Previous studies by the Congress had revealed not even the suggestion of any wrong doing in Federal employees participating in political activity voluntarily and on their own time. The Hatch Act, well-intended as it was, was enacted in a period during which the Congress was deeply concerned about the growth in the power and influence wielded by then-President Franklin Roosevelt.

But the times and conditions have changed since 1939 and H.R. 10 has taken notice of these realities. In 1939, Federal programs to provide direct aid to the poor were being expanded, while today they are being contracted. In 1939, only 32 percent of the Federal work force of 950,000 was under the merit system, in contrast to almost 70 percent of the current work force of 2.8 million. Third, the need for skilled personnel has increased to the point where the patronage system no longer flourishes as it did in the 1930's. Finally, the growing strength and influence of the Civil Service Commission has led to the institutionalization of the merit system. I find it difficult to believe that the authors of the Hatch Act ever intended that 2.8 million Federal employees would be denied the same opportunity to fully participate in the political process that is available to all other citizens of this Nation.

Prohibiting voluntary, off-duty political activity of Government employees is very serious business. It flies in the face of the guarantees of the first amendment. When we attempt to prohibit or regulate these activities, we deny free speech and free association. For this body or any other body of government to do that, there must be a compelling interest and overwhelming justification.

In modifying the Hatch Act it is important that our value system of merit, impartiality, and integrity be retained. Thus, six principles have been the centerpiece of our thinking in drafting H.R. 10.

First, that Federal employees ought to be extended all the rights and benefits of citizenship as any other person within the framework of prudence and possibility. Second, those rights and benefits ought to be made known to the recipients. Third, the administration of our laws must be impartial—free from any partisan considerations in the interpretation of those laws. Fourth, equally as important is the appearance of impartiality. The public in general must perceive the administration of laws as impartial. Fifth, the Federal Civil Service System must not be used as a patronage system to serve the political interests of any political party. And sixth, Government employees must not be subjected to undesirable pressures to participate in political activities because of fear or coercion.

H.R. 10 differentiates between voluntary and involuntary political activities. It protects the public interest while providing Federal employees with greater freedom to participate in the political process.

H.R. 10 is virtually identical to H.R. 8617, the Federal Employees' Political Activities Act of 1976, which was introduced during the 94th Congress. That bill, you may recall, passed both the House and the Senate by overwhelming majorities but was vetoed by President Ford.

In summary, the bill provides the following:

States that Federal employees are encouraged to exercise their right of voluntary political participation;

Prohibits the use of official authority, influence, or coercion with the right to vote, not to vote, or to otherwise engage in political activity;

Prohibits use of funds to influence or coercion with the right to vote, not to vote, or to otherwise engage in political activity;

Prohibits use of funds to influence votes; solicitation of political contributions by superior officials; and making political contributions in government rooms or buildings;

Prohibits political activity while on duty, in Federal buildings, or in uniform;

Prohibits the extortion of money for political purposes from employees;

Retains existing prohibitions against political activities for employees in sensitive positions within the Department of Justice, Internal Revenue Service, and Central Intelligence Agency;

Requires that employees who seek elective office do so on their own time. Employees shall, upon request, be granted accrued annual leave to seek elective office;

Authorizes the Civil Service Commission to conduct educational, enforcement and investigatory functions. Limits in-

vestigation of prohibited activities to 90 days;

Establishes an independent board whose function is to adjudicate alleged violations of law and provides for judicial review of adverse decisions;

Subjects violators of law to removal, suspension, or lesser penalties at the discretion of the board. Requires 30 days suspension without pay for any employees found guilty of violating prohibition against use of official authority or influence; and

Requires that the Civil Service Commission conduct a program for informing employees of their rights of political participation and report annually to the Congress on its implementation.

H.R. 10 adds to and strengthens those meritorious features of the Hatch Act by providing employees and the public with greater protection against any recurrence of the spoils system. It updates those parts of the Hatch Act which are no longer applicable by permitting those voluntary, off duty political activities which do not conclusively interfere with the impartial administration of effective public service.

EMERGENCY LOCATOR TRANSMITTER LEGISLATION

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. ANDERSON of California. Mr. Speaker, I am today introducing legislation to provide the Administrator of the Federal Aviation Administration increased flexibility, without compromising safety, in carrying out the law—first enacted in 1970—which required that emergency locator transmitters be installed on certain civil aircraft.

The bill requires the Administrator to issue regulations permitting the operation of civil aircraft—which are subject to the requirement—during any period for which the transmitter has been removed for inspection, repair, modification or replacement.

The Federal Aviation Regulation—FAR—requiring an operable ELT on certain civil aircraft was adopted in response to a mandate from Congress—Public Law 91-596. This regulation, which carried out the intent of Public Law 91-596, prohibits the operation of airplanes subject to the law unless there is an operable automatic type emergency locator transmitter. The mandatory date for compliance was June 30, 1974, in accordance with Public Law 93-239, which extended the original date. There was no provision made in the two statutes to permit the operation of an airplane, subject to the ELT requirement when an installed ELT becomes inoperative. The FAA, then, cannot by regulation provide for flexibility in the ELT requirement.

This lack of flexibility has caused problems. For example, following installation of some 27,000 units built by one manufacturer, a high rate of inadvertent activations was experienced. Examination revealed that internal corrosion was evident, causing the transmitter to activate indicating that an emergency existed. When a number of units were found to be defective, an Airworthiness Directive—AD was issued by FAA to require the removal and return to the manufacturer of some 27,000 units. The AD, therefore, in effect, required the grounding of some 27,000 aircraft, since there were not enough units available to replace those removed pending inspection and correction by the manufacturer. Current reports from airplane owners and ELT manufacturers indicate that time required to remove, repair, and reinstall a defective unit runs from 3 weeks to 2 months. The variation is dependent on the location of the owner and the backlog of the manufacturer. The airplanes that may be grounded have a variety of uses. Many are used for business and personal transportation, while others are used for pilot training.

Provisions should be made in the law that would allow the continued operation of the airplane while the ELT is being repaired, inspected, modified or replaced. Such provision in the law as is contained in this bill would permit the FAA to maintain an adequate level of safety and to carry out the broad intent of the statutory requirement without causing unnecessary hardship due to inflexibility existing in the present law.

A measure identical to that which I am introducing today was considered by the Aviation Subcommittee, reported, and passed by the House of Representatives on February 17, 1976. I would like to see early action on this bill in this Congress.

FARM POLICY OUTLOOK

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. FINDLEY. Mr. Speaker, a recent issue of the Quincy, Ill., Herald Whig contains an article by the newspaper's farm editor, Keith L. Wilkey, appraising the 8 years of Republican administration of farm policy and taking a look ahead. This piece gives special attention to the views of the distinguished Director of Agricultural Economics throughout the 8 years, Dr. Don Paarlberg. His departure from this post and return to Purdue University is certainly a gain for Purdue but a great loss to the Nation's capital. Here is the text of the Wilkey piece:

FARMERS PONDERING DIRECTIONS AGRICULTURE WILL TAKE IN FUTURE

(By Keith L. Wilkey)

As the present year is about to expire, perhaps an era is also.

With the harvest gathered in—better, incidentally, than many mid-summer predictions indicated it would be—and the weather cold and often snowy, restricting some outdoor activities, farmers are perhaps pondering the forthcoming directions agriculture will now take.

Most interest is in the forthcoming changing of the national administration. As an old president leaves and a new one arrives, most all the top personnel of governmental departments also will change. Men who have guided the destiny of U.S. agriculture for eight years will be leaving, to be replaced by new faces and doubtless new ideas.

Along with this personnel change could be policy change. The Agricultural Act of 1973 expires this year, so a new farm bill will be drafted and acted on by the Congress, and approved or vetoed, by the president.

Since 1968 the nation has had three secretaries of agriculture—Clifford M. Hardin, Earl L. Butz and John A. Knebel, the present executive.

There has been a new fairly stabilized level of farm prices during the last six or seven years. Looking back in the files of The Herald-Whig, we find that eight years ago this date, the following grain prices were being paid:

Wheat—$1.24 per bushel; corn—$1.09 per bushel; soybeans—$2.52 per bushel and oats—60 cents per bushel.

For livestock it was; hogs—$20.35 per hundredweight; cattle—$29 and sheep—$22 per hundredweight.

By comparison today's commodity quotations are; Wheat—$2.55 per bushel; corn—$2.39, and soybeans—$6.84. Hogs are trading at $39 per hundredweight and cattle at $40.50.

It might be significant to note that during the period the importance of oats and sheep has declined to the place that they no longer are included in local market quotations.

So, a lot of water has gone beneath the bridge.

But not everything has changed. On the market page of the 1968 paper was this news item: "The cost of living rose .4 of one per cent last month, continuing the sharpest price rise spiral since 1951."

Few times in history has agriculture undergone the dramatic change it has in recent years. The biggest change has been the escalation of the United States from a residual supplier to an aggressive merchant on world markets.

So rapidly have agricultural exports risen that today the product of one acre in every four is marketed beyond the seas. Farm exports rose from $6 billion per year to $22 billion.

The big break came in 1972 when Russia negotiated for the largest wheat transaction with the U.S. that had ever been negotiated in the history of the world.

Since then they have been a steady customer and the purchases of Japan, the European Common Market countries and other nations have increased as demands for better diets have swept the globe.

Today wheat from the U.S. is exported to 87 countries.

This has made drastic changes in domestic agriculture. Farm prices have been lifted, as the quotations indicate, and have remained stabilized, with some variations.

Agriculture is now living with these price levels as a way of life. Said Dr. Don Paalberg, USDA agricultural economist for the last eight years, recently: "The inflationary surge of the last four years has carried prices substantially, and I think, permanently, above the levels that prevailed before the economic storm struck."

But now pressure from two sources is being exerted on the present free market system. One is the pressure of increasing cost items of farm production and the other is the disconcerting news that U.S. wheat stocks are rising because of a big world-wide crop this year.

Paarlberg warns of the impending dangers. He says:

"We will not deliberately return to the old policies, but we could unintentionally get the loan levels and target prices too high, thus pricing ourselves out of world markets and again pile up surpluses . . . we might again feel imperiled to restrict output."

It might be noted as a fact of significance that neither of the 1976 presidential candidates advocated production controls. So the new president will have no debts to repudiate or to pay on this issue.

There are rumblings among some of the smaller farm organizations that target prices be set at a figure that will cover the cost of production, "plus a reasonable profit." Since costs of production vary from farm to farm and with farmer to farmer, who can say what the cost of production is? The same way with a "reasonable profit." What may be "reasonable" to one Congressman or Senator may not be to another.

So there will probably be some changes. Many seasoned agricultural observers, however, foresee no cataclysmic overturn. The people who can deliver the votes seem to indicate that they are not interested in reentering the government into agriculture . . . carrying huge surpluses, with their interest and storage costs.

CAREER EDUCATION ACT OF 1977

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. WHITEHURST. Mr. Speaker, I am introducing today the Career Education Act of 1977, which provides Federal assistance to encourage local school districts to initiate and expand career education programs. In recent years, Federal, State, and local education agencies, in conjunction with business and professional groups, have increasingly emphasized the relationship between education and work. Career education courses have been instituted to help students find work and satisfy an employer. These efforts are also designed to stimulate the student's interest in a career and to better relate classroom learning to the skills which a student will need in order to prepare successfully for a career.

In large measure, the impetus for career education programs has been the extremely high unemployment rate among young workers. Nineteen percent of our teenage population are now unemployed when more than 1 million jobs are going unfilled. This is largely because the new members of the labor force have not gained marketable skills in school. About 900,000 students currently leave school each year before earning a high school diploma. This chronically high dropout rate continues at a time when the number of unskilled jobs is constantly diminishing. Forty years ago, 30 percent of the jobs were unskilled or required a few qualifications other than a willingness to work. At the other end of the spectrum, there are college graduates unable to find employment appropriate to their education, while some technical positions requiring less than 4 years of college—but offering good pay and a promising future—remain relatively difficult to fill.

Parents, school officials, and business leaders are now demonstrating a strong desire to increase career education efforts. A recent Gallup poll revealed that 93 percent of the parents interviewed want the schools to provide greater occupational orientation in their curricula. At a national chamber of commerce meeting last year, 60 percent of those in attendance indicated that their companies could provide work experience and observation a few hours each week, and 46 percent said their organizations could engage in regular discussions with students and teachers about their firms and their work. About 5,000 of the Nation's 17,000 school districts have ongoing career education courses, and many of these have been highly successful.

In Cleveland, for example, officials have worked with business leaders to establish a career education program in five central city schools where most of the children come from welfare homes. Over 90 percent of the students participating in this program have been placed in jobs during the past several years as a result of student trips to various companies, school visits by company representatives, and industry efforts to develop jobs for graduates. In contrast, one high school in Potomac, Md., has 87 percent of its graduates going on to college. The career education program in that school focuses on managerial and professional lines of work. Students spend 10 to 20 hours a week with lawyers, dentists, architects, veterinarians, and Federal medical and scientific facilities. In this way, their initial interest in becoming a doctor or architect or some other professional is tested and in the process strengthened or weakened, to the great benefit of the students and their families.

A third large-scale program worth noting has been established in Boston. Sixteen high schools and 80 companies participate in a comprehensive program involving 3,500 students. The Boston Chamber of Commerce serves as a clearing house, scheduling student work experience among various businesses and visits by business persons to various schools.

Despite the demonstrated success of career education programs and the growing desire among educators to implement such programs, many school districts simply do not have the resources to undertake new initiatives. With school budgets tightened and new programs actually being forced to cease operation in many school systems, Federal assistance is necessary to provide the "seed money" for beginning career education efforts in many areas.

However, let me make clear my strong belief that a permanent and costly categorical grant program is neither necessary nor desirable. Career education should not be expensive, since it requires neither new buildings nor expensive equipment. The basic costs of career education are those involved in: First, in-service education of school personnel; second, salaries for local career education coordinators and necessary support personnel, and third, supplies.

Thus, the costs should not be particularly high, and they should impose the heaviest burden only during the initial stages of program implementation. Consequently, I am proposing a four-year authorization, with decreasing funding levels each year. At the end of the 4 years, State and local education agencies would be expected to assume the costs of the programs which had received the "start-up" assistance from the Federal Government.

The Office of Education would, however, continue to provide professional leadership and technical assistance to local school districts.

Local education agencies would use the grants provided in the bill in several ways. Programs would be implemented for students in grades 1 to 10 involving career awareness and exploration. For students in grades 11 to 14, programs involving actual work experience and career planning and decisionmaking would be developed, as well as job placement assistance. Guidance and counseling services for students in all grades would be provided in addition to the establishment of career resources centers in school buildings. Funding is also authorized for the employment and training of career education coordinators and the in-service training of teachers, administrators, and counselors to inform them of the importance and purpose of career education. The purchase of supplies and instructional materials is an initial cost which would be funded. Finally, in recognition of the need for career education for those in college and even those already in the work force, funding is authorized for the programs of postsecondary and adult career education.

During my service in Congress, I have become increasingly skeptical about the efficacy of Federal education programs. Too often, those programs have failed to result in meaningful achievement by our children. However, I can think of no more practical or promising use of Federal education funds than to link education directly to employment. By bringing together educators and leaders of business, industry, and the professions, school programs can be focused on preparing students for specific jobs. Students will then find their studies more meaningful, as they will better understand the relationship of their school subjects to employment. The incredibly high unemployment rate among teenagers imposes a heavy burden on our society in terms of the nearly intolerable costs of welfare and unemployment compensation, escalating crime rates, and lowered economic growth and productivity. Because these costs so far outweigh the relatively minimal costs of career education, I am convinced that a Federal program to encourage career education would be an extremely wise investment. I would, therefore, urge my colleagues to act expeditiously to enact the Career Education Act of 1977. We have no greater resource than our young people.

Rx FOR CONSUMERS

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. ROSENTHAL. Mr. Speaker, consumers scored an important victory last

year when the Supreme Court ruled States could not prohibit retail prescription drug price advertising. This is something I had been seeking legislatively since the late sixties. The pharmacy profession, however, has sternly resisted price advertising and a recent survey by a trade journal indicated that only 4 percent of pharmacists now advertise despite the Court ruling.

The purpose behind efforts to permit price advertising is to promote competition. That is why my legislation also included a section mandating price posting. Although pharmacies could not be required to buy ads, they should make price data readily available for the most commonly prescribed medicines. Experience has shown that price posting is the easiest and most effective way to accomplish this. Posting also provides an information base that can be used in advertising and help consumers compare prices. In addition, posting may prove the icebreaker that will encourage more pharmacies to compete for customers on the basis of price advertising.

American consumers are forced to pay over $1 billion annually in unnecessary prescription costs because of prohibitions on retail drug price data, overprotective patent laws, exorbitant promotional expenditures by industry, and unreasonable markups.

These are among the findings of an 18-month study conducted by my staff in New York and in Washington.

Americans are spending some $7 billion annually on prescription drugs—about $33 for each man, woman, and child—and the evidence is strong that they are being overcharged, on the average, by at least 25 percent.

One reason for this, we found is a callous disregard for the financial plight of consumers, especially the elderly, on the part of drug manufacturers, retail pharmacists, and State pharmacy boards.

The report also documents the huge disparity in the prices for identical prescriptions at different pharmacies in the same community. We surveyed over 120 pharmacies in Queens and in the Washington, D.C., area to compare retail prescription prices under a variety of conditions. The survey revealed markups generally averaged in excess of 200 percent. Pricing was grossly inconsistent, even among stores of the same chain for the same prescription.

Price advertising of drugs, extensively used on the wholesale level, is now permitted under last year's Supreme Court ruling, but it is not widely practiced, largely because of industry resistance and peer pressure. This results in a wide disparity of prices for identical drugs, from store to store and, in some instances even from customer to customer at the same store. The drug retailer is able to benefit from manufacturers' vigorous price competition but he denies that same right to the consumer.

To correct some of the glaring abuses uncovered by the study, I am introducing the following legislation:

The Prescription Drug Freshness Act, which requires the open dating of all perishable drugs, showing clearly on the dispensed product's label the date beyond which the potency is diminished or the chemical composition altered by age;

The Prescription Drug Labeling Act, which requires the labeling and advertising of prescription drugs by their established—generic—name and an end to all laws prohibiting generic substitution by pharmacists;

The Prescription Drug Price Information Act, which would require the posting of prices for the 100 most commonly prescribed drugs; and

The Prescription Drug Patent Licensing Act, which would make compulsory the licensing of new prescription drugs during the 17-year patent period.

AMENDING FEDERAL AVIATION ACT OF 1958

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. FORD of Tennessee. Mr. Speaker, I call to the attention of my colleagues a bill which I am introducing today to amend the Federal Aviation Act of 1958, as amended, to broaden the power of the Civil Aeronautics Board to grant relief by exemption in certain cases; and for other purposes.

Under the existing rules mandated by the Federal Aviation Act, the basic means of regulating and licensing air carriers to perform air transportation services is the certification procedure. Although small aircraft operators are authorized to operate without certification, operators of aircraft exceeding a maximum payload of 7,500 pounds and 30 passenger seating capacity must comply with this legislation. The certification procedure entails extensive time-consuming investigation by the Board into all matters regarding authorization, modification, suspension, and deletion of air transportation. It could require up to 10 years to effect and, at best, a minimum of 2 years. It is clear that congressional intervention is necessary in order to accommodate the growing need for overnight all-cargo air transportation service.

Hearings by the Subcommittee on Aviation of the Public Works and Transportation Committee in August and September of 1976, have revealed that the regulation and promotion of all-cargo service has been an utter failure. In addition, there is ample evidence that inappropriate regulation along with carrier neglect could have a disastrous effect on the all-cargo services industry as well as disturb the Nation's economy.

Further difficulties arise from the lack of power of the Board to grant exemptions from the normal certification requirement. Section 416(b) of the Federal Aviation Act of 1958 precludes the Board from acting to grant an exception unless it can find that the operation of the applicant air carrier are so limited in extent or affected by unusual circumstances that enforcement of the certification procedures would be an undue burden on the carrier and not in the public interest.

One case in particular which stands to have its operations thwarted by the inability of the Board to grant relief is the Federal Express Corp., an all-cargo aircarrier specializing in the swift transportation of small packages. The application from Federal Express for relief was denied by the Board in December of 1975. The request was for grant of a temporary exemption to permit the operation of five large supplementary aircraft to accommodate the growing demand that has overwhelmed the available lift capacity of the small aircraft fleet.

Although Federal Express is free to pursue the lengthy certification process, no remedy is available for the immediate alleviation of the urgent needs of the industry to fill the demand of its unduplicated package express services.

I hasten to add that this amendment is not designed to deregulate the all-cargo air transport industry. The Board would maintain complete authority to condition its temporary exemptions to ensure the safety and best interests of the American people. Again, what the bill would do is give the Board authority to grant interim relief from over-restrictive and ill-advised regulatory requirements. Most importantly, the bill would allow the Board to work expeditiously in promoting needed new all-cargo air transportation services, the development of which could be seriously impeded or destroyed with the time lag demanded in the present language of the act.

Mr. Speaker, I urge the distinguished Members of this body to join with me in supporting this effort to cut the bureaucratic red tape that is binding the hands of all-cargo air transportation industry.

THE CALAMITOUS DECLINE OF THE AMERICAN FAMILY

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. DOWNEY. Mr. Speaker, concern about the present status of the American family has been increasingly expressed in the media and academic circles. Prof. Urie Brofenbrenner of the College of Human Ecology at Cornell University has recently written an article on the subject. The essay, in my opinion, is both a masterful statement of the issue and a convincing argument for the development of a new sensibility when examining social programs that affect the family. The article, entitled "The Calamitous Decline of the American Family" appeared in the January 2 issue of the Washington Post. I had the privilege of being introduced to Dr. Brofenbrenner's thoughts while a student at Cornell. I would now like to share them with my colleagues:

[From the Washington Post, Jan. 2, 1977]

THE CALAMITOUS DECLINE OF THE AMERICAN FAMILY

Americans like to talk a lot about "progress," "improving the quality of life" and "meeting the challenges of tomorrow." All these depend on our ability to raise today's children well. The future belongs to those countries that make their primary commitment to the cultivation of the minds, charac-

ter and creative vigor of the young. Therefore, the United States should take the upbringing of its children at least as seriously as it does landing on the moon or Mars.

In the upbringing of today's children numerous factors play a role: their neighborhood or town, schools, friends, religious institutions, games, work, the television and films they watch, the papers, advertising, magazines and books they read, role models and their family. But in the recent years nearly every line of social and psychological research points to the family as the foremost influence in what the Germans call *erziehung*, the Russians *vospitanie*, the French *elevation*, the Greeks *paideia*, and we might call "character information," "cultural education" or "upbringing."

That the family is the central institution comes as no surprise to most anthropologists, ethnic patriarchs or social historians because the family is the only social institution that is present in every single village, tribe, people or nation-state we know throughout history. But that the family is the core institution in every society may startle and annoy many contemporary Americans. For most of us it is the *individual* that is the chief social unit. We speak of the individual vs. the state, the individual achievement, support for disadvantaged individuals, the rights of individuals, finding ourselves as individuals. It's always the individual, with "the government" a weak second. The family is not currently a social unit we value or support.

This fact is reflected in the scholarly research of the United States. Until recently, there has been only sporadic research on the history, significance or changes in the family. And it is reflected in our national, local and business policies, where a father, mother, son and daughter are usually treated as four individuals rather than as a family.

Thus, we have the following situation. At a time when our nation more than ever needs a public-spirited and enlightened young, and when the best new research is pointing to the critical role of the family, our nation pays little attention to the family as a key social unit, and there are mounting indications that the American family as we know it is falling apart.

I realize that at several times in the past century observers have wailed about the decline of the family. Historian Charles Thwing, for example, wrote in his 1913 book on the family: "The individual has come to be regarded as the crown and center of social and legal order. The family, as an institution of prime importance, has passed away." But what has happened in the United States since the 1950s really adds up to a rapid and radical change in American family life. And the consequences for the young, and for society as a whole, are approaching the calamitous. Let me explain what I mean.

There was a kind of family stability in the late 1940s and early 1950s. The extended family still existed in places; one out of 10 families had another adult relative living under its roof. After the shakeout year of 1946, the divorce rate was quite low, especially among families with young children. Only one mother in four was working outside the home. And fewer than 4 per cent of all children born were illegitimate. Parents fought for a better education for their children, kicking off a school and college-building boom. Television, which became commercially available to households in 1948, was almost unknown. Mass magazines wrote of "togetherness" and radio soap operas featured families. Hollywood made films about young Andy Hardy, Shirley Temple and young Dorothy from Kansas, who went to see the Wizard of Oz but longed to return to her family.

In the past 25 years, however, the change has been dramatic. The dimensions of this change can be illustrated by some data that I and others have gathered about two categories: the number of parents and other adult relatives in the home and the amount of attention that parents devote to genuine relationships with their children.

As for adults in the home, there has been a further decline in the number of grandmothers, uncles or unmarried sisters in the home. From roughly 10 per cent of all homes having a third or fourth adult in 1950, the percentage has dropped to half that. Compared to 50 years ago, the change is even more considerable. For example, in the 1920s half the households in Massachusetts included at least one adult besides the parents; today the figure is 4 per cent.

That leaves Mom and Dad. But Mom is increasingly not found at home either because she's out working, as well as attending meetings or shopping several nights a week. In 1975, for the first time in American history, a majority of the nation's mothers with school-age children—ages 6 to 17—held jobs outside the home. In fact, women with school-age children show the highest labor force participation rate, 54 per cent, compared with 28 per cent in 1950.

For preschool children the change is more startling. In 1975, 39 per cent of mothers of children under 6 were working, more than three times as many as in 1948. As for mothers with children under 3, nearly one in three is working—an amazing jump from 1950.

Of course, the increase of women in the work force is one of the most significant social and economic facts of our time. While the number of working husbands has risen from 29.8 million to 37.8 million between 1947 and 1975, or 27 per cent, the number of working wives has shot up from 6.5 million to 19.8 million, or 205 per cent—nearly 10 times as much. It began before the so-called women's liberation movement, and has unquestionably brought many new opportunities and greater satisfaction to numerous wives and mothers. But it has also had a major impact on American child-rearing.

ONE-PARENT FAMILIES

The parents not only have been leaving the home to work; they have increasingly been disappearing. The number of children under 18 living with only one of their parents—now one out of six—has almost doubled in the past 25 years. And the change has been most rapid for children under 6. In 1974, 13 per cent of all infants under 3—nearly 1 million babies—lived with only one parent.

Three of the main contributors to the rise of one-parent homes have been divorces, illegimate births and desertions.

The divorce rate has risen appreciably in the past 25 years, but especially since the early 1960s. Last year, for the first time in U.S. history, the number of divorces exceeded 1 million—twice the number of a decade earlier and almost three times that of 1950. Nearly 40 per cent of all marriages now end in divorce; three out of 10 women separate from their husbands before the age of 30. The number of children from divorced families is twice that of a decade ago.

And a growing number of divorces are now accompanied by a new phenomenon; the unwillingness of *either* parent to take custody of the children.

Next to divorce, illegitimate births are the fastest growing contributor to one-parent homes. In the past 25 years the rate of illegitimacy has more than doubled, from 4 per 100 live births to 10 per 100 live births. And in addition to the more than 350,000 babies born out of wedlock last year, another 65,000 pregnancies were halted by abortions to teenagers alone. Thus, a growing number of children are being born to unmarried women, 80 percent of them under 25 years old.

As for desertions, the male has long been a frequent deserter of his wife and children—male desertion accounted for 49 per cent of divorces in the United States in 1900—and males continue to flee. But wives have begun deserting in far greater numbers, too. Police department reports are suddenly full of notices of missing mothers, and detective bureaus indicate a quantum leap in the number of runaway wives.

Single-parenthood is especially common among the poor, although it is becoming more frequent among the lower and upper middle classes. And it is particularly prevalent among black Americans, many of whom are poor. In 1974 only 56 per cent of all black children under 18 lived with both parents, down from 71 per cent in 1965. (Recent research by Herbert Gutmann and others has found that black families have been more stable until recently than many believed.) Specifically, between 1960 and 1970 the percentage of single-parent families among blacks increased at a rate five times that for whites—a baffling fact since it was a period of considerable economic and education gains for blacks. Today, the proportion of single-parent families among blacks is three times that of whites.

Two things are noteworthy, however. White families are being fragmented progressively as well as black families. And middle-class families are now approaching the social disintegration of lower-class families a decade ago.

TIME WITH CHILDREN

The other broad category of change is the amount of attention that one or both parents give to effectionate child-raising when the children and adults are not separated by school or work. Here too there has been a sharp decline.

With demands of a job that sometimes claim the evening hours and weekends, with increasing time spent commuting and caring for automobiles, with entertaining and social visits as well as meetings and community obligations, parents spend less and less time working, playing, reading and talking with their children. More and more children come home to an empty house or apartment.

In some homes a child spends more evenings with a passive, uninterested babysitter than with a participating parent. One study of middle-class fathers of 1-year-old infants found that they spent an average of only 20 minutes a day with their babies. When a recording microphone was attached to each infant's shirt, the data indicated that in terms of true, intimate interaction between father and child the average daily time together was 38 seconds. One survey I did of child rearing practices in the United States over the past 25 years reveals a decrease in all spheres of interaction between parents and their children. (The same trend is appearing in Europe according to cross-cultural studies.)

An increasing number of parents enroll their children in day-care centers—enrollment doubled between 1965 and 1975 alone—and then preschools. And they sit them in front of television. It is estimated by experts that preschool children—under 6—spend an average 50 hours a week watching TV. By the time the average American youngster graduates from high school he has spent more hours watching the television screen than he has spent in school, or in any other activity except sleeping.

Gone increasingly are family picnics, long Sunday dinners, children and parents working together fixing the house, preparing meals, hiking in the woods, singing and dancing with other families or friends. And we are paying a price for this growing inattention, even hostility, to our children.

Accidents among children appear to be increasing. Accidents are now the chief cause of death for persons under 18, and about 15 million days of school are lost annually because of accidental injuries to youngsters.

Child abuse by parents has become a na-

tional problem. A 1970 survey projected that at least 2 million battered-child cases a year may be found annually now; nearly 2,000 infants and children a year are being killed by their supposed caretakers. A more gruesome trend shows that the killing of infants under 1 year of age has been increasing since 1957. The infanticide rate has risen from 3.1 per 100,000 in 1957 to 4.7 per 100,000 in 1970. Sadly, 90 per cent of these incidents take place right in the home; the most severe injuries occur in single-parent homes, and many brutalities are inflicted by the frazzled mother herself.

SOCIETY'S NEGLECT

It is not only the parents of children who are neglecting them. Society does so, too. As the 1970 White House Conference on Children reported:

"A host of factors conspire to isolate children from the rest of society. The fragmentation of the extended family, the separation of residential and business areas, the disappearance of neighborhoods, zoning ordinances, occupational mobility, child labor laws, the abolishment of the apprentice system, consolidated schools, television, separate patterns of social life for different age groups, the working mother, the delegation of child care to specialists—all these manifestations of progress operate to decrease opportunity and incentive for meaningful contact between children and persons older or younger than themselves."

James Coleman's fine 1974 study, "Youth: Transition to Adulthood," documented the same new conditions.

Nor should all the blame fall on the heads of the parents themselves. In many ways, the crux of the problem is not the battered child but the battered parent. To quote from the same 1970 Report to the President:

"In today's world parents find themselves at the mercy of a society which imposes pressures and priorities that allow neither time nor place for meaningful activities and relations between children and adults, which downgrade the role of parents and the functions of parenthood and which prevent the parent from doing things he wants to do as a guide, friend and companion to his children. . . . The frustrations are greatest for the family of poverty where the capacity for human response is crippled by hunger, cold, filth, sickness and despair."

What has replaced the parents, relatives, neighbors and other caring adults? Three things primarily: television, peer groups (same-age cliques or gangs) and loneliness.

A recent study found that at every age level, children today show a greater dependency on their age-mates then they did 10 years ago. And, increasing numbers of lonely "latchkey children" are growing up with almost no care at all, often running away—at the rate of more than 1 million a year now—to join colonies of other solitary juveniles and to experiment with drugs, crime, sex, religious cults and the sheer restless busy-ness of Kerouac-like movement over the American landscape. These "latchkey children" contribute far out of proportion to the ranks of young persons who have reading problems, who are dropouts, drug users and juvenile delinquents.

What is not often recognized is that the social fabric which so many feel is tearing around them is to a large extent a result of the deteriorating family life and the conditions that undermine declining care for our children. Look at what has been happening to America's youth.

The first consequence is that many of them die at birth or soon thereafter. America, the richest, most advanced scientific and medical country in the world, stands 17th among nations in combating infant mortality. The offspring of young, black mothers face an especially frightful prospect: Babies of black mothers are today still dying at the rate at which white babies died in the 1940s.

Crime in America is increasingly a youth problem. Crimes by children—those under 18—have been growing at a higher rate than the juvenile population. According to FBI data, arrests of children for serious crimes—murder, assault, robbery and rape—have jumped about 200 per cent in the past 15 years, and arrests for lesser crimes—larceny, burglary, auto theft, forgery—have doubled. Arrests for juvenile prostitution have increased 286 per cent, those for trafficking and use of drugs 4,600 per cent.

This increase of crime by children is three times that of adults over the same period. In 1973, 1.7 million children were arrested for criminal actions—one-fourth of the total arrests in that year. At the present rate, one of every nine teenagers can be expected to appear in court before 18. And since many criminal offenders tend to be repeaters, the depressing prospect is for an expanded adult criminal population in the years ahead. And crime is already costing Americans an estimated $80 billion a year.

School vandalism has become in some areas as American as apple pie, soft drinks and aspirin. A good deal of the blame put on teachers for failing to instruct our youth adequately belongs with parents and their increasingly resentful and violent children, and on the rest of us for failing to give both our teachers and our families adequate support, especially of the non-monetary kind.

The suicide rate for young people 15 to 19 has more than tripled in less than 20 years, leaping from 2.3 per 100,000 in 1956 to 7.1 in 1974; and in recent years there has been an increase in suicides among younger children, some as young as 10. Suicide is now the third leading cause of death among young American whites; the rate for young blacks is lower but increasing faster. For young American black males, homicide is now the leading cause of death. Death from violence in some form—suicide, homicide, auto and other accidents—now accounts for two out of three deaths of those between 5 and 18. The self-destructiveness of our children has become a truly serious problem.

ACADEMIC DECLINE

Well-known by now is the decline in academic capability among the nation's young during the past 15 years or so. According to the College Entrance Examination Board, average scores on the scholastic aptitude tests have dropped in the past 12 years from 44 points (from 478 to 434) in the verbal skills and 30 points (from 502 to 472) in math, on a scale of 200 to 800. Teachers and professors have in recent years become alarmed at what they experience as their students' growing inability to write decently, refusal to be rigorous in their work and inability to use common sense reasoning about everyday adult affairs of life.

In a 1976 Gallup Poll conducted for the Phi Delta Kappa, a professional education journal, two-thirds of the Americans sampled blamed parents for these test score declines because they did not provide enough attention, help and supervision for their children. And an impressive series of investigations, most notably by James Coleman and Christopher Jencks, have demonstrated that it is not so much the schools that determine academic achievement or character as a student's family life and the conditions undergirding a strong life within the family: employment, health services, work schedules, child care, neighbors who care and the like.

In addition, the alienation, antisocial behavior and disorientation of the young have made an ever larger minority of them unemployable, without training or self-discipline. Half the unemployment in our country today is among young persons under 25.

What are we as a nation to do?

I conducted a study recently for the National Academy of Sciences that tried to determine how successful all of America's early intervention programs such as Head Start really were. The results, sad to admit, were disappointing—except in places or in programs that involved the *parents* in the effort.

It's transparent now that the family is a critically important institution in shaping our children's minds, values and behavior. But it's equally clear that the American family is disintegrating. That's what I'd call a collision course for our society. It must be reversed. But how?

There is no space here for concrete suggestions, but I would like to offer a few thoughts. I think the main causes of the change in family life are three in number. So perhaps our remedies need to take three paths.

One cause is our attitudes. America has temporarily lost its balance. Today what matters most for many people is their own growth and happiness, their own self-fulfillment, doing their own thing, finding themselves. We seem to be sunk in individualism. We so much want to "make it" for ourselves that we have almost stopped being a society that cares for others. We seem to be hesitant about making a commitment to anyone or anyhing, including our own flesh and blood.

To be sure, individualism has helped bring about extraordinary solo efforts by many Americans—in art, science, business and other areas. But we have entered a period of history when we need to put other neglected values on the scale, too.

We have many other traditions in the American past: our social welfare schemes, our great public education systems, our way of helping our neighbors—or foreign peoples—in times of catastrophe, our volunteer organizations that Tocqueville found so outstanding, our scholarships and other help for the poor but able, our quickness in extending friendship and care to strangers. Like individualism, they too are American traits, and we should draw upon them also. It's a matter of more balanced attitudes.

The healthy growth of each child requires a commitment of love, care and attention from someone. Neighbors, day-care leaders and school teachers can help, but most of the enduring, irrational involvement and intimate activities must come from parents. No one else can ever care so much or so continually. We need to get out of ourselves and into the lives of our children more than we do.

A second cause is our socio-technical structure—the network of work schemes, social dances, travel patterns, telephones and other social patterns and apparatus that conduce us to separate and fragment rather than come together. We need to reshape parts of this socio-technical structure to meet the new needs of today's parents and children.

MORE PRAGMATISM NEEDED

As a nation we are superb at scientific technology. In this area we are pragmatic. We try new things to see if they work. But when it comes to social technology, we are stuffy, rigid, pessimistic. We often refuse to try little experiments in human affairs to see if our society can be more harmonious and our children happier. Little things, like more part-time work schemes to allow mothers, students and fathers to have more flexible schedules for greater human contact, seem so difficult.

Our welfare system is a disaster, actively abetting the dissolution of our families. It's chaotic and was designed by no one. Do we redesign it? No, we prefer to continue to muddle through, even though the cost in human lives is staggering.

I would suggest that the United States can no longer afford to be so methodical, precise, pragmatic and research-oriented solely in its technological advances, and con-

tinue to be so sloppy, neglectful, cautious and fatalistic in its social programs.

Last, our national rules and policy are a cause of family trouble. The United States is now the only industrialized nation that does not insure health care or a minimum income for every family with young children, and the only one that has not yet established a program of child care services for working mothers.

In the controversial gun control legislation we support the rights of each individual to bear arms but not the rights of our people—or our police—against being shot to death more easily each year.

We care more fervently about keeping our wilderness wild, our favorite fishing holes intact and football than we do about the condition of our families or the gradually spreading cancer among our children.

In our taxes, our plane fares or our government welfare policies we pay close attention to each individual's privileges and pay little attention to family rates or policies that would help build more cohesive families. We are not only "far out" in some of our individual behavior, among the advanced nations of the world the United States is "far out" in its national permissiveness toward individuals and its national neglect of the upbringing of its children.

Obviously, we cannot go back to the family life of an earlier age—nor should be wish to do so, given some of the oldtime family's inequalities and authoritarian practices. But we can design and put into practice new attitudes and structures appropriate for our time.

Among all the talk about returning to decency and fundamental values after Vietnam and Watergate, none ought to be more dear than that of a renewed concentration on the proper care, instruction, guidance and values of America's young people and the families in which they are raised.

The bodies, minds and emotional health of our children demand it. And the ability of our country to cope with its awesome future demands it.

FORTY-THREE INTRODUCE BILL TO END MANDATORY RETIREMENT

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. FINDLEY. Mr. Speaker, we all welcome those occasions when both principle and practicality come together. A law to prevent Americans from being forced to retire merely because they reach a particular age, usually 65, would be just such an occasion. It would end an ugly form of age discrimination, one of the remaining types of discrimination in our society yet to be eliminated.

Each year hundreds of thousands of Americans who want to continue working are forced to give up lifelong occupations simply because they reach the arbitrary age of 65.

Many people are well able to contribute after age 65 and many do their best work in later years. Benjamin Franklin helped draft the Declaration of Independence at age 70 and was chosen a member of the Constitutional Convention at age 81. Dr. Albert Schweitzer won the Nobel Peace Prize at 68, Frank Lloyd Wright designed New York's Guggenheim Museum at 76, and Winston Churchill was reelected British Prime Minister at 77. Carl Sandburg wrote some of his most beautiful poetry in his eighties, and Grandma Moses was still painting when she was over 100.

At a time when our Nation is learning to conserve its limited resources and striving to achieve full employment without inflation, we must stop squandering this most precious resource of all—the skill and experience of senior citizens. Eliminating the injustice of mandatory retirement would strengthen the social security and private pension systems by letting workers pay in beyond age 65 instead of drawing benefits, stimulate economic activity as those working past age 65 continue to use their full purchasing power, and add an estimated $10 billion to the gross national product from skilled workers who will stay in the economy.

Stopping forced retirement because of age has the support of 86 percent of the American people, according to a Harris survey. Both justice and common sense demand that we take this important step. That is why, on the first day of the new Congress, I have introduced H.R. 65, a bill to end mandatory retirement.

In the last session of Congress an identical measure won the support of 99 cosponsors and received a hearing before the Committee on Education and Labor's Subcommittee on Equal Opportunities, chaired by cosponsor AUGUSTUS F. HAWKINS, whose foresighted leadership to end mandatory retirement makes quick achievement of the goal more likely. This year, in addition to Chairman HAWKINS, other members of the Committee on Education and Labor have also agreed to cosponsor the bill, including the ranking Republican, ALBERT H. QUIE, of Minnesota; RONALD A. SARASIN, of Connecticut; SHIRLEY CHISHOLM, of New York; JAMES M. JEFFORDS, of Vermont; MARIO BIAGGI, of New York; WILLIAM F. GOODLING, of Pennsylvania; MICHAEL T. BLOUIN, of Iowa; and LEO C. ZEFERETTI, of New York. Much credit should also go to BENJAMIN S. ROSENTHAL of New York, whose tireless work on behalf of ending age discrimination in retirement helped bring the measure to where it is today.

A complete list of cosponsors follows:

LIST OF COSPONSORS

Augustus F. Hawkins (Calif.), Albert H. Quie (Minn.), Ronald A. Sarasin (Conn.), Shirley Chisholm (N.Y.), James M. Jeffords (Vt.), Mario Biaggi (N.Y.), William F. Goodling (Pa.), Michael T. Blouin (Iowa), Leo C. Zeferetti (N.Y.), Benjamin S. Rosenthal (N.Y.), James C. Corman (Calif.), Hamilton Fish, Jr. (N.Y.), Daniel J. Flood (Pa.), Mark W. Hannaford (Calif.), Michael Harrington (Mass.), Martha Keys (Kans.), Thomas N. Kindness (Ohio), Edward I. Koch (N.Y.).

Norman F. Lent (N.Y.), Robert McClory (Ill.), James G. Martin (N.C.), Joe Moakley (Mass.), John P. Murtha (Pa.), Stephen L. Neal (N.C.), Robert A. Roe (N.J.), Keith G. Sebelius (Kans.), Henry A. Waxman (Calif.), Timothy E. Wirth (Colo.), William A. Steiger (Wis.), Claude Pepper (Fla.), Frank Annunzio (Ill.), Les AuCoin (Wis.), Jonathan B. Bingham (N.Y.), George E. Brown, Jr. (Calif.), James A. Burke (Mass.), William S. Cohen (Maine), Edward J. Derwinski (Ill.), Robert F. Drinan (Mass.), Glenn English (Okla.), Joseph L. Fisher (Va.), Harold E. Ford (Tenn.), and Charles E. Grassley (Iowa).

REDUCED AIR FARES FOR THE ELDERLY AND THE HANDICAPPED

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. ANDERSON of California. Mr. Speaker, today, I am introducing legislation designed to increase the availability of air service for the elderly and handicapped, and to improve air service for passengers using intrastate air carriers in California.

The bill would permit CAB to approve reduced air fares on a standby basis for persons 60 years of age or older and for the handicapped, and would require CAB to study the economic feasibility of reduced fares for youth.

These provisions would make air transportation more widely available to the public. Every citizen needs the mobility which air transportation affords. Unfortunately, however, inflation has placed air transportation well beyond the reach of many consumers. The problem is particularly severe for the elderly and the handicapped. Members of these groups tend to have below-average incomes and, in many cases they are particularly dependent upon public transportation because they are unable to drive private automobiles.

The fares now charged for air transportation tend to exclude the elderly and the handicapped. For example, a survey by United Airlines showed that only 5 percent of its passengers were 65 years of age or over, while persons in this age bracket make up 10 percent of the general population. This disparity is largely attributable to the low-income levels of many of the elderly. For example, in 1973 the median income for elderly households in 1973 was under $4,600, compared to the national average of $10,500. Similar problems are faced by the handicapped.

An excellent report on the transportation needs of our senior citizens has been issued by the Subcommittee on Federal, State, and Community Services of the Select Committee on Aging, under the chairmanship of Congressman SPARK M. MATSUNAGA. The report points out that a number of Federal programs, such as the urban mass transportation program, include special provisions designed to make transportation more widely available to the elderly. In air transportation there are no programs of this nature, and under existing law the Civil Aeronautics Board is limited in its ability to authorize reduced fare transportation for deserving groups. As a consequence, there are no reduced fare programs currently in effect for the elderly.

Chairman MATSUNAGA's report also suggests that well designed reduced fare programs for the elderly have been highly successful. For example:

> Inter-island carriers in Hawaii . . . instituted a half-fare for persons aged 65 and over in 1967, which remained in effect until 1974. During that time one of the carriers, Hawaiian Airlines, reported a 340-percent increase in the number of senior citizens taking advantage of the fare reduction.

Moreover, since the seniors were accommodated on a space-available basis, the half-fares charged more than covered the extra costs of carrying them, and returned substantial increased revenues to the carriers.

The report recommends that Congress "reaffirm the power of the Civil Aeronautics Board to permit discount standby air fares for the elderly."

This bill is designed to meet these needs, and to insure that similar reduced fare standby service will be available for the handicapped.

This proposal should also result in improved air service for those members of the traveling public who use intrastate air carriers in California. Under present law intrastate carriers are not permitted to offer through ticketing and baggage service for passengers who connect with interstate carriers. For example, Pacific Southwest Airlines, an intrastate air carrier, is the only carrier now serving Long Beach. If a passenger wishes to travel on PSA to San Francisco and then connect to Western Airlines to travel to Seattle, the passenger must purchase separate tickets from PSA and Western, and he must transfer his own baggage at San Francisco.

This bill would permit PSA and Western to enter into an agreement which would permit the Long Beach-Seattle passenger to purchase a single ticket at a joint fare. The agreement could also provide that the two airlines would provide baggage transfer service.

Mr. Speaker, both of these measures passed the House last year, but did not reach the White House. This is important consumer legislation and I am hopeful that we can move quickly on this proposal early in the 95th Congress.

INTRODUCTORY REMARKS ON THE YOUTH CAMP SAFETY ACT

HON. RONALD A. SARASIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. SARASIN. Mr. Speaker, for too many years the Congress of the United States has considered the very real problem of assuring the health and safety of children attending the thousands of youth camps throughout the country.

We have held hours and hours of public hearings, we have commissioned studies by outside experts, we have inspected camping facilities and we have heard from parents who have suffered terrible tragedies as a result of the lack of proper standards for the facilities and the individuals to which we entrust our children.

Evidence we have gathered at previous hearings indicates that over 250,000 children will be injured at summer camp this season and that a majority of these injuries could be prevented by better supervision or higher standards of camp maintenance and administration. Some young lives will probably be lost.

We can no longer allow the safety of these children to be jeopardized by congressional inaction or political considerations. This House acted responsibly in the 94th Congress and adopted sound, effective standards for youth camp safety and a program to encourage the States themselves to implement these standards.

It is tragic indeed that our colleagues in the Senate did not see fit to act on a bill so that those attending camp this summer, and their parents, could have the security of knowing that at least reasonable health and safety standards are in effect at those camps.

Today I am reintroducing, with slight modification, that House-passed bill. It is my fervent hope that we can build on our years of study and act quickly to pass this legislation and to urge the other Chamber to do the same.

I want to make special mention of the individual who has been the most effective and eloquent spokesman for youth camp safety throughout the Nation. Mitchell Kurman, a resident of Westport, Conn., has virtually dedicated his life to this cause since the tragic death of his son in a camp canoeing accident in 1965. For those Members who are new to this Chamber and have not been exposed to the arguments on the need for this legislation, I urge you to listen to Mitch Kurman. I know he will be more than ready to talk to you.

The bill that I am introducing today is not some punitive or overly protective measure which would interfere with the adventure and character building of camping. In fact, it has the backing of the American Camping Association, the Boy Scouts, the Girl Scouts, the YMCA, virtually all major camping organizations, as well as the National Safety Council.

This bill would be welcomed by responsible camp operators, by State governments concerned with the safety of young people within their boundaries, and most of all by America's parents, who would have increased assurance that the summer camps to which they send their children will be safe and healthy places.

FOOD STAMP FIASCO

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. MICHEL. Mr. Speaker, this morning's Washington Post—January 4, 1977—carried a front-page story, "City Food Stamp Fiasco Causes $800,000 Debt." The story stated in part:

The District government may have to repay the federal treasury more than $800,000 that is missing from or owed by 10 city-licensed sellers of food stamps, according to U.S. Agriculture Department investigators.

Among the unaccounted for food stamp funds is nearly $300,000 missing from two now defunct establishments that sold food stamps—a furniture store and a credit union—that are now being investigated by a federal grand jury here.

The District also will have to reimburse the federal government for what it is unable to recover of $250,000 that two clerics of St. Phillip's Pentecostal Church were convicted in September of swindling from the food stamps they sold.

Mr. Speaker, as a sponsor of a bill to reform the food stamp program I find this story appalling—but not terribly surprising. The sad fact of the matter is that this program, which has the noble intention of helping those in need, is a target for ripoff artists, con-men, fakers, and fast-buck chiselers whose abuse of the system has created a situation in which reform is not only desirable, but absolutely necessary.

I find it ironic, but instructive, that on the first day of the new Congress this story should appear. In a Congress that thinks only in tens of billions, a "mere" $800,000 probably does not seem to be very much to worry about. Well, I worry about it. I worry about it, because of what it is—a misuse of taxpayers money—and what it stands for: A nationwide failure of the food stamp system as it is currently operating. Perhaps more important, it is a reminder of what can happen even to the best of intentions, when those intentions are not translated into workable legislation that achieves desirable ends while at the same time operating with honesty and efficiency.

We do not need more laws—we need better laws. That should be the idea that dominates this Congress and it is an idea that demands some real reforms—not just papering over—in the food stamp program. Toward that end I plan to reintroduce legislation that will help those Americans who really need food stamps while at the same time putting an end to the rampant abuse of the program.

In view of the facts outlined in this article, I would hope that the new Secretary of Agriculture-designate would reconsider his apparent decision to rescind the food stamp program proposed by President Ford.

I insert the article, written by Doug Watson, in the RECORD at this point:

CITY FOOD STAMP FIASCO CAUSES $800,000 DEBT

(By Douglas Watson)

The District government may have to repay the federal treasury more than $800,000 that is missing from or owed by 10 city-licensed sellers of food stamps, according to U.S. Agriculture Department investigators.

Among the unaccounted-for food stamp funds is nearly $300,000 missing from two now defunct establishments that sold food stamps—a furniture store and a credit union—that are now being investigated by a federal grand jury here.

The District also will have to reimburse the federal government for what it is unable to recover of $250,000 that two clerics of St. Phillip's Pentecostal Church were convicted in September of swindling from the food stamps they sold.

In addition, Agriculture Department auditors report that at least $294,000 is owed the government by seven other present and former food stamp sellers—including six neighborhood credit unions—that are not facing criminal action.

An Agriculture Department audit has found evidence that the D.C. Department of Human Resources, which has responsibility for overseeing the food stamp program here, has disregarded federal regulations in choosing these food stamp sellers.

As a result, the federal government could stop paying all or part of the $490,000 it now gives the city as its 50 percent annual share of the administrative cost of the District food stamp program, an Agriculture Department official said.

Most of the abuses and irregularities among District food stamp vendors were uncovered after a nationwide investigation was undertaken last winter by the Agriculture Department of 6,700 food stamp outlets—including 12 in the District—suspected of not returning food stamp receipts on time.

"The situation in the District was among the most serious disclosed," another Agriculture Department official said last week.

Bertrell L. Hallum, administrator of DHR's Payments Assistance Administration that is responsible for overseeing the food stamp program in the District, declined to comment on the findings of the federal auditors except to say, "I think we are operating under general compliance" with federal regulations.

The federal investigation of the food stamp program here was not aimed at the more than 40,000 food stamp purchasers in the District who pay a fixed amount each month and receive bonus coupons, depending on their net income and number of dependents, that supplement their food budgets.

Instead, the auditing by the Agriculture Department focused on most of the credit unions and other nonbanks here that sell food stamps to qualified purchasers. Of the 54 sellers in the city, 39 are banks, three are District government offices and most of the rest are credit unions.

Only two of these establishments currently are under investigation by the federal grand jury, according to investigators. One is the former Xavier furniture store, previously of 1401 North Capitol St., from which $203,724 allegedly is missing.

The other is the defunct D. C. Business Federal Credit Union, where federal auditors found $88,451 missing. Charted in 1969, this credit union was placed in involuntary liquidation in 1975 by the National Credit Union Administration, the federal oversight agency, after fund shortages and mismanagement were uncovered. It had an office on South Capitol Street.

According to Bonnie O'Neil, assistant to the director of the Agriculture Department's Food and Nutrition Service, which oversees the food stamp program at the federal level, the following present and former food stamp sellers in the District are being billed for the following sums:

The Change Federal Credit Union, of 1413 Park Rd. NW, which owes $127,584 and was terminated as a food stamp seller in 1974.

Southwest Community Federal Credit Union, of 401 M St. SW., which owes $106,000.

Armstrong Neighborhood Federal Credit Union, of 1502 North Capitol St. NW, which owes $20,844.

Fides Community Federal Credit Union, of 722 7th St. NW, which owes $23,085.

Far East Federal Credit Union, of 622 Division Ave. NE, which owes $16,290.

American Federation of Community Credit Union, of 2436½ 18th St. NW., which owes an unspecified amount.

According to the Agriculture Department, most of the at least $294,000 in owed funds in which no criminal charges are pending involves "lapping," the term used to describe the practice of many food stamp sellers of deliberately running late in repaying government funds, thereby building up large sums held without paying interest to the government.

Since the Agriculture Department probe, one District food stamp seller, Anacostia Southeast Federal Credit Union, of 1918 Martin Luther King Ave. SE, has reimbursed the federal government $129,601, Ms. O'Neil said.

Two other food stamp sellers who were audited, Friendship House Community Federal Credit Union and Hospitality Community Federal Credit Union, were found to have all funds accounted for, she said.

In September Bishop Lucius S. Cartwright, 33, and the Rev. Albert R. Hamrick, 40, of St. Phillip's Pentecostal Church, at Wheeler Road and Barnaby Street SE, were each sentenced to six months in prison and fined a total of $7,000 for stealing more than $250,000 in food stamp funds they had collected from stamp purchasers.

According to an interim report of a current audit of the District food stamp program by Agriculture Department investigators, licenses to stamp sellers "were not awarded in accordance with prescribed Food and Nutrition Service procedures. The resulting increased costs to the federal government may be disallowed."

The current audit was asked to look at how the D.C. Department of Human Resources was selecting food stamp sellers after complaints were received from Stanley S. Walters, president of Financial Transactions Corp., a check-cashing business that was first authorized and then halted by the city from selling food stamps.

Financial Transactions Corp. has filed a suit asking $168,018 in damages from the city, claimed it was discriminated against when the District decided to grant food stamp sales to many credit unions that were charging $1 per transaction while it was ready to do the work for 75 cents a transaction.

Walters said in an interview that the District's decision to pay 25 cents more for the same service has cost the city tens of thousands of dollars. Hallum declined to comment on the Financial Transactions Corp. suit.

Though a $1 fee to food stamp sellers for each transaction is said by an Agriculture Department official to be close to the average charged around the nation, it is less than is charged in a number of comparable cities.

In Chicago the food stamp seller's fee is 85 cents a transaction. In New York City, it's 80 cents. In Baltimore it averages 75 cents. In Philadelphia, it is only 40 to 45 cents, less than half the cost here.

THE ELDERLY AND HANDICAPPED AMERICANS TRANSPORTATION AND SERVICES ACT

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. ROSENTHAL. Mr. Speaker, today I am introducing legislation to improve the lives of two very important but neglected groups in our society: The elderly and the handicapped.

Several years ago I introduced legislation to permit the elderly and handicapped to travel free or at reduced rates on the Nation's commercial air, rail and bus lines. That bill preceded a similar measure (H.R. 10526) which passed in the House in the last few days of the 94th Congress, but unfortunately, never came to the Senate floor.

The House has already indicated its support for reduced air fares for the elderly and handicapped. It is in this spirit that I urge the adoption of a more far-reaching bill which would not only reduce air fares for this group, but would also encourage lower fares on rail, bus and mass transit systems, and promote special services and facilities to eliminate travel barriers. My bill also anticipates a long-range commitment to mobility for all Americans by planning, research, and demonstration proposals to assist the elderly and handicapped.

At a conference on aging I held in my Queens District, the overwhelming majority of participants pinpointed transportation as one of their most serious problems. As a result of economic and physical barriers, seniors are denied the mobility that can take them across town as well as across the country.

Senior citizens, particularly those who are living on fixed or limited incomes, have a difficult time meeting daily expenses, not to mention the luxury of air travel. As more than 30 percent of the Nation's elderly are poor or near poor, it is no surprise that such a small percentage of older persons travel by air. Even for the middle-income person, the cost of a plane ticket can be a financial burden.

We live in a society which places great emphasis on mobility, and seniors are consistently barred from taking part in a full and active life. This can be a time of extreme alienation and the joy of seeing family and loved ones can mitigate the loneliness that stems from growing old in our society. A woman once wrote to me:

> This bill if passed would do much to enhance the lives of the elderly who are very, very lonely. They could visit their loved ones and also see a little more than the street or town where they live . . . Loneliness is the greatest ill of the aged. They need to have something to look forward to. A trip occasionally would bring great joy to many.

Reducing these fares would cost the carriers nothing and would, in fact, increase ridership significantly. An average of 45 percent of seats on major airlines go unoccupied. Discount fares for the elderly and handicapped would bring in customers who previously stayed home. And studies have shown definitively that these two groups of people utilize all forms of transportation in greater numbers.

Mr. Speaker, what we are talking about is the freedom of mobility. All Americans deserve the opportunity to move from place to place. For pleasure or for business, we must encourage the development of transportation systems responsive to the needs of all individuals. At least 35 million Americans suffer some form of physical handicap; and over 20 million persons in this country are over 65. These people deserve the right to remain active and keep in touch with society.

Under the recently passed Urban Mass Transit Act, communities are encouraged to charge discount fares for elderly and handicapped people during nonpeak hours. Since the new plan costs the transit system virtually nothing, there is no reason why the special rates cannot be extended round-the-clock. Restricting discount fares to only off-peak hours can prevent many seniors from enjoying the benefits of a normal life. It

may mean having to wait weeks longer for a doctor's appointment, because of the abbreviated day imposed by transit fare restrictions. Or it may mean not being able to participate in the activities of community centers, something vital to a senior's life.

Since many seniors and handicapped persons, particularly those in urban areas, find it difficult to maintain a car, they are forced to rely on public transportation. Many seniors complain, however, that mass transit facilities are not designed for the slow moving or the handicapped. Elevators in subway stations, ramps instead of steps, and buses to accommodate wheelchairs are necessary features of a well-coordinated transportation system designed with all potential travelers in mind.

Getting out of their homes and traveling, whether for pleasure or for a previously unavailable job, is certain to give these Americans a new sense of belonging and a feeling of independence.

My bill also authorizes $40 million over the next 2 years for alternative transportation, research, and demonstration grants to study and implement barrier-free design in train and bus stations as well as airports. It would also provide funds to study transportation subsystems, so that all modes can be accessible to all persons.

Many measures can be taken to relieve the strain of urban and cross-country travel. Some examples of these include special ticket lanes; turnstiles that have been redesigned to accommodate not only the elderly and handicapped but also shoppers with packages, children, or anything that restricts movement; travel lanes set aside for those people unable to move quickly; wider doors on all vehicles and shuttles or minibuses where a long walk is required, as in airline terminals.

Visual indicators, illuminated sign boards, audio signals, and floor texture pathways would greatly benefit elderly and handicapped people and help keep traffic flowing smoothly. These special adaptations need not be separate from normal patterns of movement. In fact, they may prove to be even more convenient and preferable to the general public.

This bill goes beyond mere practicality. It makes new opportunities available to the elderly and handicapped. They would be freed of their present dependence and could use their new mobility for broader and richer lives. But more than anything else, this bill will aid our aged and disabled in achieving a dignified and meaningful life.

CONGRESSIONAL BUDGET ACT OF 1974

HON. RALPH S. REGULA

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. REGULA. Mr. Speaker, I am pleased to introduce legislation providing a much needed momentum for the 95th Congress regarding budgetary procedures. I offer this bill, which establishes a mandatory zero-base budgeting review of all Federal programs for Congress to follow. This serves as a complement to the Congressional Budget Act of 1974, and will finally allow us to draw our budget picture full circle.

My bill provides that the Budget Committees of the House and Senate create guidelines for a comprehensive zero-base review of all programs on a 6-year cycle. The review will be conducted by the appropriate House and Senate committees. Authorizations will automatically terminate at the end of each 6-year period. Thus, in order for the Congress to make any reauthorizations, programs must be justified from the ground up, as if enacted for the first time.

The only way Congress will cease hearing what a horrendous job is being done on our budget is for the Members of the 95th Congress to do something about it. My bill provides that opportunity.

Most important, it allows the committees involved in the actual oversight process the flexibility required for implementation.

We have jiggled around the concept of zero-base budgeting in our congressional brain long enough. Now it is time for action. No one disputes the value of the idea of zero-base budgeting—the question is what means do we employ to accomplish it. One of the keys to a successful review is cooperation and incentive. For this reason, the intricate web of instruction presented in other legislation is unrealistic.

Unlike other bills, mine offers the flexibility necessary for implementing such an innovative and complex maneuver.

It would defeat our purpose to enforce a blanket set of rigid procedures for all committees to follow in their review. Our object is not to tie the hands of each committee with a network of procedural rigidities—report filing, decision deadlines, paperwork requirements—and the like.

We must set our goals of a zero-base review and then allow each committee the discretion to mold its own specific procedures. It is the committees which best know the needs and direction of the programs under their jurisdiction. My bill accomplishes this. It permits the committee involved to tailor the process to the material within its responsibility.

We cannot legislate the Congress to do a good job through the mere words of a bill. But we can, in my bill, provide the guidance needed to encourage a good, thorough job.

Specifically, my bill includes the following framework for the zero-base budgeting review process. It is to be used at least once every 6 years on all Federal programs, and should determine:

First. Whether the program objectives are still relevant.

Second. Whether the program adhered to its original purpose.

Third. Whether the program had any substantial impact on solving the problems and objectives dealt with.

Four. What was the impact of the program on the functions and freedoms of the private sector.

Five. What is the feasibility of alternative programs for handling problems in the program and their cost effectiveness.

Six. What is the relation of all Government and private programs concerning the problems dealt with in the program.

Seven. What is the legislation pending in either House concerning modifications in these programs; looked at in the context of existing laws and private efforts.

These are the hard-core guidelines we need right now. We cannot continue to carry on the budget process of reviewing programs with a sieve each year. Under these guidelines, Congress can help to modify the trend of the budget-busters created in past years.

We can get to the root of Federal expenses—to expose duplications, distribution problems—and maybe for once answer the question we hear asked so often, "Where exactly is my tax dollar going, and why for that?"

At the root of all this process is the ultimate goal of restoring the confidence of the American people in their Government. Zero-base budgeting is not the whole answer, but it is a key to it that we can no longer afford to neglect.

STATEMENT OF THE HONORABLE JOHN M. MURPHY ON THE INTRODUCTION OF A BILL TO AMEND THE NATIONAL TRAFFIC AND MOTOR VEHICLE SAFETY ACT OF 1966 TO PROVIDE FOR THE INSTALLATION OF PASSIVE RESTRAINTS FOR OCCUPANT CRASH PROTECTION IN NEW PASSENGER CARS, JANUARY 4, 1977

HON. JOHN M. MURPHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. MURPHY of New York. Mr. Speaker, today I am introducing a bill to mandate the use of so-called passive restraints, including air bags, in all automobiles sold in the United States, beginning 3½ years after the date of enactment of this legislation.

The National Highway Traffic Safety Administration already has a rule regarding automobile passenger restraint systems, but it permits as one acceptable alternative the use of the standard active shoulder and lap belts which the occupant of the car must put on and engage.

Although these active belts would be about as effective as air bags if they were used, experience has shown that people simply do not use them. The Department of Transportation estimates only about 20 percent voluntary usage now, with a substantial portion of that number wearing the lap belt only. This is in spite of the fact that people have had since 1968 to accustom themselves to the lap belt, and in spite of the publicized and demonstrated life-saving potential of belt systems. The Department of Transportation estimates that the highest voluntary seat belt usage

they could hope for would be in the range of 35 to 40 percent.

An alternative to voluntary belt usage is, of course, for the States to pass mandatory seat belt usage laws such as exist in all of Europe, in Ontario, Canada, and in Australia. Where those laws are effectively enforced, seat belt usage climbs to about 70 percent. At that use level, consideration of passive restraints becomes unnecessary. But the States in this country have been unsuccessful in passing such laws. Although many States have introduced legislation, only Puerto Rico now has such a law.

The result of this lack of an effective occupant restraint system is an appalling number of avoidable highway deaths and serious injuries each year in this country.

The National Highway Traffic Safety Administration had been considering changes to its standard for a number of years, only to have Secretary of Transportation Coleman take the matter into his own hands last summer. In December, Secretary Coleman announced a rather peculiar ruling. It did not change the existing standard at all, but merely requested the industry to participate in a voluntary and limited study for 2 years. Each year, 250,000 cars would be equipped with air bags, half with air bags in all front positions and half in the driver's position only. Then the data would be analyzed and the standard would be reconsidered.

The basic defect in the ruling is that there is no need for an additional study of air bags, which this demonstration project represents. Air bags have been studied more than any other safety device and Secretary Coleman himself stated that the evidence showed unequivocally that their use would result in savings of 12,000 lives and tens of thousands of serious injuries per year, at a very reasonable cost. The Secretary estimates that to have an air bag in the driver's position would only cost an additional $50—$100 to equip all front positions.

Not only is the demonstration project not necessary, but it may actually set back the cause of safety several years because there is no time limit specified for analysis of data and amendment of the existing standard. The decision, in effect, delays requiring air bags or any other passive restraints for at least 5 years—5 years during which thousands of people will be killed and maimed unnecessarily.

The Secretary, I think, based his nonruling on the belief that, although he could not in conscience continue the present standard, mandating passive restraints might well result in congressional ire and a repeal of the amended standard, as happened with the ignition interlock rule. In effect, the Secretary gave us back the issue, and I think it is time that we take account of the clear facts and require passive restraints.

I should make it clear that passive restraints does not necessarily mean air bags. They are merely the most controversial form. Since the point of this effort is to get people protected in accidents, and since belts and air bags work in the same range of effectiveness, technological development should not be restricted unnecessarily. For this reason, my bill is written in terms broad enough to permit the development of a variety of passive restraints—not only air bags but, for instance, seat belts which are attached to the door of the car and are automatically placed around the occupant when the door is closed. The bill is intended to permit development of the most effective and least expensive alternatives.

Mr. Speaker, one final comment—the Secretary noted that one reason he did not mandate passive restraints is his belief that the public would not accept the air bag at this point. We should heed his warning. Although the facts seem to demonstrate that air bags are reliable—inadvertant deployment is estimated at only 5 or 6 for every 100,000 cars—and effective, people are afraid that the bags will go off when they are not supposed to, or fail to work in an accident. They are afraid of something that can explode in their faces. But the solution is not another test. The solution is, as with any other automotive feature, to have those who sell the product really sell it. So far, reports indicate that dealers themselves are not convinced, and they therefore denigrate air bags, fail to stock cars with the option, and otherwise discourage people from buying them. When this is combined with the very high cost estimates which the industry gives for air bags, it is no wonder that the public is not overly enthusiastic. A much better selling job could certainly be done.

Mr. Speaker, in the absence of effective mandatory seat belt usage laws, I believe that mandatory passive restraints are necessary to adequately protect people on our highways from death and injury.

The bill follows:

H.R.—

A bill to amend the National Traffic and Motor Vehicle Safety Act of 1966 to provide for the installation of passive restraints for occupant crash protection in new passenger cars, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 103 of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1392) is amended by adding at the end thereof the following new subsection:

"(j) (1) Not later than 6 months after the effective date of this subsection, the Secretary shall amend Federal Motor Vehicle Safety Standard Number 208; Occupant Crash Protection (49 Code of Federal Regulations 571.208) to require the provision of occupant crash protection, as specified in paragraph (2) and paragraph (3) of this subsection, with respect to all front designated seating positions of passenger cars manufactured on or after the first day of September next occurring after the 36-month period beginning on the date of issuance of the amendment required by this paragraph.

"(2) Occupant crash protection in frontal and front angular impacts of passenger cars shall be provided by passive means in accordance with S5.1 (relating to frontal barrier crash), S6 (relating to injury criteria), and S8 (relating to test conditions) of Federal Motor Vehicle Safety Standard Number 208; Occupant Crash Protection (49 Code of Federal Regulations 571.208), as amended through August 30, 1976, or as subsequently amended by the Secretary.

"(3) Occupant crash protection in lateral impacts and rollovers of passenger cars shall be provided by means of a Type I seat belt assembly which meets the requirements of Federal Motor Vehicle Safety Standard Number 209; Seat Belt Assemblies (49 Code of Federal Regulations 571.209), as amended through January 24, 1974, or as subsequently amended by the Secretary.

"(4) For purposes of this subsection, the terms 'designated seating position' and 'passenger car' have the meanings given them by the Secretary.".

SEC. 2. Section 125 of the National Traffic and Motor Vehicle Act of 1966 (15 U.S.C. 1410b) is amended to read as follows:

"SEC. 125. (a) No Federal motor vehicle safety standard may—

"(1) have the effect of requiring, or

"(2) provide that a manufacturer is permitted to comply with such standard by means of, a safety belt interlock system or any continuous buzzer designed to indicate that safety belts are not in use.

"(b) For purposes of this section—

"(1) the term 'safety belt interlock' means any system designed to prevent starting or operation of a motor vehicle if one or more occupants of such vehicle are not using safety belts; and

"(2) the term 'continuous buzzer' means a buzzer other than a buzzer which operates only during the 8-second period after the ignition of a motor vehicle is turned to the 'start' or 'on' position.".

THE FAIR PACKAGING AND LABELING ACT

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. FORD of Tennessee. Mr. Speaker, I rise today to introduce a bill designed to amend the Fair Packaging and Labeling Act to require that packaged consumer commodities be labeled to show their selling price.

This is a simple, straightforward piece of legislation that is prompted by the food industry's intention to use computer-assisted checkout stands in supermarkets.

This system, known as the universal product code—UPC—is a coding system which marks each individual product with a symbol composed of a series of bars of varying widths and a numerical code.

According to this system, the actual price of the product would be listed on the shelf—much the way unit prices are currently listed on the shelves of some stores—but not on the product itself. During the checkout process, the customer's purchases are passed over a computer scanner built into the checkout stand. The scanner reads the UPC symbol and retrieves the product name and price from the store computer. This information is then printed on the customer receipt tape.

Mr. Speaker, let me say at the outset that I am not opposed to the introduction of this new computer checkout technology. On the contrary, I, like most of the retail food industry, can see great potential for new efficiency in the operation

and management of large foodstores as a result of effective implementation of this system.

I am, however, concerned that we make it known in no uncertain terms to those testing and installing the UPC that clearly marked prices on all packaged consumer items are a right not a privilege.

I ask that each Member of this body pause for a moment to consider what would follow in the wake of the removal of prices from goods in supermarkets. Comparison shopping from one aisle to the next or from one shopping day to the next would be impossible. While shopping, a consumer would be unable to maintain a rough estimate of the total cost of the goods in his or her shopping cart without the use of a calculator or accounting list.

There would also be no way for the shopper to check the accuracy of the computer in interpreting the UPC symbol unless he or she happened to remember the price of the good or maintained a detailed price list as they placed items into the shopping basket. The only information available to the consumer on product prices once he or she leaves the supermarket would be the cashier's receipt.

In response to criticism of price removal by nearly every major consumer group in the country, including the Consumer Federation of America, as well as the Retail Clerks' International Union and many store owners themselves, the retail food industry established the ad hoc committee for the development of the UPC. This ad hoc committee commissioned a report from Michigan State University on the use of the UPC system. This report was compiled by J. W. Allen of Michigan State University, Gilbert Harrell of Michigan State University, and Michael D. Hutt of the University of Vermont. In their study, they found that there was a "significant difference" in the price awareness of UPC store shoppers and the controversial store shoppers, with the price-on-store shoppers being substantially more price-aware. This finding substantiates the claim made by a number of consumer organizations that consciousness of food costs and price rises come in great part through constantly noticing prices on packages stocked at home. This educational tool would be lost with elimination of price marking.

The Michigan study also concluded that—

About 40 percent of the UPC store shoppers as compared with 15 percent of the conventional store shoppers reported difficulty in seeing prices during their shopping trip.

This inability to view prices is a special problem among those elderly consumers who may have difficulty bending low enough to see the shelf prices or who have poor eyesight.

The report issued by the Michigan State group inspired the following comment from the Subcommittee on Public Policy of the ad hoc committee for the development of the UPC:

The results indicated at this point that some shoppers in prices-off stores do experience a measurable reduction in price awareness and consciousness compared to shoppers in conventional stores. This overall finding is of major concern to the Public Policy Subcommittee. In fact, although current studies indicate that the savings from removal of item pricing are in accordance with earlier industry projections some consumers today apparently have problems in shopping in a prices-off environment.

The industry estimates that the difference in savings between eliminating item pricing and retaining it at an individual supermarket is approximately $225 a week. However, the store would still gain $23,000, in annual savings through other advantages the UPC presents. Thus, the claim by some that mandatory item pricing would destroy the incentive to proceed with the installation of the computerized checkout system are ludicrous. I maintain that $225 a week is not too much to pay for such a fundamental consumer privilege.

JAZZ GREAT ERROLL GARNER DIES

HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. MOORHEAD of Pennsylvania. Mr. Speaker, it was with great sadness that I learned of the death over this past weekend of jazz great, pianist Erroll Garner.

Garner, a native of Pittsburgh, was known the world over for his innovative play and compositions. Perhaps his most famous work was "Misty."

Erroll Garner's death was most shocking for me for I had just received a new year's greeting from him shortly before hearing of his death.

Just last year, I noted in the CONGRESSIONAL RECORD the birthday of this musical giant and reported to my colleagues a long list of his achievements.

I would like to include in the RECORD at this time, the Washington Post story on Erroll Garner's death; an editorial which appeared in Tuesday's Pittsburgh Post Gazette, and my statement which appeared in the June 15, 1976 CONGRESSIONAL RECORD:

[From the Washington Post, Jan. 3, 1977]

ERROLL GARNER, INNOVATOR AS JAZZ PIANIST

(By Leonard Feather)

LOS ANGELES.—Erroll Louis Garner, 53, one of the greats of jazz piano history, died Sunday afternoon in an ambulance en route to Cedars-Sinai Medical Center here.

Mr. Garner had been released from the hospital Wednesday after almost two years of intermittent illness. Death was attributed to emphysema.

Born in Pittsburgh, the son of a pianist, he began playing with local groups in 1937. He went to New York City in 1944, where he began a series of engagements at small clubs along the legendary 52d street working with Slam Stewart, before forming a trio of his own.

Mr. Garner was an immediate sensation, achieving recognition through a style that owed little or nothing to anyone who had preceded him. He concentrated mainly on standard popular melodies, to which he applied variations that were rich in harmonic invention, coupled with a guitar-like strumming of chords in the left hand.

During a visit to Los Angeles in 1947, he played on a record session with Charlie Parker that was unique in the recorded annals of both men. In the late 1940s, Mr. Garner was a ubiquitous figure on records, appearing on sessions for dozens of labels.

With the advent of LP's he became a big seller, his most famous album being "Concert by the Sea." During this period he wrote his best known composition, "Misty," first recorded by Mr. Garner himself in 1956 with Mitch Miller and his orchestra. It was later matched with words by Johnny Burke and became a hit for Johnny Mathis, Sarah Vaughan and many other singers. The tune played a prominent part in the motion picture, "Play Misty For Me."

The unusually melodic character of Mr. Garner's work enabled him to be seen more often on television than almost any other jazz performer.

During the next decade he stepped up his concert schedule around the world. He continued touring and recording regularly until 1975, when he was sidetracked by a severe case of pneumonia.

Mr. Garner was an innovator equaled only by a handful of pianists such as Earl Hines, Fats Waller and Art Tatum. His accomplishments earned him dozens of honors, among then the Esquire New Star Award in 1946 and First Place in many annual polls conducted by Down Beat, Playboy and several foreign publications.

He leaves a twin brother, Ernest, another brother, pianist Linton Garner, and three sisters, Martha, Ruth and Bernice.

[From the Pittsburgh Post-Gazette, Jan. 4, 1977]

TWO GIFTED MUSICIANS

Two famed black musicians, notable in different fields, died during the New Year's weekend.

Erroll Garner, 53, prestigious jazz pianist, was a Pittsburgh native who made his debut at seven and was playing piano on riverboats on the Allegheny at 11. He boasted that he never took a piano lesson, but he developed a unique style of rich harmonic inventions which, along with his friendly ebullience at the keyboard, captivated audiences all over the world. Mr. Garner also was a prolific composer, writing such jazz classics as "Misty" and "A New Kind of Love."

Roland Hayes, 89, concert tenor, was a trailblazer for his race in the field of classic music. The son of a former slave, Mr. Hayes already was recognized as a talented singer in 1920 when he met the manager of the Boston Symphony and confided his hopes of becoming a concert performer. The response was brutal. "He told me," Mr. Hayes later recalled, "that no one of my race would ever be accepted in music."

So Mr. Hayes went to Europe where his rich, sweet voice won hearts everywhere, leading to an invitation from King George V and Queen Mary to Buckingham Palace. In three years Boston changed its mind and signed him for 30 concerts, which led to a stellar career here and abroad. By opening the world of the concert stage to black singers, Mr. Hayes pioneered the way for such greats as Marian Anderson, Paul Robeson and Leontyne Price.

The world is richer for the music of these two men.

[From the CONGRESSIONAL RECORD, June 15, 1976]

HAPPY BIRTHDAY ERROLL GARNER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. MOORHEAD) is recognized for 5 minutes.

Mr. MOORHEAD of Pennsylvania. Mr. Speaker, today, Erroll Garner, a native of Pittsburgh and one of the world's most popular musicians, celebrates his birthday. I want to

take this opportunity to salute this musical giant and note for my colleagues some of his many achievements and contributions as a pianist and composer.

From his early beginnings in Pennsylvania, this man has gone on to win world acclaim and to bring much joy and better understanding through his unique and innovative music, to people in all parts of the world.

It is especially fitting that we salute Garner in this Bicentennial Year, since his artistry is so deeply rooted in the American landscape. A legend since his early twenties. Garner was born with a great natural gift for music. Self-taught, he began playing at the age of 3, performing professionally in Pittsburgh by the time he was 7, on radio station KDKA, and in local theaters. His everdeveloping talent has taken him from the riverboats on the Allegheny River to performances in the top concert halls of America and the world.

Garner is an original artist, an innovator, and is regarded as one of the most distinctive musical voices of this century. For the past 25 years, he has been regarded as one of the dominant influences in contemporary piano.

In 1950, Garner made his solo concert debut, and later—1957—went on to appear as guest soloist with major symphony orchestras throughout the United States. His pioneering efforts have opened doors for many other performers, in concerts, television, colleges, showrooms, theater tents, and hotels. He constantly has fought to improve performing and audience conditions in his field, and consistently has resisted offers to play in segregated situations, in any part of the world. Garner is the only artist from the jazz idiom to tour under the auspices of the late classical impresario, S. Hurok.

Garner's honors and acclaim have been international. He has been awarded the keys to numerous cities in the United States, including Pittsburgh, Omaha, Indianapolis, Kansas City, and Boston, and has been honored by the Governors of several of our States. A top international favorite, Garner received the Grand Prix du Disque from the French Academy of Arts, and his work is buried at the French Theater Comedie in a time capsule. French critics call Garner "The man with 40 fingers," and "The Picasso of the Piano." The Republic of Mali has issued a postage stamp honoring Garner, and he has been invited to appear in Command Performances throughout Europe.

Garner's work and renown as a composer also are significant. With several hundred compositions to his credit, including his best-known work, "Misty," Garner's laurels as a composer continue to grow. "Misty" has been recorded by scores of artists in all fields—symphonies, pop, rock and roll, soul, and most recently, in the country and western field, winning an award from ASCAP. "Misty" also has been the title song of the film, "Play Misty for Me," and was the theme music of the "Today Show" on NBC–TV for over a decade.

For his unique recordings, Garner again has won prizes throughout the world. His album, "Concert by the Sea" is considered a precedent-making landmark in recording and was a bestseller for many years. Last year, Garner was honored by Schwann's 25th Anniversary Edition Catalog as one of three jazz-oriented artists whose recorded works have been in catalog for more than 25 years. The "Book of the Month Club" this year will issue a special three album collection of Garner's works as "The Essential Erroll Garner." The Public Educational Network filmed a half hour TV special with Garner, who also appears frequently on television here and abroad.

For his lifetime work as a creative artist, as an originator and innovator, as a man of good will whose artistry has won him high honors and respect; as a performer who has cut through all national and international boundaries to spread good feeling and good will among the most hybrid audiences, of all backgrounds and all ages, I take pleasure in celebrating this birthday of Erroll Garner, and I am sure all in this Chamber wish him many more years of fulfilling, creative activity.

ZABLOCKI SEES STRONG ROLE FOR 95TH CONGRESS IN FOREIGN POLICY

HON. ROBERT W. KASTENMEIER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. KASTENMEIER. Mr. Speaker, the Congress has gradually over the past few years begun the process of reasserting itself in the area of foreign affairs. Largely as a result of the Vietnam debacle, and other evidence of U.S. activity and commitments in foreign countries undertaken without the public's knowledge, we enacted the War Powers Act; we required that the President submit all executive agreements to the Congress; we stipulated certain human rights requirements for countries receiving U.S. aid; and, we have generally provided for a more open conduct of our foreign policy.

There has been some speculation, however, that this effort may lose momentum now that we will have a Democrat in the White House and a democratically controlled Congress. Some question whether the Congress may revert, once again, to a "junior partner" role in foreign affairs, allowing the President to take the lead.

This issue was recently addressed by our colleague, CLEMENT J. ZABLOCKI, in a speech to the Third Regional Leadership Conference of the Southern Council on International and Public Affairs at the Citadel in Charleston, S.C.

In his remarks CLEM ZABLOCKI, who is the ranking Democratic member of the House International Relations Committee, asserted an "equal partner" role for the 95th Congress in the formulation of the Nation's foreign policy. I would like to share those remarks at this point with my colleagues.

STATEMENT BY THE HONORABLE CLEMENT J. ZABLOCKI OF WISCONSIN

(To the Third Regional Leadership Conference, Southern Council on International and Public Affairs, The Citadel, Charleston, S. Carolina, December 4, 1976.)

There are two thoughts which, I suspect, are today being harbored within the hearts of many diplomats, bureaucrats, professors of political science, and those who favor a strong Presidential Government.

Those thoughts are:

First, the past few years in which Congress has asserted itself in the area of foreign policy are an aberration, and

Second, now that—for the first time in eight years—we have in prospect a President of the same political party as the large majority in Congress, things will go back to "normal."

I would like to challenge both assumptions.

First, the period usually cited as "normal" is the 25 years from the outbreak of World War II until the late 1960's.

It was a period of undoubted Executive Branch dominance in the area of foreign affairs. Congress seemed content to take a "junior partner" role in the shaping of American foreign policy.

There were some disputes between the two branches of government over international issues during that period. But it is safe to say that the Presidents who served then—Roosevelt, Truman, Eisenhower, Kennedy and Johnson—seldom, if ever, found themselves blocked on a major foreign policy matter by a "nay-saying" Congress.

Because that "golden age" of Presidential power in foreign affairs lasted more than a quarter century, there is a tendency to see the period as the normal state of things, and to see what has been happening lately as a deviation.

My contention is that the 1941–1967 period was the aberration, and the most recent period is the more normal one, particularly when one reviews the situation from the perspective of almost 200 years of American history.

The Constitution gives the President a few vague, broad powers in the area of foreign affairs.

It gives the Congress numerically more powers, but more specific and more narrowly defined powers.

But too often the Constitution fails to draw hard and fast lines between what rightly should fall to the President, and what should fall to the Congress, when foreign affairs are at issue.

The result is a vast "twilight zone" of overlapping powers and responsibilities. As the great scholar Edward S. Corwin has said, the Constitution provides only "an invitation to struggle for the privilege of directing American foreign policy."

That struggle traditionally has characterized the relations between the Congress and the President in foreign affairs.

At times the President has had the upper hand; at other times the Congress has been dominant.

For an example of Congressional dominance, we might refer to the 33 years between the end of the Civil War and the beginning of the Spanish-American War. During that period, the Senate refused to ratify a single major treaty.

Of that situation, the writer Henry Adams said:

"The Secretary of State exists only to recognize the existence of the world which the Congress would rather ignore; of obligations which the Congress repudiates whenever it can; of bargains which Congress distrusts and tries to turn to its own advantage."

One hundred years later, another Henry might well endorse those same sentiments.

I need not remind you of a subsequent period of Congressional dominance—the 22 years between the end of World War I and the entry of the United States into World War II.

In that isolationist era, a stubborn Congress refused either to endorse the structure of peace which President Wilson had created, or to recognize the dangers of war when President Roosevelt pointed them out.

In part because Congress was wrongheaded in its isolationism in the 1920's and 1930's, the cult of Presidential dominance in foreign affairs was created.

Many people—including many members of the House and Senate—decided that if Congress had been so wrong before World War II, it probably could not be trusted to do anything right in the postwar era.

To paraphrase Mark Twain: We got more out of the lesson than there was in it.

Now—as a result of the events of recent years—we have learned another lesson. That lesson is that unbridled Presidential power

in foreign affairs can be just as wrongheaded, just as destructive, and just as harmful to the Nation as unbridled Congressional power.

I can assure you that the Congress will not forget that lesson simply because the majority on Capitol Hill shares a party identification with the man who occupies the White House.

In other words, we are not going to roll over and play dead just because Jimmy Carter is President.

Even if future Congresses should be tempted to abdicate their responsibilities, we have tried to make it difficult for them by institutionalizing, as far as possible, a resurgent Congressional role in foreign affairs.

For example, the Case-Zablocki Act of 1972 requires that all executive agreements be submitted to Congress. No longer can international agreements and commitments by Presidents lawfully be kept secret from the Congress, as they once were.

The War Powers Resolution of 1973 establishes fairly precise procedures designed to insure that the elected representatives of the people have a responsible voice in the matter of commitments of American troops into hostilities.

It is not a perfect piece of legislation. It has its critics. But the War Powers Resolution has, to date, worked as we who formulated it thought it should, and would, work.

Furthermore, just this year the Congress acted to erase from the book thousands of emergency powers which have accrued to Presidents since the 1930's, and to set in motion a procedure for reviewing other statutes which grant emergency powers.

Through the Budget and Impoundment Act of 1974, the Congress at last has a handle on the budgetary and administrative apparatus of our government.

As a result of the acts I have mentioned—and dozens of other acts and amendments—Jimmy Carter will come into office facing an array of legal constraints which did not face any of his elected predecessors.

The Congress is unlikely to repeal any of those legal constraints—even if asked. And we do not expect to be asked.

In fact, before his first term is over, President Carter may find that Congress has added new constraints. For example, I believe that action should, and will, go ahead to permit Congress to veto through a concurrent resolution those international executive agreements which constitute a commitment to a foreign nation or international body.

My purpose in making these points is not to leave you with the idea that the Congress will be seeking opportunities for confrontation with the new President. It will not.

When the Congress and the President are at loggerheads over foreign policy issues, American foreign policy does not work very well. The struggle discourages our friends, heartens our enemies and confuses just about everybody.

We live in a dangerous world. If our foreign policy is to insure the safety and prosperity of the American people, cooperation—not confrontation—is required between the Congress and the President.

Nor do I think that the new President will seek confrontation. Just before Thanksgiving, Governor Carter made a special effort to meet with members of the Senate Foreign Relations Committee and the House International Relations Committee. At those meetings he pledged to consult early and frequently with the Congress on matters of foreign policy.

I believe he is sincere in that pledge. Because he is, he will find that the Congress is willing to give him and his new Secretary of State a full measure of cooperation: not cooperation based on a misguided notion of Presidential supremacy, but cooperation born of a true partnership of equals.

CHATTAHOOCHEE RIVER NATIONAL RECREATION AREA

HON. ANDREW YOUNG

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. YOUNG of Georgia. Mr. Speaker, today I am introducing a bill to authorize the establishment of the Chattahoochee River National Recreation Area in the State of Georgia.

This bill is identical to a measure approved by the House Committee on Interior and Insular Affairs in the 94th Congress. The legislation was scheduled for consideration on the House floor, but unfortunately the House did not have enough time to call it up in the closing days of the 1976 session.

I now hope that the House will act expeditiously on this proposal in this session. The legislation would protect a 48-mile segment of the Chattahoochee River in Georgia and more than 6,000 acres of adjacent unspoiled land in the Atlanta metropolitan area. It would add an extraordinary national treasure to our national park system.

In the previous Congress, the House Subcommittee on National Parks and Recreation conducted an intensive field inspection of this stretch of the Chattahoochee, and followed that up with hearings in Washington.

A number of national conservation groups have been active in their advocacy of this legislation. In Georgia, virtually all conservation organizations strongly support the bill and have worked for protection of the river for many years.

Gov. George Busbee of Georgia and many other State and local officials have also given leadership to the drive to save the Chattahoochee, as did President-elect Jimmy Carter when he was Governor of Georgia.

Additionally, the Interior Secretary's Advisory Board on National Parks has recommended that this section of the Chattahoochee River be included in the national park system as a National Recreation Area.

The many Members of Congress and citizens who have worked for this legislation will very much appreciate passage of this bill by the House, and I hope that the other body will then accept this measure as passed by the House of Representatives.

Mr. Speaker, I would like now to review the history of this legislation and the movement to save the Chattahoochee.

For several years vigorous efforts have been underway to preserve the river area. Since the late 1960's, a citizen group called Friends of the River and a coalition of conservation organizations have made progress toward survival of the river in the Atlanta metropolitan area. Donations from private and Government sources have made possible the acquisition of 914 acres of land along the river. This land has a current value of about $14 million. That represents, in our view, a very substantial State and local commitment already made to this resource.

In addition, in 1973 the Georgia Legislature passed the Metropolitan River Protection Act, which put controls on construction and development in the river area. That law mandates a 150-foot setback of all buildings on either side of the river, bars construction in the 50-year flood plain, and provides for review by the Atlanta Regional Commission of all proposed rezoning within 2,000 feet of each bank.

In recent years, Mr. Speaker, extensive studies of the Chattahoochee area have found the resource to be deserving of greater protection.

In 1971, the Bureau of Outdoor Recreation developed a plan for preserving the natural and historical values of the Chattahoochee and for using some of the area for outdoor recreational opportunities. In 1972 a study by the Atlanta Regional Commission recommended a Federal-State-local partnership designed to protect the river and its corridor. In 1975 the Georgia Department of Natural Resources, in cooperation with A.R.C. and local citizen groups and in response to my request, made a careful new survey of the stream and its environs, and produced a new plan for the establishment and management of the Chattahoochee River National Recreation Area.

I believe it is also noteworthy that last year the Interior Secretary's Advisory Board on National Parks, Historic Sites, Buildings and Monuments, after a field inspection on the Chattahoochee by two of its members, recommended "that the National Park Service proceed with the necessary preliminary study, building on the work of the Bureau of Outdoor Recreation, the Georgia Department of Natural Resources, and Friends of the River, with the intent of adding to the System the Chattahoochee River National Recreation Area." I submit the full statement by the Advisory Board, dated October 8, 1975, for the RECORD at this point:

NATIONAL PARK SERVICE,
Washington, D.C., October 8, 1975.

MEMORANDUM

To: Secretary of the Interior

From: Chairman, Advisory Board on National Parks, Historic Sites, Buildings and Monuments

Subject: Proposed Chattahoochee River national recreation area

On September 26–27, 1975, the subcommittee of Linden Pettys and William Shade visited the proposed Chattahoochee River national recreational area. After an evening orientation by people from BOR, NPS, the Georgia Department of Natural Resources, the Atlanta Regional Commission, and a citizens' group called Friends of the River, the subcommittee then visited various sites on the ground, floated a two-mile stretch of the river, and then overflew the entire proposed area from Standing Peach Tree to Lake Sidney Lanier.

The subcommittee was extremely impressed with the natural beauty of the area, particularly since much of the most attractive portions of the river are within the city limits of Atlanta. The Chattahoochee is a unique resource; it obviously must be protected from the multitude of possible immediate encroachments, and it offers an extrordinary possibility to serve the recreation

needs of the area. Presently with no management at all, and often requiring citizens to violate private property, the river is extensively used. Atlanta public transportation and the interstate highway system provide easy access to the river for people in a five-state area. Twenty percent of present usage is from outside the Atlanta area, and half of that from outside the State of Georgia.

The subcommittee was in agreement that the Chattahoochee corridor more than met the established criteria for national recreation areas, and that private and State facilities for development have been exhausted. The Board thus recommends that the National Park Service proceed with the necessary preliminary study, building on the work of the Bureau of Outdoor Recreation, the Georgia Department of Natural Resources, and Friends of the River, with the intent of adding to the System the Chattahoochee River National Recreation Area.

The Board does not make this recommendation lightly, since it concurs with the general position presented in the memorandum of June 23, 1975, on Gateway National Recreation Area. The Board recommends that the National Park Service will make an extensive effort to tighten up or clarify the criteria for a national recreation area, and in particular try to provide more adequate guidelines on the meaning of "national significance." Further, it was clear to the subcommittee that the present proposals will create an extremely difficult management situation; and the subcommittee feared that, with the increased access to the river these proposals would provide, nothing less than creative management will be necessary to protect this beautiful and fragile resource from overuse.

Consequently, the Board recommends that the National Park Service, in approaching the creation of this new national recreation area, will explore all avenues of cooperative funding and management with State and local authorities. We particularly hope that the National Park Service will make use of this opportunity to develop new and innovative approaches to cooperative management that can provide examples for future ventures in urban recreation.

STEPHEN L. ROSE.

Mr. Speaker, the plan to preserve the Chattahoochee calls for space and facilities for family camping, primitive camping, picnicking, hiking trails, canoe beaches, scenic overlooks, and access points for fishing and other recreational activities. We also envision for the area botanical gardens, wildlife sanctuaries, and educational facilities for environmental awareness and scientific research. A historical and archeological center would interpret the vicinity's history. The area has sites recording the presence of Indians 10,000 years ago, the coming of the Georgia settlers, and the Civil War.

As we have seen, there have already been tremendous State and local efforts to save the Chattahoochee. We now seek Federal legislation to complete the job of protecting what we believe is a national treasure. We want to preserve the natural integrity of the corridor along the 48-mile segment mentioned earlier—from Lake Lanier northeast of Atlanta to Peachtree Creek in the city itself. We wish to acquire about 5,300 acres of additional land at an estimated cost of $51 mililon. This land, the corridor, and the acreage already held by the State of Georgia would be managed by the Park Service as a National Recreation Area. We believe that construction of the limited facilities needed to operate the area might cost around $9 million.

It seems appropriate to note at this point that the Chattahoochee River already has a relatively high user rate. In 1975, about 2.5 million people visited the Chattahoochee in the 48-mile stretch we are discussing for inclusion in the national park system. By comparison, in 1974, Yosemite National Park had 2.4 million visitors, and Yellowstone National Park had 1.9 million users.

We are proud of our great national parks, Mr. Speaker, and we are grateful for the work of the Interior Committee over the years to expand and improve our national park system. As we continue that process, we hope and trust that the Congress will decide that the Chattahoochee River in Georgia should be included in that system as a National Recreation Area. If we act now to save the Chattahoochee, our investment will be wise and it will really be priceless, because it will be an investment for generations in the decades and centuries to come. Thank you.

LICENSING PROCESS FOR NUCLEAR FACILITIES

HON. MELVIN PRICE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. PRICE. Mr. Speaker, today I am introducing a bill to improve the effectiveness and efficiency of the licensing process for nuclear facilities.

During the 94th Congress, the Nuclear Regulatory Commission submitted proposed legislation to the Congress which would reduce the time now required to license nuclear facilities by giving the Commission authority to issue early approvals for proposed sites for nuclear facilities including nuclear powerplants. That proposal was introduced in the House by request as H.R. 7002 and was referred to the Joint Committee on Atomic Energy. The Joint Committee held extensive hearings on this and other proposals for nuclear facility licensing reform in 1974 and again in 1975. The bill which I am introducing today is completely responsive to the Nuclear Regulatory Commission's request and gives the Commission the licensing authority needed to get the job done. That sought-after goal would be achieved while preserving and further strengthening the fundamental objectives of the licensing system for commercial nuclear facilities established in the Atomic Energy Act of 1954, as amended.

OBJECTIVES OF THE BILL

The bill has the following objectives: First, to enhance earlier and more effective public participation in the licensing process for nuclear facilities; second, to enhance public confidence in and understanding of the licensing process; third, to enable the Commission to make the most effective use of its resources and to perform its licensing responsibilities as efficiently as possible; fourth, to reduce the burden of the licensing process on the public and on the participants in individual proceedings by minimizing unnecessary and costly duplication and delay in the procedures for licensing these facilities; and fifth, to reduce the long lead-time—approximately 10 years—required for the licensing of nuclear facilities under existing law by 3 or 4 years, thereby insuring that utilities which in the future will be required to construct additional elecric powerplants within shorter time periods will not be foreclosed from building a nuclear facility where that is the best alternative.

The bill accomplishes the foregoing without impairing in any way the quality or thoroughness of the Commission's regulatory responsibiilty under existing law with respect to protection of the public health and safety, the common defense and security and the environment; and without any adverse effect on the opportunity for proper public participation in the licensing process or reduction in the public and open conduct of the licensing process administered by the independent Nuclear Regulatory Commission.

NEED FOR THE LEGISLATION

The principal problem addressed by the bill is the need to reduce the long lead time—presently 10 years—required to bring a nuclear reactor through the planning, licensing, construction, and testing stages to commercial operation. It is now apparent that the Commission has accomplished about as much as can be accomplished in reducing the lead time under the licensing authority which is now available under the Atomic Energy Act of 1954, as amended. The major obstacle to further reduction is that existing law only gives the NRC the authority to issue a construction permit after a utility has filed a formal application to build a specific plant on a specific site.

Thus, under the existing licensing system, essentially all regulatory reviews and approval must be deferred to a point at which any substantial construction delay could be adverse to a utility's planned reliance on the additional capacity from the plant under construction. Further reduction in the lead time, without any sacrifice in the quality of the resolution of the paramount issues of safety, common defense and security, and environmental protection, can only be achieved by adding licensing authority which provides for early and timely decisions on approvals of facility sites. By authorizing the early review and approval of reactor sites and designs, the bill permits much of this time-consuming environmental and safety review work to be done well before a utility decides to apply for a permit to construct a plant.

If a utility decides to go ahead with an approved reactor design at an approved site, it should be able to obtain the necessary licensing authority to do so and have the plant constructed and operating in 6 or 7 years. New licensing authority which would result in lead-time reduction is needed now to avoid electrical supply shortages which may

not materialize until the early or middle part of the next decade. Since 1974, many nuclear generating plants have been canceled or deferred, due in large part, to financial pressures on the utilities. As the demand for electricity continues to grow, these utilities will be forced to bring new powerplants online to meet the demand in less than the 10 years now required for a nuclear plant. Unless something is done to reduce the leadtime for nuclear plants, those utilities will be forced to choose additional fossil fueled generating units even if nuclear were the preferred choice. The practical effect of this will be to foreclose the nuclear option and to increase this country's reliance on imported petroleum to generate its electricity.

The additional licensing authority contained in the bill, which provides for the early resolution of the major issues involved in site selection, construction, and operation of nuclear facilities does not prejudice anyone whose interest might be affected by the licensing of a nuclear facility. Indeed, the extensive hearing record which the Joint Committee has produced on this subject supports without any known exception the benefits from the standpoint of all interests, of a licensing system which permits early consideration of issues relating to the siting and design of nuclear facilities. Such a system would allow early focus on site suitability, an area in which public interest and participation is likely to be the most significant and effective.

That hearing record also demonstrates conclusively that delays in the construction of nuclear powerplants add, because of interest and inflation costs alone, many millions of dollars a month to the cost of the plant for each month's delay in plant completion and operation. In addition, the cost to a utility of replacement power, assuming that it is available, can now run as high as around $600,000 daily. These costs should be minimized by the procedural improvements in the licensing system provided for in this bill.

There are additional reasons why the reduction of the leadtime is clearly in the national interest. In 1975 alone, nuclear power provided nearly 9 percent of all the electricity generated in the United States. This contribution, according to utility announcements, represented a savings of 1 million barrels of oil a day. A 1,000-megawatt electrical nuclear plant should, on the average, replace the need for 10 million barrels of oil annually. Moreover, utilities using nuclear power to generate electricity assert that it resulted in cost savings of over $2 billion in 1975.

There are now more than 170 nuclear powerplants—in addition to the 62 now licensed to operate—which are planned or under construction. By the middle of the next decade, if all of these plants are on the line to generate electricity, they should, over their lifetime, save the equivalent of 70 billion barrels worth of petroleum generating capacity. This is about seven times the Alaskan North Slope reserves. Even at the present price of oil per barrel, the cost of such an oil replacement, again assuming its availability, would be approximately $27 billion annually.

The availability of these nuclear plants would reduce our dependency on oil imports, which have increased substantially since the oil embargo in 1973 to the point where these are in excess of domestic production. Moreover, their availability would result in the conservation of petroleum, the supply of which is finite and which has a multiplicity of essential uses other than to produce steam to generate electricity.

The Nuclear Regulatory Commission, which is responsible for the regulation of commercial nuclear facilities, testified emphatically before the Joint Committee that legislation is needed now, and that without it the prospects for further reduction in the leadtime are indeed dim.

But these costs and the long leadtime for nuclear facilities cannot be reduced at the expense of the quality of regulatory review. Safety is and must continue to be the paramount consideration in the Commission's regulation of commercial nuclear facilities. The need, therefore, is for legislation which will reduce the leadtime for nuclear plants but which will preserve the integrity of the present licensing process.

SUMMARY OF LICENSING CHANGES

The bill seeks to accomplish the objectives set forth above by two principal means: first, section 101 of the bill adds a new section 192 to the Atomic Energy Act which reaffirms, emphasizes, supplements and strengthens the objectives which the Joint Committee has stressed from the beginning of the commercial nuclear power program must be the foundation for a regulatory system which is both sound and acceptable to the public.

Second, the bill in section 103 modifies existing law by giving the Commission needed authority to restructure the process by which it approves the sites and designs for nuclear facilities. In addition to these two principal features, the bill makes other changes in the licensing process which should further the objectives set forth above.

POLICY GUIDANCE

The new section 192 emphasizes that the Commission must continue to the greatest extent feasible to candidly and expeditiously disclose information concerning radiation risks to the public. Direction is also provided for expediting Commission licensing proceedings by improving the effectiveness and efficiency of required licensing hearings.

The section emphasizes the value of obtaining finality in the Commission's licensing determinations and thereby avoiding the need for needless retrial of already resolved issues. The importance of early Commission and public involvement in a utility's site planning process is emphasized. The section also calls for increased effort by the Commission in certain areas in order to achieve greater efficiency and effectiveness in the licensing process. One such area is the need for improved coordination at the Federal level with other agencies which are involved in aspects of the licensing of nuclear facilities other than radiological health and safety.

Another area in which increased effort on the part of the Commission is needed is better coordination with States in which nuclear facilities are to be constructed in order to avoid unanticipated and undesirable duplication of regulatory programs, in fields other than radiological safety, with the goal of reducing unnecessary delay and uncertainty in obtaining the necessary approvals for nuclear powerplants.

Such improved coordination is essential if the early site approval concept is to be an effective vehicle so that Federal and State agencies can cooperate with the Commission in its licensing responsibilities by providing timely decisions on nonradiological environmental issues for which they and not the Commission have the principal responsibility. The Federal-State coordination role is an important and challenging one which will require the most careful study by the Commission. Accordingly, section 102 of the bill calls for a study to be made on the subject by the Commission.

ADDITIONAL LICENSING AUTHORITY

Section 103 of the bill adds a new section 193 to the Atomic Energy Act of 1954, as amended, which grants additional licensing authority to the Commission. The essence of this additional authority is that the Commission could upon application by a utility or other interested person, including a State, approve sites for nuclear facilities in advance of the filing of any application to construct such a facility. The licensing authority to approve sites is the additional authority needed by the Commission in order to provide early and timely decisions on site selection. The Commission already has the authority to approve the designs of nuclear facilities. The combination of these two authorities—early and separate site and design approvals—could shorten the lead time for a nuclear facility from the present 10 years to approximately 6 to 7 years if a utility decides to construct a nuclear power reactor of a previously approved design on a previously approved site.

Section 193 also provides that if a decision is made by a utility to apply for a permit to construct a facility of an approved design on an approved site, a public hearing would be required if the person requesting the hearing demonstrates to the satisfaction of the Commission under procedures published by the Commission that there is some substantial unresolved issue regarding the licensing of the facility.

Section 193 also authorizes the Commission to issue an interim license to operate a nuclear facility or an interim amendment to an operating license in those circumstances in which a hearing is pending regarding the final license to operate the facility, provided that the interim licensing requirements prescribed therein are met. Under present law the Commission lacks that authority and that deficiency has in fact on some occasions resulted in a nuclear facility being withheld from operation solely to await

the completion of the hearing and decision on the final license. The procedural deficiency could result in prolonged operational delays for a completed nuclear plant. For that reason the deficiency should be eliminated. As a practical matter, however, it is unlikely that the authority would have to be used frequently in view of the emphasis which is being placed on early and timely decisions in the licensing process.

OTHER CHANGES

Section 201 of the bill amends subsection 182b of the Atomic Energy Act of 1954, as amended, to permit the Advisory Committee on Reactor Safeguards to determine which applications for nuclear facilities it wishes to review. Under the present law that committee must review each application. In view of the fact that some of the applications are almost identical to applications which have already been reviewed by the Advisory Committee, the Advisory Committee has asked for and strongly supports this change. Indeed, the Advisory Committee has stated that this change would enable the Advisory Committee to carry out its responsibility more effectively by enabling the committee to focus on those issues which it believes are the most important.

The remainder of title II and title III of the bill simply provides for conforming changes to be made in the Atomic Energy Act of 1954, as amended, and involves no substantive change.

TRIBUTE TO SENATOR PHILIP HART

HON. WILLIAM M. BRODHEAD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. BRODHEAD. Mr. Speaker, the people of Michigan and the Nation have lost a great leader and a great friend. The passing of Senator PHILIP A. HART removes from our midst a strong and tireless advocate for legislation to help those in our society who lack a powerful lobby. He made Government work not just for the wealthy and powerful, but for every American. While he had considerable success as a legislator, his lasting legacy will be, I believe, the standard he set for political leadership. He showed by his life that gentleness, candor, and complete devotion to the needs of others are not incompatible with political success. A Detroit Free Press editorial and Detroit News article follow:

[From the Detroit Free Press, Dec. 28, 1976]

AS WE SEE IT: HART'S VISION AND COURAGE LEFT US ALL MUCH RICHER

It is hard to say goodby to a legend.

And Sen. Philip Hart, a kind and gentle and wise man who tried to make life better for people, was certainly that.

Sen. Hart was a person who fought the good fights, who stood up for what he believed in: a decent chance for all people in this country, whether that meant feeding the poor, knocking over racial barriers, or erasing the hatreds that grew from a woeful and undeclared war in Asia.

There are few people who are almost universally respected. Respect, after all, must be earned. But Philip Hart was such a person.

He seemed to do the right thing, to say the right thing, before most people had even thought about the subject, let alone come to a conclusion.

In 1957, long before the Peace Corps or VISTA, Mr. Hart, then lieutenant governor of Michigan, urged the state's Young Democrats to find solutions to "poverty in Asia and Africa and prejudice in America."

In 1958, six years before the creation of the Equal Employment Opportunity Commission, he wrote Vice-President Richard Nixon and requested that more facts be made available on the success or failure of eliminating racial discrimination in government-contracted jobs.

In 1959, his first year in the Senate—and more than a decade before financial disclosure legislation—he broke a state precedent and revealed the financial details of his office operations. That same year, he called for a system of federal election registrars to ensure voting rights for blacks in the South.

On through the years, example after example piled up. He was the man with the conscience. The man who fought for the rights of consumers. The man who stared the home state auto companies in the eye. The man who made others realize that politics, despite so much evidence to the contrary, sometimes could be the kind of noble endeavor envisioned by the pragmatic but philosophical politicians who wrote the Declaration of Independence and Constitution of this country.

Knowing all that about Philip Hart, it is doubly difficult to reconcile it with the profound despair he felt in his last months. Not despair for himself—Philip Hart, who worked in the Senate as long as he could despite the cancer growing inside him, would waste no time on that—but despair because more had not been accomplished, because the basic structures of the economy had remained mostly unchanged, because not everyone shared his vision of what a better America would be.

Perhaps no greater tribute could be paid to Mr. Hart than to say he was wrong in that despair.

His being on earth, his being in the Senate, made a difference. Anyone older than 35 in this country can look back to the year Phil Hart was elected to the Senate, and state categorically that things have gotten better. Not perfect—human nature itself precludes that—but better. There may still be racial discrimination, but it is not tolerated by law. There may still be consumer deception, but the doctrine of caveat emptor is no longer acceptable. There may still be those who will defend to the death the status quo, but there are others who, having known or known of Philip Hart, will never be so inclined.

The man was a legend. And now he is gone. And saying goodby is not easy at all.

[From the Detroit News, Dec. 27, 1976]

SENATOR HART'S FINAL SPEECH

WASHINGTON.—Three months ago—Sept. 29 to be exact—the Michigan congressional delegation hosted a reception for Sen. Philip A. Hart and Rep. James G. O'Hara in the Cannon House Office Building in Washington.

The occasion was to honor the two Michigan Democrats who were leaving Congress; Hart because he was retiring and O'Hara because he wanted to succeed Hart but had lost a Democratic primary to Rep. Donald W. Riegle Jr. in seeking to do so.

At the time of the reception Hart was dying of cancer and he and everyone there knew it. It was, in fact, to be his last public appearance.

When Hart stood up to speak the room became silent. No one talked. There was no clinking of glasses or tinkling of ice cubes.

Following is a text of much of that speech:

"It will be noticed very quickly, I did not have the opportunity that Jim O'Hara made for himself—to take the time to work on some remarks. Also, I'm at the very dangerous brink—with so much that I want to say and facing the hazard that in trying to say it all, I will do it very poorly. Or, recognizing the likelihood of that disaster, I may not say enough to make clear my appreciation. I will try to zero in on the latter.

"Those of us seated here who have been members of Congress do not need to be told that anyone who's been given the opportunity to sit in the legislature of his country has been lucky, and I, along with everyone who has been given the opportunity, am grateful to the people who demonstrate great patience with us on occasion and provide us with the means to come here and say this.

"As I look around, I see the press who know you're not as smart as your claims would suggest and know that they can make anybody look to be an idiot if they undertake it, but who nonetheless restrain themselves.

"And then there are those who, because of a specific interest in an issue, affiliate themselves with an organization which finds political action paramount and that organization determines if Jim O'Hara or Phil Hart or Phil Ruppe (a Republican congressman from Michigan's Upper Peninsula) will be their candidate, and take the streets in developing a story.

"You know our limitations and knew them before we came here. You tolerate them while attempting to improve them while we are here. I find it unlikely that I need try to explain how appreciative I am to you.

"For the two or three who may have wandered in looking for something more exciting than a retirement party, I have nothing to say.

"Again, when Jim and I met and began campaigning together in '58, the only thing we could be sure of was that we wouldn't be sure of what life would be like in '76. We've been given the opportunity to see it and for the two of us it's been exciting and for me, very fulfilling.

"There are people who fill books describing or vaguely suggesting the evils that occur in these halls. If they could listen to the conversations I've listened to since '58, if it was evil they were curious about, they would have long since left.

"In my book, politicians maintain a higher level of integrity than most other categories. The temptations are great but helpfully the discipline of the press and others is equally great. Most people say 'thank you, but no.'

"I hope that younger people understand that politics is a very dangerous business but what effective weapon isn't? And it's a weapon that will mean somebody is interested and if they will just understand that it does not demean them and that it does not expose them to more than they would be exposed to if they were a teller in a bank or an associate in a law office. Then we might be assured of a more constant, steady stream of the best of them—and we need them.

"And we've had in the brief time we've been here, Jim and I, we've seen some little growth, some improvements but it's still an awfully white audience out there and it's a pretty affluent audience.

"It's lucky that there are included in those two broad categories people who seek more clearly to understand the needs of the many who are not represented here physically tonight.

"But 50 years from now I hope the complexion and the Dun and Bradstreet rating and the ages of a group like this would be dramatically changed to reflect more in keeping with what we are as a country.

"This is the last time for me and I close as I began, by thanking all of you for trusting me."

REPORT ON CONGRESSIONAL ALLOWANCES AND OUTLAYS

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. LONG of Maryland. Mr. Speaker, today, I am reporting my congressional allowances and outlays for the period January 1, 1976, to December 31, 1976.

With this voluntary report, I have gone well beyond any legal obligation, to present my constituents with a record of my disposition of the several congressional allowances and accounts:

I. CHECKING ACCOUNT

The following is a statement of receipts and disbursements from my checking account in the Mercantile-Safe Deposit and Trust Company during the calendar year 1976:

1. Balance in account, Jan. 1, 1976	$206.85
2. Receipts:	
Congressional allowance for expenses	2,000.00
Personal deposit	50.00
Total receipts	2,050.00
3. Total in account	2,256.85
4. Disbursements:	
Supplies and miscellaneous for office operations	2,228.20
Bank service charges	28.50
Total disbursements	2,256.70
5. Balance in checking account, Dec. 31	0.15

This general statement of receipts and expenditures from my checking account demonstrates the following: 1) that all of the disbursements from the account were used for Congressional office supplies; 2) that this account contains receipts only from appropriated funds (or personal funds after appropriated funds were exhausted); 3) that no campaign funds were deposited into this account; and 4) that this account contains no funds, gifts, loans, advances, credits, or deposits of money donated from any other source, for the purpose of supporting any of my activities, official or otherwise.

II. TRAVEL ALLOWANCE

The entire 1976 Travel Allowance was used by August 26, 1976, for daily travel from Washington, D.C. to Baltimore as follows:

Travel allowance for 1976	$2,250.00
Travel through Aug. 26, 1976: 130 round trips at 116 miles equals 15,080 miles at $0.15 per mile	2,262.00
Balance	0.00

III. TELEPHONE EXPENSES

Charges for strictly official long-distance calls and telegrams made or sent by or on behalf of each Member aggregating 125,000 units for each regular session will be paid by the Clerk of the House of Representatives from the contingent fund of the House. One minute of a long-distance call equals four units. One word of a telegram equals two units.

	Units
Carried over from 1975	31,128
Allowance for 1976	125,000
Total available beginning 1976	156,128
Total units used, District of Columbia office	57,408
Total units used, District office	16,816
Total units used, telegraph	2,300
Total units used	76,524
Total units not used or not processed	79,604

As of December 31, unprocessed invoices are still pending as follows:

D.C. office telephones: September, October, November, December.

District office telephones: October, November, December.

Telegraph: October, November, December.

IV. STATIONERY ACCOUNT

Allowance certified, January 1976	$6,500.00
Redeposited to cover office expenditures by Representative Long	−145.00
Bills due but not cleared for payment	−107.06
Supplies for office operations, not reimbursed from other accounts	−373.52
Subtotal	5,874.42
Less balance on hand Dec. 31, 1976	−28.66
Cash withdrawn from account	5,845.76

At the beginning of each session, the Clerk of the House credits each Member with the full amount of the Stationery Allowance. The amount is immediately available in cash. Whether or not the amount is taken in cash by the Member, the Internal Revenue Service considers the full amount as having been constructively received by the Member as income. The Member is personally liable for income tax payments on the amount. Each Member reports the amount as personal income and pays taxes on any amount which he cannot offset with proper deductions for amounts spent on supplies or other Congressional needs.

THE MUNICIPAL FINANCIAL GUARANTEE ACT OF 1977—AN ACT TO ENABLE NEW YORK AND OTHER FINANCIALLY PRESSED CITIES TO OBTAIN CREDIT AT REASONABLE RATES AND TO FACILITATE THE REESTABLISHMENT OF INVESTOR CONFIDENCE IN THEIR BONDS

HON. EDWARD I. KOCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. KOCH. Mr. Speaker, I introduced today legislation which will enable financially troubled cities to obtain a moderate assist from the Federal Government. This legislation would authorize the Secretary of the Treasury to guarantee some or all of the bonds, notes, or other debt obligations of municipalities and States.

These guaranteed notes or bonds may be short term or have maturities as long as 30 years. The Secretary may extend guarantees only in cases in which he determines that there is a "reasonable prospect of repayment" by the municipality concerned. According to the terms of my proposal, those guaranteed municipal bonds would be taxable by the Federal Government, so that neither investors nor the municipalities involved would receive the double benefit of a federally guaranteed bond which is also tax free.

Mr. Speaker, some may think that this legislation is specially designed for New York City in order to relieve it of debt, while other more fiscally prudent cities receive no benefits. This is not the case, both because all cities are eligible to take advantage of the guarantee program and because all cities may find their own credit impaired, if the Federal Government allows New York City to default on some or all of its debt.

It is true that New York City is a prime candidate to take advantage of this legislation. In the short run, New York City might want to apply to use the authority this legislation would provide in order to raise the $1 billion necessary to repay city notes recently declared immediately payable by the New York State courts. In that decision the court of appeals voided the moratorium on payment imposed in 1975 for those short-term notes. New York City might also want to refinance the long- and short-term city debt in order to reduce carrying costs by as much as $200 million per year. Most importantly, when New York City seeks to reenter the bond market in July 1978, the date the existing Federal Seasonal Financing Act expires, this guarantee authority could enable New York City to make a smooth and successful reentry into the credit market.

In the last 2 years New York City has demonstrated its good faith by reducing its expenditures, by increasing its revenues, by projecting a balanced budget for fiscal 1978, and by introducing some of the most sophisticated and thorough financial accounting controls in existence anywhere in the country. What the city is now asking is a reasonable response from the Federal Government.

I have recently asked a number of persons concerned with New York City financial affairs for their opinions on this proposal, and when I receive answers, I hope to be able to share them with my colleagues in the weeks to come. For the benefit of those of my colleagues who would like to see the text of the proposal, I am appending a copy of the bill I introduced today:

H.R. —

A bill to authorize the Secretary of the Treasury to provide loan guarantees for the debts of municipalities

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Municipal Financial Guarantee Act of 1977".

FINDINGS

SEC. 2. The Congress finds that—

(1) at the present time, many cities and some States are unable to obtain at reasonable rates the credit necessary to continue essential governmental services because of the difficulties in restoring or continuing confidence in their financial integrity;

(2) because their underlying revenue bases remain strong, most of these cities and States

can restore investor and public confidence in their financial integrity, if they are permitted to refinance their present outstanding debt to provide for a sound and equitable system for retiring existing debt and to market such debt as is necessary to continue vital public services;

(3) because of the poor economic climate and past fiscal difficulties, many cities and some States may be unable to market municipal debt necessary to continue vital public services or to refinance their debt in an equitable manner and at reasonable interest rates unless the Federal Government restores investor confidence by guaranteeing the repayment of some or all of such municipal debt; and

(4) a bankruptcy or default by a State or city or a combination of them would be disastrous for the national financial markets (including the municipal and corporate credit markets), for the citizens of defaulting jurisdictions, and for citizens of all cities, towns, and States whose access to credit would be diminished and whose cost of borrowing would be increased.

DEFINITIONS

SEC. 3. For purposes of this Act—

(1) the term "municipality" means any State of the United States, the District of Columbia, or any city, county, town, township, village, or other general purpose political subdivision of a State.

(2) the term "municipal bond" means any bond issued by a municipality.

(3) the term "Secretary" means the Secretary of the Treasury.

GUARANTEE OF MUNICIPAL BONDS

SEC. 4. The Secretary is authorized, upon application by a municipality, to guarantee as hereinafter provided any bond to be issued by the municipality.

SECURITY FOR BONDS

SEC. 5. In connection with any bond guaranteed under this Act, the Secretary may require the municipality to provide such security as he deems appropriate. The Secretary may take such steps as he deems necessary to realize upon any collateral in which the United States has a security interest pursuant to this section to enforce any claim the United States may have against the municipality pursuant to this Act. Notwithstanding any other provision of law, Acts making appropriations may provide for the withholding of any payments from the United States to the municipality, either directly or indirectly, which may be or may become due pursuant to any law and offset the amount of such withheld payments against any claim the Secretary may have against the municipality pursuant to this Act.

LIMITATIONS AND CRITERIA

SEC. 6. A bond may be guaranteed under this Act only if the Secretary determines that there is a reasonable prospect of repayment of the loan in accordance with its terms and conditions and if such bond is payable in not more than 30 years. The Secretary may require such terms and conditions as he may deem appropriate to insure repayment. The Secretary is authorized to agree to any modification, amendment, or waiver of any such term or condition as he deems desirable to protect the interests of the United States.

REMEDIES

SEC. 7. The remedies of the Secretary prescribed in this Act shall be cumulative and not in limitation of or substitution for any other remedies available to the Secretary or the United States.

FUNDING

SEC. 8. There are authorized to be appropriated such sums as may be necessary to carry out this Act.

INSPECTION OF DOCUMENTS

SEC. 9. At any time a request for a guarantee is pending or a bond which is guaranteed is outstanding under this Act, the Secretary is authorized to inspect and copy all accounts, books, records, memorandums, correspondence, and other documents of the municipality relating to its financial affairs.

AUDITS

SEC. 10. No bond may be guaranteed under this Act unless the General Accounting Office is authorized to make such audits as may be deemed appropriate by either the Secretary or the General Accounting Office of all accounts, books, records, and transactions of the municipality involved, and any agency or instrumentality of such municipality. The General Accounting Office shall report the results of any such audit to the Secretary and to the Congress.

TAXATION OF BOND INTEREST

SEC. 11. Section 103(b) of the Internal Revenue Code of 1954 is amended to read as follows:

"(b) EXCEPTIONS.—

"(1) Subsection (a)(1) not to apply.—Subsection (a)(1) shall not apply to interest on any municipal bond guaranteed pursuant to the Municipal Financial Guarantee Act of 1977.

"(2) Subsection (a)(2) not to apply.—Subsection (a)(2) shall not apply to interest on obligations of the United States issued after September 1, 1917 (other than postal savings certificates of deposit, to the extent they represent deposits made before March 1, 1941), unless under the respective Acts authorizing the issuance thereof such interest is wholly exempt from taxes imposed by this subtitle."

EFFECTIVE CONTROL OVER THE PROLIFERATION OF NUCLEAR EXPLOSIVES

HON. MELVIN PRICE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. PRICE. Mr. Speaker, today I am introducing a bill to provide for more efficient and effective control over the proliferation of nuclear explosives throughout the world.

The purpose of the bill is:

First. To establish a comprehensive proliferation control policy of the United States which includes major proposed initiatives on the part of this Government with other nuclear supplier states and other countries of the world to strengthen, standardize and make more effective the international regimes for safeguarding and controlling the export of nuclear material, facilities, components and technology which could be of significance from the standpoint of the proliferation of nuclear explosives; and

Second. To clarify and strengthen the criteria which this Government will itself apply, pending further international agreements.

The bill would accomplish the foregoing principal purposes in the following manner:

INITIATIVES TO STRENGTHEN INTERNATIONAL NUCLEAR COOPERATION

First. The bill includes a declaration of policy and purpose by the Congress which, in essence, reaffirms the commitment of the United States to continue to urge the widest possible adherence to the Treaty on the Nonproliferation of Nuclear Weapons—"the Treaty"—and the Statute of the International Atomic Energy Agency—"Statute".

Second. The bill states the initiatives which the United States, as a matter of national policy, will initiate to strengthen international controls over the proliferation of nuclear explosives. These initiatives include the following:

The assurance to other nations that the United States is prepared to serve as a reliable supplier of nuclear fuel services to those countries which agree to adhere to policies designed to prevent the proliferation of nuclear explosive devices;

The initiatives which the United States shall institute immediately with other nations, including the nuclear supplier nations, to seek binding international arrangements which will establish agreed-to international criteria to govern all nuclear exports which could be of significance from the standpoint of the proliferation of nuclear explosives;

The initiatives which the United States shall institute immediately to endeavor, in concert with other nations, to strengthen the effectiveness of the International Atomic Energy Agency—"the Agency"—so that the Agency can effectively implement nuclear safeguards and other controls on the proliferation of nuclear explosive devices;

Initiatives which the United States shall immediately institute with other nations through the Agency to achieve international agreement on: international physical security standards and procedures for applying those standards, procedures to be followed in the event that any nation violates the Treaty, and procedures for recovering stolen or diverted nuclear materials; and

Initiatives which the United States shall immediately institute to explore the feasibility of and framework for nuclear fuel cycle facilities, including the location of a number of such facilities at specific sites, under effective international management, control, auspices, and inspection.

Third. The President, at the earliest practicable date after the enactment of the act would be required to issue regulations and proposed regulations as may be necessary to implement the national policies and initiatives in the bill.

CLARIFICATION AND STRENGHTENING OF U.S. NUCLEAR EXPORT CONTROLS

First. The bill would amend section 123 of the Atomic Energy Act, which provides the procedure for Presidential and congressional approval of agreements for cooperation with other nations, in the following manner:

To require that all agreements for cooperation for civil uses of nuclear energy be negotiated by the Secretary of State with the technical assistance and concurrence of the Administrator of the Energy Research and Development Administration and to require that such proposed agreements be submitted to the President jointly by the Secretary of State and by the Administrator;

To require that a proposed agreement be accompanied by the views of the Director of the Arms Control and Disarmament Agency;

To provide for an additional term and condition to be included in all future agreements for cooperation which would require that the other nation which is a party to the agreement, upon the request of the Government of the United States, consult with the United States for the purpose of determining whether the terms and conditions of the agreement relating to safeguards, other control mechanisms, and the peaceful use assurances contained therein should be amended;

To provide explicitly that all nuclear explosives, regardless of their purpose, are forbidden under all future agreements for cooperation for civil uses;

To provide that all future proposed agreements for cooperation and amendments to agreements for cooperation which are submitted to the Congress will be referred jointly in the Senate to the Joint Committee on Atomic Energy and the Foreign Relations Committee of the Senate, and in the House to the Joint Committee on Atomic Energy and the International Relations Committee of the House; and

(f) To provide that the Nuclear Regulatory Commission shall promptly furnish to such committees its views as to whether the safeguards and other controls included in a proposed agreement for cooperation which the President has submitted to the Congress provide an adequate framework to assure that nuclear exports thereunder will not be inimical to or constitute an unreasonable risk to the common defense and security.

Second. The bill would require the President to make every reasonable effort through consultation with other governments to assure that all agreements for cooperation for civil uses of nuclear energy which are in effect prior to the effective date of this act provide, either directly or through mutual understanding, for nonproliferation controls.

Third. The bill would require the Energy Research and Development Administration, prior to executing any subsequent arrangement under an existing agreement for cooperation, to obtain the prior concurrence of the Secretary of State and to consult with and take into full consideration the recommendations of other concerned agencies in the executive branch and the Nuclear Regulatory Commission.

Fourth. The bill would amend section 54 of the Atomic Energy Act to limit the authority of the Energy Research and Development Administration to export any special nuclear material other than under an export license granted by the Nuclear Regulatory Commission only to small quantities of special nuclear material which do not have significance for nuclear explosive purposes and which are either contained in instruments, medical devices or laboratory samples, or the distribution of which is needed to deal with an emergency situation in which time is of the essence.

Fifth. The bill would amend subsection 57b of the Atomic Energy Act to require that any approval by the Administrator of Energy Research and Development, under this authority, for the export of sensitive nuclear technology shall be only after prior consultation with the Department of State, the Arms Control and Disarmament Agency and the Nuclear Regulatory Commission.

Sixth. The bill would add a new section 111, "Export Licensing Procedures," to the Atomic Energy Act which provides for procedures to be followed to assure that the Nuclear Regulatory Commission obtains the views of all concerned agencies in the executive branch in making its licensing determinations regarding any nuclear export which could be of significance for nuclear explosive purposes.

Seventh. The bill would add a new section 112, "Principles Governing United States Nuclear Exports," to the Atomic Energy Act which the Nuclear Regulatory Commission must apply to all nuclear exports which could be of significance for nuclear explosive purposes. If, after applying these principles and performing its other statutory responsibilities, the Commission is unable to determine whether issuance of the proposed export license would be inimical to the common defense and security, or if the Commission determines that the issuance of the proposed license would be inimical to the common defense and security, that determination would be submitted to the President for his review. In such circumstances, the President, by Executive order effective not less than 60 days following its date of promulgation, could approve the export if he determines and certifies to the Congress that the export is required to avoid a serious adverse effect on significant U.S. foreign policy or national security objectives and does not substantially assist a nonnuclear weapon state in acquiring or developing nuclear explosives, and that he has received reliable assurances from the recipient country that it will not use the export to acquire, develop, or assist in the development of any nuclear explosives.

Eighth. The bill would amend section 109, "Component Parts of Facilities," in the Atomic Energy Act for the purpose of assuring that the Nuclear Regulatory Commission itself must license the exports of all component parts of nuclear facilities and such other items or substances which are intended for end use in such a facility if such component, item or substance is especially relevant from the standpoint of export control because of its significance for nuclear explosive purposes. All other items which could be of significance for nuclear explosive purposes but the end use of which is not known to be for nuclear purposes would be controlled by the Department of Commerce.

Ninth. The bill would provide for enhanced congressional oversight over nuclear export activities:

By providing for a comprehensive report from the President on the progress which is being made to carry out the initiatives called for in this act; and

By requiring that the Department of State, the Arms Control and Disarmament Agency, and the Department of Commerce keep the Joint Committee on Atomic Energy, the Senate Foreign Relations Committee, and the House International Relations Committee fully and currently informed with respect to their activities in the proliferation area to effectuate the purposes and policies of this act.

Tenth. The bill would authorize an additional $2 million for U.S. contributions to the International Atomic Energy Agency. It would also authorize for fiscal year 1978 an additional sum of $2,500,000 to permit the Nuclear Regulatory Commission to equip itself to carry out its responsibilities with regard to nuclear exports.

CHARLES H. WILSON REINTRODUCES CHARITY DISCLOSURE LEGISLATION

HON. CHARLES H. WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. CHARLES H. WILSON of California. Mr. Speaker, today I will introduce a bill which is certain to be among the most important pieces of consumer legislation to be considered by the 95th Congress. This bill, a refined version of H.R. 10922 which I sponsored in the last Congress, would require organizations soliciting charitable contributions from the public to disclose some basic information about how that money is to be spent, and thereby protect the American public and responsible charities from dishonest moneymaking schemes and grossly inefficient operations.

Last year H.R. 10922 was approved by the House Committee on Post Office and Civil Service by voice vote, but did not reach the floor for consideration. Now, with endorsements for the legislation from such well-known organizations as the American Heart Association, the American Lung Association, the National Kidney Foundation, and the Arthritis Foundation, among others, I am confident that we will see enactment of the bill before the end of this Congress.

Mr. Speaker, we as Americans should be very proud indeed of the level of support for worthy charitable organizations, and of all the good work these groups have done. I believe that strong voluntary support for philanthropic enterprises is one of the best indications of our spirit as a nation.

Last year, it has been estimated, Americans gave nearly $29 billion to charities.

Despite the staggering magnitude of money raised, however, there is no Federal requirement that an organization provide any basic information at the time of solicitation to explain what the charitable purpose actually is, or how much of the money received in the previous year actually was spent directly for that charitable purpose, as contrasted to fundraising and administrative costs.

Contributors must have blind faith that their hard-earned money will be

spent prudently and for the purpose originally claimed.

The legislation which I introduce today will give the potential contributor, for the first time, a straight forward disclosure so that he or she can make a more educated judgment about which organization to give to.

Mr. Speaker, in recent years evidence of the need for such legislation has mounted.

Most notable, of course, has been the case of the Pallottine Fathers in Baltimore. Their fundraising operation raised over $20 million, but less than 5 percent of that amount actually went to the ostensible charitable purpose.

Another example is that of the Gorman brothers, two fundraisers who collected almost $800,000 in a 9-month period for families of slain police officers, but kept over $600,000 of that amount for "expenses."

Several years ago Vice President-elect MONDALE, in hearings before a Senate subcommittee, found numerous other cases of mismanagement and apparent fraud in the charity field. The Vice President-elect is now a strong supporter of financial disclosure by charitable organizations.

All of which leads to the obvious conclusion that, while most charitable organizations do an outstanding job, there is a need for some measure to protect the public against charity ripoffs.

While some have suggested various regulatory action, I believe that undue Government regulations, which could lead to Government control of philanthropy in this country is not a wise course to take.

Instead, what my disclosure bill does is simply require that a charity provide the public with some basic financial information at the time of solicitation. If the charitable organization were to feel any need to explain any of the data supplied in order to comply with the provisions of the bill, then that organization could do so within the solicitation. If the Pallottine Fathers could convince anyone to contribute to them, once the party receiving the solicitation knew that less than a nickel of every dollar received would go to the charitable purpose, then so be it. Let the public make the decision.

Specifically, the bill would require a charitable organization which solicits "in any manner or through any means, the remittance of a contribution by mail" to state at the time of solicitation its legal name and principal business address, the purpose of the solicitation and the intended use of the contribution, and the percentage of the previous year's contributions which acutally went to the charitable purpose—as opposed to fundraising and administrative costs. Also, the organization must provide more detailed financial information upon written request and state that such information is available.

One of the most important elements of my legislation is that compliance will not burden legitimate charities. Most reputable charities already break down costs in a manner required by this legislation.

Indeed the National Kidney Foundation, in a genuine display of leadership, has developed some materials this year which voluntarily comply with the legislation.

Accounting guideposts for compliance will be developed by the Postal Service. These regulations shall conform to generally accepted accounting principles as manifested in such documents as "Audit Guides," published by the American Institute of Certified Public Accountants; "Standards of Accounting and Financial Reporting for Voluntary Health and Welfare Organizations," published by the National Health Council; and "College and University Business Administration," published by the National Association of College and University Business Officers.

The effective date for the legislation would be 3 years after enactment. By doing this we can insure that the U.S. Postal Service will have adequate time to carefully consider the issues involved in the development of necessary regulations, and make them as clear and concise as possible. Also, the additional time will provide charitable organizations with an opportunity to carefully integrate the disclosure requirements into their solicitation packages. Most importantly this time delay will allow responsible charitable organizations to embark immediately upon an information program to better educate the public about the business of fundraising before the actual disclosure requirements would go into effect in 3 years.

In summary, Mr. Speaker, this is a very reasonable approach to a problem, and I think any American who contributes to a charity will benefit from the information provided under this bill. I am hopeful that the new Committee on Post Office and Civil Service will take prompt action on the measure after hearings provide interested parties the opportunity to voice their comments about the bill.

As I have been from the beginning, I am open to any constructive proposal which will improve the bill.

A copy of the legislation as introduced today follows:

H.R. —

A bill to amend title 39, United States Code, to require the furnishing of certain information in connection with the solicitation of charitable contributions by mail, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) chapter 30 of title 39, United States Code, is amended by adding at the end thereof the following new section:

"§ 3012. Soliciting charitable contributions by mail

"(a) Any charitable organization which solicits, in any manner or through any means, the remittance of a contribution by mail, shall include with such solicitation the following information:

"(1) the legal name and the principal business address of the charitable organization making the solicitation;

"(2) the purpose of the solicitation and the intended use of the contribution solicited;

"(3) the obligation of the charitable organization to furnish information in accordance with the provisions of subsection (d) of this section;

"(4) the percentage of all contributions for the charitable purpose of the organization which remained for direct application to such charitable purpose after deducting all fundraising and management and general costs during the most recent complete fiscal year of the organization, except that if the solicitation is made during the 6 month period immediately following the close of such fiscal year, such costs may be based upon the fiscal year preceding such fiscal year; and

"(5) in the case of a federated fundraising organization, the portion of all contributions distributed or allocated by such organization to its member organizations, during the most recent complete fiscal year of the organization which remained for direct application by such member organizations to the charitable purpose involved, after deductions described in paragraph (4) of this subsection are made by such federated fundraising organization and by its membership organizations, except that if the solicitation involved is made during the 6 month period immediately following the close of such fiscal year, information relating to such portion of contributions may be based upon the fiscal year preceding such fiscal year.

"(b)(1) In the case of a written solicitation which requests the mailing of contributions and which is subject to the provisions of subsection (a) of this section, the information required to be included with such solicitation by subsection (a) of this section shall be presented in language which is readily understandable by those persons to whom the solicitation is directed, shall be located in a conspicuous place on such solicitation, and shall appear in conspicuous and legible type in contrast by typography, layout, or color with other printed matter on such solicitation.

"(2) In the case of a solicitation which is subject to the provisions of subsection (a) of this section and which is made through the use of radio or television communications, the information required to be included with such solicitation by subsection (a) of this section—

"(A) shall be presented in language which is readily understandable by those persons to whom the communication is directed;

"(B) in the case of a radio communication, shall be clearly audible; and

"(C) in the case of a television communication, shall (i) appear in lettering of sufficient size to be readily legible to the viewer; (ii) be shown against a background which does not impair the legibility of such communication; (iii) remain in view for a period sufficient to enable the viewer to read such communication; and (iv) if presented in audio form, be clearly audible.

"(3) Any solicitation which is made through the use of radio or television communications and which does not exceed 60 seconds in duration shall not be subject to the provisions of subsection (a) of this section.

"(c) Any charitable organization which makes a solicitation which requests the mailing of contributions and which is subject to the provisions of subsection (a) of this section, or any charitable organization which receives any grant or allocation from any federated fundraising organization which requests the mailing of contributions and which is subject to the provisions of subsection (a) of this section, shall, upon request by the Postal Service, furnish to the Postal Service such audit reports, accounts, or other information as the Postal Service may require to establish or verify information which such organization is required to include in solicitations in accordance with subsection (a) of this section.

"(d) Any charitable organization which makes a solicitation which requests the mailing of contributions and which is subject to

the provisions of subsection (a) of this section shall, no later than 30 days after the receipt of a request from any person receiving such solicitation, furnish to such person a pertinent financial statement prepared in accordance with generally accepted accounting principles, for the most recent complete fiscal year of the organization, which is reasonably sufficient to verify any information included in the solicitation involved in accordance with paragraphs (3), (4), and (5) of subsection (a) of this section. If the solicitation involved is made during the 6 month period immediately following the close of the most recent complete fiscal year of the charitable organization, then the financial statement required by the preceding sentence may be based upon the fiscal year preceding such fiscal year.

"(e) The Postal Service shall adopt rules and regulations which establish the accounting methods and procedures to be used by charitable organizations to assure compliance with the provisions of this section. Such accounting methods and procedures shall conform to any generally accepted accounting principles applicable to the field of operation of the charitable organizations involved.

"(f) Any charitable organization which has revenues from any source, in addition to receipts from contributions, may, for purposes of complying with the provisions of paragraph (4) of subsection (a) of this section, apportion management and general costs, other than fundraising costs, between receipts from contributions and receipts from other sources. Any such apportionment shall be made in the manner specified by rules and regulations adopted by the Postal Service.

"(g) The provisions of subsection (a) of this section shall not apply to any bona fide membership organization with respect to any solicitation for contributions by mail made by such organization exclusively to the members of such organization.

"(h) The provisions of subsection (a) of this section shall not apply to any school, college, or university with respect to any solicitation for contributions made by such institution exclusively to its students, alumni, faculty, members of governing boards and appointed committees, or a member of the family of any such individuals, nor to any charitable organization which is authorized by and exclusively makes expenditures to or for the benefit of a school, college, or university with respect to any solicitation for contributions made by such organization exclusively to any such individuals.

"(i) For purposes of this section—

"(1) The term 'charitable organization' means any person (including any individual, organization, partnership, association, trust, society, foundation, group, or corporation, or any combination of them) which is organized, or which claims to be organized, for any charitable, benevolent, philanthropic, humane, patriotic, scientific, literary, medical, religious, or educational purpose, or for the prevention of cruelty to children or animals, or for any other eleemosynary purpose;

"(2) the term 'contribution' means the promise, grant, gift, or pledge of any money or property of any kind for any charitable, benevolent, philanthropic, humane, patriotic, scientific, literary, medical, religious, or educational purpose, or for the prevention of cruelty to children or animals, or for any other eleemosynary purpose;

"(3) the term 'federated fundraising organization' means a charitable organization established for the purpose of raising and distributing money for and among affiliated charitable organizations in any case in which affiliation with, or membership in, such organization does not confer operating authority and control by any individual charitable organization upon any other individual charitable organization;

"(4) the term 'membership' does not include any case in which an organization confers a membership on any person solely as a consideration for making a contribution; and

"(5) the term 'written solicitation' includes any request for the remittance of a contribution which is made through the use of any letter (other than a letter to any individual with whom the individual transmitting such letter is personally acquainted), circular, notice, brochure, advertisement, or other written material which is (A) mailed or delivered by any means to the individual receiving the solicitation; or (B) displayed in any newspaper, magazine, or other periodical or printed matter, or which is displayed on any billboard, poster, or other device for the display of written, printed, or graphic matter.".

(b) The table of sections for chapter 30 of title 39, United States Code, is amended by adding at the end thereof the following new item:

"3012. Soliciting charitable contributions by mail.".

SEC. 2. Section 3005(a) of title 39, United States Code, is amended by inserting immediately after "means of false representations" the following: "or for a charitable purpose without complying with the provisions of section 3012 of this title,".

SEC. 3. (a) Except as provided in subsection (b), this Act shall take effect 3 years after the date of the enactment of this Act.

(b) The authority of the United States Postal Service to adopt rules and regulations to carry out the provisions of section 3012 of title 39, United States Code, as added by subsection (a) of the first section of this Act, shall take effect on the date of the enactment of this Act, except that such rules and regulations shall not take effect before the close of the period specified in subsection (a) of this section.

OUR NATION SALUTES THE PASTOR AND PARISHIONERS OF OUR LADY OF MOUNT VIRGIN CHURCH OF GARFIELD AND LODI, N.J., UPON THE CELEBRATION OF THE DIAMOND JUBILEE OF THEIR CHURCH AND THE SILVER ANNIVERSARY OF THEIR SCHOOL

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. ROE. Mr. Speaker, as the curtain descends upon our Nation's Bicentennial celebration, it is indeed an honor and privilege to call to the attention of you and our colleagues here in the Congress a most historic event that occurred in my congressional district. Our Lady of Mount Virgin Church of Garfield and Lodi, N.J., has celebrated the 75th anniversary of the founding of its parish and the 25th anniversary of the opening of its parochial school.

The events of the jubilee celebration will be commemorated this year in a history and journal that is being prepared under the auspices of the esteemed pastor, Rev. Joseph F. X. Cevetello and the parishioners of Our Lady of Mount Virgin Church. With your permission, I would like to insert at this point in our historic journal of Congress a brief profile on the background of the church's administration since its founding, as follows:

OUR LADY OF MOUNT VIRGIN PARISH

In 1901 Masses were celebrated in Garfield, New Jersey for Italian speaking families and in 1903, Most Reverend J. J. O'Connor, Bishop of Newark, gave Reverend Alfonso D'Angelo permission to formally open a mission for the Italians in Garfield. In 1904, Father D'Angelo, now appointed pastor, built a temporary chapel on Frederick Street and Grenelle (MacArthur) Avenue. On November 27, 1927, the present building was dedicated by Bishop O'Connor.

Father D'Angelo was succeeded by Reverend Joseph A. Dooling in 1930. During Father Dooling's pastorate, the interior of the church was gutted by fire. Up to this time, the building consisted of two floors—the upper being the church and the lower the auditorium. In remodeling the building, Father Dooling eliminated the auditorium, thus giving us the church as we have it today. Archbishop Joseph Walsh of Newark dedicated the renovated church November 27, 1940.

In 1946 the Reverend Charles P. Casserly was appointed administrator of Mount Virgin Parish and in 1951 he was given the title of Pastor. During his years as spiritual leader of the Mount Virgin Christian Community, Father Casserly built the school and rectory and provided a large convent for the sisters. In 1966 Father was appointed pastor of St. Matthew's Parish in Ridgefield, New Jersey.

The Reverend Sylvester Livolsi took over as administrator in 1966 and in 1972 was succeeded by the Reverend Joseph F. X. Cevetello, the present pastor.

Mr. Speaker, may I also commend to you the following birthday greetings expressed by Father Cevetello which so eloquently expresses the warmth of friendship and spiritual leadership that have emanated in a sterling tradition of faith, hope, and charity established throughout the past three-quarters of a century under his direction and that of his predecessor pastors: Rev. Alfonso D'Angelo, Rev. Joseph A. Dooling, Rev. Charles P. Casserly, and Rev. Sylvester Livolsi:

HAPPY BIRTHDAY, MOUNT VIRGIN

"This is the day which the Lord has made", the Scriptures tell us. "Let us rejoice and be glad." We rejoice and are glad because Our Lady of Mount Virgin Parish is celebrating its Diamond Jubilee and the school its Silver Jubilee. For seventy-five years, this parish has been ministering to the People of God, preaching Christ's message and administering his sacraments. Over 2,500,000 Communions have been administered so far. Since its founding, 13,420 have been baptized and 4,289 couples have had their marriage blessed. Literally, thousands have been confirmed. Only God knows how many have received the consolation of the sacraments while sick and dying. The offices of the rectory hold the secrets and problems of many who came for help and consolation. Millions upon millions of words of instruction, admonition, consolation and encouragement have been spoken from the Mount Virgin pulpit by many dedicated pastors and associate pastors. It has been estimated that well over 85,000 Masses have been celebrated in the parish during these past seventy-five years. The number of people attending these Masses is known to God alone.

Thousands of students have entered the portals of our school which has served the young for twenty-five years. Thousands have graduated and are making their mark in the world. This is due, in great part, to the priests, sisters and lay teachers who have instructed and prepared them—often at great sacrifice. Mount Virgin School can

boast priests, sisters, brothers, doctors, lawyers, mothers, fathers, etc. Its greatest boast is that it has prepared the young to be future citizens of Heaven and the United States.

How can we ever thank the priests, sisters and lay people, many long since gone to their eternal reward, for their zeal and dedication in the cause of Christ through Mount Virgin Parish. Those of the past and of the present can leave their reward in the Hands of God. He knows best what they so well deserve.

I thank our loyal parishioners and hope the others will imitate you. I thank my coworkers—priests, sisters, lay teachers, school staff, rectory staff, committees, societies and all others. Without your cooperation, I could not function as pastor.

I thank the various Diamond and Silver Jubilee Committees which are functioning so well under the General Chairmanship of Joseph Cimino.

Parishioners of Mount Virgin! Mount Virgin has been good to you over the years; she has tried to lead you to God! Don't let her down when she needs you!

Happy Birthday, Mount Virgin! May your children be a credit to God, their Church, you, their families and themselves.

Our Lady of Mount Virgin protect your children. Dear God, bless each and everyone of them.

Father JOSEPH F. X. CEVETELLO.

Mr. Speaker, I am pleased to have this opportunity to seek national recognition of the distinguished pastors and congregation of Our Lady of Mount Virgin Church. In their dedication and devotion to our people, in service to God and mankind, Father Cevetello and the former pastors of the church, through their noble deeds and quality leadership have truly enriched the cultural, educational, and religious endeavors of our community, State, and Nation. We do indeed salute them and the members of Our Lady of Mount Virgin Church of Garfield and Lodi, N.J.

POOR RICHARD CLUB OF PHILADELPHIA OBSERVES FRANKLIN DAY

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. EILBERG. Mr. Speaker, on Monday, January 17, 1977, our fellow citizens will observe the 271st anniversary of the birth of Benjamin Franklin, the first major diplomat and member of a Foreign Service of our country, our first Postmaster General, founder of hospitals and universities in Philadelphia, and truly a citizen of the world.

Again, on this date, the Poor Richard Club of Philadelphia will conduct its annual Franklin Pilgrimage to the historic shrines of colonial Philadelphia which commemorate the contributions which Benjamin Franklin made to this country.

The members of the Poor Richard Club, which is the oldest and most widely recognized organization of men and women in the communications arts and industry—joined by a representative of the President of the United States, the Governor of Pennsylvania, the mayor of Philadelphia, and a number of the historic and learned societies of Philadelphia will visit Benjamin Franklin's grave, Christ Church, the memorial to Benjamin Franklin at the site of the first fire station in Philadelphia, Independence Hall, and the Franklin Institute—carrying out a program of historic tribute to this great statesman.

On the evening of January 17 the Poor Richard Club will hold its 71st annual banquet at the Benjamin Franklin Hotel in Philadelphia at which time they will present their Gold Medal of Achievement to a truly distinguished citizen of our country.

This award is one of the prize awards of many years in the field of communications and communications media throughout the United States. Previous recipients include Generals Dwight D. Eisenhower, Douglas MacArthur, Henry M. "Hap" Arnold, and a number of figures in the industrial world, including Henry Ford, Clare Booth Luce, John Knight, William Paley, Gen. David Sarnoff and his son, Robert, Walt Disney, and Bob Hope.

Ths year's recipient is Donald H. McGannon, chairman of the board and president of Group W, Westinghouse Broadcasting Co.

Apart from Westinghouse Broadcasting, Mr. McGannon is active in broadcasting and community affairs, and an officer of many industry and advertising organizations.

He is a trustee or adviser to seven institutions of higher learning and serves with several governmental agencies and groups. He is chairman of the Connecticut Commission for Higher Education, president and trustee of the National Urban League, and a member of the steering committee of the National Urban Coalition.

In March 1972 Mr. McGannon was elected chairman of the Advertisting Council, the first broadcaster so selected. The Advertising Council is the public-service arm of business which conducts public-service advertising campaigns on social problems facing the Nation. He is an honorary chairman of the Advertising Council.

Mr. McGannon has been the recipient of honors from broadcasting and nonbroadcasting organizations, among them the Trustees Award of the National Academy of Television Arts and Sciences, 1968; the Distinguished Service Awards of the National Association of Broadcasters, 1964; the National Catholic Office for Radio and Television, 1970; and the Frederick Douglass Award of the New York Urban League, 1969.

He has received honorary degrees from Fordham University, the University of Scranton, Creighton University, St. Bonaventure University, Emerson College, Fairfield University, the College of Steubenville, St. Joseph's College, Clark College, and Temple University. He was a founder and is a trustee of Sacred Heart University, Bridgeport, Conn. He is a past member of the Connecticut Transportation Authority, the Connecticut Scholarship Commission, and the Connecticut Committee on Environmental Policy.

He was founder of the Broadcast Skills Bank—later renamed the Employment Clearing House under the direction of the National Association of Broadcasters—a national effort to seek out, train, employ, and upgrade minority-group manpower in the broadcast industry.

Mr. McGannon is a member of the bar in the States of New York and Connecticut and he proudly served our country as a major in the U.S. Army during World War II.

He merits, deservedly and richly, to take his place among the illustrious recipients of the Gold Medal of the Poor Richard Club.

I believe, Mr. Speaker, it is fitting for us to recognize both the contributions of Mr. McGannon to this country and, at the same time, the tremendous contributions which the Poor Richard Club has made in the field of communications and community service throughout all of these years. This club merits recognition for its initial sponsorship of the Franklin Institute, the formation of the Better Business Bureau, and their work in the preservation of the historic shrines in Philadelphia including their contribution to Christ Church. Most recently they are forming an alliance of all the communications clubs in Philadelphia to give a stronger voice and more awareness to the importance of mass communications in our society.

WORLD MEDICAL CAPITAL

HON. JOHN M. MURPHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. MURPHY of New York. Mr. Speaker, little more than a decade ago, polio was a killer disease. Today, of course, it is almost nonexistent in America. Just a short time ago, we thought measles was an illness every child must experience. But a whole generation of children has grown up without ever having had it. In the very near future, we will have found lifesaving treatments for other dreaded diseases.

These discoveries have been made in research and medical school laboratories here in America because we are a country dedicated to quality health care for all of our people. It is especially important now, threatened by budgetary limitations, that we do not relax in our struggles to conquer disease.

It gives me great pleasure today, therefore, to be able to point with pride to a recent editorial in the Sunday New York Times, citing New York City as "the medical capital of the world." New York, a city in the news most frequently for its urban problems, can point with justifiable pride to the fact that it is the Nation's leading medical education center. New York State, in fact, has no peer in this vital area. It provides more than 10 percent of the country's total medical education, each school representing a paragon for excellence in its field.

You will surely recognize the names of these institutions. They have all fig-

ured so prominently in many of the medical findings during the past century and they have helped to elevate the level of medical care now dispensed in our medical centers and hospitals throughout our country.

The schools I am talking about are: Albany Medical College, Albert Einstein College of Medicine, Columbia University College of Physicians and Surgeons, Cornell University Medical College, Mount Sinai School of Medicine, New York Medical College, New York University School of Medicine, University of Rochester School of Medicine and Dentistry, State University of New York-Buffalo, SUNY-Downstate Medical Center, Stony Brook Medical College, and Upstate Medical Center at Syracuse.

These medical schools, even within the framework of rigid budgetary cutbacks, continue to do an outstanding job. It is with great pleasure that I call upon you to join in the spirit of the words of praise in the New York Times editorial, whose text I am including here:

WORLD MEDICAL CAPITAL

Ebullient as ever, Hubert Humphrey walked out of Memorial Sloan-Kettering Cancer Center here the other day after major surgery declaring, "God I love New York . . . I feel fine and eternally grateful to the doctors here." And of his convalescence, he said, "I'll be swimming and walking and, God knows, I'll be talking."

As a Senator from Minnesota, Mr. Humphrey normally divides his time between Washington, D.C. and his home state. Both communities have fine hospitals and excellent doctors. But when Senator Humphrey found his life threatened by cancer and required the best possible treatment, he chose a New York City hospital. He was not alone, of course, for each year tens of thousands of people—Americans and foreigners as well—come from distant places for medical treatment here. They recognize what is too often forgotten, that New York City is in many ways the medical capital of the world, having more centers of excellence for more serious ailments than any other single community.

At the core of New York City's abundant medical excellence are its seven medical schools. They have trained a disproportionately high share of the nation's doctors. Recurrent Nobel Prizes testify to the quality of their research. And each year the medical schools and affiliated hospitals treat hundreds of thousands of patients on an inpatient or ambulatory basis.

In these days of New York City's economic problems, it is not amiss to point to the importance of these medical schools and their affiliated hospitals as economic as well as humanitarian assets. In 1974–1975 alone, the schools brought some $170 million in Federal and private funds for research, teaching and service to the city, funds that in turn were translated into thousands of jobs. More recently, City College has established a pioneering biomedical program which, in cooperation with the local medical schools, offers medical training to able but disadvantaged youths.

Anyone analyzing New York's prospects must take account of the present contribution and future potential of the medical centers that are among Gotham's greatest glories.

STATEMENT TO ACCOMPANY INTRODUCTION OF BILL TO EXTEND FROM JUNE 30, 1977 TO SEPTEMBER 30, 1978 THE AUTHORITY FOR PAYMENT OF ENLISTMENT AND REENLISMENT BONUSES

HON. MELVIN PRICE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. PRICE, Mr. Speaker, at the request of the Department of Defense, the distinguished gentleman from California (Mr. BOB WILSON) joins me in introducing a bill to amend chapter 5 of title 37 of the United States Code to extend the expiration date of the enlistment and reenlistment bonus provisions from June 30, 1977 to September 30, 1978.

It is essential that action be taken by the Congress at an early date to extend this authority to avoid creating a situation in which the Armed Forces are seriously hampered in their efforts to recruit enlisted personnel, particularly for the combat arms.

As Members of the House are aware, the Armed Forces are now attempting to meet their manpower needs through voluntary enlistments. Among the tools provided by Congress to assist the military departments to meet these needs were the enlistment and reenlistment bonus authorities.

The Department of Defense is not completely satisfied with the current bonus provisions, and submitted a legislative proposal to the 94th Congress to revise the present enlistment and reenlistment bonus provisions and to make these revisions permanent. However, because of the pressures of other matters, the Committee on Armed Services was unable to consider that proposal before adjournment of the 94th Congress.

We have been informed that a similar proposal will be forwarded to the 95th Congress.

I am sure the Members are all aware that under the Congressional Budget and Impoundment Control Act first priority for action by the Committee on Armed Services must of necessity be the Military Procurement Authorization Act for fiscal year 1978. This will make it impossible for at least several months to conduct the in-depth study needed to consider adequately a revised bonus proposal.

In the meantime, however, the military departments are faced with immediate recruiting and retention problems as the result of the pending expiration on June 30, 1977, of the present enlistment and reenlistment bonus authority.

One example of the need for early action involves the delayed entry program. Under that program, the Army and the Marine Corps enlist young people, often still in school, into the inactive Reserve, with a commitment to enter on active duty up to 12 months in the future. Various active duty options are available, including a 4-year enlistment in the Regular Army and Marine Corps for service in a designated skill—primarily the combat arms. Selection of this option entitles the enlistee to receive an enlistment bonus. Since no authority currently exists for offering that bonus to persons who commit themselves to enter active duty on or after June 30, 1977, the Army and Marine Corps are currently seriously handicapped in their efforts to recruit high school students who graduate during June 1977, The inability of the Army and Marine Corps to offer the bonus to these young people will seriously hamper those services in meeting combat arms recruiting requirements.

To resolve this dilemma, we propose simply to defer the expiration of that authority from June 30, 1977 to September 30, 1978. That action will enable the military departments to continue their current recruiting programs and give the committee an opportunity later in the session to review in detail the Department's proposal for revising the present law.

RESTORATION OF BASIC HUMAN RIGHTS SHOULD BE GIVEN PRIORITY

HON. CHRISTOPHER J. DODD

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. DODD. Mr. Speaker, on this first day of the 95th Congress, I would like to call attention to the countless violations of basic human rights that are taking place in numerous countries all over the world, and to express my hope that a vigorous commitment to the cause of human rights will become one of the priorities of the new administration and of the new Congress.

In the past several years, the tendency of the foreign policy establishment has generally been to ignore the abuses suffered by peoples in countries in which we have an interest, and to pursue our trade, aid, and negotiating relationships with those countries regardless of their internal situations.

This predilection, I believe, is wrong. We do have a moral responsibility to concern ourselves with the human rights of citizens in all countries. And if those citizens—be they under a rightist or a Communist regime—are being denied the freedoms which we uphold. I feel very strongly that we must make it our business to express our indignation, and to do what we can to right those wrongs.

I do feel also that we are at the beginning of a new era. Last year, the Congress passed legislation which mandates that policymakers take human rights issues into account when establishing military and economic aid programs overseas.

In addition, our Nation's consciousness of human rights has been steadily

growing, as our knowledge of these issues has increased and made us all more aware of their seriousness. And finally, our President-elect, Jimmy Carter, has many times stated his determination to give much greater weight to human rights considerations in the making of our foreign policy.

And so today, to renew my own personal commitment to the vital issue of human rights, I am introducing and cosponsoring several resolutions which I hope you will all support.

First of all, my distinguished colleagues, Mr. KOCH and Ms. FENWICK, and I, join in introducing a resolution urging the President to use American influence to bring about freedom for Valentyn Moroz. Mr. Moroz is a Ukrainian historian who has been imprisoned for fighting for the cultural independence of the Ukraine, He is presently in a labor camp, having already served many years in a Soviet prison. To protest the injustices perpetrated on his people by the Soviets, Mr. Moroz has renounced his citizenship of the U.S.S.R..

To show our support for him and for his courageous efforts on behalf of human liberties, this resolution is intended to convey to Soviet officials the continuing congressional concern for Mr. Moroz.

The second measure that I urge my colleagues to support is a House resolution designating January 22 of every year as "Ukrainian Independence Day," which Mr. KOCH, Ms. FENWICK, and I are also introducing today. As many of you may know, January 22, 1977, will mark the 59th anniversary of Ukrainian independence which only lasted 2 short years—1918–20—before the Soviet Union forced it under its rule.

Since that time the people of the Ukraine have suffered a severe and unrelenting oppression. Despite this, they have never stopped fighting for their cultural, intellectual, and national freedom. Their courage should inspire us all, and should motivate us to do all we can to encourage their resistance.

Passage of this resolution designating a Ukrainian Independence Day would mark this dedication on the part of the American people and of their Representatives and would pay true homage to their struggle for the freedom that we ourselves so fortunately attained a little over 200 years ago.

Lastly, Mr. Speaker, I would like to join my colleagues Mr. KOCH and Mr. DRINAN, in introducing a resolution which puts the Romanian Government on notice that it will have to ease its restrictions on the emigration and on the human rights of its citizens, or risk the loss of its most-favored-nation trade status.

The assaults on freedom that are being conducted by the Romanian Government against its ethnic minorities—and particularly the Hungarian, German, and Jewish populations—are brutal and systematic, and their ultimate end is the virtual elimination of these minority nationalities.

We, as a free people, should not tolerate such unconscionable abuses. Romania is the only Communist country to receive most-favored-nation status from the U.S. Government. We believe that if it is to continue receiving this privileged treatment, the Romanian Government must furnish us with evidence of positive change in its policies.

Thus, our resolution requires that a report be submitted by the President to the Congress on the status of human rights and emigration in Romania each time a request for extension of the most-favored nation status is sought for Romania by an administration.

In conclusion, I again take this opportunity to encourage all of you who care deeply about the issue of human rights to cosponsor these three resolutions, and to lend your continuing support to the cause of freedom all over the world.

A BILL TO PROVIDE FOR THE DETECTION OF EXPLOSIVES IN AIRLINE BAGGAGE AND CARGO

HON. JOHN M. MURPHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. MURPHY of New York. Mr. Speaker, security precautions at our Nation's airports over the past few years have become an accepted reality, rather than an obtrusive burden as some critics thought they might. But armed guards, metallic sensors, baggage X-rays, and trained personnel have not been able to completely halt the ongoing threat of death posed by hijackers and bombers armed with everything from guns and knives to professionally constructed explosive devices. The threat is not only to those who travel on board an aircraft, but to those who simply walk into a major airline terminal, such as happened at the tragic LaGuardia Terminal incident last year, where a bomb exploded in a baggage locker, killing 11 and injuring 54 persons.

Although the Federal Aviation Administration theoretically has the authority to act on this problem, it has acted only in an incredibly superficial and bureaucratic fashion. The legislation which I am introducing today is intended to remedy that.

By way of some informative background, I introduced a similar piece of legislation during the last Congress, designed to require the inspection of all carry-on and all checked baggage for both weapons and explosive devices. Included would be both baggage intended for air transport as well as that to be stored in any airport locker or storage facility.

The response of the Federal Aviation Administration, the Department of Transportation and the Office of Management and Budget, was less than encouraging: it showed a bureacratic callousness which I find very difficult to fathom. The administration took great pains to circumvent any reasonable approach to the protection of air travellers, saying, in effect, that a certain level of casualties is acceptable to them. That attitude is unacceptable to me, and to the American people.

I was a principal author of the Anti-hijacking Act which brought about the current search procedures of carry-on luggage. That has been particularly effective: last year—1975—for example, there were 4,380 guns intercepted, 41,700 knives, and over 400 explosive devices, not including ammunition and fireworks. And that accounts only for carry-on luggage, not that which is checked for carriage in cargo bins, or that which is stored in lockers.

And therein lies the problem, which this legislation addresses directly. Although the Federal Aviation Administration has issued some rather nebulous regulations requiring air carriers to augment their screening systems to include the detection of explosives or incendiary devices in carry-on and checked baggage, the regulation is grossly inadequate. First, it is a purely administrative pronouncement which simply instructs the airlines to increase their security. If they do not, the only result is an administrative disapproval, and perhaps a few dozen dead bodies from the next bomb explosion. And equally important, the regulations, weak as they are, totally ignore the primary hazard of explosives stored in lockers and similar storage areas. There is no Federal criminal penalty. And that is what my bill would provide. I can find no valid reason to believe that the gaping loophole in the FAA rules could not be used again by terrorists who murder indiscriminately.

The response of Department of Transportation and Office of Management and Budget to such an approach was a captious statement which is contrary to both reality and necessity. DOT's claim that the Federal Aviation Administration has the necessary authority to meet "present or reasonably anticipated security threats" is ridiculous. First, if they have that authority, they have chosen the weakest possible means of exercising it; and second, surreptitious bombings by mad bombers cannot be reasonably anticipated or planned for. Therefore, stronger measures must be implemented, backed with the strength of Federal law, not regulatory platitudes.

Turning to the specific problem of storage lockers such as the site of the LaGuardia incident, the FAA's "rule" does not take such facilities into consideration at all. Various studies by locker manufacturers indicate that either a new locker design, or perhaps alternate placement of banks of lockers in airports might solve the problem. But I hardly think the locker industry's own report could be considered totally objective and unbiased.

Mr. Speaker, the only effective answer, short of a total ban on all lockers, is to place such storage facilities behind the security checkpoints which screen passengers and baggage for explosives and weapons. In addition, positive identification associating the passenger with checked baggage to be carried in the airplane or stored in lockers and checkrooms is a must.

Locker companies complain of a 40- to 50-percent loss in revenues when lockers are placed within "sterile" areas behind screening facilities. I would note two

things at this point. First, the lockers are for the convenience of the traveling public, not for the primary purpose of enriching the companies. To quote a loss in profit as a reason for maintaining an open invitation to bombers is ludicrous. Second, there are only 14,000 lockers at 140 of the almost 500 air carrier airports, with the majority concentrated at 20 major air terminals. While I am certain there would be a necessary capital outlay to relocate the bulk of the lockers, it would seem to be a small price to pay for the saving of untold numbers of human lives. To be torn apart by exploding metal fragments is not an acceptable risk at a public facility, particularly where we have the legislative solution available to us to protect the traveling public. It needs ony to be exercised.

I would also like to point out the bureaucratic opposition which will undoubtedly follow the introduction of this legislation. The Department of Transportation claims it has initiated surveys, studies, discussions, assessments, recommendations, and voluntary adoption of rules to deal with such problems. The fact of the matter is that few "mad bombers" are likely to hold their plans for killing in abeyance until the DOT can evaluate and implement their long-term surveys of improbable alternatives. A terrorist's purpose is to kill, not to outmaneuver the bureaucracy.

In 1975, the United States saw 2,053 actual or attempted bombing incidents, with deaths and dollar damages almost triple the preceding year. That is a total figure, not just airlines, which points to yet another problem, that of the possibility of increased security at airports simply squeezing terrorist activity toward other modes of transportation or concentrations of people, such as railroads, bus stations, subways, sports arenas, and the like.

There is indeed a distinct possibility that such a transferral of terrorist activities could occur, although it is impossible to determine whether such a "displaced" attack might have been originally intended for another transportation facility with upgraded security protection. But modern aviation attracts the largest volume of people in the tightest concentrations, with a relative ease of access to both the aircraft and the terminal facilities, which in turn attracts potential terrorists. Their purpose is seldom murder for its own sake, but rather to attract attention to a political cause, or for criminal purposes such as ransom, theft, or hijacking. The specter of an airborne explosion or the decimation of a terminal building packed with humanity has a rather macabre fascination for the American media, and hence for the terrorist seeking attention for his cause.

There are, of course, costs incurred in the correction of this deficiency. Who pays these costs?—the American public, with one very important note: The flying public has been paying these security costs for quite sometime, but has not been getting its money's worth.

When inspection of carry-on baggage began, the Civil Aeronautics Board authorized a "security surcharge" in order to pay for the equipment, personnel, training, and enforcement of the new procedures. It is interesting, incidentally, that a great deal of the initial capital investment costs were borne by the Federal Government for large equipment and for training programs for rapidly needed personnel, even though the original security surcharge which was imposed had anticipated the burden of those costs.

Nevertheless, the surcharge has now been legitimized by the CAB, which has authorized air carriers to consider the maximum of 62 cents per passenger per origination as a part of their normal cost of doing business, added into their standard rates and fares. The Federal Government has solidified the aviation industry's claim to an almost perpetual charge for security expenses—security costs which quite a few victims of terrorist bombings would find very difficult to justify.

Congressional subcommittee figures indicate that the airlines have cumulatively grossed nearly $78 million as of last year in security surcharges alone. However, there is no regulation calling for a separate accounting of such funds, and they are therefore mixed in with general revenues to be expended as needed, be it for security or for other pressing expenses of the carriers. Airlines which have consistently run in the red have therefore applied their "excess" security charge income to other areas of expense, in effect subsidizing other costs of their operations at the expense of sufficient security.

The airlines say they cannot afford the additional expense of new security measures to detect explosives and to protect the lockers and baggage storage areas most vulnerable to attack. The answer, as noted earlier, is that the airlines are not paying for it—the traveling public is, in the form of an additional segment of rates based on a continuing expense. You and I pay about 62 cents for each flight that we make in order to be certain that the aircraft does not explode with us in it, or that the terminal building is not reduced to a pile of rubble while our families wave good by.

Yet bombs continue to be carried aboard aircraft, or to be discovered in a random locker, often with an accompanying publicized threat of detonation if some huge price is not paid. Explosions occur, yet no effective effort has been expended to intercept such devices except a few specious Federal regulations with no enforcement clout at all behind them.

No rational person expects the Federal bureaucracy to move forward under its own power. There is a definite and immediate need for legislation to define precisely what must be done. This bill instructs the Administrator to exercise the power he contends he already has, but has to date not chosen to use in any but a superficial fashion. It brings to bear strong criminal penalties under the United States Code which are unavailable to enforce the simple and ineffective agency regulations proffered by a lax administration.

I do not intend to wait until yet another explosion occurs at a major airport terminal or in a commercial airliner laden with hundreds of travelers before raising the need for increased security measures, particularly when the public is already paying for security which is far from the best available. Current efforts by the FAA can be best described as sluggardly, taking the form of studies and inquiries into risk patterns and probabilities which are almost totally useless against the random criminal.

The bill at hand requires screening of all passengers and property—baggage and cargo—by weapons and explosives detection procedures, both when intended for carriage on the airlines or when intended for storage in lockers or check rooms. In the case of lockers, which are particularly inviting to potential terrorists, they would be moved to a "sterile" area behind screening devices.

I do not believe these to be unreasonable requirements for the protection of the millions of Americans who pass through major airline terminals each day. Each of us here in Congress might notice that we walk no more than 10 feet from dozens of lockers each time we go to National Airport. How many lives are we willing to spend in the false hope that the next bomb might not be in that locker beside your family waiting for your arrival?

Mr. Speaker, I also wish to include in my statement the text of an article from the December 20 New York Post regarding the progress in the investigation of the LaGuardia bombing incident. As the author notes, there are 11 families of the dead from that blast who deserve answers as to its cause. I agree with him. And I believe there are thousands of families who can be saved from a similar fate.

The article referred to follows:

LaGuardia Bomber: No Name

(By Michael Hechtman)

A Seattle teacher. A Brooklyn apartment building superintendent. A radical student from Minnesota. A young Air Force enlisted man.

Each was suspected of being the LaGuardia bomber.

In the weeks and months that followed the Dec. 29, 1975, blast that ripped through the TWA baggage claim area, killing 11 persons and wounding 74, thousands of persons were interviewed and dozens of leads developed.

But the biggest manhunt in the city's history has thus far failed to identify the person or group responsible.

"As of today, we have eliminated a large number of people who had both motive and means," said Deputy Chief Edwin T. Dreher, head of the police Arson Explosion Squad. "But we are no closer to an arrest than we were Dec. 29, 1975."

Investigators focused their search on known bombers, terrorists and those thought to have a grudge against any of the victims—but they did not reject any other possibility.

"We looked in all directions," Dreher said. "We didn't assume it had to be a terrorist. Maybe it was a disgruntled lover or someone who wanted to kill a relative for insurance. We checked everyone—was John Jones seen at the airport? Who's his wife? Was she sleeping with the milkman? Did the milkman fly into LaGuardia that day?"

Although no arrest is imminent, investigators say they currently are pursuing a few live leads. They won't reveal them, but

they were willing to talk about some of the leads that fizzled.

Among these were the teacher, the super, the student and the airman. "They were four of our best suspects," said an investigator. "For a while, after each was identified, we thought we had the case cracked."

Within hours after the blast, investigators from the city and Port Authority police, the Queens District Attorney's office, the Bureau of Alcohol, Tobacco and Firearms and the FBI began checking on the movements of every person known to have passed through the airport that day.

And that's how they came upon the man from Seattle.

The 30-year-old teacher had shunned non-stop flights from Seattle to Kennedy and had made reservations on two LaGuardia-bound planes that stopped en route.

The duplicate reservations, coupled with his desire to arrive at LaGuardia, aroused suspicion and investigators obtained a picture of him. It had been taken several months earlier, before he had grown a beard, and, clean shaven, he resembled a man seen near the baggage area before the blast.

Investigators constructed a theory: The bomb had been built in the Pacific Northwest, the scene of several terrorist bombings, placed in a suitcase and put aboard a Northwest flight. Then the teacher flew to LaGuardia on United in case the bomb exploded in the air.

Further checks showed he had a record of minor arrests and had associated with campus radicals during his student days.

After weeks of surveillance, police approached him. He said he had made two reservations because one airline had been threatened with a strike. And a polygraph test convinced detectives he knew nothing about the bombing.

Finally, a relative produced a picture of him, taken during his New York visit, showing him with a full beard. Police technicians determined the photo had been taken recently and had not been doctored.

The investigation provided one New York detective with a personal glimpse of airline security.

He was flying back from Seattle carrying a box containing a model of a bomb that had been set off on the West Coast.

"What's in the box?" asked the ticket agent.

"Just some wires, pipes and a battery," said the detective, who did not identify himself as a cop.

The agent smiled, checked in the box, and the detective claimed it in New York with no trouble.

The building superintendent was fingered by an informant. "Our tipster described him as a militant Arab and said he had admitted building the bomb," according to an investigator.

The super did carry an Arab passport and "it looked real good.

"We tailed him 24 hours a day for six weeks. We checked the people he associated with. We followed him to Arab bars, restaurants, social clubs. He never did anything incriminating."

The informant balked when police asked him to carry a tape recorder in the hope the suspect would repeat his confession. This left detectives no choice but to confront the super, who came up with a solid alibi.

And a check on the tipster disclosed that he had had an argument with the man he accused.

"We have to assume he made it up," the investigator said. "Our informant painted a picture of an Arab terrorist itching to kill. This guy wouldn't know a bomb if he tripped on one."

The informant was not prosecuted.

The third suspect turned up when police, checking the "grudge" angle, investigated anyone involved in an altercation at LaGuardia in the days before the blast.

On the 28th, harsh words had been exchanged between a young man trying to cash in a ticket and an agent, who suspected it was stolen.

Police took keen interest when they discovered the young man's brother had led a student Black Panther group and was on parole from a Minnesota prison, where he was serving a term for bombing a department store in 1970.

"It was a particularly vicious thing," a police officer here said." One bomb went off in a rubbish bin, seriously injuring a woman. A second—a booby trap—was set to go off while police and rescue workers were on the scene." This second bomb was discovered before it exploded—like the one at LaGuardia, it had been planted in a locker.

The student, who was attending school in Washington, had been seen in New York Christmas Eve.

Investigators said when they tried to speak to him he was "very uncooperative."

"Some conversations were nothing but screaming sessions," a detective said. "He wanted to dictate terms for the interview. He was convinced he was being persecuted."

This only increased suspicion. But finally, the student decided it was in his best interest to cooperate to some extent—and he too managed to account for all of his time and convince police he had not been at LaGuardia.

His mother, it was learned, was involved in politics in her home state and had some contacts in the Ford Administration. Police here were astounded to learn that his record apparently had been overlooked by Secret Service agents and while on parole he had been in the White House, where he had been invited to photograph a meeting in which his mother participated.

The airman was boarding a plane at LaGuardia two days after the bombing, when his attache case sprang open. Before he could scoop up his papers, an alert stewardess got a glimpse of them and saw diagrams of "how to make just about any kind of bomb and all sorts of chemical formulas," a detective said.

She told the captain, who had a terse comment: "Get him the hell off my plane."

Authorities did, and turned him over to police. "We put him under a microscope," said a detective. "He had no prior history of violence and he had an alibi for the time of the bombing. Believe it or not, it was just his hobby. He had been a chemistry major and this was his thing—he liked to sit around drawing diagrams of bombs."

One investigation failed to turn up the bomber, but did produce major arrests. An off-duty cop heard a person he knew to be a member of the Jewish Defense League discuss the LaGuardia blast. He reported it and was pressed into service as an undercover agent.

His information cleared the suspects of the LaGuardia bombing, but turned up enough facts to indict five JDL members for federal firearms violations. Explosives and guns traced to them were linked to attacks on Soviet and Iraqi diplomatic facilities here. The five all pleaded guilty. Four were given prison terms; the fifth cooperated with investigators and drew a suspended sentence.

One person still under active investigation is Zvonco Busic, the Croatian nationalist chargfied with hijacking a TWA jet and planting a bomb in a Grand Central Station locker. Busic, who is awaiting trial on these charges, reportedly has admitted he landed at LaGuardia an hour before the blast, but denied any connection with the bombing.

The explosive used in both the LaGuardia and Grand Central bombs was dynamite.

Investigators continue to be interested in two political groups. "The list of best suspects has to include the FALN and the Palestine Liberation Organization," said assistant Queens DA John Ryan. The FALN, a Puerto Rican militant group, claimed responsibility for several bombings here, including the blast at Fraunces Tavern that killed four persons. The PLO has not been active in this country, but investigators note that several hours before the bombing, former Israeli prime minister Golda Meir, who was visiting the U.S., left from LaGuardia for Ohio.

Among the many persons who contacted investigators, there is at least one, authorities feel, who may have solid information to offer. "I was in contact last September with a person I have reason to believe was in the right place at the right time to provide a clue," said Joan Carey, who, until earlier this month, headed the DA's Investigations Bureau. Miss Carey, who now works for Special State Prosecutor John Keenan, refused to disclose any details, but appealed to the person to reestablish contact.

Anyone who saw or heard anything suspicious or unusual is asked to call 349-5844. The Air Transport Assn. of America has posted a $50,000 reward.

Authorities have turned in many directions for help. Psychologists have tried to come up with a profile of the bomber and Dreher regularly exchanges information on bombings and terrorists with Interpol.

Even clairvoyants were sometimes listened to. "Personally, I have no confidence in psychics," Dreher said. "But no stone could be left unturned." He spoke of a half dozen, one of whom asked to handle some evidence. "He said he'd get vibrations," Dreher said. "I let him hold a piece of the timing device. No vibrations."

Police said it was virtually impossible to trace the source of the dynamite used to make the bomb. "It's ironic to know you can drive one hour from New York and legally buy enough explosives to blow up a building" said Lt. Charles Prestia of the Arson Explosion Squad.

Investigators say they are hopeful they'll solve the LaGuardia case.

"There are 11 families entitled to an answer," Ryan said. "We're not going to stop until we give it to them."

H.R. —

A bill to amend the Federal Aviation Act of 1958 to improve prevention of aircraft and airport violence, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first sentence of section 315(a) (49 U.S.C. 1356(a)) of the Federal Aviation Act of 1958 is amended to read as follows: "The Administrator shall prescribe or continue in effect reasonable regulations requiring that—

"(1) prior to any passenger boarding and any property being placed aboard an aircraft for air transportation or intrastate air transportation, such passenger and property be screened by weapon-detecting and explosive-detecting procedures, facilities, or devices employed or operated by employees or agents of the air carrier, intrastate air carrier, or foreign air carrier; and

"(2) prior to any property being placed in storage in a storage area accessible to the public at an airport serving air carriers certificated by the Civil Aeronautics Board, such property be screened by weapon-detecting and explosive-detecting procedures, facilities, or devices employed or operated by employees or agents of the persons operating such airport; and

"(3) any property placed aboard an aircraft for air transportation or intrastate air transportation, or property placed in storage areas accessible to the public at an airport serving air carriers certificated by the Civil Aeronautics Board, shall bear such identifi-

cation marks, tags, stickers, or other attachments as to positively identify owner or bearer of such property.".

SEC. 2. The second sentence of section 315 (a) of the Federal Aviation Act of 1958 is amended by inserting immediately before the period "or against acts of criminal violence at an airport serving air carriers certificated by the Civil Aeronautics Board.".

SEC. 3. The center heading of section 315 of the Federal Aviation Act of 1958 is amended by adding at the end thereof "AND PROPERTY".

SEC. 4. Item 315 of the table of contents contained in the first section of the Federal Aviation Act of 1958 is amended by striking out "in air transportation" and inserting in lieu thereof "and property".

ALASKA NATIONAL INTEREST LANDS CONSERVATION ACT

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. UDALL. Mr. Speaker, the bill I am introducing today—along with a number of my colleagues—is one of the most important pieces of legislation in the conservation annals of our great country. The Alaska National Interest Lands Conservation Act, is one of history's most challenging land conservation opportunities. Today, Alaska is the embodiment of a larger public debate taking place within our society—the debate over the development of a wise and lasting national resource policy. The need for a comprehensive national resource use policy—including carefully addressing the element of resource conservation and preservation—is perhaps more glaringly apparent in the State of Alaska than in any other region of the country. Given the great opportunities that Alaska provides for resource conservation and/or development, it is not surprising that nearly every major environmental and energy issue before the last Congress, in some manner, affected Alaska. It is no accident that today, Alaska—where the most is at stake—has now become the showcase for the effort to resolve this larger issue. A brief history of the Alaskan lands issue may be helpful for my many colleagues to understand some of the provisions of this bill.

HISTORY OF ALASKA NATIVE CLAIMS SETTLEMENT ACT OF 1971

In 1958, Mr. Speaker, the Congress created Alaska—a new State, the largest of all States, over twice the size of Texas. At that time we granted the State of Alaska the right to carve out 104 million acres of Federal land as a "land base." In a year or two Alaskan Natives came forward and argued that they too owned Alaska—that it was theirs by aboriginal right. The battle for Alaska was underway. Subsequently the Secretary of the Interior put a freeze on Alaska lands, claiming the State could not go ahead with its land selections until Justice was done to the Natives. The freeze was a blessing in disguise since it provided us with the opportunity to finally resolve the longstanding question of aboriginal rights of Alaska Natives while at the same time considering the national interests in the Federal lands of Alaska. Thus, in 1971 the Congress enacted the Alaska Native Claims Settlement Act—ANCSA. With passage of that act, Alaska Natives settled for some 43 million acres of land and nearly a billion dollars—the most generous land settlement in history. The State retained its option to select 104 million acres.

And, finally, ANCSA provided the opportunity for other Federal lands to be set aside by the Congress in the national interest. Section 17(d)(2) of that act directed the Secretary of the Interior to transmit his recommendations to the Congress on what the Department of the Interior thought ought to be set aside, by law, as new units of existing national conservation systems. These recommendations were submitted for consideration by the Congress in December 1973. This historic opportunity is the direct result of an amendment I offered on the floor of the House with my late colleague, Representative John Saylor, during the consideration of the Native claims legislation.

In March of 1974, I introduced a bill which contained national interest public land dedications as proposed by various conservation organizations. In January 1975, I again introduced an identical bill. The bill I am introducing today is similar to my previous measures and is intended to establish a framework for legislative consideration on this important matter.

The Secretary of Interior was directed by section 17(d)(2) to submit his recommendations for the national interest lands by December 1973. The Secretary met that deadline, providing us with minimum guidelines for our deliberations. While various legislative proposals have been before the Congress since that time we have failed to seriously consider any of them. Now is the time for the Congress to follow through on—to make good on—its commitment to the American people; to set aside permanently these truly magnificent wildlands and wild rivers—to do it right the first time, for perhaps the last time.

COMPLETE ECOSYSTEMS

Unlike the Department of Interior, citizen conservationists do not have the resources to conduct extensive field studies over an area the size of Alaska. But the proposals in my bill were designed by people with direct knowledge of the land and its particular natural resources. Furthermore, the boundaries have generally been based on the information and range of alternatives contained in the environmental impact statements prepared by Department of the Interior professionals. Accordingly, these proposals avoid the political compromises and bureaucratic infighting amongst agencies that occurred within the past administration.

While this bill is a countermeasure to that proposed by the Secretary of the Interior, it is not to be considered final. It is a comprehensive land preservation package for all Alaska. The final decision is that of the Congress and ultimately of the American people.

The proposals in my legislation are carefully designed to protect complete ecosystems. As examples, a proposal encompasses a complete watershed or the entire range and critical habitat of sensitive wildlife populations. The areas proposed in my bill, while seemingly large when compared with units in the "lower 48" are merely samples of the vast and diverse federally owned landscapes of Alaska.

The proposals are many because Alaska is so vast. They span a region as diverse as the entire lower 48 States—from rainforests to tundra prairies, mountains to marshland.

NATIVE SUBSISTENCE

I have also sought in this legislation to protect the existing way of life of many Alaska Natives. We live in an age of rapid change. Whether the subsistence use patterns, a social order unknown to most Americans, will continue to be the lifestyle of these hardy peoples far into the future is questionable. But we have attempted to design a framework that will insure that those individuals who want to subsist—who depend upon subsistence for survival—can continue to do so.

NATIONAL PRESERVES

We have established national preserves to allow certain areas, managed under the National Park Service as national preserves to be opened to hunting. This classification makes available to sportsmen some of the most unique hunting areas in the world, while at the same time continuing to preserve all values in the remaining national parks and national monuments. The option of permitting hunting in a national preserve is the only deviation from a national park. We continue existing policy permitting hunting in national wildlife refuges, wildlife ranges, and national forests.

WILDERNESS

We are proposing that each unit in this legislation be immediately designated as wilderness and made a component of the National Wilderness Preservation System. The one characteristic most apparent in the bulk of Alaska's lands is wilderness. If the lands proposed for dedication in this bill are not wilderness then surely no wilderness exists anywhere. In this sense, Alaska is truly our last frontier. Here we are talking of wilderness parks, and wilderness wildlife ranges—not the overcommercialized Yosemite or Yellowstone. Here exists an opportunity to fulfill the promise of the Wilderness Act of 1964 "* * * to secure for the American people of present and future generations the benefits of an enduring resource of wilderness" and "in such a manner as will leave them unimpaired for future use and enjoyment as wilderness." Accordingly all units proposed in this bill are to be withdrawn, subject to valid existing rights, from all forms of appropriation under the mining and mineral leasing laws.

Additionally, most of the proposed units have been reviewed for wilderness suitability under section 17(d)(2) of ANSCA or pursuant to Wilderness Act processes. We do not need to go through the wilderness review process again after this initial dedication. To delay consid-

eration would be a waste of considerable time, money and effort. We should do so now.

Because development nodes for access and use purposes have been recommended for many of the areas in the Secretary's proposals I look forward to a full examination, with the assistance of the expert advice of the Department, as to just what these entail including possible impact on wilderness resources.

FOREST SERVICE

The intent of the Congress in the enactment of section 17(d)(2) was to dedicate the bulk of these national interest lands as national parks, national wildlife refuges, and wild and scenic rivers, with minor boundary additions to existing national forests. It was not the intent of Congress to create new national forests in interior Alaska which cannot maintain a sustained yield forestry program. The professional study teams of the Department had initially selected these areas as National Wildlife Refuge System and National Park System units, but were subsequently overruled in the White House. Therefore, the bill does not propose any such forests for interior Alaska, though it does allow for the expansion of the existing national forests into appropriate adjacent lands.

SOUTHEAST ALASKA

One of the most splendid regions of all Alaska is the part known as southeast. It is a superb blend of sea and land, intricate waterways, majestic mountains, and abundant wildlife. Forest is the key word in any discussion of southeast Alaska. The dominant spruce and hemlock form a dense rainforest everywhere that there is soil, from tidewater to timberline.

Nearly all of southeast Alaska is within the jurisdiction of the Tongass National Forest. Last year, during the consideration of the National Forest Timber Management Reform Act, citizens from southeast Alaska came before the Congress to testify on the mindless destruction of the values that make southeast Alaska unique—a destruction taking place under the direction of the Forest Service in the name of "multiple-use." Testimony from various individuals pointed out that priceless natural values as well as economically vital fishery resources were being destroyed daily in order to maintain a steady timber and pulp supply for Japan. The Forest Service has admitted that it has firm plans to cut 98.4 percent of the commercial timber in the Tongass within 50 years. In a region where it takes centuries for the ecosystem to recover from timber harvesting and to renew a mature stand of timber, the Forest Service plans give little hope for land preservation. The Forest Service has repeatedly ignored public support of deserving wilderness areas. They have disregarded the concept of wilderness almost totally. In an effort to save some of the most precious areas of southeast Alaska, and to lay out a comprehensive land preservation program for all Alaska my legislation designates five national forest wilderness areas in the Tongass National Forest. It is important that the Congress examine the land use policies on the Tongass, our Nation's largest national forest, and act quickly, where the Forest Service has failed to do so, to preserve portions of this unique part of America before here again, it is too late.

ALASKA PETROLEUM RESERVE

During the 94th Congress legislation, Public Law 94–258, transferred jurisdiction of the Naval Petroleum Reserve No. 4, from the Secretary of the Navy to the Secretary of the Interior. The intent of this legislation was twofold. First, the Secretary of the Interior is to conduct an exploration program to determine the extent of petroleum resources within the reserve. But, it is to be an exploration program only. Congress reserved the right to authorize production of petroleum resources from the reserve after carefully reviewing the report and recommendations of the Secretary and after determining more precisely the petroleum potentials.

Second, because of its large size and remote location, nationally important surface values and other uses are largely undocumented. Thus Public Law 94–258 directed the Secretary to identify and designate qualified areas containing values and uses which should be protected during the oil and gas exploration period. Once again, the Congress will have the final say on ultimate dedication and use of these areas, with initial recommendations required of the Secretary. In summary, the intent of the bill, as stated by Representative JOHN MELCHER, the floor manager of the bill, during House adoption of the conference report, "is to carefully explore and determine the petroleum potential of the reserve while simultaneously identifying and protecting other important resource values and uses."

The Secretary has assigned the Bureau of Land Management, and the U.S. Geological Survey interim management responsibility for the reserve. And though the transfer to the Interior Department is not yet complete, indications are that there is little interest being shown by the Department in fulfilling the twofold intent of the Congress. There is little indication that the Department of Interior will promote the protection of surface and other values during the exploration phase. Therefore, in furtherance of the commitment to design a national interest lands preservation program for all Alaska and to keep open congressional options for the reserve as intended by Public Law 94–258, this bill proposes to assign the U.S. Fish and Wildlife Service jurisdiction over the reserve during the study phase. This will insure a consideration of the natural values of the reserve while exploration is ongoing and serve to promote specific dedication opportunities for congressional consideration.

COMMITTEE JURISDICTION

The Committee on Interior and Insular Affairs of which I am a member will have primary jurisdiction over this bill as a consequence of our committee's purview over the National Park System, National Wild and Scenic Rivers System, National Wilderness Preservation System, and national forests created from the public domain as well as all unreserved public lands, the Naval Petroleum Reserves Production Act of 1976 and the Alaska Native Claims Settlement Act of 1971. Yet, principal jurisdiction for the National Wildlife Refuge System—both its management policy and the creation of new units—sits with the Merchant Marine and Fisheries Committee.

I invite the chairman and members of the Merchant Marine and Fisheries Committee to join me in supporting the proposals in this bill and to work out a mutually beneficial process for our committees to work together on this most challenging and critical legislative task. In furtherance of this cooperative effort, I have attempted to follow the policy approach as I understand it for additions of the National Wildlife Refuge System as to the designations as provided by the proposed National Wildlife Refuge System Organic Act sponsored by my good friend from the State of Michigan, Representative JOHN DINGELL.

CONCLUSION

Mr. Speaker, when I offered my amendment to the Alaska Native Claims Settlement Act on the floor of the House in 1971, which ultimately resulted in section (d)(2) I told my colleagues:

If you stay here for another ten years—now, mark my words very carefully—you will not cast a more important conservation vote you will be asked to cast on the amendment that I am offering . . .

We lost the vote that day by a narrow margin, but subsequently the conference committee adopted a similar provision. And I was right. The Alaska national interest land issue goes beyond the drawing of boundaries and the totaling up of acreages. It speaks to the heart of public land policy—to how much and what type of land we are willing to protect in return for having demanded so much in terms of resource development. It speaks to our responsibility as stewards of the land to provide future generations with not merely fragmented remants of our natural heritage, but with whole, intact, truly magnificent ecosystems. Today, Alaska is the last great unspoiled piece of America still within man's saving. Each generation has its own rendezvous with the land and we now must press forward with the opportunity to help provide those generations yet unborn the right to this heritage.

I urge each and everyone of my colleagues and the incoming administration, to join with me in support of this legislation, to make it the highest priority for early enactment in this Congress.

CIVILIAN CONSERVATION CORPS

HON. ROBERT DUNCAN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. DUNCAN of Oregon. Mr. Speaker, today I introduced legislation to revive the Civilian Conservation Corps. The bill is similar to legislation which I introduced in the last Congress and is an at-

tempt to alleviate the unemployment problem this country faces.

In the darkest days of the Depression-ridden 1930's, the Roosevelt administration recruited an army of young men from the Nation's troubled cities and sent them to work in the forests of the West. At its height, in 1935, the Civilian Conservation Corps numbered half a million men, scattered in more than 2,500 army-styled camps, under supervision of the old War Department. Inspired by that program and motivated by the severe unemployment problems facing this country, I have introduced a bill to revive the CCC.

There are three principal objectives which this legislation will accomplish. From each of these three, collateral and incidental benefits will follow. Each objective represents an attack on a major problem facing the country today. These three major problems are: First, unemployment; second, a rising crime rate; and third, the poor and deteriorating condition of the great natural resources of this country—the forests, the rangelands, outdoor recreational facilities, timberlands, and water resources.

I. UNEMPLOYMENT

In spite of all that Congress has done, unemployment is still at an unacceptably high rate in this country. Among the youth the unemployment figures skyrocket to over 20 percent, and among the youth of minority groups even higher. My bill is directed to that high unemployed age group, from among which the corpsmen and corpswomen will be recruited. In effect this can be considered a program of Government employment of last resort. Its success will be limited only by the funding that we are able to provide for it, because there is virtually no limit to the amount of productive work that needs to be done. The jobs that we will create by this legislation are not of the type which draw scorn and derision—the paper-shuffling type of work which produces no lasting benefits and does little or nothing for the employee's self-esteem. Furthermore, these jobs are labor-intensive and the money provided will not go for equipment and buildings, but rather predominantly into payroll.

II. CRIME ON THE STREETS

Carl Rowan, the Washington Post columnist, questioned six of the Nation's top police administrators from six of the Nation's largest cities, asking them one simple question, "If you had to recommend one thing, one action, the country could take to combat the rise of crime, what would it be?" None suggested more prisons, or greater law enforcement, or better prison rehabilitation. All six of these officials agreed that efforts to reduce unemployment in the central cities among young men, especially minority young men under the age of 25 years, would be one of the most effective means of reducing the crime rate. The CCC will offer constructive alternatives to these young people.

III. NATURAL RESOURCE IMPROVEMENT

I sit on the Subcommittee of Appropriations dealing with the Department of the Interior and the Forest Service, and including the Bureau of Land Management, the Fish and Wildlife Service, and other resource agencies. For decades the great natural resource agencies have been starved by the Office of Management and Budget, and by its predecessor, the Bureau of the Budget, as they strove to compete with all other Government programs for a share of the Federal tax dollar.

As a result of inadequate capital investment, coupled with excessive use in the past:

First. Our outdoor recreational facilities have deteriorated and many campgrounds and picnic facilities have been closed and abandoned.

Second. Millions of areas lie fallow and unproductive because we have not spent the money and made the effort to replant. This is a time of soaring lumber prices, increasing demand for wood products, and ever-increasing pressures from environmentally oriented groups to diminish the harvesting of trees.

Third. Millions of acres of rangeland are today incapable of carrying the allotments of livestock they should because they have been overgrazed and the waterholes stamped dry. Continued grazing, with no effort to rehabilitate results in further deterioration. Not only do we lose the capacity to convert forage, unpalatable to humans into useful protein to help feed the hungry world, but as the sagebrush and the bitterweed take over from the bunchgrass and the crested wheat they reduce forage for the wildlife, which results in a diminution of their numbers.

Millions of dollars are needed to replant the national forests and rangelands, to build drift fences, to drill wells, to build waterholes, to control grazing patterns, to build trails, picnic facilities, campsites and footbridges. And all this work is labor intensive, requiring many people and only simple tools and equipment readily available. And by so doing, we will not only be rehabilitating those who do the work, but we will be insuring the productivity of the land for those who come after us.

I believe my bill can alleviate a good portion of those three major problems. More important are the benefits to be derived by the Nation from the growth of the individuals who serve in the Civilian Conservation Corps. The values which they will retain long after their service has ended will be of great advantage to the Nation, as those who served in the old CCC have proved time and time again.

I am convinced that this Congress will pass this bill and will affirm its belief in the good sense that the bill provides. In the 94th Congress similar legislation, passed by a substantial margin, and only a technical difficulty with the Budget Act kept it from reaching the Senate floor. There will be no technical conflict this time and I hope and believe that this legislation will receive support from the incoming administration. As I am sure all of you are aware, President-elect Carter made references to a CCC-type program in his debates with President Ford. While my bill does not solve the total problem of unemployment in this country, I think it can alleviate a portion of it, as well as halt the rising crime rate, and focus our attention and energy upon renewing our natural resources.

LEGISLATION TO INSURE THAT AIRLINE PASSENGERS, SHIPPERS, AND TRAVEL AGENTS RECEIVE AT LEAST 15 DAYS NOTICE OF CHANGES IN AIRLINE FARES

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. ANDERSON of California. Mr. Speaker, air carriers under the present law, section 403(c) to the Federal Aviation Act of 1958, are required to file proposed rate changes with the Civil Aeronautics Board 30 days prior to the effective date of the proposed change. The CAB is permitted to issue its decision on the proposed change any time prior to the effective date.

Hearings before the Aviation Subcommittee last year revealed that these procedural deadlines are insufficient to insure adequate public notice of changes in fares. All too frequently, the CAB does not issue its decision until the eve of the effective date of a proposed fare change. When this occurs, there is great uncertainty among passengers and shippers as to whether a proposed fare change will take effect. If the CAB disallows a proposed fare change at the last minute, passengers who purchased tickets in advance may have to make extra payments or obtain refunds.

Testimony at the hearings indicated that in most cases the fault for last-minute decisions does not lie with CAB. The economic considerations underlying proposed fare changes are frequently complex and due process requires that interested persons have an opportunity to file comments with the CAB on a proposed change. Thirty days is not an unreasonable period for the CAB to analyze the voluminous pleadings it receives and to prepare and issue its decision. Thus, the solution to the problem is not to shorten the period for CAB action, but to move back the dates for both carrier filing and CAB decision, preserving the 30-day period for CAB action.

PASSENGER TARIFFS

This legislation provides that air carriers must file proposed changes in passenger fares 45 days before the effective date and that the CAB must issue its decision 15 days before the effective date. These changes guarantee the public at least 15 days notice of changes in airline passenger fares.

At the hearing, some witnesses suggested that earlier filing dates would be appropriate so that there would be an even longer period of public notice. However, as was pointed out by other witnesses, the earlier the filing date, the less flexibility carriers have to file new fares in response to changing economic conditions. This lack of flexibility would limit not only fare increases designed to meet rising costs, but also new discount

fares attempting to generate increased traffic.

Balancing these considerations, last year, our committee decided to adhere to a requirement of 15 days' notice of fare changes. This requirement should solve many of the problems which have arisen from 11th-hour CAB decisions.

FREIGHT TARIFFS

Freight tariffs present a special problem because of the interaction of indirect air carriers, particularly air freight forwarders, and direct air carriers. Air freight forwarders do not operate aircraft but serve as middlemen between shippers and airlines. A shipper pays an air freight forwarder for shipment of goods. The forwarder does not act as the shipper's agent but as an independent transportation company charging the shipper a rate which has been approved by the CAB. The forwarder then consolidates the goods of a number of shippers and makes arrangements with a direct air carrier to ship goods at the direct air carrier's rates.

A forwarder's rates must be closely related to direct air carrier rates, and when direct air carrier rates are increased, the forwarders ordinarily increase their rates. If direct air carriers and forwarders are subject to the same tariff filing requirements, the forwarders will lag behind in changing their rates and will lose revenues. For example, if both forwarders and direct air carriers are required to file no later than 30 days before the effective date of a rate change and the direct air carrier waits until the 30th day to file, it will probably take the forwarder a week or more to complete the paperwork necessary for its own filing. This would mean that the forwarder's rate increase could not take effect until at least a week after the direct air carrier's increase. According to testimony, a 2-week lag in matching a 10-percent increase would cost the air freight forwarder industry $1.6 million in revenue.

Under present law, forwarders are ordinarily able to respond to direct air carrier rate change without a lag. Although forwarders and direct air carriers are both legally required to file 30 days before the effective date of a rate change, as a practical matter, the direct air carriers frequently voluntarily file 45 days in advance, in the hopes of getting an early CAB decision.

However, if the law is changed to require 45 days filing, there is some doubt that the direct air carriers would voluntarily file more than 45 days in advance. If they did not, forwarders would be unable to meet air carrier rate increases for a week or more.

To remedy this problem, the measure I am introducing requires direct air carriers to file changes in freight rates 60 days in advance and indirect carriers to file 45 days in advance. The CAB is required to issue its decision 15 days in advance of the effective date. This will insure that the public has at least 15 days' notice of changes in freight rates, and will give the forwarders 15 days to respond to changes in direct air carrier rates.

Mr. Speaker, a bill identical to this proposal passed the House of Representatives on February 17, 1976, and died at the end of the 94th Congress.

ON THE NEED TO REFORM ELECTRIC UTILITY RATE REGULATION

HON. CHRISTOPHER J. DODD

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. DODD. Mr. Speaker, I am introducing today legislation to reform Federal statutes pertaining to electric rate regulation by the Federal Power Commission. Despite dramatic changes in electric energy generation, transmission, distribution, and especially, changes in the needs of the consumer, no major changes have been made in the Federal Power Act since it was enacted in 1935.

The problems in electric ratemaking first came to my attention last year when I became involved—ultimately as an intervenor—in an electric rate increase case which is pending before the Federal Power Commission. I was appalled by the inequities which are allowed and fostered by current rate regulations, and for this reason, I am introducing legislation which is designed to improve ratemaking procedures before the Federal Power Commission to assure that our energy resources, as well as our generating and transmission facilities, are being used in the most efficient manner possible, and to assure that electric energy is being provided to customers at the lowest possible cost.

I would like to include Mr. Speaker, this bill in the RECORD for the consideration of my colleagues, and I would like to take this opportunity to explain the problems as they currently exist, and how this legislation relates to these problems.

Mr. Speaker, at present there are more than 130 electric rate increase cases pending before the Federal Power Commission. This represents over a half a billion dollars annually in electric rates which are in effect, which customers already are paying, but for which a final decision on lawfulness has not been rendered. The legislation I propose is directed at expediting electric rate proceedings, minimizing the possibility of a questionable rate being levied against customers, and assuring that the criteria used in determining the lawfulness of proposed rates reflects the actual costs of generating and transmitting electric power.

Current provisions of the Federal Power Act allow up to a 5-month suspension on new rates, if the Commission so orders, and give the Commission authority to order rebates if and when the decision comes after the rate has gone into effect and the rate is determined to be excessive. I understand that congressional intent underlying this portion of the Federal Power Act, some 41 years ago, was that the 5-month suspension period would allow the Commission to conduct and to complete proceedings on a new rate filing and determine its lawfulness before permitting it to be charged to customers.

At present, however, an average rate proceeding before the Commission consumes well over a year from the date of filing to the date of the final decision by the presiding administrative law judge. Many rate schedule filings require 2, 3, or more years to complete, and during most of that time, even if the full 5-month suspension has been ordered—which is atypical—the rate is in effect and customers are required to pay the questionable charge.

The process whereby rebates may be ordered is a problem, as well. Although a public utility may find it quite easy to keep records on their wholesale buyers and issue refunds on an excessive rate if the Commission so orders, it is often very difficult for the electric company to pass these refunds along to their retail customers—the ultimate consumers—since, because of the lengthy proceedings on the case, many may be deceased, unable to be located, or otherwise unable to be recompensated.

The present ratemaking procedure, by allowing any rate filed to go into effect 5 months or less after filing, also acts as an incentive for the petitioning utility to intentionally file one or more inflated rate proposals, knowing they can collect the excessive rate for years even if it is unlawful. This procedure also provides incentive for the petitioning utility to attempt to delay Commission proceedings on their rate filing if there is any question as to what the final holding will be, in order to keep the high rate in effect for as long as possible. Clearly, it is in the public utility's interest to delay a possible negative decision on one of their rate proposals—they are already collecting the rate—but it is very contrary to the interests of the purchasers.

I am an intervenor in an electric rate increase proposal which was filed by Connecticut Light & Power Co. on December 2, 1975, and which is in its preliminary stages of hearing. This is the most recent of three rate increase proposals by Connecticut Light & Power, all of which are still pending final decision. The first of these was filed on June 16, 1972, and has been charged to customers since January 16, 1973. Despite the more than 3 years of elapsed time—an unconscionable delay for the customers to bear, to my way of thinking—there has been no final decision on the lawfulness of the rate. In addition, Commission regulations have permitted Connecticut Light & Power Co. to file and begin collecting on the two more recent rate increase proposals. I think it is interesting to note that the profit rate enjoyed by Connecticut Light & Power has increased dramatically over this same period.

Section 7 of the bill I have introduced would resolve this problem by eliminating incentive for public utilities to file inflated rate proposals by requiring suspension of new rate proposals until such time as a final decision is rendered, and this decision holds the proposed schedule as being lawful. The provisions of section

8 of this bill complement section 7, by disallowing the filing of a new rate increase proposal while another one, filed by the same company, is still pending final decision. This antipancaking measure would provide incentive for the petitioning utility to dispose of rate filings promptly, and in conjunction with section 7, it would eliminate incentive for the petitioning utility to attempt to delay Commission proceedings. In addition, this measure would enable the Commission to complete action on rate filings more promptly, since each case would be reduced in complexity, and the total number of cases pending before the Commission would, in all probability, be substantially diminished.

Alone, however, these measures will not resolve the problem entirely. These revisions, by themselves, might in fact provide incentive for intervenors to employ delaying tactics in order to prevent a proposed rate from going into effect. To overcome this problem, section 7 of the bill I am offering authorizes the Commission to order interim rate increases or decreases after five months have elapsed since the filing date, if records on file with the Commission demonstrate the need for such a change in the rate schedule. The interim rate could be a portion or the whole of the proposed rate change, and would be in effect until the time of the final decision on the rate filing, but subject to rebates.

Thus, this measure is intended to provide incentive for intervenors who feel the proposed rate to be excessive to attempt to expedite Commission proceedings so that they may be concluded before the five month suspension on interim rates is over. The interim rate provision also allows the Commission, in the event of a lengthy proceeding, to order increases or decreases appropriate to the financial solvency of the petitioning utility.

There are a number of other essential revisions to the Federal Power Act which I have included in this bill, and which I would like to explain briefly:

Sections 4 and 5 of this bill mandate that public utilities utilize energy resources, and generating and transmitting facilities, in the most efficient ways possible, by requiring that they share facilities, and engage in joint and cooperative efforts whenever this will accomplish that goal. Section 13 insures that such cooperative efforts be undertaken in the interest of conserving energy resources and distributing electric power at the lowest possible cost, and that they be in full compliance with the antitrust policies and laws of the United States.

The bill further prohibits selective distribution of electric power, and, in the event of a power shortage, requires a public utility unable to meet the demands of all of its customers to accommodate both wholesale and retail customers in a manner which is proportionate, equitable, and nondiscriminatory.

Sections 6, 9, and 10 assure that the Commission will give adequate notice of new rate filings, and that affected customers will have sufficient time to respond; and limit the use of automatic adjustment clauses, including the fuel adjustment clauses, and the inclusion of construction work in progress—CWIP—in the rate base.

Finally, Mr. Speaker, this legislation would correct another problem which I have become aware of as a result of my involvement in a rate proceeding: That, by filing for an excessive rate proposal before the Commission, a public utility may be able to keep its retail rates lower than its wholesale rates—which are usually charged to relatively small municipal utilities and electric companies—thereby attempting to squeeze the wholesale purchasers out of the market. By requiring the Commission to take into account the financial impact of a proposed rate increase on each wholesale purchaser, as sections 11 and 12 of the bill do, this problem is effectively eliminated.

Mr. Speaker, the reform of electric rate regulation is long overdue. The amendments which I propose in this bill will be very effective, I think, in assuring conservation of energy, reasonable and appropriate regulation of rates, and the provision of electric power to all customers at the lowest possible cost. I am hopeful that the Subcommittee on Energy and Power, which is chaired by my distinguished colleague from Michigan (Mr. DINGELL), will take prompt action on this bill, and the other related bills which are now pending their consideration, and that the reported bill will establish regulations to assure an equitable system of electric rate regulation, consistent with the Nation's present needs—and one which will truly serve the public interest.

H.R. —

A bill to amend the Federal Power Act to provide for the reform of electric utility rate regulation by the Federal Power Commission, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Electric Rate Regulatory Reform Act of 1976".

FINDINGS

SEC. 2. The Congress finds and declares that—

(1) the continued generation and transmission of an adequate supply of electrical energy at reasonable rates is critical to the Nation's defense, a sound and stable economy, and the general health and welfare of the people of the United States;

(2) rates for electric energy increased dramatically during each of the years 1971 through 1975;

(3) current ratemaking provisions of the Federal Power Act often place the full burden of unproven rates on wholesale customers and subsequently on the ultimate consumer;

(4) these ratemaking provisions provide incentive for public utilities to file inflated increases and delay Federal Power Commission proceedings on such filings, knowing that these rates may be collected during such proceedings;

(5) the system whereby rebates may be ordered by the Federal Power Commission in the event that, at the decision of the presiding Administrative Law Judge, the rate is determined to be excessive, is imperfect as the delay in proceedings makes it impossible to locate and recompensate all persons who had been paying the excessive rate;

(6) that lengthy delays in Commission electric rate proceedings create a "price squeeze" situation whereby the supplier may be able, simply by filing one or more unproven rates, to keep his retail rates lower than those charged to wholesale purchasers;

(7) the construction of unnecessary generating capacity by the electric utility industry would create burdens on electric consumers;

(8) shortages and unreliable supplies of electric energy would jeopardize the normal flow of interstate and foreign commerce by creating severe economic dislocation, including loss of jobs, closing of factories and businesses, and curtailments of vital public services; and

(9) increased competition among electric utilities for wholesale and industrial sales can complement existing regulation in providing protection for consumers of electric energy.

PURPOSES

SEC. 3. The purposes of this Act are—

(1) to make more equitable the structure of electric utility rate schedules in this Nation, while leaving unaffected the overall rate of return of such utilities;

(2) to promote more efficient use of scarce capital and energy resources by electric utilities;

(3) to institute rate reform, in order to prevent or minimize increases in rates of electric energy, and to assure that these rates are administered in a fair and equitable manner, and based on actual costs of generating and transmitting;

(4) to eliminate any incentive for any party to a rate proceeding before the Federal Power Commission to delay such proceeding;

(5) to encourage maximum efficient and economical use of electric generating and transmission facilities through interconnections, joint planning and ventures, sharing of facilites, and other means;

(6) that any such cooperative efforts be undertaken in the interest of minimizing costs to customers and conserving our scarce energy resources, and that they be undertaken in full compliance with the antitrust policies and laws of the United States;

(7) to increase the period of notice for new filings before the Federal Power Commission, to allow adequate time for the affected customers to be informed and to respond; and

(8) to foster increased use of competition as a complement to existing regulation.

ACCESS TO TRANSMISSION CAPACITY

SEC. 4. (a) Section 202(a) of the Federal Power Act is amended—

(1) by striking out "voluntary" in the first sentence;

(2) by inserting "with the maximum competitive opportunities for the purchase and sale of electric energy at wholesale and" after "United States" in the first sentence; and

(3) by inserting "for the purpose of assuring the goals set forth in this part and to assure maximum competitive opportunities for the purchase and sale of electric energy at wholesale at the lowest possible cost" immediately after "district" in the third sentence.

(b) The portion of the first sentence of section 202(b) of the Federal Power Act prior to the colon preceding the proviso is amended to read as follows: "Whenever the Commission, upon application of any State commission or of any person engaged in the transmission or sale of electric energy, and after notice to each State commission and public utility affected after opportunity for hearing, finds such action necessary or appropriate in the public interest, it may by order direct a public utility (if the Commission finds that no undue burden will be placed upon such public utility thereby) to establish physical connection of its transmission facilities with the facilities of one or more other persons engaged in the transmission or sale of electric energy, to sell energy to, transmit energy for, provide transmission services or wheeling for, ex-

change energy with, provide pooling services for, or coordinate with such persons".

CONTINUANCE OF SERVICE

SEC. 5. Section 202(c) of the Federal Power Act is amended to read as follows:

"(c) During the continuance of any war in which the United States is engaged, or whenever the Commission determines that an emergency exists by reason of a sudden increase in the demand for electric energy, or a shortage of electric energy or of facilities for the generation or transmission of electric energy, or of fuel or water for generating facilities, or other causes, the Commission shall have authority, either upon its own motion or upon complaint, with or without notice, hearing, or report, to require by order such connections of facilities and such generation, delivery, interchange, transmission of electric energy, pooling, coordination, wheeling, or other transmission service as in its judgment will best meet the emergency and serve the public interest. The Commission shall require, in order to insure continuity of service to wholesale customers, each public utility to report promptly any anticipated deficiency of power which would affect the utility's capability of serving its wholesale customers, and may (1) require by order the utility to accommodate such deficiency in a manner which affects the retail customers of the utility and the retail customers of the utility's wholesale customers in a proportionate, equitable, and nondiscriminatory manner, and (2) require by order such connections of facilities and such generation, delivery, interchange, transmission of electric energy, pooling, wheeling, or other transmission service as in its judgment will best serve the public interest. If the parties affected by any such order fail to agree upon the terms of any arrangement between them in carrying out such order, the Commission, after hearing held either before or after such order takes effect, may prescribe by supplemental order such terms as it finds to be just and reasonable, including the compensation or reimbursement which should be paid to or by any such party.".

TIMELY NOTICE OF RATE CHANGES

SEC. 6. Section 205(d) of the Federal Power Act is amended—

(1) by striking out "thirty" and inserting in lieu thereof "sixty"; and

(2) by striking out the last sentence thereof.

INTERIM RATE SCHEDULE

SEC. 7. (a) The first sentence of section 205(e) of the Federal Power Act is amended by striking out "delivering to the public" down through the end of such sentence and inserting in lieu thereof "shall suspend the operation of such schedule and defer the use of such rate, charge, classification, or service until such schedule and any such rate, charge, classification, or service is determined to be lawful.",

(b) The second sentence of section 205(e) of the Federal Power Act is amended by striking out "such five months, the proposed change of rate, charge, classification, or service shall go into effect at the end of such period," and inserting in lieu thereof "five months after the date of filing of such new schedule and the Commission has made a determination, after a preliminary hearing with respect to such new schedule, that all or part of the schedule is likely to be held lawful, the Commission may order an interim rate schedule to take effect,".

PROHIBITION ON PENDENCY OF CUMULATIVE RATE APPLICATIONS

SEC. 8. Section 205(e) of the Federal Power Act is amended by adding at the end thereof the following: "A public utility may not file a schedule which seeks to increase a rate or charge so long as the Commission has pending before it for final determination any schedule previously filed by such public utility.".

FUEL ADJUSTMENT CLAUSE

SEC. 9. Section 205 of the Federal Power Act (16 U.S.C. 824a) is amended by adding thereto the following:

"(f)(1) Except as otherwise provided in subsection (e) or in paragraph (2) of this subsection, the Commission may not allow to go into effect any increase in any rate of any public utility unless opportunity for consideration of such increase in an evidentiary hearing is afforded prior to the date such increase takes effect.

"(2) Paragraph (1) shall not apply to a rate increase made pursuant to an automatic adjustment clause of a rate schedule which has been approved by the Commission in an evidentiary hearing and which provides that rates may be increased by not more than 85 percent of the amount by which (A) the amount of actual covered expenses exceeds (B) 105 percent of the amount of base period covered expenses. The Commission may not approve any automatic adjustment clause which includes, as actual covered expenses, the expenses of goods or services purchased by a public utility from any person who controls, is controlled by, or is under common control with, such utility.

"(3) As used in this subsection—

"(A) The term 'automatic adjustment clause' means a provision of a rate schedule which permits, without affording an opportunity for prior evidentiary hearing, a public utility's rates to increase in order to reflect a change in the actual amount of one or more types of operating expenses.

"(B) The term 'base period covered expenses' means the amount, established for purposes of setting rates after affording an opportunity for evidentiary hearing, of operating expenses to which an automatic adjustment clause applies.

"(C) The term 'actual covered expenses' means the amount of operating expenses which were actually incurred and to which an automatic adjustment clause applies.

"(4) If a rate schedule of a public utility contains an automatic adjustment clause, such schedule shall be reviewed by the Commission in an evidentiary hearing not less often than annually to insure the maximum economies in those operations and purchases which affect such rates. In making such review, the Commission shall review and audit the fuel acquisition practices of such public utility. Each public utility shall provide reports on fuel acquisition practices as required by the Commission, which shall be made available to the public, and shall contain such information as the Commission may require to implement the purposes of this section. On its own motion, or upon complaint, the Commission shall, after affording an opportunity for evidentiary hearing, direct a public utility to cease any fuel acquisition practice which is unreasonably discriminatory or anticompetitive in nature, which does not lead to the use of fuel at the lowest possible cost, or which in any way inhibits or precludes the use or acquisition of the least expensive fuel by such utility.".

CONSTRUCTION WORK IN PROGRESS

SEC. 10. Section 205 of the Federal Power Act (as amended by this Act) is further amended by adding at the end thereof the following:

"(g) The Commission may not, in determining a public utility's rate base for purposes of fixing, approving, or allowing any rate to go into effect, include any portion of construction work in progress (or other similar capital prepayment or accelerated charge provision) in the rate base.".

UNFAIR METHODS OF COMPETITION

SEC. 11. Section 205 of the Federal Power Act (as amended by this Act) is further amended by adding at the end thereof the following:

"(h) Whenever the Commission determines on its own initiative or upon complaint, after affording an opportunity for evidentiary hearing, that a public utility is engaging in any unfair method of competition, or that a public utility has filed any contract, agreement, tariff, or schedule which would result in an unfair method of competition, it shall issue an order prohibiting any such unfair method of competition, or reject such a filing.".

FINANCIAL IMPACT OF RATE INCREASES

SEC. 12. Section 205 of the Federal Power Act (as amended by this Act) is further amended by adding at the end thereof the following:

"(i)(1) The Commission, in making determinations with respect to any new schedule filed with the Commission by a public utility under subsection (d), shall take into account the financial impact of any proposed increased rate or charge of each electric utility which buys electric energy from such public utility for resale to electric consumers.

"(2) As used in this subsection—

"(A) The term 'electric consumer' means any person, State agency, or Federal agency, to which electric energy is sold other than for purposes of resale.

"(B) The term 'electric utility' means any person, State agency, or Federal agency, which sells electric energy.

"(C) The term 'Federal agency' means any agency or instrumentality of the United States, but does not include the District of Columbia.

"(D) The term 'State agency' means a State, political subdivision thereof, or any agency or instrumentality . . ."

APPLICABILITY OF ANTITRUST LAWS

SEC. 13. Nothing contained in this Act or the amendments made thereby shall (1) relieve any person or electric utility from the operation or enforcement of the antitrust laws of the United States, including the Sherman Act (15 U.S.C. 1 et seq.), Clayton Act (15 U.S.C. 12 et seq.), and the Federal Trade Commission Act (15 U.S.C. 31 et seq.), or (2) restrict any authority the Commission may have under the Federal Power Act to regulate unfair methods of competition.

SENATE—*Thursday, January 6, 1977*

The Senate met at 12:30 p.m. and was called to order by Hon. JAMES B. ALLEN, a Senator from the State of Alabama.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Eternal Spirit, Creator, Redeemer and Judge, we beseech Thee to grant us clean hands and pure hearts that we may fitly serve Thee in this place. Help us ever to remember that the character of this body is determined by the character of all who serve here. Spare us from setting standards for others higher than we dare to set for ourselves. As we shape the agenda of the Nation's

business may we prepare our hearts and minds to live and act in accord with Thy will.

And to Thee shall be praise and thanksgiving. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., January 6, 1977.

To the Senate:

Being temporarily absent from the Senate on official duties, I appoint Hon. JAMES B. ALLEN, a Senator from the State of Alabama, to perform the duties of the Chair during my absence.

JAMES O. EASTLAND,
President pro tempore.

Mr. ALLEN thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Tuesday, January 4, 1977, be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The Senate will please come to order. The Senate will receive a message from the President of the United States.

MESSAGE FROM THE PRESIDENT

A message from the President of the United States was communicated to the Senate by Mr. Marks, one of his secretaries.

SIXTH PERIODIC REPORT ON THE CYPRUS NEGOTIATIONS—MESSAGE FROM THE PRESIDENT—PM 2

The ACTING PRESIDENT pro tempore (Mr. ALLEN) laid before the Senate the following message from the President of the United States which was referred to the Committee on Foreign Relations:

To the Congress of the United States:

Pursuant to Public Law 94–104, I am submitting my sixth periodic report on the Cyprus negotiations and the actions which this Administration is taking to assist in the search of a lasting solution to the problems still facing the people of the Republic of Cyprus.

In my last report I reviewed recent steps taken by the administration to bring about further progress in the Cyprus talks, and I emphasized the need for the parties to set aside procedural problems and move on to discussions of key substantive issues.

Our efforts during the past sixty days have been directed to encouraging the resumption of such negotiations. We have been in close contact with our major Western allies regarding new ideas which might contribute to progress in the Cyprus talks and have continued to work closely with United Nations Secretary General Waldheim. Secretary of State Kissinger met with Mr. Waldheim in New York in late August to discuss the Cyprus question. Following that meeting Secretary General Waldheim asked the chief Cypriot negotiators from both sides to come to New York for individual consultations with him on how the negotiations might best be resumed. These consultations developed into a series of joint meetings at which both sides discussed the issues which were blocking further progress. After these meetings, the two Cypriot negotiators agreed to continue their consultations in Nicosia, under the chairmanship of the Secretary General's Special Representative for Cyprus. It is my hope these talks will lead to resumption of meaningful discussion on the main issues.

In his meetings with the Foreign Ministers of Greece and Turkey at the United Nations last week, Secretary Kissinger urged their strong support once again for a new round of talks. We will continue to work as closely as possible with the Governments of Greece and Turkey, with the UN Secretary General, with our Western allies, and with the parties themselves, to insure that every opportunity is seized in pursuing a just and lasting settlement on Cyprus.

To focus the world's attention on the need for rapid progress, Secretary Kissinger stated anew the position of my Administration in his speech before the UN General Assembly on September 30 when he emphasized that our overriding objectives remain the well-being of the Cypriot people and peace in the Eastern Mediterranean. Calling upon all concerned to undertake a new commitment to achieve these ends, he underlined once again the position I have repeatedly voiced:

"A settlement must come from the Cypriot communities themselves. It is they who must decide how their island's economy and government shall be reconstructed. It is they who must decide the ultimate relationship of the two communities and the territorial extent of each area."

This Administration believes that in order to restore momentum in the negotiations a set of principles along the following lines might help the parties to resume talks on substantive issues:

—A settlement should preserve the independence, sovereignty and territorial integrity of Cyprus;

—The present dividing lines on Cyprus must be adjusted to reduce the area currently controlled by the Turkish side;

—The territorial arrangement should take into account the economic requirements and humanitarian concerns of the two Cypriot communities, including the plight of those who remain refugees;

—A constitutional arrangement should provide conditions under which the two Cypriot communities can live in freedom and have a large vote in their own affairs; and

—Security arrangements should be agreed that permit the withdrawal of foreign military forces other than those present under international agreement.

It is my strong hope that these ideas may be given careful consideration by all concerned.

In addition to these steps, the United States also continues to provide financial assistance to the people of Cyprus so that they may overcome the burdens imposed on them by the events of 1974. I have just signed into law a bill authorizing $17.5 million in U.S. relief assistance for Cyprus in the coming fiscal year. Our assistance thus far, some $50 million over the past two years, has been a major factor in providing adequate homes for almost all of those unfortunate Cypriots uprooted in 1974, and, in addition, has made a substantial contribution toward the medical needs, emergency food aid and the general welfare of the many displaced from their homes. We will continue to offer our help wherever it is needed.

The United States also continues to be the largest financial contributor to the maintenance of the United Nations Peacekeeping Force on Cyprus, which has done such a highly effective job. We continue actively to support both the work of the UN Peacekeeping Force and the UN resolutions calling for a just and lasting solution to the Cyprus problem, respect for the sovereignty and territorial integrity of that island, and withdrawal of all foreign military forces not authorized by agreements. While I strongly endorse all of these precepts, the last is of special importance since the cause of peace can only be poorly served when men confront each other with arms. I was therefore gratified to hear of the withdrawal last month of a further portion of the Turkish armed forces from Cyprus.

In summary, during the past sixty days we have increased our efforts to bring the two sides together once more for discussions in any area which might contribute to a more secure and normal life for the people of Cyprus. We have reaffirmed our determination to continue direct bilateral assistance on a large scale. We have worked with other members of the international community to bring about the best possible set of conditions for resumption of the Cyprus talks at an early date.

My Administration will further intensify its efforts to bring both sides together again with the hope, based on their meetings in New York last month, that some further significant advances may occur.

The people of the United States remain keenly interested in promoting an equitable and lasting settlement on Cyprus. My Administration has been active at every opportunity in encouraging such a settlement. We believe the people of both the Greek Cypriot and Turkish Cypriot communities share equally a desire for peaceful, productive and secure lives. We will continue to use every opportunity further to encourage the leaders of both sides toward a common solutin which will achieve these goals.

GERALD R. FORD.

THE WHITE HOUSE, *October 4, 1976.*

MESSAGES FROM THE HOUSE

At 12:33 p.m., a message from the House of Representatives delivered by Mr. Hackney, one of its reading clerks, announced that the House has agreed, without amendment, to the Senate Concurrent Resolution (S. Con. Res. 1) to provide for the counting on January 6, 1977, of the electoral votes for President and Vice President of the United States.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a period for the transaction of routine morning business limited only to the making of speeches, with a limitation on speeches of not to exceed 3 minutes, such period not to extend beyond the hour of 12:50 p.m. today.

The ACTING PRESIDENT pro tempore. The distinguished majority leader does not seek recognition in his own right?

Mr. ROBERT C. BYRD. I do not seek further recognition.

The ACTING PRESIDENT pro tempore. Does the Republican leader seek recognition?

Mr. BAKER. Mr. President, I do not seek recognition.

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from West Virginia? Without objection, it is so ordered. Is there morning business?

HOUSE CONCURRENT RESOLUTION 1—JOINT SESSION TO HEAR THE PRESIDENT

Mr. ROBERT C. BYRD. Mr. President, I send to the desk a concurrent resolution, and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. STONE) laid before the Senate a concurrent resolution (H. Con. Res. 1) to provide for the joint session to hear the President.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution was considered and agreed to.

HOUSE CONCURRENT RESOLUTION 2—COMMITTEE ON INAUGURAL ARRANGEMENTS

Mr. ROBERT C. BYRD. I ask that the Chair lay before the Senate House Concurrent Resolution 2.

The PRESIDING OFFICER laid before the Senate a concurrent resolution (H. Con. Res. 2) to provide for a Committee on Inaugural Arrangements.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution was considered and agreed to.

AMENDMENT OF THE SENATE RULES

Mr. ALLEN. Mr. President, will the Senator from West Virginia yield to me?

Mr. ROBERT C. BYRD. I yield.

Mr. ALLEN. The distinguished Senator from West Virginia, the majority leader, on yesterday introduced by unanimous consent a resolution having to do with amending certain rules of the Senate. By unanimous consent, the resolution went to the Rules Committee under a directive that it be reported back not later than 90 days and not earlier than 60 days from yesterday.

I noted also that at the close of business on yesterday, the distinguished majority leader——

Mr. ROBERT C. BYRD. I believe the Senator refers to Tuesday.

Mr. ALLEN. Tuesday, yes, the last legislative day. On the last legislative day, the distinguished majority leader inserted a notice that thereafter he would make a motion to amend the Senate rules along certain lines, as contained in the resolution that he had theretofore introduced.

I would like to inquire of the distinguished majority leader if he plans to wait until the Senate has acted on this resolution under the unanimous-consent agreement, or if he plans to proceed prior to the time that the resolution comes back from the Rules Committee, under the notice that he has given.

Mr. ROBERT C. BYRD. The distinguished Senator asks two questions. I will answer the second question first.

It is not my plan to proceed to attempt to get any action in connection with the changes that I embodied in that resolution prior to such time as it has been reported back and placed on the calendar.

The first part of the question was a little different. As I understood the distinguished Senator, he asked whether or not it was my plan to seek any such action prior to Senate action on the resolution.

Mr. ALLEN. No, the Senate Rules Committee action.

Mr. ROBERT C. BYRD. No. In that case, the answer is "No."

Mr. ALLEN. There was only the one question.

Mr. ROBERT C. BYRD. Then I misunderstood the Senator.

Mr. ALLEN. I thank the distinguished Senator.

Mr. ROBERT C. BYRD. I think I should say by way of explanation that I passed the notice and the motion to amend the rules to the Committee on Rules and Administration unstapled. If there had been an objection, then I intended to send my notice to the desk separately, but it was stapled and it was all to be printed together.

Mr. ALLEN. I thank the Senator for that explanation. I noted that several pages of the CONGRESSIONAL RECORD intervened between the resolution and the notice. That is what alerted the Senator from Alabama to the possibility that the Senator might proceed under the notice.

Mr. ROBERT C. BYRD. No.

Mr. ALLEN. I thank the majority leader.

QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senate will be in order.

ORDER FOR RECOGNITION OF SENATOR SCOTT ON MONDAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on Monday next, after the two leaders or their designees have been recognized under the standing order, the Senator from Virginia (Mr. SCOTT) be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ADJOURNMENT OF THE SENATE FOLLOWING THE COUNTING OF THE ELECTORAL VOTES

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at the hour of 12:50 p.m. today, the Senate recess to go in a body to the Hall of the House of Representatives, and that upon the completion of the counting of the electoral votes in the other body, the Senate then stand adjourned under the previous order until 12 o'clock noon on Monday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ALLEN. Mr. President, I ask unani-

mous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senate will be in order.

FINANCIAL STATEMENT OF SENATOR ALLEN

Mr. ALLEN. Mr. President, each year at the start of the session of Congress, the first day of the session if possible, I file for the RECORD my financial statement as of the end of the preceding year. I have been doing this each year that I have been in the Senate, and expect to continue to do so.

The statement contains a statement of my assets and liabilities and of my income, of the fact that while I am a licensed attorney I do not practice law in any form, and that I do not now and never have accepted honoraria or expense payments of any sort.

I ask unanimous consent that I be permitted to offer that statement, and that it be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

FINANCIAL STATEMENT

I, James B. Allen, Gadsden, Alabama, do hereby certify that the following is a true and correct statement of my financial condition as of December 31, 1976.

Assets:	
Home at 1321 Bellevue Drive, Gadsden, Ala.—cost 1959	$32,500.00
Furniture, furnishing, books	5,000.00
Automobile	2,500.00
State of Alabama: City of Huntsville, Ala. bonds, $30,000 face amount (carried in past statements but sold 1976)	None
U.S. Savings bonds, at cost	600.00
Residence at 7405 Hallcrest Dr., McLean, Va.—1970 cost	47,700.00
Certificate of Deposit in First Bank of Altoona, Ala	19,000.00
Bank Accounts (exact):	
Personal	1,319.65
Reserve account for medical bills	1,171.11
Household	(33.07 o.d.)
Office (100% personal funds)	1,573.28
Accumulated rent collections on rental of Alabama home	748.25
Property tax and insurance account on Alabama and Virginia residences	359.26
Total	5,138.48
Payments into Civil Service Retirement account (exact)	27,029.36
Life insurance surrender value—all term insurance	None
U.S. Government Bonds—cost	50,395.00
One-half interest (other one-half owned by Jack L. Ray, Gadsden, Ala.) in furnished condominium in Gulf Shores, Ala.	22,500.00
Total assets	212,362.84
Liabilities:	
Indebtedness on residence at 7405 Hallcrest Dr., McLean, Va. to First State Bank of Altoona, Alabama and Exchange Bank of Attalla, Alabama, monthly payment loan (exact)	35,581.10
Mortgage—First State Bank of Altoona, Ala. on home at 1321 Bellevue Drive, Gadsden, Alabama, monthly payment loan (exact)	31,100.68
Note—First State Bank of Altoona, Alabama secured by U.S. Government Bonds	49,711.10
Note—First State Bank of Altoona, Alabama	22,472.10
Total Liabilities	138,864.98
Net Worth	73,497.86

I am not an officer, director, stockholder, employee of or attorney for any person, firm, company or corporation. Though I am a licensed attorney I have not engaged in the private practice of law since coming to the Senate, and I am not a member of any law firm, nor am I engaged in the practice of law in any form. My only business, vocation or profession is that of representing the people of Alabama and the Nation in the United States Senate.

My income is limited to my Senate salary, rent on our Alabama home and interest on certificates of deposit and U.S. Government Bonds listed herein. During 1976 I received no honoraria or expense payments or reimbursements of any sort, nor did I receive nor did any person or committee for me receive any contributions, political or otherwise during such year. I have never during my service in the Senate, or at any time prior thereto, accepted any honoraria or expense payments or reimbursements of any sort. I do not now nor have I ever maintained a so-called "office account" to receive and disburse funds other than those which I myself contribute to such account from my own personal funds. These policies will continue during the time I serve in the Senate.

This statement is made pursuant to a declared policy of filing annually with the Secretary of the U.S. Senate, the Secretary of State of the State of Alabama, the Probate Judge of Etowah County, Alabama (my home county), a statement of my assets and liabilities, and income. A similar statement will be filed each year during my service in the Senate, this being the ninth such annual statement I have filed since coming to the Senate in January 1969.

The purpose of this statement is twofold:

1. To show the absence of any conflict of interest between my ownership of assets and my service in the Senate in the public interest.

2. To keep the public advised as to my financial status, and to disclose the extent to which I have benefited financially during my public service.

I believe the public is entitled to this information from me as a United States Senator in the discharge of this public trust.

Recapitulation of past years' net worth as shown by year-end statements filed by me each year since I came to the Senate:

End of 1968, as I came to the Senate	92,984.81
End of 1969	87,750.00
End of 1970	87,243.34
End of 1971	85,939.09
End of 1972	85,265.70
End of 1973	79,443.92
End of 1974	78,758.77
End of 1974	78,081.27
End of 1976	73,497.86

"WHAT'S RIGHT WITH AMERICA" ESSAY CONTEST WINNERS

Mr. ALLEN. Mr. President, each year I have a contest among high school seniors in Alabama——

[Disturbance in the galleries.]

The PRESIDING OFFICER. The Senator will suspend until the Sergeant at Arms restores order in the galleries.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the galleries?

The PRESIDING OFFICER. The Sergeant at Arms is restoring order.

Mr. ALLEN. Mr. President, in 1975 I sponsored an essay contest on the subject of "What's Right With America," for all 12th grade students in Alabama public and private high schools. Four winners were selected from the hundreds of essays entered in the contest, and those winning essays and the six runners-up were printed in the CONGRESSIONAL RECORD of November 19, 1975.

The quality of all of the entries in that contest so impressed me that I decided to make the contest an annual event and the 1976 contest ended on November 1 and winners and runners-up were selected and awarded before Thanksgiving.

One of the few rules established for the contest limited the essays to 200 words. I felt that this would be a challenge to the students, because some of the world's greatest thoughts have been expressed in fewer than 300 words: The Lord's Prayer contains 66 words, the 23d Psalm has 118 words, and the Gettysburg Address was expressed in 267 words.

In sponsoring this contest, it is my hope to offer a forum for Alabama's junior citizens, who I think are quite representative of other young people in America, to express themselves on what they feel to be the strengths and virtues of our system of representative Government and the state of affairs in our Nation as we begin our third century of existence.

The hundreds of essays which poured into my office in the 1976 contest confirm my belief that the vast majority of our young people feel a great sense of optimism and faith in the future of our country. America's youth has always been its most valuable resource and I strongly believe that today's young men and women have the potential to cure many of today's problems and that they will lead our Nation to greater heights in the years ahead.

Mr. President, we have read of polls which show a supposed credibility gap between the American people and their Government and of a lack of confidence by the American people. Well, the polls evidently failed to take into consideration the views of American young people as expressed by these hundreds of Alabama high school seniors. I believe that my enthusiasm will be shared by anyone who reads these essays, and in order to give at least a sample of the views they contain, I ask unanimous consent that the four winning essays and the six runners-up in the 1976 "What's Right With America" contest be printed in the RECORD.

There being no objection, the essays were ordered to be printed in the RECORD, as follows:

1976 "WHAT'S RIGHT WITH AMERICA" ESSAY CONTEST SPONSORED BY SENATOR JAMES B. ALLEN

WINNERS

First Place: $100 U.S. Savings Bond—Jill Lolley, Enterprise High School, 205 Gilbert Street, Enterprise, Ala. 36330.

Second Place: $75 U.S. Savings Bond—Jim Reynolds, Gadsden High School, 1503 Litchfield, E. Gadsden, Ala. 35903.

Third Place: $50 U.S. Savings Bond—Lynn Grimes, Goshen High School, Route 2, Troy, Ala. 36081.

Fourth Place: $25 U.S. Savings Bond—Carol Sisson, Haleyville High School, P.O. Box 51, Haleyville, Ala. 35565.

RUNNER-UP

Karen Clements, Huffman High School, 704 Sherwood Forest Circle, Birmingham, Ala. 35235.

Debbie Crawford, Plainview High School, Route 3, Box 88, Fort Payne, Ala. 35967.

Jeff Davidson, W.W. Davidson High School, 4136 Burma Hills Drive, Mobile, Ala. 36609.

Ronda Killingsworth, Central High School, Route 5, Box 926 Auburn Road, Phenix City, Ala. 36867.

Joe Turnham, Lee Academy, 606 Moores Mill Road, Auburn, Ala. 36830.

Eric D. Waller, Bradshaw High School, 414 Nottingham Road, Florence, Ala. 35630.

WHAT'S RIGHT WITH AMERICA

(Jill Lolley, Enterprise High School, Enterprise, Ala.)

FIRST PLACE

John Foster Dulles, former Secretary of State said, "If we are faithful to our past, we shall not have to fear our future." Our heritage was founded on the principles of personal and political freedoms. The pilgrims settled at Plymouth Rock in search for freedom to worship as they pleased—not as the king dictated. The colonists fought the British in order to obtain the right to self-government—the right to choose who should lead them and how they should be taxed. These freedoms have enabled a Republic of thirteen small colonies to grow into a major world power. Our heritage of freedom of speech, freedom of press, freedom of religion, and freedom of free enterprise has enabled our nation to progress in industry, agriculture, science, and culture. We as Americans must be proud of our heritage that has laid the foundation for what is right with America now. If we uphold our heritage based on personal and political freedoms, I have confidence America's future will be one all Americans can be proud of.

WHAT'S RIGHT WITH AMERICA

(Jim Reynolds, Gadsden High School, Gadsden, Ala.

SECOND PLACE

America is a land of promise. Ours is a heritage of greatness, prestige, and hope for the future, keeping in mind the struggles and hardships of our forefathers. Americans possess an inherent sense of pride which consistently promotes individual accomplishment. Each new generation of Americans is encouraged by the defeats and victories of the preceding generation.

Patriotism is not dead. Patriotism lives in the hearts of all Americans who take pride in being themselves. America is the land of the individual, yet all Americans are members of a distinct brotherhood which forms the basis of our nation itself.

We, as Americans, owe a certain debt of responsibility to our country which can be denied by no true American. We should all be thankful for the immense benefits that our citizenship provides and, more importantly, we should do everything within our power, individually and collectively, to promote the growth of our nation. Americans have always taken pride in serving their country and many have given their lives in this service. This is the essense of the spirit of America.

WHAT'S RIGHT WITH AMERICA

(Lynn Grimes, Goshen High School, Troy, Ala.)

THIRD PLACE

America is based on a dream—a dream of purpose, freedom, self-fulfillment and the "inalienable rights of life, liberty, and the pursuit of happiness." These dreams brought millions to American shores and these dreams still exist.

Today men and women have equal opportunities to achieve their goals. They have freedoms to say and do what they choose, and rights that should not be infringed upon. Individualism, success, happiness and involvement are essential elements in every meaningful life.

As these dreams and promises comprise an American profile, these same dreams are coming true. America is becoming more and more what she promised to be. Americans continue to pursue the right.

What is right with America? America is no less than her people, who are unique, moral, optimistic, decent living individuals who take pride in their country, their religions, their families, and their jobs.

What is right with our country? The American dream brought millions to her shores and this dream shines brightly in the hearts of millions, both here and abroad.

WHAT'S RIGHT WITH AMERICA

(Carol Sisson, Haleyville High School, Haleyville, Ala.)

FOURTH PLACE

With so many voices shouting the wrongs in America today, one might believe that this country is on its decline. I say, however, that the very people who make these complaints are proving what is right with America.

Our nation, founded on the principle of freedom for all, protects the very individuals who seek to tear her down. The Constitution of the United States provides freedoms which are basic to all men. Americans are given the opportunity to express themselves in whatever way they choose. The only restriction is that they may not infringe on the rights of others in doing so.

The expression may be in the form of celebrating the Bicentennial, standing up for the National Anthem, or attending a national political convention. If, on the other hand, the expression is marching to protest something, joining the American Communist party, or campaigning for a Communist candidate for President, nothing is done to suppress it.

In America, everyone is free to follow his own conscience, no matter what others may think. This individualism, whether it sets one for or against our nation, is fiercely guarded with the sharp sword of Democracy. With this principle held high, America will endure.

WHAT'S RIGHT WITH AMERICA

(Karen Clements, Huffman High School, Birmingham, Ala.)

"I believe in the supreme worth of the individual. . . ."—John D. Rockefeller, Jr.

The philosophy of individualism is what is right with America. The American individualist has independence and a dedication to freedom. Individualism is the keystone of America's political system and America's economy.

Our government, the servant of a society of individuals, protects the individual rights of "life, liberty, and the pursuit of happiness.'" The Constitution and the Bill of Rights protect the individual freedoms of speech, religion, press, and thought. To preserve their independence, Thomas Jefferson, George Washington, and others conceived a democracy governed by the people, and they rejected a monarchy ruled by tyrants.

Individuals with free minds and free consciences have forged our economic progress. A Staten Island Ferryman with a yen for success became a multi-millionaire called "Commodore" Vanderbilt. A "newsbutcher" for the Grand Trunk Railroad became a geat inventor known as Thomas A. Edison. Individualism has augmented the American economy.

Individuals have written American history with experience. They will illustrate the pages of future histories. They are the achievers, the producers, the men and women with free, independent thoughts. They are what's right with America.

WHAT'S RIGHT WITH AMERICA

(Debbie Crawford, Plainview High School, Fort Payne, Ala.)

Criticisms of America are heard more frequently than praise of her virtues. Now, during our bicentenial year, is the time to concentrate on what is right with America!

America is the "land of opportunity", the land where all who are able and willing to work have a chance to set and achieve their goals in life. America is the land of religious freedom, the land where all may worship as they choose or not worship at all. America is the land of democratic government, the land where representatives are elected to speak out on issues concerning the citizens in their district. America is the land of free enterprise, the land where anyone who wishes to operate a place of business may do so. America is the land of free speech, the land where everyone has the right to express orally his/her opinions. America is all these things and much, much more.

America is a wonderful place to live, offering so much more to her citizens than any other nation in the world. She is truly "America the Beautiful".

WHAT'S RIGHT WITH AMERICA

(Jeff Davidson, W. W. Davidson High School, Mobile, Ala.)

For 200 years America has stood as a beacon of light in a world of darkness emitting freedom, justice, and equality. Her beauty and benevolence have touched virtually every part of the world. Those who were hungry, she fed; those who were naked, she clothed; to those who were persecuted and oppressed, she gave refuge and rest. Time and again when called off to war, many have given their lives that the truth for which she stood might live on. Plagues, earthquakes, war, crises, and disaster upon disaster have come and passed, yet still she stands, victor over tragedy and time.

Today there are those who challenge her and threaten her with destruction. She is continually mocked, ridiculed, misrepresented, and denied. Even some of her own have turned against her. But united she stands, stronger than ever before—battered but not broken, downtrodden but not defeated, hounded but not hopeless. And in spite of all she may be, of this am I sure:

That she is not perfect nor ever shall be,
But because of her birth I was born free.

Yes, I am hers and she is mine,
And together we live, and die side by side.

WHAT'S RIGHT WITH AMERICA

(Joe Turnham, Lee Academy, Auburn, Ala.)

I read it in magazines. I hear it on the news and in political speeches. I get an earful of it from many of our nation's top leaders. They all seem to think America is corrupt and destined for doom. They all deplore the evils of our society. Yet, after 200 majestic years as a free republic a lot is right with America.

We have had trouble since Valley Forge, but unlike then our soldiers now have boots to wear and warm barracks in which to sleep. People laughed at our nation 200 years ago, but today our power and strength are respected all over the world.

Napoleon, Hitler, and Stalin tried to create great empires, but never reached the wealth or enjoyed the benefits we enjoy. The miracle is that all Americans enjoy this greatness in freedom.

America produces more goods, raises more food, and educates the greatest men. Your and my lifestyles are the envy of the world. We have nicer homes, better diets, and more opportunity than any other people.

Can you complain about your condition, your government, your job? Surely you can, because you are free and independent. You can change your government, because you are the government. We, the people, are our government. Our greatness lies, not in our material wealth, but in the freedom of the hearts, minds, and souls of our people. Upon that platform we build. Without that platform of freedom we are not America.

WHAT'S RIGHT WITH AMERICA

(Eric D. Waller, Bradshaw High School, Florence, Ala.)

When writing about the greatest country in the world it is logical to mention its early establishment and great beginning. In those days it was not such a great beginning though, because whatever they earned came from sweat and blood. That included freedom which was prized over all possessions. The founding fathers, because of this high regard for liberty, to live one's own life with regard to others, did an unheard of and risky thing. They turned the government over to the people. The result was not anarchy but the first true form of democracy. Our forefathers reasoned that the people were the best ones to know right from wrong. Faith in the people to exercise government would not be disappointed. So we celebrate two hundred years of decision making by a government of and for the people. We have stood the test of time and are structured therefore to withstand the coming years. "What's right with America?" A list in answer would be long and tedious. No one person could take all the credit because many are the participants of this democracy. The people are responsible for America and they are what's right with America

---

WHAT'S RIGHT WITH AMERICA

(Ronda Killingsworth, Central High School, Phenix City, Ala.)

America can best be described by one of her symbols, the bald eagle. An eagle is strong and powerful. An eagle lives in harmony with itself, moving and flowing freely within nature. However, these features of power, strength, and harmony are not the strongest points of comparison one may see between America and an eagle.

The strongest comparison is the free spirit which flows through the eagle's blood, for this free spirit also flows through the blood of America. America's free spirit flows through the minds of other countries causing jealousy and unfounded acts of violence on America. This free spirit gives America its strength and progressive motivation. America's free, peaceful spirit is what gives her the motivation to help countries where hunger, war, and strife abound.

What's right with America can be summed up in three words, "America's free spirit." All of her strengths and services are contained within her free spirit. All of her beauty and peacefulness are also contained within her free spirit. As the eagle so proudly and beautifully soars through the skies, America's beautiful free spirit soars through the hearts of her people, making them proud to be an American.

INSERTION OF STATEMENTS IN THE RECORD TODAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Senators may have until the hour of 5 p.m. today to insert statements in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

TRIBUTE TO SENATOR PHILIP A. HART

Mr. BROOKE. Mr. President, death finally came for Philip A. Hart, as he had known for some time that it would. It came the day after Christmas. And in so doing, it took from us one of the most selfless, devoted, and courageous public servants of our time.

It is hard to grasp the loss of this warm, humane man; the unfairness of cancer's awful toll; the quiet courage with which he and his family faced it.

In his 64 years, 18 of which were spent here in this Chamber, Phil Hart left an indelible mark on American politics and American life. The litany of his legislative interests and accomplishments is as long as it is important. Amnesty, antitrust enforcement, drug safety, civil rights, and environmental protection were just a few of the issues he championed.

But they were more than simply issues to be pursued. Keats once wrote:

A man's life of any worth is a continual Allegory.

I think those words apply to Phil, for the issues he involved himself with were but allegories, symbols of his inner beliefs and convictions, concrete expressions of his inner rage against discrimination, against suffering, against deprivation, against growing corporate power that threatened the average citizen.

When Phil retired last fall, I knew—we all knew—that we were losing as fine a man as we are likely to see walk into this Chamber, and as fine a public servant as we are likely to have in this country. His death only magnifies this sense of loss. That American politics will someday elevate itself to Phil's level of distinction is the hope of one who will always consider it the greatest privilege to have served in this body with so wonderful a man.

To his wife Janey, who so eloquently shares her husband's determination to make this a better world, go my prayers that God be with her and her eight children to comfort them in their loss, and that He stand by them in the weeks and months ahead. I deeply regret being out of the country at the time of his funeral; its simplicity seemed yet another symbol of the dignity that was Philip A. Hart.

Mr. President, much has been written about Phil Hart, but few writers have grasped the sheer depth of his heart and soul as has Colman McCarthy of the Washington Post. I ask unanimous consent that his tribute to Phil, which appeared in the Boston Globe on December 31, be printed in the RECORD. It says it all.

There being no objection, the tribute was ordered to be printed in the RECORD, as follows:

THE TRUSTED MAN OF POLITICS

(By Colman McCarthy)

WASHINGTON.—In late September, in what were to be his last public words, Philip Hart spoke simply before a gathering of the Michigan delegation to Congress: "I close as I began, by thanking all of you for trusting me."

That he was thanking others was characteristic. Yet the debt was clearly and directly the other way. How many owed something to Sen. Hart when he died Sunday can't be known, but it can be said that because of the moral substance of his positions and the depths of his character, it was no accident that he was the trusted man of American politics.

He fronted for no one. His alliances were to timeless ideals, not upstart lobbies. As though he were the wildest of gamblers, he bet that the common vanities of hack politics—images, smiles, calls for brighter days—counted for little. Instead, he wagered that conscience and persistence could matter.

Philip Hart's 18 years in the Senate can be understood, on one level, by examining the positions he took and the causes he backed. He used his political power to help ease the suffering of society's victims, from inner-city children damaged by lead fumes to farmworkers poisoned by pesticides. He sought to reduce the might of corporations and increase their accountability, beginning with the automakers in Michigan who might have expected some coziness from him.

Others in Congress have groped through the darkness with similar lights, yet they have not come close to enjoying the trust that people gave Philip Hart. The difference had less to do with positions or votes than with voice. Sen. Hart spoke, whether in private conversation or public debate, as one who cared little for the spectacle of politics—everything for its potential to elevate policy to the heightened level where people live. Because of that, trusting him required no large leap of faith. Instead, the faith was but a step away, no more than a natural movement from doubt to believability.

Sen. Hart made mistakes, but the public learned of them from him, not the newspapers. In November, 1975, he attended hearings at which abuses by the FBI were detailed. Hart said that prior to those hearings he had "been told for years by, among others, members of my own family that this is what the bureau has been doing all this time. As a result of my superior wisdom and high office, I assured them that they were on pot—it just wasn't true. They (the FBI) just wouldn't do it. I am glad I got back in time

to be persuaded of what my own family had not been able to persuade me of for so long."

That Hart could be sufficiently detached to see his own lapses was one of the reasons for his closeness to Eugene McCarthy. "Gene had an ability to stand back and look at us, including himself," Hart recalled in an interview this year. "In the Senate, where you're busy all the time and tend to think this is where all the action is, amid all the puffery that goes on around here, Gene could periodically sit in the gallery and look at himself and the rest of us, and put it in perspective."

Although Hart understood that "no one gets into elective politics who doesn't have some ego to be fed, and that includes me," he consistently defended politics as "a high vocation." He told the September gathering of his Michigan colleagues, "There are people who fill books describing or vaguely suggesting the evils that occur in these halls. If they could listen to the conversations I've listened to since 1958, if it were evil they were curious about they would have long since left. In my book, politicians maintain a higher level of integrity that most other categories. The temptations are great but hopefully the discipline of the press and others is equally great and even if you would like to pick up an extra $500 million you wouldn't like to read about it. Most people say thank you, but 'no'. I hope that younger people understand that politics is a very dangerous business. But what effective weapon isn't?"

Much of Hart's committee work involved issues that touched people's lives in the neighborhoods and shops and showed how these people were often victimized by the government's value system. Some of these values, he told a reporter in his office, have helped create "the myth that you increase your (national) security by increasing your armaments. I don't know how many billions we've spent for weapons since I've been here but it's at least a trillion dollars . . . And the whole world is doing it, and we're peddling arms to the poor nations. Every dollar spent that way is a dollar deprived the poor, health systems, educational systems. Last year, the world spent—I think it was $240 billion—for its 'security.' If we had taken 10 percent of that —$24 billion—and put it into technology to increase agricultural productivity so the world could better feed itself—a person could argue he would have contributed more toward security than we got from that $24 billion spent on weapons."

Philip Hart was neither a scholar nor an orator and he had little taste for writing. In crowds, he was easily overlooked. He was no shouter and refused to bombard newsrooms with press releases merely to get coverage of his hearings. If any issue was crucial, the pack would be forced to show up sooner or later, while the prescient reporters would have been on hand all along. News coverage ranked lower to him than news analysis: the painstaking laying-out of the connections among economic forces, legislative reforms and what all the confusion meant in the lives of citizens. He valued editors and writers who shared his conviction that citizenship didn't have to be a synonym for bewilderment.

By maintaining fidelity to one wife, one church and one party throughout his adult life, Sen. Hart lived, as it might be said, as a conformist. But the ideas he conformed to—that laws mattered, that public exposure would lead to less victimization of the innocent, that inner rage was compatible with outer gentleness—were less the values of the herd than his own standards of singular excellence.

The last weeks of Philip Hart's life were an agony of cancer's pain. He had known death was coming, had quietly spoken of it and had called a priest to his bedside to make peace with the God with whom he had seldom quarreled. His death on Sunday, in his home on Calvert street with his wife and children offering mercies, came several days after consciousness had become but a flicker. His body, small to begin with, had given out. The visitors to his sickbed could only trust that their dying friend—beyond words but not yet beyond life—knew they were there to offer final testaments of love. It was fitting that they should have this faith at that time, trust having so ofen passed between Sen. Hart and his friends.

TRIBUTE TO SAM RAYBURN

Mr. BENTSEN. Mr. President, as the American people celebrate the beginning of this country's third century, I feel that it would be appropriate at this time to reflect for a few moments not only on our past, but also our future.

Mr. President, last year the people of our great country celebrated the Bicentennial of the founding of our Republic and honored those patriots who were the "architects" of our present freedoms, or in Jefferson's words those who dedicated "their lives, liberty, and sacred honors."

In this the beginning of a new Congress, I feel that it is only appropriate that we pay tribute to the memory of a modern day "architect" whose devotion to the Congress as a whole was unmatched. The man I speak of is the late, former Speaker of the House of Representatives, Sam Rayburn of Texas.

On January 6, 1882, Sam Rayburn was born near Kingtown, Roane County, Tenn.

In 1887, his parents moved to Fannin County, Tex.

After attending several Texas rural schools, Rayburn was graduated from Mayo's East Texas Normal College of Commerce, Texas in 1903.

He studied law at the University of Texas at Austin, and in 1908 he was admitted to the bar and opened practice in Bonham, Fannin County, Tex., his hometown until death.

In 1907, he was elected to the Texas State House of Representatives, serving as that body's speaker in 1912 and 1913.

He was elected as a Democrat to the 63d Congress of the United States, for the term beginning on March 4, 1913, and took office as a Member of the House of Representatives on April 7, 1913, when the Congress was called into extraordinary session by the newly elected President Woodrow Wilson. He served continuously from the 63d Congress until his death in 1961.

In the 75th and 76th Congress—1937 to 1940—he served as majority leader.

On September 16, 1940, he was elected Speaker to fill the vacancy caused by the death of Speaker William B. Bankhead of Alabama.

Rayburn was subsequently reelected Speaker in the 77th, 78th, and 79th Congress and with the exception of the 80th and 83d Congress when he served as minority leader, he served continuously as Speaker until his passing in 1961.

All in all, the late Speaker Rayburn served for 48 years as a Member of the House of Representatives, 16 years of which he served as the presiding officer of that body.

Mr. President, the aforementioned facts which I have related are only biographical statistics.

They do not testify to the accomplishments and the qualities of the man himself.

As a legislator during the New Deal, he was responsible for steering through the House "the Truth in Securities Act," "the Securities and Exchange Act," "the Federal Communications Act," "the Railroad Holding Company Act," "the Public Utilities Holding Company Act," and "the Rural Electrification Act."

Moreover, in addition to these monumental pieces of legislation, he was a driving force behind the farm-to-market road program, the soil conservation and food control acts, and the GI bill of rights.

During his tenure in the Congress and as Speaker, Sam Rayburn sought to represent all the people. He fought with the only weapon he possessed and that was his legislative skills. At the same time, however, he was not arrogant or dictatorial, but rather a man who could bring compromise out of conflict and harmony out of discord.

Sam Rayburn served twice as long as any Speaker and was one of the ablest and most farseeing men in this century. He served with eight Presidents from Wilson to Kennedy, and all valued his advice and counsel. Most importantly, however, he never failed to show his fairness to all regardless of their political persuasion.

Mr. President, today in Bonham, Tex., the home of the late Speaker Rayburn, the residents are celebrating the birth of this great American. The people of Texas as a whole will also celebrate, Mr. President, for the Governor of the State of Texas, the Honorable Dolph Briscoe, has declared this to be "Sam Rayburn Day" in Texas.

There was a time, Mr. President, when many remarked that they could not imagine a Congress without Sam Rayburn. Likewise, today, it is hard to accept the fact that he no longer is present to give advice and counsel. As a young Congressman from Texas, I had the opportunity of knowing Speaker Rayburn.

He was a wise counselor, but most of all he was my friend.

Speaker Rayburn would often say, "You can't be a leader, and ask other people to follow you, unless you know how to follow, too."

Sam Rayburn "followed" the will of the people. He knew their hopes, their disappointments, and their dreams, because he was one of them. A common, everyday man. Even though he rose to great heights, he never chose to forget his heritage.

ANNOUNCEMENT OF OPPOSITION TO PAY INCREASE RECOMMENDATIONS FOR FEDERAL BUREAUCRACY AND CONGRESS

Mr. DOMENICI. Mr. President, I would like to take a moment early in the session to announce my opposition to the recommendations of the Quadrennial Commission to increase the pay of the Federal bureaucracy and Congress. If the President chooses to propose this package of salary increases in his fiscal year 1978 budget message, it is my intention to oppose it vigorously and introduce a resolution of disapproval.

At a time of economic uncertainty when the American people are being called upon to make sacrifices, and when American business and labor are being urged to show restraint in prices and wages, it is imperative that Congress set an example.

Pay increases in the order of the 25 to 50 percent recommended by the Commission can only properly be perceived by the public at large as unwarranted. At a time when public disenchantment is growing with both the Congress and the bureaucracy, salary increases of this magnitude represent an exercise in irresponsibility. At some point the American people have the right to expect some leadership from their elected representatives rather than the spectacle of them voting themselves excessive pay raises. Accordingly, Mr. President, I would urge my colleagues to join in opposition if the President chooses to propose the recommended pay increases in his forthcoming budget message.

OIL, ARMS, AND IRAN

Mr. CULVER. Mr. President, Iran in recent years has been rapidly expanding its defense budget and its military forces. According to the best unclassified source, the International Institute for Strategic Studies in London, Iran's defense budget in 1976 was 11 times its 1970 level. During the same period, the Army expanded by 50 percent in terms of numbers of men; the Navy more than doubled; and the Air Force more than quadrupled in personnel and doubled its number of combat aircraft. Qualitatively, Iran has improved its forces dramatically with the acquisition of the latest and best American equipment such as our F–14 fighters with Phoenix missiles.

U.S. military sales to Iran have totaled $15 billion over the past 6 years, and France and Britain have also sold hundreds of millions of dollars' worth of weaponry.

How can Iran afford and absorb all of this new equipment?

If recent news reports are accurate, the answer to this question is that Iran is depending on higher oil prices to pay for equipment which it probably cannot absorb effectively anyway.

On Wednesday, the New York Times printed a major article questioning whether Iran can absorb the vast purchases of weapons which it has made in recent years. The article cites several examples of problems which have been created by the rapid influx of sophisticated equipment.

Early in December, the Washington Post reported from Teheran that the Iranian military was pushing for a 15-percent increase in the price of oil in order to pay for what the generals claimed were higher prices of U.S. weapons. Although OPEC members eventually split over whether to increase oil prices by 5 or 10 percent, it is significant that one of the major pressures for higher prices was the military's desire for new, more costly equipment.

Mr. President, I believe that we need a comprehensive review of U.S. policy toward Iran, one which takes into account broad security matters, arms sales issues, economic relations, and human rights. Such a review should seek to establish whether there is a dynamic and a momentum, as there appears to be, for ever-rising oil prices and arms sales.

If there is such a linkage, we must break that chain. We must not allow other nations to take vast quantities of our most advanced equipment, often before our own forces are supplied, and then charge us higher oil prices to pay for those weapons.

Mr. President, in order that all Senators may have an opportunity to read the articles which I have mentioned, I ask unanimous consent that they be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Dec. 9, 1976]

IRAN'S MILITARY, OIL CHIEFS SPLIT OVER PRICE INCREASE

(By William Branigin)

TEHRAN, IRAN, December 8.—Iran's military leaders and its civilian oil officials are in sharp disagreement over how much of an increase in the world price of oil they want the Organization of Petroleum Exporting Countries to adopt next week.

The Iranian military, with the support of the shah, appears to be urging a 15 per cent increase, contending that inflation in the United States is boosting the cost of American arms and justifies a major oil price rise.

Top specialists of the National Iranian Oil Company say privately, however, that OPEC should limit any increase to 10 per cent to avoid upsetting oil consuming economies and to assure a continued strong market for Iranian oil.

In October, the shah urged a "minimum 15 per cent" increase. In recent statements, he seemed to soften this demand, saying the figure could be a starting point for bargaining purposes. But today his call for a 15 per cent increase was published anew by Iranian newspapers.

In an interview this week, Gen. Hassan Toufanian, Iran's vice minister for war, urged a sharp increase in the price of oil, charging that U.S. inflation in the last 15 months has tacked an additional $2 billion on the price of weapons Iran is buying from the United States.

Toufanian, the chief Iranian arms procurement officer, did not specify what increase he would like to see adopted at the OPEC conference, set for Dec. 15 in Doha, Qatar. But his statements indicated that the military favors a sharper price rise than do specialists in the state oil company, who are more concerned with selling Iran's oil than with what the revenue it brings in can buy.

The oil officials recall that last winter the economic recession in the West reduced oil orders, significantly cutting into Iran's oil income.

Toufanian blamed U.S. inflation and defense contractor profits for what he feels are excessive cost increases on arms orders, especially for spare parts and support services. These, he said, justify an oil price increase.

To illustrate his point, he reached into a cardboard box filled with small aircraft parts and produced some odds and ends. Holding up a helicopter door handle, he said, "This costs us one barrel of oil."

The OPEC price for Iranian light crude, the country's most expensive grade, is presently $11.62 a barrel.

The general said U.S. companies are charging the equivalent of more than 10,000 barrels of oil a year to send a single low-level American warehouseman or mechanic to Iran and support him here for a year.

A U.S. employee officially described as "a logistics representative" but who does the work of "a storekeeper" for an arms company costs $115,000 a year, according to the most recent charges outlined in U.S. support services contracts, Toufanian said.

Toufanian said "imported inflation" would hurt both Iran and the United States.

Defense officials said inflated U.S. arms costs have forced Iran to revise plans to modernize its military, cancel some American orders and seek suppliers apart from the United States. Toufanian recently signed an oil-for-missiles barter deal with the British before traveling to Moscow for a five-day official visit, the purpose of which was not disclosed.

The $2 billion in additional bills presented to Iran recently by the U.S. government covers cost increases on arms orders previously set at $10.4 billion. Iran has trimmed its military programs as a result, officials said.

Orders for two of six Spruance class destroyers were canceled after the cost nearly tripled to $338 million apiece, they said. Plans to buy American M-113 armored personnel carriers were also dropped because of cost increases.

Iran is insisting on renegotiating the F-16 contract after the U.S. government priced 160 of the planes at $3.8 billion, including inflation over the delivery period, just three months after the manufacturer, General Dynamics, had given a figure of $2.1 billion for 300 aircraft based on 1975 dollars.

[From the New York Times, Jan. 5, 1977]

IRAN'S VAST PURCHASES OF WEAPONRY STRAIN ABILITY OF COUNTRY TO ABSORB IT ALL

(By Eric Pace)

TEHERAN, IRAN.—Since early 1972 Iran has spent more than $15 billion on military equipment ranging from sophisticated aircraft to tanks, and concern is growing about the ability of the nation's armed forces to absorb so much new equipment.

The country has already allocated $200 million to have United States experts train ground personnel of the Iranian Air Force, and Iranian officials have recently stressed the importance of preparing for more new arms deliveries. Plans have been made for 1,000 American experts to help with the maintenance of advanced F–16 fighter bombers ordered by Iran.

Foreign critics contend that these heavy arms purchases are excessive and ill advised, and there is also concern about the country's procedures for purchasing arms.

Iranian authorities contend that the coun-

try needs modern armaments to meet threats to its security and that it has formal procedures for deciding what to buy to meet these threats. In practice, however, it by and large just orders new American-made equipment, notably aircraft, as it becomes available.

SHAH HAS THE FINAL WORD

The final say in Iran's arms buying belongs to the country's ruler, Shah Mohammed Riza Pahlevi, who has been defending all the spending against criticism. He denies persistent reports of corruption in foreign arms deals and suggestions that he has empire-building intentions.

"As far as I know, I think we have absorbed these arms so far easily, very easily; whatever we get in the future will also be absorbed," the Shah asserted at a news conference in Iran last summer when questioned about Iran's capacity to operate and maintain all the weaponry it is buying with its oil income, which is expected to be $22 billion or more this year.

Yet the fact that Iran has been having trouble coping with the influx of armaments was underscored by the Government's decision, disclosed recently, to go ahead with the $200 million, three-year program under which up to 400 American civilians are to train thousands of Iranian airmen in supply management, inventory control and other skills necessary to keep Iran's new aircraft serviced and provided with spare parts.

It has also been suggested here that similar training programs may be organized for Iran's navy and ground forces.

AIR FORCE GETS MOST ATTENTION

Attention has been focused on Iran's air force because that is where the bulk of the new sophisticated equipment has been going—and will continue to go. In August, it was announced that the United States had agreed to sell Iran 160 F–16's at a cost of well over $3 billion. Iran has also expressed an interest in buying 140 more of the F–16's.

In addition, Iran expressed interest in September in buying 250 land-based versions of a new United States Navy fighter, the Northrop F–18, although the land-based F–18, known as the F–18L, has not been developed and may never be developed. That possible deal would be worth $4 billion.

What Iran had earlier received or ordered from the United States includes, at rough count, a half-dozen Lockheed P–3 sea reconnaissance aircraft; 80 Grumman F–14 Tomcat fighters; more than 300 McDonnell Douglas F–4 fighter-bombers and Northrop F–5 fighters; two dozen Boeing 747 and 707 military tanker and cargo aircraft; 500 Bell military helicopters; and four Spruance-class advanced destroyers, which are to be delivered to Iran in the 1980's.

The list also includes three Tang-class submarines and the large, supersecret communications monitoring installation known as Project Ibex, along with many other American-made items.

A HALF-ILLITERATE MILITARY POWER

It was impossible for Iran, a country with a population of about 30 million and half of these illiterate, to avoid difficulties in assimilating the military equipment, despite expensive help from United States civilian and military personnel.

At present, there are more than 10,000 American civilians in Iran in connection with defense industry projects—the figure includes employees and their dependents and the total is expected to grow.

In the last five years, numerous signs of problems with military sales to Iran have appeared, especially where training was involved. A shortage of military jet pilots developed and some new ground equipment had to be put into storage for lack of trained operators. A strike by hastily recruited American helicopter instructors in central Iran last year called attention to the problems.

EAGLETON SEES SOME CONFUSION

Senator Thomas F. Eagleton, Democrat of Missouri, said some time ago while visiting Iran that in making his massive arms purchases the Shah "knows what he's getting into in terms of cost, but I doubt if he knows in terms of the cost of the requisite and indispensable manpower to operate, maintain and service such highly complex weaponry."

Yet Iranian officials have been insisting in recent months that necessary preparations for putting and keeping new equipment in effective use are being taken. The Shah's chief military procurement officer, Gen. Hassan Toufanian, in a recent interview, declared that Iran gave careful study to the requirements for skilled manpower that the country's arms purchases entail, along with many other logistical questions.

An example often cited here is the F–16 deal, which is to extend over a period of several years and provides for spare parts, support equipment and the training of Iranian air force personnel.

Yet General Toufanian, interviewed at his office in a military compound in northeastern Teheran, said that though Iran planned years in advance to train Iranians and make other preparations for defense systems, problems nonetheless arose. Sometimes, he said, the equipment arrives "and I don't have the people yet, we have a gap, and we ask your friendly country, the United States, 'please fill the gap for us.'"

Senator Eagleton, interviewed at the United States Embassy compound here, said he had serious doubts whether the Iranian armed forces would ever be able to operate their new weaponry without the assistance of foreign military experts.

AUTHORITY AND NATIONAL PRIDE

The sheer size of the Shah's armaments purchases has also caused unease and negative comment in other nations of this volatile area—as they have on Capitol Hill. A Turkish newspaper recently published a cartoon showing the Shah standing on an ammunition box and pointing to a map where Iran had expanded to include the entire Middle East and the Indian subcontinent.

Yet to a longtime traveler in this area, the Shah's desire to equip his armed forces with modern military equipment—he has long preferred American-made equipment—seems understandable. It was largely through the deployment of military power that his father and predecessor, Riza Shah, worked to establish central authority throughout Iran, which has numerous disparate ethnic groups.

And when the present Shah was a young man, he saw his father humiliated by the movement of British and Soviet forces into Iran in August 1941.

By buying quantities of new arms, which have a prestige as well as a strategic and tactical value, the Shah is presumably helping to deter foreign military challenges from various directions to his dictatorial regime.

He is also maintaining the armed forces as a powerful instrument to contain and forestall separatism, notably in the southeastern region of Iran, Baluchistan. And the indications are that his purchases are helping to keep morale and loyalty high in the armed forces.

Yet the vast scope of the armaments that the Shah has shown interest in acquiring does not seem justified by these considerations. Even foreign military experts who applaud most of the Shah's military policies voice perplexity over his interest in the Northrop F–18L.

General George S. Brown, chairman of the United States Joint Chiefs of Staff, said in an interview in October that one of the main concerns of the United States in the Middle East was Iran "and the puzzling question of why she is building such a tremendous military force."

Later he added more guardly that the Shah "correctly sees a need for Iran to be militarily strong."

WEAPONS FASCINATE THE SHAH

Explanations of why Iran wants all this equipment have been repeatedly forthcoming from Iranian leaders, notably the Shah himself.

Noting that Iran's "defense and the independent national policy" had been officially declared to be "super principles" of his modernization and development policies, the Shah told an interviewer here this fall: "If Iran is strong and independent then we can apply the [other] principles but if there is no Iran there will be nothing else either."

"Fortunately our people fully appreciate the importance of these two inner 'super principles'" he said, adding: "The defense of Iran and its independent national policy are even above history and time."

Behind such generalities lies a more detailed military rationale that a traveler in Iran repeatedly hears in somewhat varying forms. Its essence is that Iran has proven vulnerable in the past and now must reckon with dangers from almost every direction.

A PROBLEM OF OIL SHIPMENTS

One danger is that an enemy, or enemies, might try to impede or cut the flow of Iranian and Arab oil from the Persian Gulf through the narrow Strait of Hormuz. This oil comprises the bulk of Western Europe's supply, more than 80 percent of Japan's supply and part of the 40 percent of the United States' oil requirements now filled by imports.

Elsewhere around Iran's borders, Iranian planners perceive a variety of potential threats, notably from the racial Arab Government of Iran's western neighbor, Iraq—even though relations between Iraq and Iran have been substantially improved since early 1975.

For years now the Shah's supporters here have been citing statistics about Iraq's Soviet-equipped military establishment in partly explaining and justifying Iran's military acquisitions.

Recently, a traveler was told here by circles close to the Shah that though Iran now owns more tanks than Iraq, Iraq has more than 1,400 tanks and more than 1,000 armored personnel carriers formed up in combat units while Iran has only about 1,200 tanks and 750 armored personnel carriers in combat units.

The number of aircraft in the Iraqi Air Force has increased by more than a third since the 1973 Arab-Israeli war, it was said, and Iraq now has roughly 350 advanced fighter planes on hand, including MIG–23's—about a score more aircraft than the equivalent figure for Iran.

Appraisals of the likelihood of an Iraqi-Iranian conflict differ. In Baghdad, the Iraqi Information Minister, Tariq Aziz, told a traveler not long ago: "Iran is our neighbor, and you cannot change your neighbors; it is one hundred times better to have good relations with your neighbor than bad."

Given the climate of controversy surrounding Iran's procurement practices, General Toufanian understandably underscored in the interview the various deliberative processes involved.

Receiving a caller in his large office, the general reported that requirements for Iran's arms purchases were formulated by a group of officers who carry out planning under

Gen. Golamreza Azhari, who is the head of the supreme commander's staff—the supreme commander being the Shah.

General Toufanian said these officers, in their deliberations, took into account threats to Iran and unspecified "political guidance and basic assumptions."

Specific "defense items" are then considered for purchase in the light of these requirements, the general said. His own office provides expertise on procurement and pricing, particularly where new military technology is involved.

In considering new weaponry, General Toufanian, his aides and members of the individual Iranian armed forces involved, undertake various studies, and pay visits to foreign countries and their arms manufacturers to gather information.

The general also gets advice from Eric F. von Marbod, a high official of the United States Defense Department, who is installed in an office down the hall from the general's chambers. Mr. von Marbod is the third highest ranking official of the large American Embassy staff in Teheran. He was sent here last year to oversee and coordinate military programs.

Despite the relative complexity of these various procedures and considerations, all the evidence is that, where major arms purchases are concerned, what matters is simply whether the equipment involved wins the approval of the Shah. He himself observed in an interview here recently: "The arms I choose. All the systems I choose."

In point of fact, the Shah leaves decision making in lesser purchases to his subordinates, but he does make the big decisions himself—as was indicated by the circumstances surrounding Iran's recent official indication of interest in the Northrop F–18L.

CHRONOLOGY OF AN ARMS DEAL

As pieced together from various sources and information, the chronology went as follows:

Thomas V. Jones, the chairman of the board of the Northrop Corporation, which is based in California, arrived this September in Teheran, where he had been making periodic visits over the years. According to informants critical of Mr. Jones here and in Washington, he gave the impression to key Iranians that the United States Defense Department had approved the sale of F–18L's to Iran—which was not the case.

On or before Sept. 12, the Shah granted an audience here to Mr. Jones. What was said at the audience has not been disclosed, but after the audience, General Toufanian was told to send a letter to Secretary of Defense Donald H. Rumsfeld in Washington. Who told him to do so is not clear, but the implication is that he was told by the Shah or a top palace aide.

The letter, dated Sept. 12, was in good English and Mr. Jones either drafted it or helped in its drafting, although it was signed by General Toufanian, who has the title of Deputy Minister of War for Armament. He said Iran intended "to purchase Northrop land-based F–18 aircraft" and asked Washington to prepare a sale document for 250 of the planes.

The letter caused a stir in Washington, largely because of the absence of Defense Department approval for the sale. Asked about it, General Toufanian insisted in the interview that Iran was only studying the feasibility of acquiring the aircraft. Asked why Iran was interested in the aircraft he said merely "We have to have the new," without elaborating.

So far it is not at all clear why the Shah is interested in acquiring the F–18L as well as the F–16; the two planes are basically comparable. But an impression is widespread in the foreign community here that Mr. Jones, knowing that the Shah could make decisions on the spot if he wanted to, went in and did a skillful selling job.

THE COAST GUARD MRS CONTRACT

Mr. PEARSON. Mr. President, the U.S. Coast Guard presently operates a fleet of medium range surveillance—MRS—aircraft, the Albatross HU–16's, which has been used successfully for search and rescue, enforcement of laws and treaties, and marine environmental protection. These planes are rapidly being retired as they approach their limit of 11,000 operating hours.

Consequently, the Coast Guard is on the verge of awarding a $250 million contract for the procurement of 41 new MRS airplanes that will replace the aging Albatross fleet. The 20-year life of this contract could generate nearly 150,000 man-years of work for the U.S. skilled labor force and provide a new stimulus to our economy with the introduction of $500 million.

Yet, Mr. President, if the Coast Guard proceeds to award this contract in the manner they are proposing, the American taxpayer will never realize the full potential of this undertaking. Indeed, the primary benefits of this program will be directed into a foreign economy precisely at a time when the new administration is actively considering a massive Federal spending effort to create jobs and spur our economy.

In fact, Mr. President, the Coast Guard's handling of the MRS replacement program has been inept from the beginning. The MRS procurement dates back to July 1971, when the Coast Guard decided to develop specifications for an aircraft suitable to replace the HU–16 Albatross. For more than 2 years, the Coast Guard created the obvious impression that they expected to purchase a small size jet. For example, the Coast Guard leased an Israeli Westwind and a Cessna Citation for several months in order to evaluate the suitability of these aircraft for MRS missions. They conducted several meetings with various candidate small jet manufacturers as if these planes were being actively considered. The Falcon Jet Corp. flew Coast Guard representatives in a Falcon 10 aircraft in order to demonstrate the performance and interior capacity of this small plane. Notably, the Coast Guard never had any meaningful discussions with the Falcon Jet Corp. representatives concerning the purchase of a larger plane, such as the Falcon 20, which was available at that time. The Coast Guard clearly led the aviation community to believe that they would soon issue a request for technical proposals on their desired MRS replacement, and that the procurement would proceed on an open, competitive basis.

Then, unexplainedly, the Coast Guard surprised the aircraft manufacturing community by announcing their intention to purchase Rockwell International's Sabre 75A aircraft on a sole source basis. The accompanying acquisition papers specified that a cockpit and cabin working space of at least 600 cubic feet was required to accommodate the necessary equipment and to allow crew movement during extended flights. This 600 cubic feet requirement was significantly larger than expected by the aviation industry, representing an increase of 50 percent over the Westwind's 418 cubic feet of cabin space and 100 percent over the Citation's 300 cubic feet. The need for a cabin volume of 600 cubic feet was totally undocumented at that time. As a result of vigorous objections from within the aircraft manufacturing community coupled with congressional interest, the sole source Rockwell contract was never executed and the Coast Guard agreed to proceed with procurement on a competitive basis.

Accordingly, in January 1975, the Coast Guard issued a request for technical proposals. Two bids were submitted. Then, amid congressional allegations that the Coast Guard had tailored their request to the Sabre Liner so as to make it extremely difficult for manufacturers other than Rockwell International to bid successfully, the Coast Guard reissued a modified request for technical proposals in the hope of encouraging broader participation from the aircraft manufacturing community.

A review of this second request reveals that the Coast Guard continues to stand by their commitment to 600 cubic feet. Yet, as I have already mentioned, the 600-cubic-foot requirement has been vigorously criticized since its initial disclosure in 1973. For example, experienced aircraft engineers allege that 65 cubic feet identified to house avionics equipment is totally unnecessary. That is, if the communications and navigation equipment comprising the avionics package were placed in the nose of the aircraft, as is the case with virtually every other airplane, 65 cubic feet could be subtracted from the overall 600 cubic feet cabin space requirement.

The Coast Guard maintains that 100 cubic feet is necessary for the cockpit area. However, the Falcon 20, which the Coast Guard now has selected as an MRS replacement, has only 85 cubic feet of cockpit space. Therefore, the Coast Guard, itself, has acknowledged the fact that 100 cubic feet is excessive by 15 cubic feet.

The Coast Guard has allotted 50 cubic feet for each of three crew members. I understand that this is, more or less, a standard military specification. However, the Coast Guard asserts that an additional 150 cubic feet is necessary for aisle space walkways, and overhead to allow crew movement during extended flights. It is also my understanding that this additional movement area is already included in the standardized 50 cubic feet allotment for each crew member. The extent to which this additional 150 cubic feet is necessary is, therefore highly questionable.

In view of the many issues that had

been raised concerning this procurement on September 9, 1976, Senator MAGNUSON and I requested the General Accounting Office, GAO, to make their own independent analysis of the Coast Guard's decision to purchase a 600-cubic-foot class of aircraft. The GAO report concluded that the 600-cubic-foot requirement appeared reasonable. Yet several areas of judgment were identified. For example, 12 cubic feet which have been allotted to accommodate the forward looking radar could be subtracted from the overall 600-cubic-foot cabin space requirement because this amount of radar equipment will be installed in the unpressurized aircraft nose and, therefore, need not be included in the cabin space allotment.

Similiarly, 14 cubic feet of droppable and crew survival equipment represents excess space since this amount of equipment will be installed outside the cabin area. Further, GAO concluded that the Coast Guard's stated avionics requirement appeared to exceed the necessary amount of space by 14 to 42 cubic feet. Finally, the Coast Guard has required that all 41 MRS planes have 75 cubic feet of cabin space to accept a $5 million sensor surveillance console which will be used primarily for oil spill detection. Yet the Coast Guard has plans to procure only six sensor packages. This means that the remaining 35 MRS planes will have 75 cubic feet of space to accommodate a nonexistent sensing device.

Mr. President, the General Accounting Office has concluded from their data that the Coast Guard acted reasonably in requiring a minimum of 600 cubic feet in the cabin area. Still it seems to me that a number of substantial questions have been raised on this issue, both by the GAO and from within the aviation community. It is by no means clear to me that a plane of this size is necessary to perform the bulk of MRS missions.

Even more critical, Mr. President, and wholly independent of the issue of aircraft size, is the fact that the Coast Guard has recommended to Secretary of Transportation Coleman that this $250 million procurement contract be awarded to the Falcon Jet Corp. Falcon Jet is presently owned by Pan American and Dassault-Breguet, a French corporation, on a 50-to-50 basis. Falcon is the marketing arm of Dassault in the United States. Reportedly, Dassault's ownership interest will increase to 80 percent sometime early this year, and, under their present agreement, Dassault may buy out PanAm at any time.

About 30 percent of the Falcon 20 will be foreign content. Yet this portion represents the airframe itself which requires special tooling, jigs, dies, et cetera, to manufacture.

A point which is central to this issue is that the Coast Guard becomes an agency of the Department of Defense in times of national emergency and is assigned military tasks. It is, therefore, paramount that the Coast Guard be assured of support for their equipment during such operations just as the military must be assured of support. If the MRS contract is awarded to the Falcon Jet Corp., the possibility arises that the Coast Guard will be relying for its airframe support on a company wholly owned by the French.

More disturbing, Mr. President, is the fact that when the Coast Guard began this undertaking several years ago, they were attempting to purchase an off-the-shelf aircraft so as to minimize acquisition costs. Yet, now not only has the cost of the MRS aircraft nearly doubled, but also Dassault-Breguet is on the verge of winning the award with an aircraft that requires recertification and whose engines are not yet fully developed. In fact, I understand that more than $40 million of the Falcon Jet Corp.'s bid reflects nonrecurring costs to modify and certify the airframe and engine. This simply means that the U.S. Government would be helping to upgrade a foreign commercial product into a more favorable competitive position relative to U.S. manufacturers in the world marketplace. I have always believed that in addition to regulating American industry, it is the purpose of the Federal Government to assist our domestic manufacturers in their business ventures whenever possible. It clearly does not serve the interests of the domestic aviation community for the Federal Government to export U.S. dollars, U.S. jobs, and to directly subsidize the development of a foreign aircraft which will present substantial competition to the U.S. aircraft industry.

It is also pertinent to point out that Dassault has received substantial subsidies from the French Government. I do not know how much of these subsidies accrued to the Falcon Jet Corp., or what effect these funds had on Falcon's ability to underbid the next lowest bidder by $25 million and the next lowest American competitor by $32 million. However, it appears that if the MRS contract is awarded as planned, Dassault-Breguet will receive subsidies from both the French and American Governments.

Mr. President, I fail to see the rationale of making the American taxpayer subsidize French payrolls in the face of high unemployment at home. I recognize that this procurement has dragged on for years and that the Coast Guard desperately needs new MRS aircraft to carry out their broadened responsibilities in a competent, professional manner. At the same time, however, I believe that serious questions remain as to the wisdom of proceeding with the Coast Guard's recommended award of this multimillion dollar contract.

Yesterday Secretary Coleman authorized the Coast Guard to award the MRS contract to the Falcon Jet Corp. at any time after January 6 if the Commandant is satisfied that Falcon Jet is a responsible prospective contractor. I must again strongly urge Admiral Siler to consider the major issues involved with this procurement before proceeding further with this contract award.

TECHNOLOGY ASSESSMENT BOARD CHAIRMANSHIP

Mr. CRANSTON. Mr. President, I wish to inform the Senate that the chairmanship of the Office of Technology Assessment—OTA—has reverted to the Senate in accordance with the Technology Assessment Act of 1972 (Public Law 92-484), which stipulates that the OTA chairmanship rotate between the House and the Senate with each new Congress. Pursuant to subsection 4(c) of this act, the Senate members of the Technology Assessment Board (Mr. KENNEDY, Mr. HOLLINGS, Mr. HUMPHREY, Mr. CASE, Mr. SCHWEIKER, and Mr. STEVENS) have unanimously selected the Senator from Massachusetts (Mr. KENNEDY) to serve as Chairman of the Board for the duration of the 95th Congress. Senator KENNEDY previously served as first Chairman of the Board during the 93d Congress.

THE ELECTORAL COLLEGE

Mr. BAYH. Mr. President, today is a historic occasion for two reasons. First, we will, in joint session with the House of Representatives, count the votes of the electoral college affirming the election of Jimmy Carter as President of the United States. Second, this will be, I am confident, the last time that the anachronistic electoral college votes will be counted.

It is my firm conviction, Mr. President, that the Congress will pass and the several States will ratify, prior to the 1980 Presidential election, a constitutional amendment to abolish the electoral college and provide for the direct popular election of the President and Vice President.

Mr. President, last November the American people chose their next President and Vice President by a popular vote plurality of 1.7 million votes. Yet today it is only by sheer luck that we can assemble in a joint session of Congress as required by the Constitution and for the first time officially announce that the people's choice fortunately has been elected by the electoral college.

The American people believe that they have elected their President. Instead, the little understood, undemocratic electoral college has elected the President. The 538 faceless members of the electoral college are not bound to follow the will of the American voters. Indeed, they may elect whomever they choose. Again this year one of the electors has demonstrated that unbridled power to thwart the popular will by casting his vote for a person who was not even on the ballot in the November election.

Not since 1888 has there been a greater risk of the electoral college putting a President in office who did not receive the greatest popular vote. A shift of one-hundredth of 1 percent of the national popular vote—fewer than 10,000 votes—in two key States would have changed the outcome of the electoral college votes that were counted today despite the people's 1.7 million plurality vote for Presi-

dent-elect Carter. That kind of overthrow of the popular will is exactly what happened in 1888 when the electoral college put a President in office who came in second in the popular vote.

Mr. President, the American people today would not tolerate such a thwarting of the popular will as occurred in 1888 and but for the grace of God might have happened this year. Yet Congress has failed since 1888 to correct that potential for electoral disaster.

We must act now to correct the constitutional flaw that every 4 years places our electoral process and the confidence of the American people in such great risk. The American people want us to correct this anachronistic system. The Harris and Gallup polls have shown in past years that between 76 percent and 82 percent of the American people in each of the four geographic regions of the country favor direct popular election. Direct popular election is favored by a broad array of responsible national organizations, including the American Bar Association, the Chamber of Commerce, the AFL–CIO, the United Auto Workers, the League of Women Voters, the National Federation of Independent Business, and the National Small Business Association. It seems almost everyone has expressed support for direct popular election of the President and Vice President except the required two-thirds of both Houses of Congress.

On the first legislative day of this session, Mr. President, I intend to introduce the proposed direct election amendment, which will be numbered Senate Joint Resolution No. 1.

It is indeed rewarding, and a demonstration of the support for this measure, that more than 30 Senators will be cosponsoring Senate Joint Resolution 1 on its introduction. A number of my distinguished colleagues, on both sides of the aisle, have provided valuable leadership in our fight for direct election. At the time of introduction next week, I look forward to acknowledging by name several of my colleagues whose support and guidance have been crucial to this effort.

The Subcommittee on Constitutional Amendments has conducted substantial hearings on this proposal over the past 10 years. We intend to conduct further hearings during the next few months, and I intend to work with a large number of cosponsors and supporters in seeking prompt action on the direct election amendment in the Senate this year. This amendment should wait no longer.

Mr. President, I ask unanimous consent to print in the RECORD the complete text of the proposed amendment and excerpts of a draft committee report prepared for the Judiciary Committee last year, which explains and analyzes the proposed amendment.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

JOINT RESOLUTION

Proposing an amendment to the Constitution to provide for the direct popular election of the President and Vice President of the United States

Resolved by the Senate and House of Representatives of the United of America in Congress assembled, (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States within seven years from the date of its submission by the Congress:

"ARTICLE —

"SECTION 1. The people of the several States and the District constituting the seat of government of the United States shall elect the President and Vice President. Each elector shall cast a single vote for two persons who shall have consented to the joining of their names as candidates for the offices of President and Vice President. No candidate shall consent to the joinder of his name with that of more than one other person.

"SEC. 2. The electors of President and Vice President in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislature, except that for electors of President and Vice President the legislature of any State may prescribe less restrictive residence qualifications and for electors of President and Vice President the Congress may establish uniform residence qualifications.

"SEC. 3. The persons joined as candidates for President and Vice President having the greatest number of votes shall be elected President and Vice President, if such number be at least 40 per centum of the total number of votes cast.

"If, after any such election, none of the persons joined as candidates for President and Vice President is elected pursuant to the preceding paragraph, a runoff election shall be held in which the choice of President and Vice President shall be made from the two pairs of persons joined as candidates for President and Vice President who received the highest numbers of votes cast in the election. The pair of persons joined as candidates for President and Vice President receiving the greater number of votes in such runoff election shall be elected President and Vice President.

"SEC. 4. The times, places, and manner of holding such elections and entitlement to inclusion on the ballot shall be prescribed in each State by the legislature thereof; but the Congress may at any time by law make or alter such regulations. The days for such elections shall be determined by Congress and shall be uniform throughout the United States. The Congress shall prescribe by law the times, places and manner in which the results of such elections shall be ascertained and declared. No such election, other than a runoff election, shall be held later than the first Tuesday after the first Monday in November, and the results thereof shall be declared no later than the thirtieth day after the date on which the election occurs.

"SEC. 5. The Congress may by law provide for the case of the death, inability, or withdrawal of any candidate for President or Vice President before a President and Vice President have been elected, and for the case of the death of both the President-elect and Vice President-elect.

"SEC. 6. Sections 1 through 4 of this article shall take effect two years after the ratification of this article.

"SEC. 7. The Congress shall have power to enforce this article by appropriate legislation."

HISTORY OF SENATE JOINT RESOLUTION 1

The Subcommittee on Constitutional Amendments began the first hearings on the election of the President on February 28, 1966. The subcommittee held 18 days of hearings and heard testimony on all of the various plans for reform of the electoral system. More than 50 witnesses appeared before the subcommittee and the hearing record totaled nearly 1,000 pages. ("Election of the President," Hearings before the Subcommittee on Constitutional Amendments, 89th Cong., second sess. and 90th Cong., first sess.).

Following the election of 1968, in which a change of only 42,000 votes in 3 states would have denied Richard Nixon an electoral college majority, though he had won a popular plurality, the subcommittee heard 49 witnesses and compiled a second hearing record of more than 1,000 pages. Once again, the subcommittee heard testimony on all the various plans for reform. ("Electing the President," Hearings before Subcommittee on Constitutional Amendments, 91st Cong., first sess.).

In September 1969, electoral reform became the pending order of business before the full Judiciary Committee. On February 3, 1970, the committee voted 13–4 to consider electoral reform by April 14 and to vote on the pending resolutions no later than April 24. Three additional days of hearings were held by the full Judiciary Committee on April 15, 16, and 17.

The full Judiciary Committee met in executive session on April 23, 1970. In the course of its deliberations, the committee rejected a number of substitute amendments, including the district plan, the proportional plan, the modified present system plan, and a number of other substantive amendments that would have altered the runoff provisions of Senate Joint Resolution 1. The committee then voted 11–6 to report the direct popular election plan embodied in the substitute version of Senate Joint Resolution 1, which had been passed by the House of Representatives in September of 1969 by a vote of 339–70.

Senate Joint Resolution 1, as amended, was made the pending order of business in the Senate on September 2, 1970, and floor debate commenced on September 8. Two attempts to limit debate by invoking cloture failed, on September 17, by a vote of 54 yeas to 36 nays, and on September 29, by a vote of 53 yeas to 34 nays. On October 5, 1970, after further debate, the Senate agreed to a unanimous consent request of Senator Mansfield to return S.J. Res. 1 to the calendar, not to be brought up again before the end of the November election recess. No further action was taken.

Once again in the 93rd Congress the Subcommittee conducted hearings on S.J. Res. 1 on September 26 and 27, 1973. On December 21, 1973 the Subcommittee met in Executive Session and unanimously voted to report S.J. Res. 1 to the full Committee. No consideration was given to the Resolution by the full Committee in the 93rd Congress.

On May 21, 1975 the newly constituted Subcommittee met and voted 5–0 to report S.J. Res. 1 to the full Committee.

* * * * *

Section 5 empowers Congress to provide by legislation for the death, inability, or withdrawal of any candidate for President and Vice President before a President or Vice President has been elected. Once a President and Vice President have been elected, existing constitutional provisions would apply. Thus, the death of the President-elect would be governed by the 20th amendment and the death of the Vice President-elect would be governed by the procedure for filling a Vice Presidential vacancy contained in the 25th amendment. Section 5 also empowers the Congress to provide by legislation for the case of the death of both the President-elect and Vice President-elect.

Section 6 provides that the article shall take effect 2 years after ratification. The committee was of the opinion that since legislation will be necessary to fully implement and effectuate the purposes of the proposed amendment, a reasonable period of time should be provided between the date of ratification and the date on which the amendment is to take effect. The committee believes that this provision affords both the Congress and the States an adequate opportunity to legislate, but does not foreclose the possibility of securing ratification in time for the proposed articles to be in effect before the 1976 Presidential election.

Section 7 confers on Congress the power to enforce this article by appropriate legislation. The power conferred upon Congress by this section parallels the reserve power granted to the Congress by numerous amendments to the Constitution. Any exercise of power under this section must not only be "appropriate" to the effectuation of the article but must also be consistent with the Constitution.

* * * * *

In the absence of an electoral college majority for Vice-President, the choice rests with the Senate from the two candidates with the greatest number of electoral votes. A majority of all of the Senators is required for election.

HISTORICAL DESIGN OF THE FRAMERS OF THE CONSTITUTION

In 1787 James Wilson of Pennsylvania spoke of the difficulty the Constitutional Convention had experienced in agreeing on a plan for choosing the President:

This Convention, Sir, was perplexed with no part of this plan so much as with the mode of choosing the President of the United States. * * * This subject has greatly divided the House, and will also divide people out of doors. It is in truth the most difficult of all on which we had to decide.

There was no shortage of ideas at the Convention on how to elect the President. Among the many plans proposed were direct popular election, election by the Congress, and election by the State legislatures. Direct popular election was opposed mainly because it was felt that the people, lacking knowledge of the candidates, could not make an intelligent choice. An election by Congress was rejected because it was believed that this would undermine the independence of the Executive. Similarly, the idea of election by State legislatures was defeated because of the fear that the President would be so indebted to the States that the exercise of Federal authority would be jeopardized.

Unable to agree upon a plan, the Convention appointed a "Committee of Eleven" to propose a compromise solution. The hybrid electoral college system was that compromise solution. The people would choose electors in the first instance, either by direct popular election or through appointment by popularly elected State legislatures, but the electors they chose would actually vote for President and Vice President. The electors, according to the original design, would vote individually for the candidate they believed best qualified for President. The runner-up became Vice-President. As Alexander Hamilton wrote in *Federalist No. 68*. "A small number of persons selected by their fellow citizens from the general mass, will be most likely to possess the information and discernment requisite to such complicated investigation * * *."

DEFECTS AND DEFICIENCIES IN THE PRESENT SYSTEM

The appearance of political party candidates as early as 1800 meant, in effect, that Hamilton's concept of a "select assembly" of independent electors already had lost its purpose only a decade after its embodiment in the Constitution. A Senate report published in 1826 caustically noted that the free and independent electors had "degenerated into mere agents in a case which requires no agency and where the agent must be useless if he is faithful and dangerous if he is not." More than 145 years later, however, the elector still retains his constitutionally guaranteed independence. In January 1969, Congress confirmed this 18th century prerogative by accepting the vote of a popularly chosen Republican elector from North Carolina who had cast his vote in the Electoral College for George Wallace, the American Independent Party candidate. Again in 1973, a Republican elector from Virginia was allowed to cast his vote for one Dr. John Hospers of the Liberation Party. In neither instance was the vote cast for the candidate receiving the most popular votes in the Elector's state.

How dangerous is the anachronistic elector? Historically, as the late Justice Jackson pointed out, paraphrasing Gilbert and Sullivan's *H.M.S. Pinafore* and its descriptions of partisans: "they always voted at their party's beck and call and never thought of thinking for themselves at all." The prospect of unknown electors auctioning off the Presidency to the highest bidder, nevertheless, is all too real. That is the lesson of 1968, when the present electoral system brought us to the brink of constitutional crisis. A shift from Nixon to Humphrey of only 42,000 popular votes in three states would have denied Nixon an electoral majority and given Wallace, with his 46 electoral votes, the balance of power. As the Alabama Governor explained in an exclusive interview with *U.S. News & World Report* (September 30, 1968):

Question. If none of the three candidates get a majority, is the election going to be decided in the Electoral College or in the House of Representatives?

WALLACE. I think it would be settled in the Electoral College.

Question. Two of the candidates get together or their electors get together and determine who is to be President?

WALLACE. That is right.

The elector is to the body politic what the appendix is to the human body. As Henry Cabot Lodge said, "While it does no good and ordinarily causes no trouble, it continually exposes the body to the danger of political peritonitis." We can avoid this potentially dangerous disease simply by eliminating the elector. But that is not a cure-all for what ails our present electoral machinery. The elector, in fact, is merely a symptom of what the American Bar Association's Special Commission on Electoral Reform aptly described as our "archaic, undemocratic, complex, ambiguous, indirect, and dangerous" method of electing a President.

After a 10 month study, the Commission concluded that the entire electoral system should be replaced, and popular choice substituted for political chance. In February 1974, the American Bar Association reaffirmed their support of the present version of S.J. Res. 1 which provides for the direct election of the President and also provides for a Congressional selection of the President if no candidate receives 40% of the popular vote. Initially, the Bar Association had favored a runoff between the two leading candidates if neither received a 40% plurality.

Among other things, the present system can elect a President who has fewer popular votes than his opponent and thus is not the first choice of the voters; awards all of a State's electoral votes to the winner of the State popular vote, whether his margin is 1 vote or 1 million votes; cancels out all of the popular votes cast for the losing candidate in a State and casts these votes for the winner; assigns to each State a minimum of three electoral votes regardless of population and voter turnout; and provides for a patently undemocratic method for choosing a President in the event no candidate receives an electoral majority.

The major defect of the present electoral system—the unit rule—is not even a constitutional provision. The unit rule or "winner-take-all" formula is the State practice of awarding all of its electoral votes to the statewide popular vote winner. In effect, millions of votes are disfranchised if they vote for the losing candidate in their State because the full voting power of the State—its electoral vote—is awarded to the candidate they opposed. The obvious injustice of this was pointed out by Thomas Hart Benton over a century ago. "To lose their votes is the fate of all minorities," he said, "and it is their duty to submit; but this is not a case of votes lost, but votes taken away, added to those of the majority and given to a person to whom the minority is opposed."

A practical consequence of this disfranchisement is that it discourages the minority party in traditionally one-party States. Simply stated, where there is no hope of carrying the statewide popular vote the size of the voter turnout for the likely loser is meaningless. This necessarily leads to the atrophy of the party structure in many States. By the same token, the prospective winner has little incentive to turn out his vote because the margin of victory likewise is meaningless. In sum, the unit rule has the unhealthy political effect of both discouraging second parties in areas of one-party dominance, and discouraging voting. This is reflected most clearly in the poor voter turnout in U.S. presidential elections in comparison to most other democratic nations.

A by-product of the unit rule is the distortions it produces in the value of individual popular votes. The unit rule tends to inflate the voting power of a small number of well-organized voters in the handful of large, closely contested States where blocs of electoral votes can be won on the basis of narrow popular vote margin. A candidate, for example, could win an electoral majority by capturing statewide pluralities in the 11 largest States and the District of Columbia—even if he did not receive a single popular vote in all of the other States This means, in effect, that under the present system, 25 percent of the popular vote could elect a President.

Some opponents of electoral reform have argued that this inequity is a political necessity and a fair counter-weight to the small State advantage built into the electoral system (each State is entitled to a minimum of three electoral votes). The committee concluded, however, that this "uneasy tension between opposing distortions of the popular will" is not the proper foundation on which to build a sound and democratic electoral process—a process that should ensure every American voter the same opportunity to vote directly and equally for the presidential candidate of his choice and guarantees a popular choice every time.

Largely as a result of the unit rule, the present electoral vote system cannot guarantee that the candidate with the most popular votes will be elected. This dangerous prospect, more than anything else, condemns the present system as an imperfect device for recording the sentiment of American voters. In 1824, 1876, and again in 1888 this system produced Presidents who were not the popular choice of the voters. On numerous other occasions in this century, a shift of less than 1 percent of the popular vote would have produced an electoral majority for the candidate who received fewer popular votes. In 1948, for example, a shift of less than 30,000 popular votes in three States would have given Governor Dewey an electoral vote majority—despite President Truman's 2 million-plus popular vote margin.

Good fortune, not design, has produced Presidents who were the popular choices of the people. A glance at past elections reveals that there have been very few elections where the candidates' percentage of the electoral vote reasonably resembled their percentage of the popular vote.

Year	Percent of popular vote		Percent of electoral vote	
	Democrats	Republicans	Democrats	Republicans
1952	44.4	55.1	16.7	83.2
1956	42.0	57.4	13.7	83.4
1960	49.5	49.3	56.1	40.7
1964	61.1	38.5	90.4	9.6
1968	42.7	43.3	35.5	56.9
1972	37.5	60.7	3.15	96.6

In a runaway election—like that of 1972—any system will produce an electoral victory for the popular vote winner. It is the accuracy of the results produced in closely contested elections, however, that determines the true soundness of an electoral system. Based on this criterion, the committee concluded that the present system is clearly defective. A computer study of presidential elections over the last 50 years revealed, for example, that in elections as close as 1960 the present system offered only a 50–50 chance that the electoral result would agree with the popular vote. For an election as close as 1968, where some 500,000 popular votes separated the candidates, there was one chance in three that the electoral vote winner would not be the popular vote winner as well. According to the evidence, the danger of an electoral backfire is clear and present.

ALTERNATIVE REFORM PLANS CONSIDERED IN COMMITTEE

The District plan

The district plan would retain the electoral vote, with electors chosen from single-member districts within each State and two electors running at large statewide.

The district plan, like the present Electoral system, is based on the "winner-take-all" principle—merely shifting its application from the state level to the district level. As a result, the district plan would continue to produce significant disparities between the popular vote and the electoral vote. To its credit, Presidents Eisenhower, Johnson and Nixon would all have received significantly fewer electoral votes in the elections that they won if the votes actually cast had been aggregated by the rules of the district plan. Hence, the Electoral College votes would be more commensurate with their popular vote margins. A more grave result, on the negative side, is that Nixon would have defeated Kennedy in electoral votes had the district plan been in effect.

By "wasting" large numbers of popular votes, the district system can easily elect a President who is not the popular choice of the voters.

As in the case of the present system, the district plan would discourage the minority party's voters within each electoral district, thus reducing the incentive to vote. This district plan, in fact, would operate even more effectively to discourage voters because a larger number of congressional districts than states are controlled by one party.

PERCENTAGE OF DISTRICTS AND STATES CARRIED BY CANDIDATES AND THEIR POPULAR VOTE MARGINS

	54.9 or less	55 to 59	60 to 64.9	65 to 69.9	70 or more
Districts in 1960	39	29	18	7	7
States in 1960	68	22	10	0	0
Districts in 1964	17	23	21	17	22
States in 1964	16	29	23	22	10
Districts in 1968	66	18	6	4	6
States in 1968	78	14	6	2	0
Districts in 1972	6	18	34	18	24
States in 1972	11	15	25	29	20

In addition, "spoiler" minor party candidacies would be encouraged by the district plan since it is easier to campaign in a few local districts than throughout an entire state or nation. While their hopes of winning the Presidency would still be scant, these parties could reasonably try to win enough local districts to throw the election into Congress more frequently. If the 1968 returns, for example, had been counted by Congressional districts, Wallace would have received 58 electoral votes instead of 46—an improvement of nearly 30%. This would have substantially closed the gap between his popular vote percentage and his electoral vote percentage.

The proportional plan

The proportional plan would retain the electoral vote, but replace the unit rule with a proportional division of a State's electoral vote on the basis of the popular vote in that State.

Had the proportional system been in effect in 1968, it would have produced the following distortions in two States having the identical number of electoral votes:

(1) President Nixon captured 43 percent of the popular vote in Virginia and under the proportional plan this would have produced 5.2 electoral votes. Vice President Humphrey's 43 percent of the popular vote in Missouri, likewise, would have produced 5.2 electoral votes. Nixon, however, only required 590,315 popular votes, whereas Humphrey had to poll 791,444 votes in order to produce 5.2 electoral votes—a startling difference of 201,129 popular votes.

(2) Both Idaho and Utah have 4 electoral votes. In both States, Nixon captured 56 percent of the statewide popular vote and this would have entitled him to 2.2 electoral votes. The interesting point is that it required 238,728 popular votes in Utah to produce the same number of electoral votes as 165,369 popular votes in Idaho.

The practical political consequences of the proportional plan is that it enhances the political influence of the "safe" States, which traditionally have had poor voter turnouts. Simply, a popular vote in a State where the voter turnout is poor is worth more than a vote in a State of equal size with a heavy voter turnout.

States sharing marked sectional interests, moreover, would have a great incentive to maximize their electoral influence by encouraging one-partyism. As a result, regional third party challenges are likely to be encouraged. In 1948, for example, the State Rights Party polled only 2.4 percent of the total popular vote, but under a proportional plan it would have received more than three times that percentage of the electoral vote.

Under certain political conditions, the proportional plan would produce a President who was not the popular choice of the voters. If one candidate won handily in most of the States where the turnout was poor and the results in the remaining States were almost evenly divided, it is likely the electoral winner would have been the popular vote loser. A perfect example of this division occurred in the election of 1896. Bryan captured 46.7 percent of the popular vote and McKinley won 51.1 percent. McKinley's majority of the popular vote under the present system produced 61 percent of the electoral vote. Under a proportional plan, however, Bryan would have won a 6 vote electoral victory—despite being a popular vote loser.

A recent computer study presented to the committee examined the electoral results produced under a proportional system in close popular elections. The random survey, based on several thousand two-candidate races with the popular vote distribution varying from a wide 60–40 split to a 50–50 division, revealed that with a plurality of less than 1 million votes there was a 14 percent chance of an electoral mishap. In an election as close as 1968, moreover, there was a 35 percent chance of electing the popular vote loser.

Although the proportional plan is intended to reflect the popular vote more accurately than does the existing system, it would nevertheless distort the nationwide popular total. Each State would continue to have a minimum of three electoral votes regardless of population. Additional electoral votes would be based on frequently outdated population figures rather than on the actual turnout at the polls. The need to round-off percentages would provide another, though minor, distortion. Thus the outcome of the popular vote across the country would not necessarily be the same as the sum of the State outcomes figured under the proportional plan.

An analysis of past elections suggests how frequently a runner-up President might have been elected under the proportional plan. Samuel J. Tilden would have beaten Rutherford B. Hayes in 1876, Winfield S. Hancock would have defeated James A. Garfield in 1880, Grover Cleveland would have won over Benjamin Harrison in 1888, William Jennings Bryan would have edged William McKinley in 1896, and Richard M. Nixon would have defeated John F. Kennedy in 1960.

These results would have meant the election of one candidate, Tilden, who evidently won a popular majority but lost in electoral votes, and of another, Cleveland, who got a popular plurality but ultimately lost the election. It would have meant victory for three runner-ups—Hancock in 1880, Bryan in 1896 and Nixon in 1960. Thus the proportional plan, while aimed at reflecting the popular vote more accurately, might sometimes do the reverse.

Moreover, the proportional plan would not enhance citizen understanding of and confidence in the vote-counting process for presidential elections. It would introduce a complex and cumbersome system for tallying votes. It would be difficult to follow the counting procedures on election night since the total vote in each State would have to be established before final counts could be made. A complex arithmetic formula would in effect be written into the Constitution, and because of its intricacies an extended period of doubt about the outcome of a close election would be more likely.

THE OPPONENTS' ARGUMENTS AND SOME COUNTERPOINTS

In the ten years the proposal for the direct popular election of the President has been before the Congress, through many weeks of hearings and many days of floor debate, the arguments on this question have been sharpened and refined. It has been, in the Committee's view, an example of the deliberative virtues of the legislative process at its best. The questions raised by the proposed amendment have been reviewed and commented upon by the broadest range of individuals and institutions in our society. The Committee has carefully examined each of the arguments suggested by those who have voiced opposition to direct popular election and has, in each case, found them unconvincing.

ABOLITION OF THE UNIT RULE WILL STRENGTHEN—NOT WEAKEN—THE TWO-PARTY SYSTEM

Opponents of direct election have alleged that abolition of the electoral college would tend to proliferate the party structure and weaken the two major parties. They believe that the winner take all, or unit rule, feature of the present system is the most important institutional guarantee for the two-party system. A well known political scientist has summarized their argument as follows: "Under the present system, the votes cast for a minor party candidate in any state are lost except in the unlikely event he runs ahead of the major party candidate. On the other hand, all of the votes cast for a minor party under a popular vote would count toward the total vote of its candidate. Therefore, the carryover of votes from state to state, which would be possible under direct election, would cause the proliferation of third parties".

However, a careful study of the dynamics of the electoral college reveals that it does

not discourage third parties, and in certain instances actually encourages them. The unit rule in fact has facilitated the growth of the regional "spoiler" type of third parties, as exemplified by the States Rights Party in 1948 and the American Independent Party in 1968. The strength of the two-party system and the deterrence of other types of nationwide third parties are related to factors other than the electoral college—factors which will not be affected by the adoption of direct election.

The electoral college does not discourage third parties:

While opponents of direct election believe that the unit rule discourages third parties, it is this very feature of the electoral college which has facilitated the growth of ideologically oriented regional third parties—third parties not organized for victory but designed to deny either of the major party candidates an electoral majority. The reason for this is that votes cast for a minor party candidate in any state are lost except in the unlikely event he runs ahead of the major party candidate. By concentrating on the South in 1968, Governor Wallace was able to turn this "unlikely event" into a likely event. The unit rule magnified the impact in the electoral college of the Wallace plurality in the South. While Wallace had less than 50% of the popular vote in Louisiana, Georgia and Arkansas in 1968, the unit rule gave him 100% of the electoral votes.

Some political observers in 1972 believed that this is exactly what Governor Wallace had planned to do, but for the tragedy of yet another American political assassination—a fortunately unsuccessful one. A column by two nationally syndicated reporters at the time suggested that:

"Wallace's 1972 plan is a new 'Southern strategy' of his own. Instead of running a national campaign as in 1968, Wallace plans a frankly regional campaign, his name on as many state ballots as possible but his campaigning concentrated in Southern and border states.

"That is intended to maximize Wallace's electoral votes, exceeding the five states and 45 electoral votes won in 1968. By campaigning hard in the North last time, he reduced drastically appearances in North and South Carolina, Florida, Tennessee, and Texas—and lost them all. By concentrating there in 1972, Wallace might collect twice as many electoral votes and hold the balance of power in the electoral college."

As it turned out the 1972 nominee of Wallace's American Independent Party, John G. Schmitz, lacked the sectional appeal that made such a strategy possible.

If the electoral college does not cause the two-party system—what does?

Most authorities agree that the deterrence of third parties is related to factors other than the Electoral College. An excellent case in point is the abortive attempt of the "peace" forces to organize a fourth party after the 1968 Democratic Convention. In 1968, a "Peace Party" probably could not have garnered a plurality in enough states to have a significant impact on the Electoral College, and the unit rule undoubtedly played some role in their ultimate decision not to proceed. However, it is difficult to believe that the organizers of the Peace Party in 1968 were any more deterred by the unit rule than were the organizers of the most successful nationwide third party in our history—the Republican party.

It is much more likely that the Peace Party failed in 1968 for two reasons totally unrelated to the structure of the electoral college—two reasons why nationwide third parties will also be deterred under direct election. First, as Richard Goodwin—one of those who attempted to organize the peace party—himself admitted, the organizers realized that their efforts would take votes from the major party candidate closest to them in conviction and insure the victory of the major party candidate most undesirable to them. The Peace Party would have been more apt to garner a Humphrey vote than a Nixon vote, and thus by entering the field they would have enhanced the prospects of Nixon. Second, nationwide third party movements are discouraged by the fact that they must compete with the major parties for a single office—the Presidency. Planners of a Peace Party in 1968 were discouraged by the realization that they would have little to show for their efforts, for unlike the European coalition governments, the Presidency is held by one man and would be the exclusive prize of one of the major parties. On the other hand, if all the Peace Party wanted was to "spoil" the Democratic Party's chances, then the Electoral College system was best suited to its purposes. For all they needed to do was to run in New York and California, to ensure a Democratic defeat.

Scholars who have studied the two-party system in this country and compared it to similar systems throughout the world have a variety of theories as to its cause; but none suggest the Electoral College. Most political scientists believe that the major institutional influence on the two-party system is the election of almost all officials in the U.S. in single-member districts. This theory stems originally from the writings of Maurice Duverger, who has found that almost every government in the world which elects its officials from single-member districts and by plurality vote has only two major parties, while countries that use multi-member districts and proportional representation have a multitude of parties. Duverger and other scholars have found that the electoral mechanics of the single member district, in terms of its effect on the party system, are such that they tend to force factions to combine in order to be certain of capturing a popular vote plurality and victory.

Direct election will discourage regional and national third parties:

Under direct election, without winner-take-all in the states, regional third party movements would have less impact. In 1968, in states like Louisiana, Georgia and Arkansas where Governor Wallace got approximately half the popular vote, he received all the electoral votes. That type of distortion would no longer be possible under the direct election system. Granted, his votes in the urban states will count for the first time, but in order for any third party or group of third parties to have any impact on the selection of the President by forcing the election into Congress, they must receive more than 20 percent of the vote at the same time that no major party receives 40 percent. Despite his nation-wide effort in 1968, however, Governor Wallace received only 13.5 percent of the popular vote.

National third party movements, like the Peace Party in 1968, would also be discouraged under direct election for the same reason that they are discouraged under the present system. First, they are most likely to take votes from the major party candidate closest to them in conviction and insure the victory of the major party candidate most undesirable to them. Second, the Presidency would still be a single member office. A third party movement that fails gets no reward, and could not sustain itself nationally without these rewards.

But most important of all, direct popular election would work affirmatively to strengthen the two-party system. First, by counting every popular vote regardless of where it is cast, direct election would spread and foster two-party competition on a nationwide scale. The goal of both major parties would be to "get out the vote" in every state. Simply carrying a state, the objective under the present system, would no longer be the ultimate objective. The critical point under direct popular election, in healthy contrast, would be the margin of victory—or, to view it from the opposite end, the margin of defeat. As a consequence, the likely winner would seek to maximize the state's net plus and the probable loser would work to minimize the state margin of defeat. The next result, therefore, would be increased party activity—particularly in what are now one-party states.

Second, the contingent election provision would further strengthen the two-party system since in selecting the President and Vice-President, the Congress would be limited to the two pair of candidates having the greatest number of popular votes. They would almost assuredly be the nominees of the two major parties, and Congress itself is primarily composed of the two major parties.

II. Under Senate Joint Resolution 1, the Probability of a Contingent Election Is Extremely Remote

Direct popular election eliminates the unfair advantage now given a regional candidate by the unit rule. Each candidate's strength would be determined by the absolute number of votes he received. Without the leverage of the unit rule, and in the absence of the requirement of an absolute majority for victory, it would be necessary for a third party or combination of third parties to receive a large number of votes, a minimum of 20 percent of the national total, to prevent one of the major parties from obtaining the 40 percent needed to avoid a contingent election. This would be a very difficult task.

Indeed, it is such a remote possibility that it has happened only twice in our entire history. In the election of 1824 none of the four candidates received a majority of the electoral college, and John Quincy Adams, who had come in second in the popular vote to Andrew Jackson, was elected by the House of Representatives. In the 1860 election of Lincoln he received 39.76 percent of the vote, despite the fact that he was not even on the ballot in 10 states. In 1968, the most significant third party bid since 1924 could produce only 13.5 percent of the vote. And in the four-party races of 1912 and 1948, the winner received well over 40 percent of the vote.

Critics of direct election sometimes cite state primaries or foreign elections as examples where splinter candidates have precluded any candidate from receiving an absolute majority. But examination of these races disproves the point. First, the examples are instances where a 50-percent majority was not attained, but the 40-percent clause in S.J. Res. 1 would eliminate the need for all, or at least the vast preponderance, of contingent elections.

Secondly, it should be pointed out that the State examples are not really relevant to a national election. In State elections it may be possible for candidates to combine local popularity, narrow regional issues, and the support of their personal friends to gain a significant vote without undue expense, organization, or effort. Getting a significant number of votes on a national scale is much more difficult. It takes good issues, a lot of money, and a team of dedicated campaign workers in order to win a number of votes which will have any significance in the context of a national election.

Third, the Presidency is a single member office, unlike the parliamentary system in many foreign countries. There is no reward for those who lose—no coalition government, no seats in the legislature. For this reason, voting for a candidate who cannot possibly

win essentially amounts to throwing a vote away. Therefore, even if no major party candidate perfectly reflects a voter's views on important issues, he will tend to vote for the more acceptable of the two major candidates.

For these reasons—the magnitude of a national campaign, the dominant position of the two major parties, the Presidency as a single member office—contingent elections will be very rare indeed.

The two-party system can only survive as long as both parties are truly responsive to the needs of the electorate. Under direct election, or the present system—or any system—new parties can arise if the old fail to respond. Moreover, no electoral system should seek to entrench the existing party framework, because it would be impossible at the same time to ensure that the entrenched parties would also always be capable of responding to differing needs or changed circumstances. Indeed, it was out of such circumstances that today's Republican party was born. The contingent election provision will not cause or help to bring about the end of the two-party system, any more than the electoral college has. But neither will direct election institutionalize the present two parties at the cost of losing the democratic responsiveness of the system.

III. The New Contingent Election Machinery Would Strengthen—Not Weaken—the Democratic System

In the 91st and earlier Congresses, much of the debate centered on the provision for a "runoff" election that was contained in earlier versions of S.J. Res. 1. As the Committee has indicated, we found that the dangers inherent in the present system could be eliminated while providing for the highly unlikely event of a contingent election by a means which are less of a departure from the existing mechanism.

Both the present electoral college system and the proposed amendment are based on the need to select an individual for the office of the Presidency who has a personal mandate to govern directly from the people. Both the electoral college and the amendment provide for an alternative means of selection if no individual captures sufficient support to have such a mandate. One great problem with the electoral college is that it causes or fails to cause the contingent election machinery (election by States in the House) to be invoked for reasons which may have nothing to do with the actual popular vote of the people. The point at which the present system calls for a contingent election is arbitrary and irrational since the framers did not have the idea of a popular mandate in mind since it was designed.

But the framers idea of a contingent election by Congress without the anacronistic baggage of the electoral college has much to commend it. In theoretical terms, going directly back to the people in a run-off election would be the most democratic solution to the problem of no candidate garnering sufficient support. But here institutional and historical considerations become important. The tradition of a single election for the Presidency is strongly ingrained in American history.

In 1965 this Committee was faced with a somewhat similar issue in connection with its consideration of the 25th Amendment's procedure for filling a vacancy in the Vice-Presidency. At that time we considered but rejected the idea of a special election to fill such a vacancy because of its novel nature historically and its cost. We chose instead a process of surrogate election by the people's representatives in the Congress. In recent months we have seen its first use which in most observers view, was highly successful, despite the fact that the Exective and Legislative branches were in the control of opposing parties. Under the proposed amendment, in the unlikely event that no candidate received 40 percent of the popular vote, the Senators and Representatives who were elected on the same day that the Presidential candidates went to the people would, as with the 25th Amendment, act as surrogate electors. The Committee concluded that direct popular election combined with a contingent election by the Congress was a reasonable balance of institutional concerns and popular government.

IV. Federalism—Will States Lose Power in the Political Parties as a Result of Direct Election?

Opponents of direct election believe that the abolition of the electoral college and the adoption of direct election will lead to a radical restructuring of the nominating conventions and committees within the national parties at the expense of the state parties. Their argument can be summarized as follows: (1) The national political parties, especially the national nominating conventions are essentially "State-based," and this structure of the parties reinforces the power of the States as members of the Union. (2) The power of the States in the political parties results from the peculiar structure of the electoral college and its abolition will destroy state political power in the nominating conventions. (3) Without the electoral college, the national nominating conventions would be composed of delegates representing interest groups, not states, or the major parties would stop nominating by convention and would adopt a national primary.

No responsible political scientist will disagree with the opponents first point that the national political parties are indeed coalitions of state parties. In that sense they are oriented toward the interests of the States. However, the second and third points in the opponent's argument are practically without foundation. The power of the States in the political parties has nothing whatsoever to do with the electoral college. State parties are represented in the national conventions and committees because they are the most powerful and effective political organizations in this country—with or without the electoral college. The power of state parties derives from their control of an immense amount of patronage, their control of the legislatures which enact the laws which regulate elections and political parties, and from their control of the party machinery which turns out the vote on election day. None of these factors will be altered by abolition of the electoral college. Therefore, the states will retain their power in the national party councils under direct election. And since the national party is a coalition of parties, with its continuity derived from on-going State party activities, the States would simply not allow the national parties to nominate candidates in a national primary or to replace state representation with interest group representation.

The national political parties are indeed state-oriented:

Even a very cursory examination of the formal structure of the national parties reveals that the real source of power is the state party. For example, the two major representative bodies within the major parties—the national committee and the national convention—are oriented toward the state parties. And, national nominating conventions are organized around delegations from the individual states and the whole delegate selection process is up to the discretion of the individual state parties.

The late V. O. Key, an expert on political parties, expresses this thought most succinctly:

"The center of gravity or of power in each party is farther down the hierarchy (from the national party apparatus) and is vested in state and city committees, leaders, and bosses. The party nationally, tends to be a loose alliance of state and city leaders who work together most faithfully during a presidential campaign. The national committee is more a gathering of sovereigns to negotiate and treat with each other than a gathering of subordinates of the national chairman. Its members convene as equals to agree upon a course of action acceptable to the majority; the national chairman resembles more a moderator than a boss."

State political power is not due to the electoral college:

No serious student of party politics has concluded that the role of the states as the center of power in the national party results from the electoral college. Other factors explain this State centered power: (1) The state parties control nominations to most of the elected offices in the country; (2) Through control of these offices, the state party controls patronage and influences the enactment of laws which regulate political behavior in their states; and (3) State parties are the most effective organizations in turning out the vote on election day.

Let us examine these three points carefully:

(1) The presidency is the only office in the United States for which the nomination is not made by a state political party or one of its constituent parties (congressional district, county or municipal committees). Candidates for the United States Senate, House of Representatives, State legislature, Governor, etc. all must seek a state or local party nomination. Since each of these persons owe their election to and must seek reelection through his state or local committee, each is sensitive to the state party's interests.

(2) Through control of the state house and the Governor's mansion, a state party can determine the state laws that regulate its very existence. The state legislatures, which are composed of members of the state party, enact the laws relating to organization of the state committee, the residency requirements for candidates, the election of delegates to state and national conventions, the general election laws, and the nominating procedures for all offices, including U.S. Senator and Congressman. With the power to decide these questions comes the power to actually control political behavior in the State. Direct election will not alter the authority of the states to decide these questions.

By way of its members in the state legislature, a state party is able not only to control the nomination and election process in its state, but also to control the nomination and election of the President. The procedures by which delegates are selected to the national nominating conventions of both parties are controlled by the states—within broad national guidelines. And the power to control the process by which delegates are selected to the national convention is the best possible guarantee of state political power within the national party. Many observers believe that in 1972 the Democratic Party suffered greatly by attempting to place too much restraint on the state parties' right to control the delegate selection process.

Another consequence of control of the state and local offices, plus the Senators and Congressmen, is the control of patronage. As a result of the Hatch Act, Civil Service reform, and recent executive reforms in the Post Office, the patronage available to the party that controls the White House has become extremely limited. However, such reforms have not taken place on the state level. State parties still control the dispersal of patronage and through patronage they have been able to entrench their power.

(3) Since state or local parties conduct the

elections of thousands of officials within their state each election year, they have developed effective grass roots organizations. As a result, state parties are the most reliable organizations in the country for turning out votes on election day.

HEARINGS ON NOMINATION OF THOMAS BERTRAM LANCE TO BE DIRECTOR OF THE OFFICE OF MANAGEMENT AND BUDGET

Mr. RIBICOFF. Mr. President, I wish to announce that the Committee on Government Operations will hold 1 day of hearings on Monday, January 17, 1977, on the nomination of Thomas Bertram Lance to be Director of the Office of Management and Budget. The hearing will be held in room 3302 in the Dirksen Senate Office Building beginning at 10 a.m.

Any interested party should advise the committee of his interest in appearing or filing a statement. The committee's office number is 224–4751.

NOTICE OF HEARINGS

Mr. PROXMIRE. Mr. President, the Committee on Banking, Housing, and Urban Affairs has scheduled hearings on January 10 and 11 on the following prospective nominations:

Patricia R. Harris to be Secretary of Housing and Urban Development;

Charles Schultze to be Chairman of the Council of Economic Advisers.

Ms. Harris' hearings are scheduled for Monday, January 10 at 10 a.m. in room 318, Russell Senate Office Building;

Mr. Schultze's hearings will be held on Tuesday, January 11 at 10 a.m. in room 5302, Dirksen Senate Office Building.

QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

JOINT SESSION OF THE TWO HOUSES—ELECTORAL VOTE COUNT

The PRESIDING OFFICER. Under the previous order, the hour of 12:50 p.m. having arrived, the Senate will now stand in recess and proceed in body to the Hall of the House of Representatives for the purpose of counting the electoral votes with respect to the last Presidential election, and when the joint session is concluded the Senate will stand in adjournment until 12 noon, Monday, January 10, 1977.

Thereupon, at 12:40 p.m., the Senate, preceded by the Sergeant at Arms, Frank N. Hoffmann, and the Assistant Secretary of the Senate, Darrell St. Claire, proceeded to the Hall of the House of Representatives for the purpose of counting the electoral votes.

ADJOURNMENT UNTIL MONDAY, JANUARY 10, 1977

At the conclusion of the joint session of the two Houses, and in accordance with the order previously entered, at 1:34 p.m., the Senate adjourned until Monday, January 10, 1977, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate January 6, 1977:

DEPARTMET OF STATE

Lowell Bruce Laingen, of Minnesota, a Foregin Service Officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Malta, to which office he was appointed during the last recess of the Senate.

Donald R. Norland, of Iowa, a Foreign Service Officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Botswana, to which office he was appointed during the last recess of the Senate.

Donald R. Norland, of Iowa, a Foreign Service Officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Kingdom of Lesotho, to which office he was appointed during the last recess of the Senate.

Donald R. Norland, of Iowa, a Foreign Service Officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Kingdom of Swaziland, to which office he was appointed during the last recess of the Senate.

Jack B. Olson, of Wisconsin, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Commonwealth of the Bahamas, to which office he was appointed during the last recess of the Senate.

Malcolm Toon, of Maryland, a Foreign Service Officer of the class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Union of Soviet Socialist Republics, to which office he was appointed during the last recess of the Senate.

James M. Wilson, Jr., of Maryland, a Foreign Service Officer of class 1, to be Coordinator for Human Rights and Humanitarian Affairs, to which office he was appointed during the last recess of the Senate.

The following-named Foreign Service officers for promotion from class 1 to the class of Career Minister:

Harry G. Barnes, Jr., of Maryland.
Robert A. Hurwitch, of Illinois.
Richard B. Parker, of Kansas.
Thomas R. Pickering, of New Jersey.
Harry W. Shlaudeman, of California.
Ronald I. Spiers, of Vermont.
Christopher Van Hollen, of Virginia.

CONSUMER PRODUCT SAFETY COMMISSION

Thaddeus A. Garrett, Jr., of Ohio, to be a Commissioner of the Consumer Product Safety Commission for a term of 7 years from October 27, 1975, vice Richard O. Simpson, term expired, to which office he was appointed during the last recess of the Senate.

SECURITIES AND EXCHANGE COMMISSION

Patrick J. Delaney, of New York, to be a member of the Securities and Exchange Commission for the term expiring June 5, 1981, vice A. A. Sommer, Jr.

NATIONAL LIBRARY OF MEDICINE

The following-named persons to be members of the Board of Regents of the National Library of Medicine, Public Health Service, for the terms indicated:

For a term expiring August 3, 1978:

Julio E. Figueroa, of Louisiana, vice John Phillip McGovern, term expired.

Francis X. Scannell, of Michigan, vice J. Stanley Marshall, term expired.

For a term expiring August 3, 1979:

Neva Martin Abelson, of the District of Columbia, vice Susan N. Crawford, term expired.

Charles Huggins, of Illinois, vice Bernice M. Hetzner, term expired.

For a term expiring August 3, 1980:

Clara M. Ambrus, of New York, vice Ethel Weinberg, term expired.

John A. Hill, of Connecticut, vice William N. Hubbard, Jr., term expired.

U.S. METRIC BOARD

The following-named persons to the positions indicated:

Louis F. Polk, of Ohio, to be Chairman of the U.S. Metric Board for a term of 6 years. (New position)

To be members of the U.S. Metric Board for the terms indicated: (New positions)

For a term of 2 years:
Harold M. Agnew, of New Mexico.
Sydney D. Andrews, of Florida.
Andrew H. Kenopensky, of New Jersey.
Adrian G. Weaver, of Connecticut.
Virginia H. Knauer, of Pennsylvania.

For a term of 4 years:
Valerie Antoine, of California.
Carl A. Beck, of Pennsylvania.
Ralph V. Durham, Sr., of North Carolina.
W. E. Hamilton, of Illinois.
Harry E. Kinney, of New Mexico.

For a term of 6 years:
Francis R. Dugan, of Ohio.
Frank Hartman, of Michigan.
James D. McKevitt, of Colorado.
Jerry J. McReal, of Oregon.
Satenig S. St. Marie, of Connecticut.
Kenyon Y. Taylor, of Illinois.

PUBLIC HEALTH SERVICE

The following candidates for personnel action in the Regular Corps of the Public Health Service subject to qualifications therefor as provided by law and regulations:

1. For permanent promotion:

To be medical director

David L. Aronson	Kurt W. Kohn
John C. Ballar III	Gerald D. Laveck
Jacob A. Brody	Robert E. Markush
Peter G. Contacos	Philip R. B. McMaster
H. Bruce Dull	Robert E. G. Morton
Arvo B. Ederma	Joseph P. O'Malley
John R. Gill, Jr.	Harold E. Ramsey
Robert I. Gregerman	James A. Richardson
Ferdinand R. Hassler, Jr.	Saul W. Rosen
	Bernard Rosenbaum
Jimmie D. Hawthorne	Norman C. Telles
Edward J. Hinman	Fred E. Tosh
Axel W. Hoke	James D. Tovey
Isao Hoshiwara	James R. Warbasse
Albert Z. Kapikian	

To be senior surgeon

Lewellys F. Barker	Ward B. Hurlburt
Kenneth S. Brown	James D. MacLowry
Donald W. Dippe	Robert G. Martin
J. William Flynt, Jr.	John A. Vaillancourt
Robert G. Godersky	John J. Witte
Kenneth L. Herrmann	

To be surgeon

Mitchell H. Gail	John A. Knight, Jr.
Roger H. Halterman	Oliver M. Korshin
Charles I. Hostetter	David L. Levin
William H. King	Osamu H. Matsutani

To be dental director

Ray W. Alcox	Thomas E. McClellan
George L. Crocker	Richard B. McDowell
Clair L. Gardner	James W. Miller
Stanley B. Heifetz	Jerry D. Niswander
Wayne R. Jameson	Roald J. Shern
Christopher E. Kennemer	John W. Vitamvas

To be senior dental surgeon

Richard R. Baker	Robert C. Faine
Robert C. Birch	Ralph A. Frew
Merwyn C. Crump	Karl J. Hettwer
Richard Q. Dunn	John H. Holt

Richard D. Lowe
Horace E. Lyon
Albert J. Munk
Regis M. Nairn
Richard P. Ribisl, Jr.
Wayne E. Stroud
John W. Topping, Jr.
John O. Wilson

To be dental surgeon

Donald P. Butler
Gary A. Kellam
Conrad A. Schwalm
William D. Straube

To be nurse director

Alice E. Duncan
Alice M. Haggerty
Alice R. Harmon
Margaret E. Lamson
Carol M. Larson
Margaret M. Resnick
Billee Vonfumetti

To be senior nurse officer

Kathryn G. Ames
Jennifer Boondas
Virginia B. Brown
Celeste B. Evans
Janet L. Lunceford
Jean A. McCollum
Ellen I. McDonald
Annette McLemore
June G. Michalski
M. Ethel Payne

To be sanitary engineer director

Perry C. Brackett.

To be senior sanitary engineer

James K. Channell
James H. Eagen
Santo A. Furfari
Lawrence P. Gazda
Joseph M. Hans, Jr.
John J. Henderson
H. Lanier Hickman, Jr.
Francis G. Mattern
Anton J. Muhich

To be sanitary engineer

George E. Anderson
Ronald K. Anderson
Charles R. Bowman
Keith E. Enders
Kenneth W. Grimley, Jr.
John L. Hankinson
William A. Mullen III
John R. O'Connor
Charles W. Whitmore

To be senior assistant sanitary engineer

Paul S. Arell
Stanley M. Blacker
Robert A. Dangel

To be scientist director

Kenneth A. Borchardt
Frank L. Bryan
Malcolm D. Hoggan
Robert Sullivan

To be senior scientist

Robert K. Bergman
Daniel F. Cahill
Robert G. Patzer
Harley G. Sheffield

To be scientist

William A. Betts
James M. Everts
Bobby J. Gunter
James F. McTigue
Michael Weisberg

To be sanitarian director

G. J. Brittain, Jr.
Robert A. Kay
Arthur L. Kenney
Richard A. Moats
Roger O. Olmsted
James L. Shoemake
Lee W. Smith
Richard E. Stedman
Dale H. Treusdell
Calvin C. Vaughn

To be senior sanitarian

Gene P. Burke
Norman G. Edmisten
Harry Haverland
Sidney D. Heidersdorf
Dale J. Johnson
Alfred B. Kline, Jr.
Joseph Lovett
Michael B. Musachio
James W. Pees
Charles R. Porter
Philip J. Robbins
Donald R. Smith
Geswaldo A. Verrone
William P. Wollschlager
Litsey L. Zellner

To be sanitarian

Raymond D. Beaulieu
Lee A. Bland, Jr.
Walter L. McPartlin
Michael A. Randolph
John C. Yashuk

To be veterinary officer director

Fritz P. Gluckstein
Gerald A. Jacobson
William T. London
Gordon D. Wallace

To be senior veterinary officer

George M. Baer
David L. Madden
Donald D. Smith

To be pharmacist director

Mark H. Barnett
Thomas H. Hodges
Paul J. Lesage
M. Thomas Wagner, Jr
Gene G. Knapp

To be senior pharmacist

Clarence I. Fortner
Ronald D. Gilbert
Philip R. Hugill
James L. Snowden
Edward S. Thompson

To be pharmacist

Edgar H. Adams
James V. Anderson
Richard J. Bertin
Norman C. Dittman
Robert A. Epstein
Bobby L. Golden
Ronald W. Horloff
John F. Mays
Jimmy R. Mitchell
Timothy F. Svoboda

To be senior assistant pharmacist

David Barash
John A. Boren
Robert DeChristoforo
James E. Edge
Steven C. Garrett
Rolley E. Johnson
James A. May
Merle E. Milburn, Jr.
Paul F. Nelson
Edward D. Westmoreland

To be dietitian director

Louise L. Boyer
Jane A. Davidsaver
Molette M. Jacobson

To be senior dietitian

Mary R. Emerson.

To be therapist director

Vincent J. Barbato
William E. Cox
Mario L. Salvanelli
Lawrence Sidel
Lennes A. Talbot

To be senior therapist

Richard S. Mazzacone

To be senior assistant health services officer

William M. Chapin, Jr.
Bryan D. Hardin
Johnny R. Rainey

PUBLIC HEALTH SERVICE

The following candidates for personnel action in the Regular Corps of the Public Health Service subject to qualifications therefor as provided by law and regulations:

1. For appointment:

To be senior surgeon

Edward F. Blasser
Warren O. Coleman, Jr.
William R. Decesare
John C. Duffy
Wallace W. Harvey, Jr.
John T. Hogan
William H. James
Frederick A. Jordan
Leonard R. Kilmer
Richard M. Krause
Ephraim Y. Levin
Raymond B. Mabrey
Rolfe W. Salin
Jack C. Siebe
William R. Thomas

To be surgeon

Gerald L. Brown
Won Suk Cho
Ronald J. Elin
Robert H. Gelber
James Gilliam, Jr.
Harold L. Kennedy
Donald O. Lyman
John P. Manges, Jr.
Lawrence W. Osborn
Steve R. Pieczenik
William W. Richards, Jr.
Michael Roe
Peter C. Scheidt
Joseph F. Tangredi
Sheridan L. Weinstein
David L. Wright

To be senior assistant surgeon

James R. Allen
Robert S. Blumberg
James R. Cooper
Richard E. Dixon
Jeffrey R. Fisher
Charles F. Horn
Elaine S. Jaffe
Demetrios A. Julius
Michael S. Katz
James C. MacMillan
James M. Raveret
Roger A. Rosenblatt
Drew H. Sterling
Robert Wayne

To be senior dental surgeon

Norman L. Clark.

To be dental surgeon

Merle C. Drew
Jack A. Shannon

To be senior assistant dental surgeon

Jay A. Balzer
William R. Burns
Edward S. Colyer
Melvin D. Cooper
Richard J. DeFilippo
John G. Devine
David M. Gabelman
Jan R. Goldsmith
Michael E. Grijalvo
Henry W. Guy
Norbert H. Hertl
Benjamin F. Howard
Jay J. Jones
Peter S. Katz
Melvin L. Lerner
Michael D. Lund
John R. Lythgoe
Timothy C. Moore
Eric D. Rehorst
Paul S. Rogers
Gary W. Starbuck
Gerald S. Summerhays

To be nurse officer

Vincent G. DeFazio
Taye G. Emori
Beverly A. Fraser
Joan A. Hartwell
O. Marie Henry
Marian M. Langley
Donna G. Roehl
Anita P. Satterly
Ernest D. Walker

To be senior assistant nurse officer

Laura J. Andersen
Rolland W. Arnold
Suzanne Dahlman
Helen D. Dymon
Clarence P. Graether
Doris C. Haak
Sandra J. Longnecker
Marie A. Moses
Eileen J. Philbin

To be assistant nurse officer

Jewel L. Boykin
Christine M. Brownholtz
Judy R. Gaalswyk
Larry R. Tripp
Diane K. Wysowski
Linda M. Zwiaska

To be sanitary engineer

William F. Holcomb
Robert R. Williams

To be senior assistant sanitary engineer

William M. Burch
Patrick A. Crotty
Ronald D. Dobbin
Clarence H. Emmett, Jr.
William E. Engle
John R. Hamilton
Wallace Hampton
Gary C. Hawthorn
Alan J. Hoffman
David S. Kircher
Paul J. Liebendorfer
Jerry H. Nunogawa
E. Albert Rachal III
Steven H. Rubin
Andrew T. Sumner
Richard F. White

To be assistant sanitary engineer

James J. Cherniack
Terrence L. Whitington, Jr.
Gordon H. Wilcox
Wayne E. Wruble

To be senior scientist

Joseph Greenberg

To be scientist

James C. Hill
Arthur E. Lagace, Jr.

To be senior assistant scientist

Douglas L. Archer
Keneth W. Boyer
Donald L. Campbell
Richard P. Chiacchierini
Robert M. Gagne
Carl J. Gates
Robert H. Hill, Jr.
William A. Kachadorian
Kenneth Krell
John P. Lucas

To be sanitarian

Webster Young, Jr.

To be senior assistant sanitarian

Mala L. Beard
Bruce R. Chelikowsky

To be veterinary officer

Ernest F. McConnell

To be pharmacist

Carles A. Branagan, Jr.
Donald G. Weinand

To be senior assistant pharmacist

Mark D. Anderson
Michael G. Beatrice
James J. Carder
Everett B. Cox, Jr.
Nicholas M. Fleischer
Arthur L. Gurtel
James C. Hayes
Karl W. Hohengarten
Ina J. Holley
Alfred P. Jenkins
John P. Juergens
James E. Knoben
James R. Minor
Barry W. Nishikawa
Steven L. Pettitt
Raleigh J. Putnam II
Steven R. Robinson
Lawrence C. Rosenthal
Michael R. Schallock
Gary P. Trosclair
Richard S. Walling
Michael R. Weaver
Edwin C. Wilkerson, Jr.
John T. Winniford
Alan M. Yamashita

To be assistant pharmacist

Robert C. Adams
Steven C. Bowman
James P. Cobb
Gary P. Copeland
Thomas E. Dorworth
David P. Elder
Paul W. Erickson
Marcia R. Gerstenzang
Patrick J. Halton
Raymond W. Hammond
Gary L. Henderson
Neumon D. Johnson, Jr.
Alexander P. Jones
Richard W. Killpack
Ezequiel Mendieta, Jr.
James F. Neighbors
Walter J. H. Hess
Thomas G. Phillips
Michael A. Rempfer
Glenn H. Rex
William P. Tyler, Jr.
Dorothy S. Vershure
William B. Welch

To be senior assistant dietitian

Alberta C. Bourn
Pamela L. Brye
Carolyn K. Scalise

To be assistant dietitian

Mary P. Bruchac

To be therapist

Carol A. Wood

To be senior assistant therapist

William M. Brown
Gary C. Hunt
Ronald E. Leppanen
Ronald W. Sweitzer

To be assistant therapist

Michael R. Huylebroeck
James C. Pryce

To be health services officer

John W. Biendekapp
Mark E. Huffman
Gary D. Knott
Robert J. Landry
Nathan E. Seldin
Reiko H. True

To be senior assistant health services officer

Michael B. Beckerman
Dale M. Botwin
Daniel J. Gouvea
John E. Hickey
Michael J. Kennedy
Lawrence E. Kucken
Richard E. Lippman
Lee H. Loomis
Edward F. Manny
Frederick J. Miller
James L. Morrison
Melvin E. Segal
David R. Selby
Libby B. Smith
Penni I. St. Hilaire
David R. Weir

To be assistant health services officer

Ronald E. Basil
Beverly A. Bogner
Constance M. Burtoff
Kenneth C. Diepold
Ronald G. Jans
George S. Komada
Llewellyn H. Mason, Jr.
Peter P. Mazzella
Tim L. Pay
James J. Vucich
Joseph R. Williams

IN THE COAST GUARD

The following regular officers in the U.S. Coast Guard for promotion to the grade of captain:

John H. Guest
Lawrence J. Opezio
James J. Rooney, III

Joseph L. Valenti
Arthur E. Henn
Nils Linfors
Leon Z. Katcharian
John G. Denninger
David H. Whitten
Lance A. Eagan
Hugh L. Thomas
William J. Wallace, Jr.
Harold L. Bonnet
Elmer Sorensen
Frederick A. Kelley
Raymond D. Bland
James F. Greene, Jr.
Joseph J. Smith
Peter C. Hennings
Walter M. Coburn
Wade M. Moncrief, Jr.
David S. Gemmell
Carl H. Burkhart
Neal Mahan
Glenn E. Haines
Peter T. Muth
Michael O. Murtagh
Anthony J. Soltys
Kwang P. Hsu
Albert F. Baker
William S. Murray
George E. Mason
Norman H. Huff
Don M. Keehn
Thomas D. Smith
Raymond J. Houttekier
David K. Carey
Louis M. Casale
Wayne P. Stevens
Harry N. Hutchins III
Joseph R. Finelli
Richmond D. Greenough, Jr.
Hugh W. Nabors
Scott D. McCowen
David V. Wood
Gary L. Rowe
Branson E. Epler, Jr.
Stephen L. Richmond
Hugh Huleatt
Walter R. Granstra
Howard R. Ledbetter
Theodore H. Hofer
John K. Andrews
Cyrus E. Potts
John E. Streetep
Billy G. Cunningham
Alfred T. Miles
Harold T. Sherman
Gary R. Hall
David Corson
Edward G. O'keefe
Michael J. Schiro
Richard V. Consigle
Clifford E. Banner
Thomas F. McGrath III
Phillip J. Bull
Michael H. Dennis
Alvin Cattalini
Gary F. Vannevel
Clinton H. Smoke, Jr.
James F. Brodie, Jr.
Frank A. Boersma
Richard S. Bizar
Roger W. Bing
Joseph B. Coyle
William R. Wilkins
William W. Barker III
George J. Thompson
Arder B. Chittick
Gerald F. Wollever
Nelson H. Keeler, Jr.
Harry T. Suzuki

To be captains

Donald R. Tibbit
Gerald C. Saladin
Ray E. Moses
James G. Grunwell
Robert L. Sandquist
James S. Midgley
Melvin J. Umbach
Charles H. Nixon
J. Austin Yeager
John D. Bossler
Raymond L. Speer

To be commanders

John C. Albright
Hugh B. Milburn
Yeager A. Bush
William L. Stubblefield
Melvyn C. Grunthal
Michael Kawka
Clarence W. Tignor

To be lieutenant commanders

Thomas W. Ruszala
Frank B. Arbusto, Jr.
Stephen D. Whitaker
James A. Wexler
Patrick L. Wehling, Jr.
David W. Yeager
Kent P. Dolan
Craig S. Nelson
Stephen H. Manzo
Michael C. Meyer
George W. Jamerson
Jeffrey P. Calebaugh
Burl L. Wescott
Robert K. Norris
James D. Servais
William J. Lounsbery
Alan J. Pickrell
Gerald W. Stanley
Ronald W. Jones
Theodore C. Kaiser
Richard W. Permenter
Wayne L. Perryman
Daniel S. Eilers

To be lieutenants

Dennis M. Kuhl
Michael E. Ziolko
Terrance D. Jackson
Edward D. Gullekson
Christine S. Carty
Karen L. Pasciuti
James D. Sarb
David H. Peterson
Richard W. Ellis
Cheryl A. Cavin
James H. Bennett, Jr.
Deborah A. Astle

Constantine E. Mericas
Gary M. Albertson
Evelyn J. Fields
Howard T. Langeveld
Edward B. Christman
Gary S. E. Lagerloef
David A. Waltz
Lee R. Doering
John A. Withrow

To be lieutenants (junior grade)

Kathryn A. Andreen
David J. Tennesen
Peter W. deWitt
James W. O'Clock
Richard E. Marriner II
Roger A. Norris
Hans E. Ramm
Dale E. Bretschneider
Lawrence D. Parsons
Stanley R. Iwamoto
Roddy J. Swope
Gregory P. Kosinski
Bruce W. Dearbaugh
Lewis W. Walker
Mark V. Losleben
Mary C. Wencker
Ronald W. Kimball
Pirkko K. Uusitalo
Robert D. Haught
Lars A. G. Pardo
Todd A. Baxter
Stephen L. Poole
Thomas L. Renninger
Thomas G. Clark
F. Ronald Philippsborn
Marcella J. Bradley
James E. Talton, Jr.
George J. Munkenbeck, Jr.
Michael A. Coulman
George M. Doggett

To be ensigns

Douglas G. Brockhouse
William L. Hiscox
Marianne Molchan
Kirsten E. Olson
Joseph C. Rhett
Donald B. Stanley
James H. Thomson
John D. Wilder
Paul M. Daugherty
John T. Moakley
Michael McCluskey
Judith E. Barnett
John W. Blackwell
Samuel P. DeBow, Jr.
James G. Fausone
Lyle B. Fox, Jr.

Woods, Billy F.

HOUSE OF REPRESENTATIVES—*Thursday, January 6, 1977*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

He has showed you, O Man, what is good; and what does the Lord require of you but to do justly, and to love mercy, and to walk humbly with your God.—Micah 6: 8.

Almighty God, whose will it is that we do justly, love mercy, and walk humbly with Thee, grant unto us the fortitude to do what we ought to do, the faith not to do what we ought not to do, the wisdom to see our way clearly and the courage to walk worthy in that way.

Deliver us and our Nation from discord and disunity, give to us the continual strength of Thy presence and the constant awareness of our duty to lead our people in the ways of truth and love, faith and freedom, justice and peace.

We cannot do everything we would like to do but, please God, help us to do what we can to keep our Nation great, our Government strong, and our citizens good; for Thy names sake. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed the following resolution:

S. RES. 15

Resolved, That the Senate has heard with profound sorrow and deep regret the announcement of the death of Honorable Philip A. Hart, late a Senator from the State of Michigan.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Resolved, That as a further mark of respect to the memory of the deceased, the Senate, at the conclusion of its business today, do adjourn.

SWEARING IN OF MEMBER-ELECT

The SPEAKER. The gentleman from Illinois (Mr. MURPHY) was not present on Tuesday, January 4, 1977, to take the oath of office.

Will the gentleman come to the well of the House and take the oath of office at this time?

Mr. MURPHY of Illinois appeared at the bar of the House and took the oath of office.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The gentleman from New Jersey (Mr. THOMPSON) is unavoidably detained and is unable to serve as a teller of the electoral college.

The Chair designates the gentleman from Pennsylvania (Mr. DENT) to act as teller in his stead.

APPOINTMENT AS MEMBERS OF HOUSE OFFICE BUILDING COMMISSION

The SPEAKER. Pursuant to the provisions of title 40, United States Code, sections 175 and 176, the Chair appoints as members of the House Office Building Commission to serve with himself: the gentleman from Texas, Mr. WRIGHT, and the gentleman from Arizona, Mr. RHODES.

SAM RAYBURN DAY IN TEXAS

(Mr. MAHON asked and was given permission to address the House for 1 minute to revise and extend his remarks, and to include extraneous material.)

Mr. MAHON. Mr. Speaker, January 6 is an important day in the State of Texas and in fact in the Nation. It is the birthdate of the late Sam Rayburn who served in this House for 49 years and who served as Speaker for 19 years. Sam Rayburn's record, in my opinion, will never be equalled or surpassed.

Mr. Rayburn measured up to the very high standards of conduct as a Member of the House of Representatives. Nobody ever questioned his total integrity, honesty, and virtue. He left a great heritage.

We honor ourselves in taking a moment today to recall the life and work of this great American.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to the distinguished gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Speaker, I thank

the distinguished dean of the House for yielding to me.

This day should not pass without our observing that 95 years ago the incontestably greatest legislator of our century, Sam Rayburn, was born.

When Mr. Rayburn was born those 95 years ago, the world was a much different place. It was about 8 miles from Windom, near where the Rayburn family lived, to Flag Springs, a nearby community.

On many occasions, Mr. Rayburn later observed that in his childhood he labored under the impression that the people of Flag Springs were inherently different from those of Windom. He sometimes remarked that the greatest education of his life had been that people everywhere are neighbors and are much the same, dreaming the same dreams, hoping the same hopes, fearing the same fears. In his maiden speech in the House, he spoke of his vision of a nation in which there would be "no north, no south, no east, no west."

It was this perhaps that made Mr. Rayburn the most incisive, the most comprehending and most effective of all legislators, his name attached to more great legislation than any other in our century.

He was to many of us exemplar, friend, leader, counselor, and father confessor. It is appropriate that we pause for these few moments in commemoration of the birth of this truly great American.

Mr. HALL. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to the distinguished gentleman from Texas, who represents what was once the hometown for so many years of Sam Rayburn (Mr. HALL).

Mr. HALL. I thank the gentleman for yielding.

Mr. SPEAKER. Sam Rayburn of Texas is one of that select few of whom it can be said he was the most and the best—in his case—Speaker of the House of Representatives longer than any other man in history. The quality of his leadership is a legend that will be spoken of in the Halls of Congress when the most prestigious of our newer buildings—the Sam Rayburn House Office Building—itself becomes an old and respected historic landmark. It was Sam Rayburn who gave Franklin D. Roosevelt the legislative muscle to invigorate the economy during the onset of the great depression, and it was Sam Rayburn who helped keep the Nation productive during the crucial years of war. The memory of Sam Rayburn is revered here in Washington and I am proud to represent his town, his county, and his host of friends in the Nation's Capital. It is right and proper that we recognize "Sam Rayburn's Birthday" with humility, affection, and respect for one of the very greatest of American patriots.

Mr. BOLLING. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to the distinguished gentleman from Missouri (Mr. BOLLING).

Mr. BOLLING. I thank the gentleman from Texas for yielding to me.

Mr. Speaker, I can add nothing to what has already been said, except one point. It was mentioned that Sam Rayburn was the greatest legislator of this century. I think his career is entirely unparalleled in any legislative body in the world. Certainly in this institution, the U.S. Congress, he held great power for 30 years. He was a committee chairman before he became the majority leader and then the Speaker, and he had great legislative power for longer than anybody else who ever served in this institution. His skill as a legislator was entirely unmatched in his time and, in my judgment, before and since.

Mr. Speaker, I am delighted to join the Texas delegation and others in honoring his memory.

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to the distinguished gentleman from Mississippi (Mr. WHITTEN).

Mr. WHITTEN. I thank the gentleman for yielding.

Mr. Speaker, I wish to also join in the words that have been said earlier. Having had the privilege of serving many years under the late Speaker Sam Rayburn, I would like to say that I have never known a man in my life who had the ability not only to get the attention of the Members but to hold that attention, who could put into concise words his thoughts. He never wasted a word. He never wasted a moment. He was always to the point. He always made sense.

Mr. Speaker, for that reason, and for many others, I agree with the statement that never in our history have we had a more effective Member, a man who better used the power that was his and who served as a Member of the House in the same spirit in which he served as its leader. I am glad to have this opportunity to pay my respects to his memory and to give credit to the greatest legislator it has been my privilege to serve.

Mr. BURLESON of Texas. Mr. Speaker will the gentleman yield?

Mr. MAHON. I yield to the gentleman from Texas (Mr. BURLESON).

Mr. BURLESON of Texas. Mr. Speaker, those of us who served with Sam Rayburn and under him as majority leader and Speaker, really need no reminder or special occasion to remember him. Even those Members not privileged to have had the experience of his association, must feel an affinity with him by reason of the rich legacy and legend which he left.

It is not necessary to walk by his statue in the rotunda of the Rayburn Building or look at his portrait in the Speaker's lobby, to feel his ever-presence in this House of Representatives. It was his dedication: his pride, his joy, his life. He took pride in its operation and its accomplishments. He saw to its business and jealously guarded its reputation as an institution. He was devoted to its Members, always concerned with the problems and interests of every individual.

We in Texas are extremely proud of the Sam Rayburn Library in Bonham which houses his papers and memorabilia. I hope it might be possible for many of you to visit that institution at some time, with confidence that you would gain an ever greater appreciation of this man whose influence lives on and whose memory remains constant in the hearts of thousands.

On this, his birthday, we especially honor his memory and pay homage.

Mr. KAZEN. Mr. Speaker, on this 95th anniversary of the birth of Sam Rayburn, I am pleased to join my colleagues in honoring one of the greatest Congressmen, the greatest Texans and the greatest Americans of all time. The world knew him, as we did, as Mr. Sam. It is fitting today to recall the dignity, the diligence, and the dedication that marked his service in this House.

Mr. Sam began his public service in our Texas Legislature, winning his first election before he was admitted to the bar. He was elected speaker of the Texas House in his third term, and then in 1913 left Austin to come to the Congress. He managed always to blend his interests in Texas and our Nation to write his name indelibly into the history of the United States.

He served in 25 Congresses, became the Speaker on September 16, 1940, and served 17 years, more time than any other Speaker, before his death November 16, 1961. His spirit lives on, just as it was displayed when he was asked under how many Presidents he had served. His oft-quoted reply was "None, but I served with seven." In that single sentence, he spoke of the importance of the Congress and its role as a coequal branch of our Government. I suggest that his message should be heard today, as we approach a change in administrations. All of us, on either side of our center aisle, will do well to serve with the new President.

It is fitting that we today honor the anniversary of the birth of Mr. Sam.

Mrs. BOGGS. Mr. Speaker, today, January 6, is the 95th anniversary of the birth of one of the great figures in the history of this House and this Nation—the late Speaker Sam Rayburn.

Gov. Dolph Briscoe, of Texas, has officially designated January 6 as "Sam Rayburn Day" so that Texans can reflect upon the magnificent public service rendered to them by this man for nearly 55 years. Twenty-eight times he ran for office; 28 times he was elected. What confidence his constituents had in him!

Today, as we begin the third century in the life of our Nation, I want to take a few minutes to recall this remarkable human being.

First, his memorable, simple language in such sayings as:

The House of Representatives—it is my life and my love.

Common sense is all the sense there is.

You never have to explain something you didn't say.

One of the wisest things anybody ever said was—"Wait a minute."

I don't care what you call me—progressive conservative or conservative progressive—just as long as you keep that word progressive in there.

The greatest goal every human being can have is to be a just person—to realize that every other human being has just as much right to be on this earth as you have.

If Mr. Sam could visit his beloved House today, I think he would find several things that would make him happy.

First and foremost, he would be very proud of the manner in which his be-

loved country, the Constitution which he so revered, and particularly the Congress, survived the raging storms of the last decade, and emerged the stronger for it.

Particularly would he be proud of the dignity and the sense of anguished justice with which this House and its Committee on the Judiciary met the awful duty of the impeachment process.

I think he would be very appreciative of the countless ways in which we are attempting to strengthen and modernize our internal procedures in order better to meet tomorrow's challenges.

Without question he would be proud of the majestic strides taken since his death to minimize, and hopefully, to end, discrimination among our citizens.

Since he himself paid a lifelong penalty from this particular discrimination, he would have derived great joy from the fact that this Nation at last turned its back upon the rule that no one from the Old South could occupy the Presidency.

The efforts we are making to improve the quality of life and the environment in which we live are a reflection of his own lifelong interests and efforts.

Particularly, I think, he would be happy to see so many young people in this Congress. How he loved the young—how he liked to be with them—how he never missed an opportunity to help them develop and make progress. Perhaps that is why to many of us he never seemed to grow old.

In conclusion, as we start our third century as Americans, when we become weary and discouraged, let us take heart from one of Sam Rayburn's favorite sayings:

Service is the most beautiful word in the language.

Mr. ROBERTS. Mr. Speaker, today marks the 95th birthday of the late Speaker Sam Rayburn. In honor of this occasion, I would like to share with my colleagues some reflections on the life and career of this giant of a man I proudly called my friend and for whom I was privileged to work:

SAM RAYBURN—THE MAN

To have a hope of winning any public office a man must establish himself in a community and over a period of years acquire a circle of friends who, if they believe he has the qualifications for the office he seeks, will actively back him and help him to gain the support of the majority of the voters in his district.—The Honorable SAM RAYBURN.

Sam Rayburn belonged to a rare category of human beings—he became a legend in his own lifetime.

For a whole generation national writers told the story of his record as a public official and the many laws he fathered to improve the daily lives of the plain people of America in whom he had a passionate, almost religious, faith.

Many people know that he was the Speaker of the U.S. House of Representatives 17½ years—longer than any man in history—and served as a Member of the Congress almost 49 years, and that he helped to guide the United States through its two greatest wars, its greatest prosperity and its greatest depression.

A lot of people know some of his legislative achievements. The REA, which brought electricity to almost all the farms of America; the farm-to-market road program which is lifting the farmer out of the mud; the regulation of Wall Street which protected the savings of millions of people who invest in stocks and bonds; GI insurance and the veterans disability payments which have helped every American soldier and his family since 1917; soil conservation and flood control measures to help save the priceless heritage of the soil so that unborn generations of Americans may continue to eat abundantly—these are a few of the Rayburn accomplishments in the Halls of Congress which affect the daily welfare of all Americans.

But in spite of this knowledge of his records and his accomplishments, many people have only a hazy idea of what kind of a human being this man was.

For this Mr. Rayburn himself was largely responsible. Most men in public life seek—even crave—every bit of publicity they can manage.

Not so with Sam Rayburn.

He never had a "publicity man" on his staff.

He steadfastly refused to write the story of his life.

He seldom made a speech in Congress. Once he complimented an associate by saying:

He doesn't run around getting his name in the newspaper.

Well, what kind of a human being was Sam Rayburn?

In Washington he lived in the same small, comfortable apartment for more than 30 years.

He preferred to couch his conversation in the simple, homespun, Anglo-Saxon words he learned around his father's fireside south of Windom. He intensely disliked what he calls "those five-cylinder words." When he spoke, everyone understood exactly what he meant.

He was one man who never had any desire to go abroad. When Congress adjourned, there was only one place he wanted to go—and that was home.

He said once:

When I get away from Washington, I don't want to go anywhere in the world except home, and to see my lovely country, to see what little possessions I have and to associate with my brothers and sisters and old friends. Home looks better to me than any place in the world.

To many people, much of Mr. Rayburn's success came from his universal reputation for candor and telling the truth. On one occasion Mr. Rayburn said:

Always tell the truth. You often have to say "no" in politics. If you tell the truth to people and the reasons for your action, you will retain their respect and, almost invariably, their friendship.

But those who knew the man will remember him longest, not for his achievements nor his commonsense, but for his kindness.

A former Washington correspondent told how, some years ago, the depths of Sam Rayburn's kindness were revealed to him:

One of our daughters died. The next morning the Speaker was at our front door. He said he had just come to help out in any way he could. Understand, I was fairly new in the bureau and I wasn't very important to my paper, and I certainly wasn't important to Mr. Rayburn in any political way. But there he was. He helped me make coffee and told our other two little girls stories about Texas. I knew he was supposed to go to have breakfast with the President at the White House that morning and at one point I asked him about it. He said, "Yes, but I called the President and told him I had a friend in trouble."

Mr. Rayburn was a deeply religious man although it was late in life when he joined the church. In a letter to a friend, he said:

In my own life faith has been the greatest moving factor, and I have always tried to live and follow the principles expressed in those wonderful words, "For what doth the Lord require of Thee, but to do justice, to love mercy and to walk humbly before thy God".

From a boy I have been a Christian. Every day of my life God becomes more personal to me. Every time I look Him in the face and call on Him, He responds.

It is great to live and to know that such a power exists, for the good, of course.

Mr. BROOKS. Mr. Speaker, on January 6, 1882, the late Speaker of the House, Sam Rayburn, was born and it is my honor to remember him on this 95th anniversary of his birth.

Speaker Rayburn serves as an inspiration to all of us who had the privilege to serve in this body with him and his legacy—a man of compassion, determination, and diligence—remains as an example to follow for every Member of Congress.

Mr. Speaker, as the 95th Congress begins another chapter in our Nation's history, it seems to me that this is a fitting occasion to recall the qualities of Speaker Rayburn and to keep them fresh in our minds as we go about our work to restore the trust of the American people in our country's public servants.

Speaker Rayburn was a man whom I was proud to know and to call my friend and it is with deep humility that I pay tribute to his memory today.

GENERAL LEAVE

Mr. MAHON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of Sam Rayburn Day and of the life, character, and public service of the late Hon. Sam Rayburn, former Representative and Speaker of the House.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

AUTHORIZING PAYMENTS FROM CONTINGENT FUND

Mr. DENT. Mr. Speaker, I offer a privileged resolution (H. Res. 84) and ask unanimous consent for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 84

Resolved, That, notwithstanding any other provision of law or of the Rules of the House of Representatives, during the period beginning on the date of the adoption of this resolution and ending on the date of the elec-

tion of the chairman of the committee involved in the Ninety-fifth Congress—

(1) the Member of the House who was chairman of a committee of the House established in Rule X of the Rules of the House of Representatives at the close of the Ninety-fourth Congress (if such Member is a Member of the House in the Ninety-fifth Congress); or

(2) in any other case, the ranking majority party member of such committee who was serving on such committee at the close of the Ninety-fourth Congress (and is a Member of the House in the Ninety-fifth Congress); may authorize payments from the contingent fund of the House for the payment or reimbursement of any continuing or recurring expense incurred on behalf of such committee in the exercise of its functions or jurisdiction following sine die adjournment of the Ninety-fourth Congress and upon the re-establishment of such committee in the Ninety-fifth Congress, under regulations promulgated by the Committee on House Administration in existence at the conclusion of the Ninety-fourth Congress.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

Mr. MICHEL. Mr. Speaker, reserving the right to object, this resolution is, as I understand it, necessary because of a number of persons having had their pay status fouled up and haven't as yet received their December checks as no one could formally authorize their issuance.

All I want is the assurance of the gentleman from Pennsylvania (Mr. DENT) that we are not talking about additional new people being added beyond what normally would be the complement of staff of the standing committees which we are discussing.

Mr. DENT. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Pennsylvania.

Mr. DENT. Mr. Speaker, the resolution that is pending before the House is quite simple. It provides the authority for the Member who was the chairman of each of the standing committees in the last Congress to authorize payment for routine, recurring expenses from today until the House has an opportunity to elect a new chairman. In those cases where the chairman is not a Member of the 95th Congress, the ranking majority party member is granted this limited authority.

There is one main reason why this is essential. There are in excess of 100 staff people spread over approximately 16 different committees who have not been paid for the month of December. These individuals are entitled to promptly receive their December paycheck.

The approach taken in this resolution further allows those routine expenditures like the paying of telephone bills, copying costs, et cetera, to continue in an orderly and business-like fashion.

I urge the adoption of this resolution.

Mr. MICHEL. This in no way establishes the permanent staff or changes the makeup of any of the new committees which we are discussing?

Mr. DENT. Mr. Speaker, it does not authorize anything except routine matters, and there will not be any new staff authorized by this resolution.

Mr. MICHEL. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GAMMAGE-PAUL ELECTION CONTEST IN TEXAS

(Mr. ECKHARDT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ECKHARDT. Mr. Speaker, I should like to engage in a colloquy with the distinguished gentleman from Pennsylvania (Mr. DENT) concerning persons who have now become Members as a result of the swearing in which occurred the other day and who are also contestees. I refer specifically to the distinguished member from the 22d District of Texas, Mr. GAMMAGE, who defeated incumbent Ron Paul in the general election of November 2, 1976. Under provisions of the Texas Election Code, Article 9.38 of Vernon's Annotated Texas Statutes, a recount was conducted under the general observation of counsel from the Privileges and Elections Subcommittee of the House Administration Committee. The result of this recount was to show GAMMAGE the winner by approximately 268 votes. Consequently, he was certified as having won by the secretary of state of the State of Texas.

Texas has provisions for election contests purporting to be applicable to congressional elections, and Dr. Ron Paul filed notice of a contest under them. Thus, this case is presently before the district court in Harris County, Tex.

Of course, Congress has provided by law, procedures for contesting elections in title 2, United States Code, section 381, et seq., and notice of contest has been filed by Dr. Paul under this statute with the Clerk of the House of Representatives.

Now there may be some questions arising in the State court relating to the procedures that took place here the other day and which will normally follow in the House Administration Committee.

The SPEAKER. The time of the gentleman from Texas (Mr. ECKHARDT) has expired.

(Mr. DENT asked and was given permission to address the House for 1 minute.)

Mr. ECKHARDT. Mr. Speaker, will the gentleman yield?

Mr. DENT. I yield to the gentleman from Texas.

Mr. ECKHARDT. Mr. Speaker, I should like to have the views of the gentleman from Pennsylvania (Mr. DENT) as to the posture that that committee is likely to take. Of course, it will not be constituted for this term of Congress until after the middle of the month, but I know the gentleman from Pennsylvania to be very knowledgeable about the processes of the committee, and I shall ask this question:

What is the authority of the House of Representatives in judging an election contest of this type?

Mr. DENT. Of course, article I of the Constitution empowers each House of Congress to be the judge of the elections, returns, and qualifications of its own Members. While *Roudebush* v. *Hartke*, 405 U.S. 16, 25 (1972) held an exercise of a State's article I, section 4 powers, a vote recount, did not usurp the authority of the Congress, the House, in previous election contests, has deemed its authority to judge the elections, returns, and qualifications to be "infinite."

Mr. ECKHARDT. Now, since the full processes under Texas law for a recount have been completed, and since Mr. GAMMAGE has been certified as having been duly elected by the secretary of state of the State of Texas, would there, in your opinion, be any further action under State authority which would not be altogether duplicative of the procedures before the House Administration Committee since Dr. Paul has filed his notice of contest before that committee?

Mr. DENT. No, there is nothing that can be done under State processes, as, for instance, in a State court, that could not be duplicated. As I see it, it is the House's right and duty to act fully, completely, and exclusively in the final instance as the judge of the elections, returns, and qualifications of Members of the House, and the Committee on House Administration, as the agent of the House, would, I think, proceed properly to hear all contests referred to it, sending for persons and papers and examining witnesses and taking all other evidence relative and material to any proceeding.

The SPEAKER. The time of the gentleman from Pennsylvania (Mr. DENT) has expired.

(Mr. DANIELSON asked and was given permission to address the House for 1 minute.)

Mr. DENT. Mr. Speaker, will the gentleman yield?

Mr. DANIELSON. I yield to the gentleman from Pennsylvania.

Mr. DENT. Mr. Speaker, this is not only my view, but it has been the view of Congress and of high State courts. For instance, the Supreme Court of Michigan in *McLeod* v. *Kelly*, 304 Mich. 120, (1942) said:

> Assuming that the State board might be directed to take testimony, or that this court should (as suggested by oral argument and supplemental brief) take testimony as to the result of the election. The final decision rests with the House of Representatives in Congress.

And the court recognized that the U.S. statutes provide an adequate method for contesting an election in the House of Representatives and for taking testimony before a congressional committee. Such committee would, of course, be the Committee on House Administration under our customs and procedures.

Mr. ECKHARDT. Mr. Speaker, since the distinguished gentleman from California is placing in the RECORD what constitutes, in effect, a brief in behalf of the contestant, Dr. Ron Paul, in the case of the seating of the contestee, the gentleman from Texas (Mr. GAMMAGE) and since, in the opinion of this Member, the brief comes to wrong conclusions, it seems necessary to point out these errors. They involve, indeed, questions of law, and my previous colloquy with the gentleman from Pennsylvania (Mr. DENT) attempted to avoid extensive and detailed legal conclusions—rather to deal with the

facts: the House's broad jurisdiction in this matter and its intent to occupy the field and exercise such full jurisdiction. The gentleman from New Jersey (Mr. THOMPSON) has also placed in the RECORD of today a statement of his intent to proceed to deal with the seven contests which have now been filed with the Clerk.

But since it becomes necessary to correct certain erroneous conclusions, the following observations on the effect of article I, sections 4 and 5 of the Constitution, are respectfully submitted.

The power of the Congress and of the States with regard to Federal elections is prescribed in the Constitution in two separate clauses:

Article I, section 4 states that—

The times, places, and manner of holding elections for Senators and Representatives shall be prescribed in each state by the legislature thereof; but the Congress may at any time by law make or alter such regulations, except as to the places of choosing Senators.

Article I, section 5 provides that each House of the Congress is empowered to "* * * be the judge of the elections, returns, and qualifications of its own members."

It is, of course, patent and explicit in the Constitution that the House, by article I, section 5, possesses the ultimate power to be the final judge of elections of its own Members. On this point there can be no serious dispute.

However, it has been suggested that judicial precedents recognize the propriety of State proceedings incidental to an election contest of a Member of Congress, and that such judicial recognition comes by virtue of the power of the States under article I, section 4.

It has even been suggested by the distinguished gentleman from California (Mr. WIGGINS) that the Supreme Court has recognized the power of a State court to try an election contest in any case. Mr. WIGGINS seems so to interpret *Smiley* v. *Holm*, 285 U.S. 355, 76 L. Ed. 795.

Though that case does not give support to the proposal advanced by Mr. WIGGINS, its facts afford an excellent example of the reach and appropriate application of article I, section 4, of the Constitution—relating to the "times, places, and manner of holding elections"—as opposed to article I, section 5, of the Constitution—governing the judging of "elections, returns, and qualifications" of contestees.

That 1931 Supreme Court case raised the question of whether or not districting by the Legislature of Minnesota was valid though it had not been done by statute. The petitioners sought mandamus to restrain the holding of elections in the congressional districts thus established. Respondents contended that article I, section 4, confers directly to the legislature of a State authority to control elections, returns, and qualifications. Consequently—so runs the argument—the ordinary processes for the passage of a law under the constitution of the State need not be adhered to. In this case the Governor had vetoed the bill. Respondents pressed upon the Court a literal interpretation of the language of article I, section 4, providing that—

The Times, Places, and Manner of holding Elections for Senators and Represenatives, shall be prescribed in each State by the Legislature thereof . . .

Since such power appears to be delegated directly to the "Legislature" and not to the "State," it was argued that the legislature had special and direct Federal constitutional authority to engage in the function of controlling times, places, and manner of holding elections, including districting.

The Supreme Court rejected this argument resting the case on the question of whether the function contemplated by article I, section 4, is that of making laws. The Court held it was such a function and that the manner of making laws is governed in a State by that State's constitution.

It can be seen, then, that the Court did not touch the question of the extent of the State's power to deal with the other and separate matter governed by article I, section 5, of the Constitution, the judging of elections, returns, and qualifications of Members.

The quotation in Mr. WIGGINS' statement is altogether dictum respecting the point that he seeks to urge, but the dictum, considered in light of the facts dealt with in the case, cuts the other way. Smiley against Holm dealt with procedure and the Court made it clear that article I, section 4, was a procedural article dealing with times, places, and manner of elections embracing such things as notices, registration, supervision of voting, protection of voters, prevention of fraud and corrupt practices, counting of votes, duties of inspectors and canvassers, and making and publication of election returns; it was—

. . . in short, [authority] to enact the numerous requirements as to *procedure* and safeguards which experience shows are necessary in order to enforce the fundamental right involved. [Emphasis added.]

There is no question about the State's authority to set up procedures and to provide means of enforcing them. Thus, persons conducting the election or attempting to tamper with returns are clearly subject to scrutiny and possible punishment under State authority. A part of the election procedure is the process of recounts, and provision for this is clearly within the constitutional authority granted under article I, section 4. *Roudebush* v. *Hartke et al.*, 405 U.S. 15 (1972).[1]

But when the matter to be dealt with is directed at the qualifications of a person to serve as a Member of Congress and when it involves the judging of the election, the election returns and their effect upon such qualifications, such matter is, under the Constitution, governed wholly by article I, section 5, not by section 4. There is no extension of constitutional authority to the States to conduct this process. Thus, if a State court purports to enter this field, it is acting without constitutional authority, and the appropriate House of Congress duty and authority to determine the election contest is altogether untrammeled by the State's gratuitous action in this field.

II

The divide between procedure—"times, places, and manner"—and the merits—"election, returns, and qualifications"—is clearly delineated in Roudebush against Hartke, supra. Hartke successfully sought an injunction against a recount which had been granted under a timely recount petition in State court. He urged that the basic issue was:

Which candidate is entitled to be seated in the Senate.

The Supreme Court held that the actual question was not that at all.

It is whether an Indiana recount of the votes in the 1970 election is a valid exercise of the State's power, under Article I, Section 4, to prescribe the times, places, and manner of holding elections, or is a forbidden infringement upon the Senate's power under Article I, Section 5. (405 U.S. 19)

The Court said that the—

State courts' duties in connection with a recount may be characterized as ministerial, or perhaps administrative, but they clearly do not fall within . . . [the] definition of a "judicial inquiry."

Indeed, the Court held that the limited responsibilities involved in such a recount did not even constitute a "court proceeding" under the terms of 28 U.S.C., section 2283, which prohibits a Federal court from enjoining State court proceedings except in a few specific instances.

Thus, the Court did not agree with the lower court that in making judgments as to which ballots to count, the recount commission would be judging the qualifications of a Member of the Senate. It said:

Indiana has found, along with many other States, that one procedure necessary to guard against irregularity and error in the tabulation of votes is the availability of a recount . . . A recount is an integral part of the Indiana electoral process and is within the ambit of the broad powers delegated to the States by Article I, Section 4.

Had the case involved the question of which candidate is entitled to be seated in the Senate, the court said "to be sure, a nonjusticiable political question—a question that would not have been the business of this Court even before the Senate acted" would have been involved.

III

Contrast the subject matter in Smiley against Holm and Roudebush against Hartke with that of the earlier cases of *Barry* v. *Cunningham*, 279 U.S. 597, and *Reed* v. *County Commissioners*, 277 U.S. 376. These cases arose out of the disputed 1926 senatorial election in Pennsylvania in which William Vare appeared to have

[1] As in the Supreme Court cases, the cases before state courts have also decided in favor of the constitutionality of recount procedures in congressional elections. One such case held that if the state has a statutory recount procedure, the election process is not over until the recount is completed. *Blackburn* v. *Hall*, 115 Ga. App. 235, 154 S.E. 2d 392 (1967).

A significant case suggesting the limit of a state's power under Art. 1, sec. 4, is *Wickersham* v. *State Election Board*, 357 P. 2d 421 (Okla. 1960). In that opinion, the Oklahoma Supreme Court stated that the Congress would not refuse to accept the results of a statutory recount, and granted a writ of mandamus for such a recount. The court went on, however, to state that if a state lacked a recount provision, a petition for a recount would constitute a contest. In such a case, only Congress could grant appropriate relief.

defeated William Wilson. In 1926 the Senate committee was authorized to inquire into the means used to influence the nomination of candidates in that election. Vare was given the certificate of election and Wilson initiated a contest. The Court in Reed recognized that the case arose under article I, section 5, of the Constitution and stated that the Senate—

. . . is the judge of the elections, returns and qualifications of its members . . . It is fully empowered, and may determine such matters without the aid of the House of Representatives or the Executive or Judicial Department. 277 U.S., at 388.

In Barry against Cunningham, the Court also recognized the nature of the case as an article I, section 5, matter and said:

It is enough to say . . . that upon the face of the returns [Vare] had been elected and had received a certificate from the Governor of the State to that effect. Upon these returns and with this certificate, he presented himself to the Senate, claiming all the rights of membership. Thereby the jurisdiction of the Senate to determine the rightfulness of the claim was invoked and its power to adjudicate such right immediately attached by virtue of Section 5 of Article I of the Constitution. 279 U.S., at 614.

The Court further said:

The Senate having *sole authority* under the Constitution to judge of the elections, returns and qualifications of its members, may exercise in its own right the incidental power of compelling the attendance of witnesses without the aid of a statute. [Emphasis added]

Note the term "sole authority." When one of the Houses of Congress has sole authority, the matter is not a justiciable controversy for a court.

IV

State court decisions accord with the principles established in the Supreme Court cases discussed. In *Laxalt* v. *Cannon*, 80 Nev. 588, 397 p. 2d 466 (1964), the petitioner argued that an election contest pursuant to a State statute is part of the total election process contemplated by article I, section 4. He conceded that the ultimate power to judge and determine the winner of a senatorial race rests with the Senate, but he saw no dilution of that power by permitting a State court first to decide the controversy as an aid to the final decision of the Senate. The Supreme Court of Nevada found the weight of authority overwhelmingly supporting the opposite view, submitted by the respondent, that only the Senate has the power to judge the elections and returns of a senatorial election, and that a State court is a fortiori precluded from doing so. The court, in fact, stated that it found no contrary holding, and the contest was denied.

The authority of each House of Congress to be the judge of the ". . . elections, returns, and qualifications of its own members" has been construed by State courts in sweeping terms. Some courts have stated that the power is "supreme." In one, a Federal court declined to enjoin a State Governor from issuing certificates of election to those who ostensibly won, pending outcome of a proceeding concerning redistricting. *Keogh* v. *Horner*, 8 F. Supp. 933, 935 (S.D. Ill. 1934). In another, the Supreme Court of Nevada granted a motion to dismiss a contest of election for U.S. Senator. *Laxalt* v. *Cannon*, 80 Nev. 588, 397 P. 2d 466, 467 (1964). Other courts have stated that the power is "exclusive." For example, in *Odegard* v. *Olson*, 264 Minn. 439, 119 N.W. 2d 717, 720 (1963), the Supreme Court of Minnesota cited Congress' "exclusive" authority as its reason for refusing to enjoin the issuance by the Minnesota secretary of state of a certificate of election to the apparent winner of a congressional seat pending the outcome of a contest. *Richardson* v. *Hare*, 381 Mich. 304, 160 N.W. 2d 883 (1968).

It may be concluded generally that whatever action a State may take under its own statutes when a congressional election is contested is "meaningless," *Richardson* v. *Hare, Supra.*, 160 N.W. 2d at 888, or "officious and nugatory." *State ex rel 25 Voters* v. *Selvig*, 179 Minn. 406 212 N.W. 604 (1927). Thus, in an overwhelming number of reported cases, state courts have refused jurisdiction, either to decide the outcome of an election contest for a congressional seat, *Burchell* v. *State Bd. of Election Comm're*, 252 Ky. 82, 68 S.W. 2d 427 (1934); *Smith* v. *Polk*, 135 Ohio St. 70, 19 N.E. 2d 281 (1939); *State ex Rel 25 Voters* v. *Selvig, Supra.*: *McLeod* v. *Kelly*, 304 Mich. 120, 7 N.W. 2d 240 (1942), or to enjoin the issuance of a certificate of election to the apparent winner during pendency of the contest. *McLeod* v. *Kelly, Supra* is typical:

This Court cannot decide any contest over a congressional seat so as to bind the House of Representatives to accept the result. *Id.*, 7 N.W. 2d at 242.

That court particularly could not see the need even for the State to continue with proceedings in furtherance of a contest:

Assuming that the State board might be directed to take testimony, or that this court should (as suggested by oral argument and supplemental brief) take testimony as to the disptued facts, to do so would not determine the result of the election. The final decision rests with the House of Representatives in Congress. We see no desirable result to be accomplished by taking testimony, comparable to the delay in representation in Congress from the 13th District, for an indefinite period of time. United States statutes provide an adequate method for contesting an election to the House of Representatives, and for taking testimony before a congressional committee. *Id.*, at 243.

V

Federal courts have not frequently considered questions concerning the validity of election contests in State forums for congressional elections. But in a proceeding in which the petitioner claimed a congressional election to be void for failure of the State legislature to redistrict in compliance with Federal law, a district court found no authority which would support its restraining the State Governor from issuing certificates of election to those elected as Congressmen. *Keogh* v. *Horner, supra.* Another district court refused to enjoin county auditors from unlocking ballot boxes and voting machines prior to the State canvassing board finally determining the winner of a congressional seat. *Peterson* v. *Sears*, 238 F. Supp. 12 (N.D. Iowa 1964). The Court cited lack of jurisdiction to take any action, such jurisdiction being vested exclusively in Congress. *Id.* Other Federal court cases have cited the exclusive jurisdiction of the Congress to determine the elections and qualifications of its Members in refusing to entertain actions in quo warranto to determine the right of an elected representative to his seat. *Application of James*, 241 F. Supp. 858 (S.D.N.Y. 1965), or to enjoin the canvass of returns in a congressional election. *Manion* v. *Holtzman*, 379 F. 2d 843 (7th Cir. 1967), certiorari denied, 389 U.S. 976.

The foregoing reluctance of Federal courts to take any action with regard to a Federal election, once ballots have been cast, suggests that the more expeditious procedure to quash a contest of an election for a congressional seat in a State forum is a motion in the State court to dismiss, rather than a petition in Federal court for an injunction.

Furthermore, in the usual case in State court involving a judicial issue a Federal court is confronted with the prohibition of 28 U.S.C. 2281 prohibiting a Federal court from enjoining State court processing except in a few specific instances. This also is one explanation for the fact that some cases invalidly invoking State court jurisdiction in election contest situations have been permitted to run on. The other explanation is that Congress is reluctant to invoke court powers in matters in which it is the exclusive judge—as in impeachment, explusion, and qualification cases. The State court action is a nullity anyway.

VI

If a State possesses a statutory recount procedure in congressional elections, and that procedure has been completed, no further proceedings incidental to an election contest in a congressional election may proceed in State court.

Regarding further the power of the States under article I, section 4, to regulate the times, places, and manner of holding congressional elections, it is significant that, though the Congress retains the power to make or alter such regulations, it has not enacted recount procedures. But it has enacted a statute providing for procedures for contests of elections for the House of Representatives. This is consonant with the constitutional interpretation that though Congress has left to the State all election procedures, including the recount—under article I, section 4—it has jealously protected its sole authority under article I, section 5, to deal exclusively in the field of election contests. Thus, the Constitution has given to each House the exclusive and final authority to deal with election contests and Congress has entered and fully occupied the field by its own election contest procedure. Correspondingly the States are totally preempted in the area covered by article I, section 5.

GAMMAGE-PAUL ELECTION CONTEST IN TEXAS

(Mr. WIGGINS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WIGGINS. Mr. Speaker and Members of the House, the colloquy which just

occurred relates to the election contest pending before the Committee on House Administration involving our colleague, the gentleman from Texas (Mr. GAMMAGE) and our former colleague, the gentleman from Texas, Mr. Paul.

The gentleman from Pennsylvania (Mr. DENT), who just spoke, is the former chairman of the Subcommittee on Elections and his views with respect to policy and law are important and are to be respected. I am the ranking Republican member of that subcommittee, and I would like to think that my views also are entitled to some weight.

Mr. Speaker, let there be no mistake that the views expressed by the gentleman from Pennsylvania (Mr. DENT) are his own and do not reflect the considered views of the subcommittee, of the full committee, or of the House of Representatives. On the contrary, they are the personal opinions of Mr. DENT with which I expressly and specifically disagree. Let me explain the reasons for my disagreement in greater detail.

Mr. Speaker, on Tuesday, all Members-elect for whom a certificate of election had been received by the Clerk were administered the oath of office. The oath was, in each case, administered without condition; however, under the precedents of the House, the seating of a Member unconditionally does not defeat the jurisdiction of either the House or other appropriate bodies to consider pending election contests.

I

Pursuant to the Federal Election Contest Act, 2 U.S.C. 381 et seq., election contests have been duly filed and are pending with respect to the gentleman from Florida (Mr. KELLY), the gentleman from Michigan (Mr. PURSELL), the gentleman from Illinois (Mr. MIKVA), the gentleman from Texas (Mr. GAMMAGE), and the gentleman from California (Mr. LEGGETT). In addition, two petitions in the nature of election contests have been filed with respect to the gentleman from Missouri (Mr. CLAY) and the gentleman from Louisiana (Mr. TONRY). The seating of each such Member, although unconditional in form, is in fact subject to the condition that the contest filed against him be resolved in his favor. Under the precedents, the certificate of election in proper form is treated only as a prima facie showing of a right to be seated. The seating of a Member pursuant to that prima facie showing may later be rejected, and the seated Member denied his seat, if the challenge to his election or qualifications is sustained by a majority vote.

The conditional nature of the seating of a Member against whom a contest has been properly lodged is unaffected by the lack of objection to the seating of such a Member at the time the oath is administered. Under the precedents, any member-elect may object to the seating of another. Customarily, the person challenged stands aside temporarily. The challenge serves no purpose other than to alert the House that a question exists with respect to the elections, returns, or qualifications of a Member-elect. The unconditional and immediate seating of a Member, following a request that he stand aside, has no effect upon the ultimate resolution by the House of the challenge to his seating.

We have provided by law that the process of contesting an election is commenced by the filing of a formal contest pursuant to the contest statute and is terminated upon the final resolution of that contest by the House. Intervening requests that a Member stand aside, or the seating of a Member based upon the prima facie sufficiency of his election certificate, are not a part of that process.

All of the foregoing is unquestionably established by our precedents.

In the 75th Congress, a certificate of election was filed with respect to the Member-elect from New Hampshire, Mr. Jenks. Mr. Jenks was requested to stand aside and the oath was administered to all other Members-elect. Immediately thereafter, a resolution was offered permitting Mr. Jenks to take the oath of office. It was unconditional in form. The resolution was agreed to without debate, and Mr. Jenks was seated. The House thereupon authorized an investigation of Mr. Jenks' election. The investigating committee ultimately recommended that Mr. Jenks be denied his seat and that his election opponent, Mr. Roy, be seated in his stead. The House accepted the recommendations of its committee by a majority vote.

The Jenks precedent unquestionably stands for the proposition that the unconditional seating of a Member does not bar the resolution of a challenge to his election, and, if appropriate, the awarding of his seat to the challenger.

II

Judicial precedents recognize the propriety of State proceedings incidental to an election contest of a Member of Congress.

Article I, section 5 of the Constitution is clear that—

> Each House shall be the judge of the elections, returns, and qualifications of its own Members.

It is equally clear that unless Congress acts, article I, section 4 grants to the States the power to regulate the "times, places, and manner" of holding elections for Representatives.

In speaking of the breadth of this State power to regulate congressional elections, the Supreme Court has said that—

> It cannot be doubted that these comprehensive words embrace authority to provide a complete code for congressional elections, not only as to time and places, but in relation to notices, registration, supervision of voting, protection of voters, prevention of fraud and corrupt practice, counting of votes, duties of inspectors, canvassers, and making and publication of election returns; in short, to enact the numerous requirements as to procedure and safeguards which experience has shown are necessary in order to enforce the fundamental right involved. *Smiley* v. *Holm*, 285 US 355, 366 (1932).

More recently, the Court spoke to the relationship between section 4 and section 5 of article I in an opinion holding that Indiana recount procedures did not interfere with the ultimate authority of the Senate to be the judge of its Members.

> It is true that a State's verification of the accuracy of election results pursuant to its Article I, Section 4 powers is not totally separable from the Senate power to judge elections and returns. But a recount can be said to "usurp" the Senate's function only if it frustrates the Senate's ability to make an independent final judgment. *Roudebush* v. *Hartke*, 405 US 16, 25 (1972).

The House, of course, possesses the ultimate power under the Constitution to be the final judge of the elections, returns, and qualifications of its own Members. But it has traditionally yielded to the States the right to enact procedures for the election of its Members, and to make preliminary factual and legal determinations as to whether those procedures have been met. This is a rule of comity, based on practical necessity.

This House is ill-equipped to recount ballots or to determine the sufficiency of thousands of challenged voters or the ballots cast by them. The role of the House is not usurped or frustrated by such State proceedings. Quite to the contrary, they assist us in the discharge of our ultimate responsibility. Thus, so long as State procedures exist for doing so, it has been the policy of this House to permit such challenges to be initiated and processed at the State level, subject always, of course, to the ultimate power of this body to make an independent final judgment as to the challenged election.

Since such preliminary State proceedings are unquestionably proper, it follows that the unconditional seating of a Member based upon the prima facie force of his election certificate in no way ousts a State of its jurisdiction in such proceedings. The seating of a Member who is the subject of a challenge is not a final act. Those procedures incidental and preliminary to a final resolution of the controversy, including State proceedings where appropriate, must necessarily proceed unabated if the policy of comity and the reasons for it are to be respected.

It is because of the settled posture of the law and the House precedents, and because of my unwillingness to mar the ceremonial nature of the occasion, that no request to stand aside was made with respect to any Member-elect against whom a contest is pending.

III

Moments ago, the gentleman from Texas (Mr. ECKHARDT) and the gentleman from Pennsylvania (Mr. DENT) engaged in a colloquy with respect to the Paul-Gammage contest in Texas. The purpose of that exchange was to influence proceedings now pending before a Texas State court. Quite apart from the propriety of the colloquy, or the weight to be given expressions of opinion by those whose partisan interests are manifest, it must be observed that the views expressed are simply wrong.

Let me restate the law so as to correct any misconceptions which may exist:

The House has jurisdiction to resolve contests concerning the election of its Members. That jurisdiction is not exclusive, but it may be characterized as "ultimate and final." States also have concurrent jurisdiction to hear and resolve disputes concerning the election of House Members which may be exercised in a manner compatible with the ultimate jurisdiction of the House. Since the jurisdiction of the House is superior to that of a State, the House may, if it wishes,

assert its superior jurisdiction to the exclusion of a State's claim of jurisdiction. It seldom does so, however, for those policy reasons stated earlier. Because of the historic reluctance to interfere with ongoing State proceedings in this area, Federal preemption should only be found when it is expressly asserted or can be implied unmistakably from the affirmative acts of the House.

Without question, the Texas court in the Paul-Gammage case has jurisdiction. Whether it should retain that jurisdiction is for the Texas court to decide.

Also, without question, the House has jurisdiction of the election contest. It has not yet asserted the primacy of its jurisdiction and I suggest to my House colleagues that it would be especially inappropriate in this case to do so. The matters of fact in dispute will require extensive discovery proceedings. The legal issues involve questions of State law. Both the factual and legal questions should be resolved in an atmosphere of due process, free of partisan influences. The State court of Texas is a far better forum for the resolution of these questions than the House of Representatives.

RECESS

The SPEAKER. The Chair wishes to make a statement.

The Chair desires deferment of unanimous-consent requests and also 1-minute speeches until after the formal ceremony of the day, which is the counting of the electoral votes for President and Vice President. Therefore, pursuant to the order adopted on Tuesday, January 4, 1976, the Chair declares the House in recess until approximately 12:55 p.m.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 12 o'clock and 55 minutes p.m.

COUNTING ELECTORAL VOTES—JOINT SESSION OF THE HOUSE AND SENATE HELD PURSUANT TO THE PROVISIONS OF SENATE CONCURRENT RESOLUTION 1

At 12 o'clock and 55 minutes p.m., the Doorkeeper, the Honorable James T. Molloy, announced the Vice President and the Senate of the United States.

The Senate entered the Hall of the House of Representatives, headed by the Vice President and the Secretary of the Senate, the Members and officers of the House rising to receive them.

The Vice President took his seat as the Presiding Officer of the joint convention of the two Houses, the Speaker of the House occupying the chair on his left.

The joint session was called to order by the Vice President.

The VICE PRESIDENT. Mr. Speaker, Members of the Congress, the Senate and the House of Representatives, pursuant to the requirements of the Constitution and the laws of the United States, have met in joint session for the purpose of opening the certificates and ascertaining and counting the votes of the electors of the several States for President and Vice President.

Under well-established precedents, unless a motion shall be made in any case, the reading of the formal portions of the certificates will be dispensed with. After ascertainment has been made that the certificates are authentic and correct in form, the tellers will count and make a list of the votes cast by the electors of the several States.

The tellers on the part of the two Houses will take their respective places at the Clerk's desk.

The tellers, Mr. CANNON and Mr. HATFIELD on the part of the Senate, and Mr. DENT and Mr. DICKINSON on the part of the House, took their places at the desk.

The VICE PRESIDENT. The Chair will now hand to the tellers the certificates of the electors for President and Vice President of the State of Alabama, and they will count and make a list of the votes cast by that State.

Mr. DICKINSON (one of the tellers). Mr. President, the certificate of the electoral vote of the State of Alabama seems to be regular in form and authentic, and it appears therefrom that Jimmy Carter of the State of Georgia received nine votes for President, and WALTER F. MONDALE of the State of Minnesota received nine votes for Vice President.

The VICE PRESIDENT. There being no objection, the Chair will omit in further procedure the formal statement just made for the State of Alabama, and we will open the certificates in alphabetical order and pass to the tellers the certificates showing the vote of the electors in each State; and the tellers will then read, count, and announce the result in each State as was done in the case of the State of Alabama.

Is there objection?

The Chair hears no objection.

There was no objection.

The tellers then proceeded to read, count, and announce, as was done in the case of the State of Alabama, the electoral votes of the several States in alphabetical order.

The VICE PRESIDENT. Gentlemen and gentlewomen of the Congress, the certificates of all of the States have now been opened and read, and the tellers will make the final ascertainment of the results and deliver the same to the Vice President.

The tellers delivered to the Vice President the following statement of the results:

The undersigned, Howard W. Cannon and Mark O. Hatfield, tellers on the part of the Senate, John H. Dent and William L. Dickinson, tellers on the part of the House of Representatives, report the following as the result of the ascertainment and counting of the electoral vote for President and Vice President of the United States for the term beginning on the twentieth day of January, nineteen hundred and seventy-seven.

States	Electoral votes of each State	For President: Jimmy Carter	For President: Gerald R. Ford	For President: Ronald Reagan	For Vice President: Walter F. Mondale	For Vice President: Robert Dole

Total	538	297	240	1	297	241

HOWARD W. CANNON,
MARK O. HATFIELD,
Tellers on the part of the Senate.
JOHN H. DENT,
WILLIAM L. DICKINSON,
Tellers on the part of the House of Representatives.

The state of the vote for President of the United States, as delivered to the President of the Senate, is as follows:

The whole number of the electors appointed to vote for President of the United States is 538, of which a majority is 270.

Jimmy Carter, of the State of Georgia, has received for President of the United States 297 votes;

Gerald R. Ford, of the State of Michigan, has received 240 votes;

Ronald Reagan, of the State of California, has received 1 vote.

The state of the vote for Vice President of the United States, as delivered to the President of the Senate, is as follows:

The whole number of the electors appointed to vote for Vice President of the United States is 538, of which a majority is 270.

Walter F. Mondale, of the State of Minnesota, has received for Vice President of the United States 297 votes;

Robert Dole, of the State of Kansas, has received 241 votes;

This announcement of the state of the vote by the President of the Senate shall be deemed a sufficient declaration of the persons elected President and Vice President of the United States, each for the term beginning on the twentieth day of January, nineteen hundred and seventy-seven, and shall be entered, together with a list of the votes, on the Journals of the Senate and House of Representatives.

The VICE PRESIDENT. The state of the vote for President of the United States, as delivered to the President of the Senate, is as follows:

The whole number of the electors appointed to vote for President of the United States is 538, of which a majority is 270.

Gov. Jimmy Carter, of the State of Georgia, has received for the Presidency of the United States 297 votes;

President Gerald R. Ford, of the State of Michigan, has received 240 votes; and

Gov. Ronald Reagan, of the State of California, has received 1 vote.

The state of the vote for the Vice Presidency of the United States, as delivered to the President of the Senate, is as follows:

The whole number of the electors appointed to vote for Vice President of the United States is 538, of which a majority is 270.

Senator WALTER F. MONDALE, of the State of Minnesota, has received for Vice President of the United States 297 votes; and

Senator ROBERT DOLE, of the State of Kansas, has received 241 votes.

This announcement of the state of the vote by the President of the Senate shall be deemed a sufficient declaration of the persons elected President and Vice President of the United States, each for the term beginning on the 20th day of January, 1977, and shall be entered, together with a list of the votes, on the Journals of the Senate and the House of Representatives.

Members of the Congress, the purpose for which the joint session of the two Houses of Congress has been called, pursuant to Senate Concurrent Resolution 1, 95th Congress, having been accomplished, the Chair declares the joint session dissolved.

(Thereupon, at 1 o'clock and 34 minutes p.m., the joint session of the two Houses of Congress was dissolved.)

The House was called to order by the Speaker.

The SPEAKER. Pursuant to Senate Concurrent Resolution 1, the Chair directs that the electoral votes be spread at large upon the Journal.

LEGISLATIVE PROGRAM FOR BALANCE OF THIS WEEK AND FOR NEXT WEEK

(Mr. RHODES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RHODES. Mr. Speaker, I take this time to inquire of the distinguished majority leader as to the program for the balance of this week.

Mr. WRIGHT. Mr. Speaker, if the gentleman will yield, there is no further legislative business for today or for the balance of this week.

The program of the House of Representatives for next week is as follows:

On Monday the House will meet at noon. It would be a day for suspensions, but there are no bills.

On Tuesday the House will meet at noon. We have one suspension scheduled, House Resolution 9, Reestablishing the Committee on Assassinations, and a second resolution of the House, heretofore unnumbered, which would call for the election of the members of the Committee on the Budget.

On Wednesday, the House again will meet, but not until 8 p.m.

The purpose of that being a joint session of the two Houses to hear the state of the Union address by President Ford.

Thursday and the balance of the week, the House would meet at 11 a.m. There is no legislative business of which I personally have notice, except that I should advise the gentleman from Arizona and the other Members that if the question of gasoline decontrol should be prime for consideration, it would be scheduled; but all Members would be notified in sufficient time.

Beyond that, Mr. Speaker, any further program will be announced later.

Mr. RHODES. Mr. Speaker, I thank the gentleman.

DISPENSING WITH BUSINESS IN ORDER UNDER THE CALENDAR WEDNESDAY RULE ON WEDNESDAY NEXT

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule may be dispensed with on Wednesday next.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

ADJOURNMENT TO MONDAY, JANUARY 10, 1977

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

ADJOURNMENT OF HOUSE ON TUESDAY UNTIL 8 P.M. WEDNESDAY, JANUARY 12, 1977

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns on Tuesday, January 11, 1977, that it adjourn to meet at 8 p.m. on Wednesday, January 12, 1977, to hear the state of the Union address by President Ford.

THE SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

HOUSE WORK SCHEDULE FOR 1977

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that I may be permitted to insert in the RECORD at this point the House schedule for 1977.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The House schedule for 1977 is as follows:

HOUSE SCHEDULE FOR 1977

January 5–February 9: Washington work period: organize House, organize committees, begin hearings on authorization and appropriations bills.

January 17: Receive President's budget.

January 20: Inauguration.

February 10–15: District work period.

(February 12—Lincoln's Birthday.)

February 16–April 6: Washington work period: continue hearings and action on legislation.

March 15: Report by all committees to Budget Committee on projections for fiscal year 1978.

April 1: Congressional Budget Office reports to Budget Committee.

April 7–17: District work period.

(April 10: Easter Sunday.)

April 15: Deadline for Budget Committee report of first budget resolution.

April 18–May 26: Washington work period: finish hearings and mark-ups in authorizing committees for fiscal year 1978 and in appropriations subcommittees, report all new authorizations by May 15.

May 15: Complete action on first budget resolution.

May 16–26: Consider authorizations on the Floor and begin full committee markup for appropriations bills.

May 27–May 31: District work period.

(May 30: Memorial Day.)

June 1–June 30: Washington work period: consider appropriations, bills and authorizations.

July 1–July 9: District work period.

(July 4: Independence Day.)

July 10–August 5: Washington work period: complete appropriations and authorizations as well as other legislation.

August 6–September 6: August recess as provided for in Legislative Reorganization Act of 1970. District business; travel, domestic and foreign; member and family vacation.

(September 5: Labor Day.)

September 7–October 7: Washington work period.

September 12: All spending measures finalized.

September 15: Complete action on second budget resolution.

September 23: Reconciliation resolution completed.

October 1: Fiscal year 1978 begins.

October 8–14: District work period.

(October 10: Columbus Day.)

October 15–November 18: Washington work period.

(October 24: Veterans Day holiday.)

November 19–28: District work period.
(November 24: Thanksgiving Day.)
November 29–December 10: Washington work period.

FLOOR PRIVILEGES OF FORMER MEMBERS AND OFFICERS OF THE HOUSE OF REPRESENTATIVES

The SPEAKER. The Chair will insert at this point in the RECORD a statement covering the floor privileges of former Members and officers of the House of Representatives, in order that former Members and officers of the House of Representatives will be aware of the floor privileges accorded to them:

FLOOR PRIVILEGES OF FORMER MEMBERS AND OFFICERS OF THE HOUSE OF REPRESENTATIVES

1. Former Members and Officers of the House shall be entitled to the privilege of admission to the floor of the House only if they do not have a direct personal or pecuniary interest, as determined by the Speaker, in any legislative measure pending before the House or reported by any committee of the House and only if they are not in the employ of, or do not represent, as determined by the Speaker, any party or organization for the purpose of influencing, directly or indirectly, the passage, defeat, or amendment of any legislative measure pending before the House, reported by any committee of the House or under consideration in any of its committees or subcommittees.

2. Former Members and Officers of the House shall enter the Chamber through the Lobby Doors and shall furnish adequate identification to the doormen. Each former Member and Officer shall be furnished with a copy of these regulations, and with a copy of the proposed House schedule for that day. It is the responsibility of the former Member or Officer to personally ascertain that there is no measure pending in a committee or subcommittee that would prevent his access to the floor under this rule.

3. For the purposes of clause 3 of Rule XXXII, legislative measures under consideration in committees and subcommittees shall be those bills and resolutions which either (1) have been called up for consideration in a proper meeting of the full committee or of a subcommittee thereof, or (2) have been the subject of a proper hearing of the full committee or of a subcommittee thereof, whichever first occurs. A measure shall not be deemed under consideration if the committee or subcommittee has finally disposed of the bill or resolution adversely.

4. The provisions of (a) above shall not apply to former Members who are entitled to the privilege of the floor in another capacity under Rule XXXII.

ELECTORAL COLLEGE REFORM

(Mr. McCLORY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCLORY. Mr. Speaker, today has been set aside as the day on which the Congress complies with the requirements of the 12th amendment to the Constitution. Earlier, during the session—as we do every 4 years—the President of the Senate, in the presence of the Senate and the House of Representatives, opens and counts the votes cast by the members of the electoral college.

After witnessing this process once again, it seems to me most appropriate to introduce an amendment to our Constitution which would reform once and for all an outdated and unpopular system of electing a President and Vice President of the United States.

During the first session of the 91st Congress, my colleagues and I on the Judiciary Committee participated in an extensive series of hearings which examined over 50 joint resolutions proposing some alteration in the current method of electing a President and Vice President. With only six members dissenting, the Judiciary Committee reported a joint resolution to the House which was passed in September 1969, by a vote of 339 to 70. Unfortunately, the Senate failed to act on the House-passed constitutional amendment during that Congress. Since that time, the only interest in electoral college reform in Congress was exhibited by the Senate Subcommittee on Constitutional Amendments. During the 94th Congress, this subcommittee, by unanimous vote, reported Senate Joint Resolution 1 to the full Senate Judiciary Committee. No further action on the proposed amendment was taken during the last Congress.

In no less than 14 Presidential elections, we have failed to elect a President who received 50 percent of the popular vote. In 11 of these instances, the candidate who received a plurality of the popular vote did, in fact, obtain a majority of the electoral college vote. More significant, however, are the remaining three cases which resulted in the election of a "minority" President—a candidate who received a smaller number of the popular votes than his closest opponent.

In 1824, the House of Representatives elected John Quincy Adams although Andrew Jackson received more electoral and more popular votes.

In 1876, Rutherford B. Hayes received 250,000 less popular votes than Samuel J. Tilden. After a Congressional Electoral Commission settled several contested returns, Hayes emerged the victor by one electoral vote.

The third example of the election of a minority President occurred during the 1888 Presidential election. Although the incumbent, Grover Cleveland, recorded a 100,000 vote plurality over his closest opponent, Benjamin Harrison, Harrison was elected President with 65 more electoral votes.

There are three primary goals which have prompted me to submit to the House of Representatives this joint resolution. First, the proposed joint resolution will eliminate the problem of the "faithless elector"—a member of the electoral college who does not cast his vote in accord with the results of popular vote in his particular State. Both in 1960 and in 1968, one elector cast his ballot in this manner. Indeed, here today we have found that one elector has proven to be unfaithful to the people he was chosen to represent and has cast his ballot for a candidate who did not receive a majority of the votes in his State.

The evidence is clear that when the Founding Fathers framed our Constitution the intent was that the Presidential electors be selected from a group of the Nation's leaders. By 1826, however, the Congress noted that the electors "have degenerated into mere agents, in a case which requires no agency, and where the agent must be useless, if he is faithful, and dangerous, if he is not." In any event, I suspect that very few people could name the Presidential electors selected by their respective States.

Second, this proposed constitutional amendment provides that 35 per centum of the popular vote will be sufficient for election of the President and Vice President if this figure constitutes a plurality of the total votes cast. If no ticket receives 35 percent of the total votes cast, a runoff election between the two sets of candidates with the most popular votes will result. During the 91st Congress, I supported this 35-percent figure; however, the House adopted 40 percent. My reasons for support of the lower figure are the same today as they were at that time. A general runoff election subsequent to a general popular election of a President should be avoided if possible. Those who have studied this issue report that the 35-percent figure in lieu of the 40 percent of the popular vote could reduce the possibility of a runoff election from 1 in 100 to 1 in 1,000. In addition to the added expense and delay, a runoff election could easily promote to victory the candidate who finished second in the general election.

Finally, it is the intent of this joint resolution to reform the system to insure that the electoral outcome more closely reflects the results of the popular vote. The results of a direct election, as provided for in the resolution, would reflect more accurately the preference of the voters. For example, Franklin Roosevelt in 1936 won 60 percent of the popular vote, but recorded 98 percent of the electoral votes by winning all the States except Vermont and Maine. While this procedure would certainly eliminate the appearance of a landslide victory, the problem of "minority" Presidents would be alleviated as well. In addition to the cases cited above, it should be pointed out that if in the recent Presidential election—or any future such elections—one of the candidates should receive a plurality of 5 million or more votes—and yet should lose to another candidate who receives a majority of the votes in the electoral college—I fear that the Nation would face a grave crisis. The evidence shows that both the people and the Congress support reform. I urge my colleagues and the new administration to think seriously about acting to erase the grave possibility that these concerns will be with us again during the 1980 election. The time to act is now—with decisiveness—and finality.

SHOULD WE CONTINUE THE ASSASSINATION COMMITTEE?

The SPEAKER. Under a previous order of the House, the gentleman from Maryland (Mr. BAUMANN) is recognized for 15 minutes.

Mr. BAUMAN. Mr. Speaker, on last Tuesday, January 4, 1977, I objected to a unanimous-consent request to consider a resolution which would have extended for 3 months the powers and life of the Select Committee on Assassinations. This

select committee was created by the House on September 17, 1975, by a vote of 280 in favor to 84 against. I was one of those who supported the creation of the select committee at that time.

I am well aware that most polls show that a majority of Americans do not believe all the findings of the Warren Commission. I know, as most Members do, that substantial questions remain about the Kennedy assassination, and about the assassination of Dr. Martin Luther King. These questions should be properly resolved.

It was my impression that the Select Committee on Assassinations as described in debate on September 17 was to conduct a full and fair investigation into these two tragic deaths. The end result was to be a definitive report or series of reports which would lay to rest the many questions that remain. Obviously such an undertaking requires a very careful and judicious approach because of the highly controversial nature of the subject matter.

Since the time the committee was created and its chief counsel, Richard A. Sprague, was appointed, I have become increasingly apprehensive about the direction this group is taking.

First of all, Mr. Sprague, in a series of public statements, television appearances, interviews and newspaper articles, has virtually assumed the role of chairman of the committee. It is customary in the House for Members of Congress to speak for legislative or select committees, but Mr. Sprague has arrogated this role unto himself even to the point of apparently announcing policy decisions such as the direction of the investigation and the ground rules which will govern it.

At the same time, he has been constructing what I am sure he considers to be a good case for his proposal to spend more than $13 million over a 2-year period and to hire more than 170 staff members to conduct this investigation.

Mr. Speaker, I was under the impression that this investigation was going to tie up loose ends, resolve questions still remaining, and fill in the gaps of previous investigations. Now we are told by Mr. Sprague as he stated before the Republican conference last Monday, that the investigation will probably go so far as to place on trial the CIA and the FBI, and each agency's role in investigating these two deaths. In so doing, Mr. Sprague seems to assume that both of these agencies have committed wrongs and are not to be trusted in regard to this new investigation. Over the past several weeks, the public has been treated in the press to numerous sensational statements and charges from Mr. Sprague and a few members of the committee, many of them highly interesting, but most of them unsupported by any evidence. All of them seem designed to justify the continued existence of the committee.

Mr. Speaker, it is my belief that the House should know precisely what the scope of the investigation to be conducted by the Select Committee on Assassinations is to be. We should know who the new chairman is going to be, and who the members will be once the committee is reconstituted in this Congress if indeed it is. We should certainly question seriously the enormous amount of money and the size of the staff proposed. This staff and the money involved exceeds almost every other committee in the House today. It is more than was spent for the Watergate investigation or on the impeachment inquiry. And the question inevitably arises whether an investigation of such scope and magnitude is truly necessary. I have my serious doubts that it is necessary especially in view of the manner in which it has been conducted so far.

Mr. Speaker, other Members of the House have also expressed concern about the proposals that Mr. Sprague has made for the procedures which will be used in this investigation. At this point, I insert in the RECORD a letter from our colleague, the Honorable DON EDWARDS, chairman of the Subcommittee on Civil and Constitutional Rights of the Committee on the Judiciary which points out some shocking statements made by Mr. Sprague in an interview in the Los Angeles Times on December 15, 1976. I urge my colleagues to read the gentleman from California's letter carefully and consider whether this is what they wish to endorse by their votes.

The letter follows:

WASHINGTON, *D.C.*,
December 16, 1976.

Hon. THOMAS N. DOWNING,
Chairman, Select Committee on Assassinations, Rayburn House Office Building, Washington, D.C.

DEAR TOM: Recent statements to the press by staff director Richard A. Sprague raise some grave questions as to the procedures he has announced for the Select Committee's investigations. I would most respectfully like to call some of my concerns to your attention so that you might share them with your Members.

I am sure, there will be strenuous Congressional and public objection to Mr. Sprague's plans. One statement is that the Committee will, as outlined in an article in the December 15, 1976 *Los Angeles Times*, "purchase two tiny transmitters that can be hidden in the clothing of an investigator during the questioning of a potential witness. When combined with the stress evaluator, this device will permit the Committee to subject individuals to secret lie detector tests". Such procedures are, to say the least, totally inappropriate for use by a Congressional Committee. This would constitute intentional invasions of the most fundamental rights of American citizens. I believe the use of these techniques by a Committee of Congress to be wrong, immoral, and very likely illegal.

Most courts do not admit polygraph or other "truth testing" evidence. I don't believe Congress can or should adopt a lower standard than employed by the Courts to arrive at the truth.

The FBI employs polygraphs on a very limited scale, only with the subject's written consent and never for employment purposes. The CIA and NSA use the polygraph for employment screening on a completely voluntary basis. Legislation is pending in my Subcommittee to prohibit such use both in and out of government, and I am sure similar legislation will be introduced in the next session. We are currently gathering information, both legal and technical, on this unproven technique and hope to have some valid recommendations in the coming year.

For all of the above reasons, I request that very serious consideration be given by you and the Full Committee to each investigative technique to be employed by your staff. To have your work tainted by disreputable methods would be unfortunate. Can you imagine the public and Congressional outcry if the FBI were to use the investigative techniques outlined in the cited article? If your Committee cannot resolve all the issues by traditional legal and court tested methods, then so be it. The impeachment proceedings showed that our system, employing institutional safeguards and traditions, can thwart those who decide to employ unorthodox approaches to their own goals.

One other area of deep concern for me appearing in the same article is Mr. Sprague's statement that "the Committee would make public—chiefly through public hearings—the information that it develops, even if the disclosures might affect individuals or government agencies only indirectly connected to the murders."

If the above procedure is actually to be employed, it seems to me that you run the risk that innocent persons might well be subjected to criticism or worse, when they have no reasonable connection with, or involvement in, the tragedies. Further, such persons would not have those rights to relief which exist for a citizen subjected to such unwarranted vilification from other than a Committee of Congress. A Congressional Committee must set much higher standards in protecting the rights of privacy of citizens, since the protections afforded in our civil and criminal justice systems do not exist in a Congressional hearing room.

It was the intention of the House of Representatives to have the Select Committee conduct a responsible, thorough investigation of the two assassinations. And, when the investigations are completed, thoroughly documented reports should be published, informing the American people and indeed the world, of the conclusions of the Members of the Subcommittee.

It is not appropriate for staff (Mr. Sprague), to state that "his staff has discovered withheld information from the (Warren) Commission in addition to the previously disclosed situations." If the Committee has such information, it should be made available to the public by the Chairman of the Committee after Full Committee debate and approval. Veiled staff warnings that sensational disclosures are forthcoming serve only to disturb and confuse the public.

Lastly, I must respectfully suggest that from an institutional point of view, it is customary in the House of Representatives that the spokesperson for any Committee should be its Chairman or an elected Member and not one of the staff.

I am sure that with its distinguished Chairman, and Members, the Select Committee will do its important work in accordance with the highest standards of Congressional Committee conduct. I appreciate your consideration of the serious problems outlined in this letter and in the friendly, yet concerned, spirit with which they are transmitted. I hope you can provide me with the necessary assurances as soon as your schedule allows.

Kind personal regards,

Sincerely,

DON EDWARDS,
Chairman, Subcommittee on Civil and Constitutional Rights.

Mr. Speaker, we also should have full information regarding the scope of the investigation, and those who will conduct it. For those of you who did not read it, I am inserting in the RECORD at close of my remarks an article by Mr. David Burnham of the New York Times which appeared last Sunday, January 2, 1977. It details the past record of the

chief counsel of the select committee, Mr. Sprague, giving both charges made against him in a number of instances and his response to those charges. Certainly, it is not my duty to pass judgment on the charges, but it is the duty of each of us to have a full understanding of Mr. Sprague's background prior to our vote.

Mr. Speaker, next Tuesday, January 11, the majority leadership will bring up under suspension a resolution continuing the life of the Select Committee on Assassinations for 3 months. I do not believe that an issue of this seriousness should be treated under suspension where no amendments are allowed and only 20 minutes debate is permitted on each side. We were told that the new suspension procedure permitted by the amended rules would not be used for controversial matters. Certainly this is a controversial matter. The House should be allowed full debate on this matter. I know that I am receiving many complaints from taxpayers about the scope and cost of this investigation.

Last, Mr. Speaker, we should be able to consider the continuation of this committee in a more deliberate manner so that we can write restrictions on its jurisdiction and procedures, and so that we can be sure that its staff is properly selected and equipped to conduct this investigation.

I hope that my colleagues will consider these facts prior to casting their vote on this matter.

The article follows:

COUNSEL IN ASSASSINATION INQUIRY OFTEN TARGET OF CRITICISM

(By David Burnham)

WASHINGTON, January 1.—The chief counsel and director of the House committee investigating the assassinations of President Kennedy and the Rev. Dr. Martin Luther King Jr. is a former prosecutor whose judgment and actions have been subject to formal criticism on a number of occasions.

According to Representative Thomas N. Downing, chairman of the House Select Committee on Assassinations, the controversial background of Richard A. Sprague, the committee's chief counsel, was unknown to Congress when he was selected for the politically sensitive job of re-examining the conclusions of the previous investigations of the two killings.

The committee was established on Sept. 17 and Mr. Sprague's selection was announced two weeks later. Functioning for the last three months on a $150,000 budget, the committee now has a staff of 68 lawyers, investigators and technicians.

With the release yesterday of an interim reoprt describing what it called important new possible leads, Mr. Sprague and the members of the committee hope to persuade the House to provide at least $13 million for a two-year investigation by a staff of 170.

OPPOSITION TO INQUIRY

However, there is some opposition in the House of Representatives to the committee and some doubt about the need for the reinvestigation and the size of the proposed budget. Mr. Sprague's controversial record could affect the House debate over the committee's future.

Mr. Sprague won wide acclaim for his successful prosecution of the killers of Joseph A. Yablonski, the United Mine Workers insurgent leader, and his family, and for the conviction of scores of other murderers in his 18-year career in the office of the Philadelphia District Attorney.

In a two-and-a-half-hour interview in the committee's office this week, Mr. Sprague described himself as a dedicated public servant and said that most of the criticisms of him were a result of the highly tumultous nature of Pennsylvania politics.

But an examination of official reports and records and interviews with a number of Philadelphians has uncovered at least five situations in which Mr. Sprague's official and unofficial actions have been faulted by the Pennsylvania Supreme Court, the Attorney General of Pennsylvania, the Pennsylvania Crime Commission and elected officials.

Three years ago, for example, the Pennsylvania Attorney General issued a two-inch thick report on Mr. Sprague's handling of a homicide case in which the son of a good friend was involved in a dispute leading to the death of a man named John Russell Applegate.

PROBLEMS ARE CITED

"It is unfortunate that various matters were not properly pursued in 1963 immediately after the death of Applegate," the 1973 report concluded, citing unresolved conflicts in the testimony of key participants, additional witnesses who were not interviewed, an incomplete fingerprint search at the death scene and faulty lie-detector and blood tests.

A second controversial case involved a Philadelphia detective who worked as Mr. Sprague's chief investigator and who once trailed the husband of Mr. Sprague's girlfriend to what was alleged to be a motel rendezvous with another woman. The detective testified under oath in a divorce proceeding that he had undertaken the clandestine spying on his own time and without pay but at the request of Mr. Sprague.

Two years later, the Supreme Court issued a decision involving the same domestic squabble in which Mr. Sprague was said to have done in his office much of the legal work that led to the arrest for contempt of court of the same man who had been followed by the detective.

The court's 1969 decision characterized the contempt of court action that led to the arrest of this man as a "gross injustice" and said that the legal proceedings "were sorely lacking in due process."

U.S. AGENCY CRITICISM

Concerning Mr. Sprague's administrative abilities, the Citizens Crime Commission of Philadelphia made public two years ago a 60-page report on the Philadelphia prosecutors office that had been compiled by Charles Rogovin, a criminal justice consultant, under a grant from the United States Law Enforcement Assistance Administration.

"The principal impressions received during the initial review of this office were an inordinate concentration of authority in the first assistant district attorney, Mr. Sprague, a lack of necessary delegations of authority to division chiefs and very serious deficiencies in administration throughout the entire organization," Mr. Rogovin concluded.

Representative Downing, the head of the select committee, said in response to a detailed inquiry that he tended "to think that Mr. Sprague's overall qualifications minimized any indiscretions he may have made during his career."

NO BACKGROUND INVESTIGATION

Mr. Downing, a Virginia Democrat who will retire from Congress next week, acknowledged that he had never heard of the various official criticisms concerning Mr. Sprague and that Mr. Sprague had been selected as chief counsel without a background investigation.

Mr. Downing said that, based on his experience in working with Mr. Sprague over the last three months, he was convinced the former prosecutor would make "a great contribution to the committee's effort."

He said he had selected Mr. Sprague from a list of about six candidates after an interview. A number of members of the committee apparently helped in the preparation of the final list, but neither Mr. Downing nor Representative Henry B. Gonzalez, the Texas Democrat who is expected to be named the next chairman, could remember who specifically recommended Mr. Sprague.

Mark Lane, one of the leading critics of the official explanation of President Kennedy's assassination, has said that he recommended Mr. Sprague. One committee source, however, said that the Philadelphia prosecutor had been suggested by several Congressmen.

In addition to Mr. Sprague's general defense of his reputation, the former prosecutor offered detailed explanations of each of the criticisms of his actions that he contended showed the criticisms were groundless.

Concerning the criticism of his handling of the murder case involving the son of a friend, for example, Mr. Sprague argued that the alleged failure to make an adequate investigation should have been directed by the Attorney General's report at the Philadelphia police and not himself, even though he was in charge of both the individual case and the District Attorney's homicide squad.

According to the Attorney's General's report on the affair Mr. Sprague personally recommended that no charges be brought against Rocco Urella Jr. and Donald F. Scallessa, then students at LaSalle College, in the death of Mr. Applegate.

The report quoted Mr. Sprague as saying that he had handled the case at the request of Mr. Urella's father, a close friend who at that time was a captain in the Pennsylvania state police.

Louis Vignola, at the time a district magistrate, said that because he was not a lawyer he had relied on Mr. Sprague's recommendation that there was insufficient evidence to bring a murder charge in the case.

Mr. Sprague, according to the report, said that he did not believe it was improper for him to have handled this case because what the State Attorney General's report now describes as a faulty police investigation had not found any evidence that the son of his friend had contributed to Mr. Applegate's death.

DOMESTIC CASE EXPLAINED

Concerning his actions regarding the former husband of his girlfriend, Mr. Sprague said that he now understands how the use of a county detective, even if voluntary, might be subject to misunderstanding.

"Thinking of it subsequently, I don't think there was anything wrong with my action but it would have been wiser perhaps to have hired a private investigator," he said.

But Mr. Sprague defended his role in helping his friend obtain a contempt of court citation and criticized the Pennsylvania Supreme Court on the grounds that it had issued its opinion in the case without giving either him or the judge who signed the contempt citation an opportunity to make their case.

As for the report by the Citizens Crime Commission of Philadelphia, Mr. Sprague dismissed it as a substantively weak and politically motivated document whose publication had been arranged by the present Philadelphia District Attorney F. Emmett Fitzpatrick, with whom he had many disputes.

OTHER CASES IN DISPUTE

A number of other actions of Mr. Sprague have been questioned or criticized. On May 25, 1972, for example, the Philadelphia District Attorney's office charged Gregory P. Walter, one of that city's leading investigative reporters, with recording his own telephone conversations without informing the persons to whom he was talking.

Mr. Sprague, then the busy first assistant district attorney, personally handled the prosecution of Mr. Walter in the misdemeanor court. It resulted in a conviction and

a $350 file. Mr. Walter's lawyer, Gregory M. Harvey, argued that because the Philadelphia police and fire departments routinely recorded all incoming calls without informing the callers, the case appeared to represent selective enforcement of an unusual Pennsylvania law.

The case against Mr. Walter was "terminated" by agreement between his lawyer and the district attorney after it was appealed to the next court.

In an unusual disposition, the misdemeanor conviction and associated fine were "terminated" by the district attorney after Mr. Walter appealed his case.

Mr. Sprague said the decision to prosecute Mr. Walter, who was working on a major story about police corruption, was made by Arlen Specter, then the District Attorney, and that he had personally handled the prosecution in the lower court at the specific request of Mr. Specter.

Several months later, on April 19, 1973, Mr. Sprague brought a $2 million libel suit against The Philadelphia Inquirer, Mr. Walter and several other reporters and editors, for a series of articles about his handling of the Applegate murder. This action is still pending.

CRIME COMMISSION CRITICISM

During the summer of 1971, the Pennsylvania Crime Commission, controlled by the Democratic administration of Gov. Milton J. Shapp, issued a report charging widespread political corruption in Delaware County, a Republican stronghold. On Sept. 24, 1971, Stephen McEwen Jr., the Delaware County District Attorney, announced the appointment of Mr. Sprague as a special prosecutor to look into the allegations of corruption.

On June 30, 1974, the crime commission issued another report charging that "despite possessing extensive records of what appears to be systematic forced political contributions by county officials, Mr. Sprague has issued no criminal charges and has not yet even reported on the results of his investigation despite the passage of nearly three years."

Four months later, on Oct. 18, Mr. Sprague issued his own 36-page report, denouncing the crime commission for denouncing him and accusing the commission of refusing to cooperate with his investigation of Delaware County, done with the assistance of two detectives and two assistant district attorneys from Philadelphia and volunteer law students.

During his interview, Mr. Sprague said that his investigation and report on Delaware County had been delayed because he at the same time was serving as special prosecutor in the Yablonski killing and as first assistant district attorney in Philadelphia.

On Feb. 24, 1967, Paul Delahanty was found not guilty of homicide in a Philadelphia courtroom. The principal reason for the decision: a Police Department evidence expert named Agnes Bell Malatratt, who had repeatedly testified as a professional witness for the Philadelphia District Attorney's office, had been discovered to have lied about her qualifications and training.

Both Mr. Sprague and Arlen Specter, then the Philadelphia District Attorney, unsuccessfully argued that the misstatements by Mrs. Malatratt were of no importance because she was in fact an expert witness.

Even Mr. Sprague's string of convictions in the Yablonski murders has not been free from criticism. Although the special prosecutor is widely praised for dogged detective work and brilliant courtroom tactics in the long series of state and Federal trials, their expense did become an issue.

According to Frank Mascara, the newly elected comptroller in Washington County, Pa., one reason he won the Democratic primary earlier this year was his criticism of his opponent—who had held the position for 20 years—for approving the $440,000 expense of the trials.

"Sprague wasn't very careful with the money during the first trial and I raised hell about it," said Mr. Mascara in a recent interview. "They would say you can't put a price tag on justice and I would say baloney, you can have justice in a frugal manner."

Mr. Sprague, in his interview, denied that the cost of the trials was in any way extravagant and pointed out that the state ultimately had refunded most of the county's expenditure for the prosecution. He also noted that the county prosecutor who had asked him to be special prosecutor, unlike the comptroller, was re-elected. But the select committee's estimate that its investigation will cost at least $13 million has already been criticized as extravagant by several members of Congress.

"There is a price to being a public official, to being in the goldfish bowl, but it doesn't mean you have to be subject to smears and distortions," Mr. Sprague said at the end of the interview.

"I do feel the public in general does not have dedicated people serving in the public interest. But I happen to think I have been a good public servant," he said.

RECENT DISTRICT COURT DECISIONS INVOLVING THE CONSTITUTIONALITY OF OSHA SECTON 8(a) UNDER THE FOURTH AMENDMENT

The SPEAKER. Under a previous order of the House, the gentleman from Wisconsin (Mr. STEIGER) is recognized for 15 minutes.

Mr. STEIGER. Mr. Speaker, on the last business day of 1976 a three-judge Federal district court in Boise, Idaho, issued a decision purporting to declare the inspection provision of the Occupational Safety and Health Act of 1970 "unconstitutional and void in that it directly offends against the prohibitions of the Fourth Amendment" and to enjoin the Secretary of Labor "forever and permanently * * * from acting or attempting to act pursuant to or in furtherance of Section 8(a) of OSHA * * * and from conducting or attempting to conduct any general * * * inspections of the nonpublic portions of the premises of the plaintiff herein pursuant to Section 8(a)."

That decision is Barlow's against Usery; it came about when Barlow's refused to obey a previous court order to permit reasonably limited OSHA inspections "without delay" under the statute; and it appears to go far beyond other decisions on this OSHA issue. In two of those decisions, Buckeye Industries and Able Contractors, district courts in Georgia and Montana flatly rejected identical fourth amendment arguments, finding warrantless civil workplace inspections for job safety and health purposes constitutional. In two others, Gibson's Products and Hertzler, district courts in Texas and New Mexico indicated their belief that OSHA inspections without warrants based on grounds to believe safety violations were present raised fourth amendment problems, but avoided those problems by interpreting the act to require a flexible showing of "administrative probable cause" where inspection was not permitted by the employer.

Unlike Gibson's and Hertzler—which clearly permitted OSHA to continue to inspect workplaces, though creating their own difficulties—the Barlow's order appears to halt all inspections, with or without warrants or even clear proof that severe violations have occurred. In light of claims from some quarters that this decision has "repealed OSHA" or put it "out of business," I think it important to set the record straight by noting its limited effect, avoiding irresponsible actions by employers tempted by those claims.

First, it is of course true that any order restricting OSHA's ability to inspect harms safety and health enforcement, since the right to make unannounced inspections is the cornerstone of the act. But Barlow's is simply a district court order like any other. It is not the final word on the subject; it is not a pronouncement of the Supreme Court. That it came from a district court of three judges rather than a single judge does not change this fact, for it is the law that apart from their narrowly-drawn power to issue constitutional injunctions, three-judge courts have no more authority than ordinary ones. In particular, there is precedent to the effect that injunctions issued by district courts may not run beyond the geographical boundaries of their districts. And while the law is not free from doubt, that result seems supported by powerful logic where a private party seeks injunctions against the Government which might run head-on against contrary results reached by other courts of equal stature if applied beyond the issuing court's district. Without such a limit, any district court could simply nullify rulings of numerous other district or circuit courts which had passed on the same issue, merely by issuing its own order. That is the function of the Supreme Court rather than a district court; and that is precisely what the three-judge court statute was passed to prevent. Thus, it is doubtful that Barlow's affects any inspections beyond Idaho, even if it affects other Idaho employers for whom no relief was ever sought.

Second, and more importantly, because the Idaho court issued an injunction against the act on pure constitutional grounds, the Government is entitled to a direct appeal to the Supreme Court which will bypass the court of appeals and permit swift authoritative resolution of this issue. The Government may also move to suspend the Barlow's order pending Supreme Court decision, since the normal rule is that the status quo created by Congress must be preserved until the High Court decides whether the district court's order should stand. It is my understanding that the Secretary has already asked the Idaho court for such a suspension, which is normally granted in a routine manner in these types of cases. It is also my understanding that the Secretary intends, pending the Solicitor General's approval, to file an immediate appeal and expedite it for possible Supreme Court resolution this term. That appeal will suspend indefinitely the circuit court proceedings in Gibson's and Hertzler, since those courts will not decide an issue which is

before the Supreme Court. And if, as is likely, the district court's order is suspended until the High Court decides, it will have no practical effect before then. Inspections to protect employees exposed to unsafe or unhealthy working conditions will proceed, in Idaho as well as elsewhere, exactly as they have always proceeded.

In short, this decision is simply the first step in the constitutional decision process, just as on OSHA administrative law judge's decision is the first step in the act's decision process. It is equally tentative, equally subject to reversal; and it has neither erased section 8(a) nor "repealed" the statute. Practically speaking, nothing will have been decided until the Supreme Court decides. The Idaho order is merely a vehicle for Supreme Court decision; and employers would be ill-advised to act on the assumption that their obligations to afford employees safe work and workplaces have somehow been diluted or removed.

Third, it is important to note that warrantless civil inspections are both absolutely essential to this act's enforcement and a longstanding Federal practice. OSHA inspections do not depart in any degree from American custom. Identical provisions for warrantless civil inspections of business premises have been commonplace for at least the 70 years since passage of the Railroad Safety Appliance Act of 1908, and have been consistently upheld by the courts as applied to almost every aspect of American industry, including manufacture and sale of foods, pesticides, drugs and cosmetics, railroads, mining, taxation, atomic power, pollution and gun control, marine operations, use of hazardous substances, and labor standards.

When we passed this act we not only acknowledged that similar inspection authority was essential by proscribing advance notice of inspections and stating that such warnings had virtually nullified enforcement of other safety statutes. We admitted as much by unanimous action as well as words, for no bill was introduced, reported, or passed in either House which did not include such authority. The eighth circuit court of appeals has most recently summarized the legislative history, concluding that "prompt, unannounced inspections without delay" are central to OSHA's success, both to "prevent subversion of the program and encourage consistent compliance." *Usery* v. *Godfrey Brake & Supply Service* (Nov. 19, 1976). And the fact remains that any requirement which would permit employers to turn inspectors away during lengthy warrant proceedings, thus securing time to temporarily conceal or "clean up" safety and health hazards, would make this carefully-considered scheme virtually powerless to reach many injurious working conditions.

This is especially true because the effect of any employer's insistence on a warrant would rapidly multiply, since his competitors would also be forced to refuse to permit inspections. Otherwise they would be saddled with safety costs their competition could easily evade.

Thus, as one court has noted, requiring search warrants under OSHA "would serve to destroy the objects of the legislation." If Congress cannot regulate safety and health without such restrictions, it cannot really regulate at all. Given the controlling fourth amendment test of whether the means chosen by Congress are "reasonable"; the urgent Federal human and economic interest in preventing the enormous drain on this society caused by the $8 billion annual cost of workplace deaths, injuries and illnesses to nearly 3 million employees each year; and the relatively low privacy interests of employers whose workplaces are open every day to all their employees, I cannot believe the fourth amendment mandates that result.

Finally, a brief word about the quality of the Barlow's and Gibson's decisions themselves is appropriate. I do not speak to the correctness of those courts' results, which is for the Supreme Court to determine. But the reasoning, or lack of reasoning, by which those results were reached is a cause for legitimate concern. To mention just two examples, of dubious analysis, the Supreme Court cases on which the district courts chiefly relied, Camara against Municipal Court and See against Seattle, involved only municipal ordinances and expressly refused to decide whether similar fourth amendment requirements would be imposed on nationwide Federal statutes whose enforcement might be hampered by such restrictions.

Yet the district courts briefly assumed those Supreme Court cases were controlling, in the very situation the High Court said they were not. The district courts also relied on two other Supreme Court decisions, Western Alfalfa and Almeida-Sanchez, which respectively refused to extend the fourth amendment in any way to certain federally approved administrative inspections, and involved unlimited semicriminal searches very different from those under OSHA. Yet those courts neither acknowledged these significant differences nor deigned, except in the most summary way, to mention other cases restricting Almeida-Sanchez, indicating that business premises are entitled to much less fourth amendment protection than private homes, and approving identical inspections under other Federal statutes. Since especially in constitutional matters the courts' duties are to reconcile such decisions within the bounds set by existing precedent, I would hope that regardless of the eventual result, more reasoned reflection will be given this important issue when the Barlow's order is evaluated on appeal.

It is worth repeating that the Barlow's court would apparently have found section 8(a) acceptable if it required warrants based on probable cause where permission to inspect was denied by employers. But if the fourth amendment requires such restrictions despite the act's existing limitation of civil OSHA inspections to reasonable times, places, and manners directly connected to job-related hazards, it has stripped Congress of all power to effectively regulate dangers which are necessarily transient and in the main easily concealed or made order proof if a foreman is aware an inspector is about to arrive. The Constitution created a Federal Government of limited powers, but not no powers where the important right to work without being killed, maimed, or otherwise disabled is involved.

GENERAL LEAVE

Mr. STEIGER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order today, the Occupational Safety and Health Act of 1970 and the court decisions.

The SPEAKER pro tempore (Mr. DANIELSON). Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

SERIOUS QUESTIONS ABOUT ELECTORAL COLLEGE SYSTEM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. PRITCHARD) is recognized for 5 minutes.

Mr. PRITCHARD. Mr. Speaker, I would like to take this opportunity to single out a misguided action by one of the Washington State electors that highlights one of the weaknesses of the electoral college system.

This elector chose not to cast his vote for the candidate nominated by the Republican Party for President and favored by a majority of the Washington State voters in the November election. Rather, he cast his ballot for Governor Reagan. I believe this action violated the trust of the people of Washington State who cast their vote for President on November 2, and is a perversion of the electoral college system.

This action is not unprecedented in the history of the electoral college, but it again raises serious questions about the dangers and potential for abuse in the electoral college as currently constituted. At the very least, steps should be taken before the next Presidential election to bind electors to cast their ballots in accordance with the majority of the voters in each respective State.

THE FUTURE OF THE AMERICAN CITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. REUSS) is recognized for 30 minutes.

Mr. REUSS. Mr. Speaker, today I gave a talk to the National Women's Democratic Club here in Washington entitled "Does the City of the Future Have a Future?"

The text follows:

DOES THE CITY OF THE FUTURE HAVE A FUTURE?

For the American city, it may turn out to have been darkest just before the dawn.

In-migration of the rural poor to the central city is tapering off, and cities are becoming increasingly attractive to the more affluent. Financial institutions and citizen groups in many communities are working together to prevent older neighborhoods from falling into decay.

More important, the cities can expect to receive heightened attention from the fed-

eral government. President-elect Carter and the new Democratic Congress owe their mandate largely to a constituency concerned about urban joblessness and decay.

Still, all is not well. Jobs continue to move to the suburbs and beyond. Service needs of city residents and the cost of government operation increase, while the tax base erodes. Many cities face severe financial difficulties as a consequence. The fragmentation and proliferation of jurisdictions within a metropolitan area artificially separate the functional city—the entire metropolitan area—from the legal city. As a result, the substantial wealth which exists in the suburbs surrounding central cities remains unavailable and untapped.

Last September the House Banking Committee held two weeks of hearings on the future of our cities. I am personally convinced that the future of the American city is not as bleak and dreary as many have prophesied. It is within our own power—if we have the wit and the will—to see to it that the American city survives and flourishes as a viable economic enity, as a livable residential community, and as the cultural center of our civilization.

A coherent national urban policy which provides the framework for federal approaches to city problems, and for the coordination of federal, state, local, and private sector activities, ought to be a starting point for our efforts. Only with a national urban policy in place can the federal government determine how its programs in housing, transportation, regional planning, open space, public works, manpower, state/local budget support, welfare, health, education, public safety can best complement what the rest of the country is doing.

Unfortunately, such a policy does not now exist. This month the House Banking Committee will establish a new Subcommittee on the City to help develop such a naional urban policy, and to provide a focus within the House of Representatives for the consideration of overall urban concerns.

I shall discuss today the outlines of what such an urban policy might be.

If the cities do recover—and as I have noted, there are reasons for optimism—it is not likely to be because of a massive Washington-centered Marshall Plan. Instead, one can hope for a more modest urban policy representing a realistic division of labor between Washington on the one hand, and state and local governments, private citizens and institutions on the other.

Washington *will* have to assume primary responsibility for the first two goals of an urban policy—achieving full employment, and restructuring and expanding the major federal urban aid programs in health, welfare, housing, transportation, and general governmental support. But the other two goals—conserving neighborhoods, land, and energy, and creating equitable metropolitan burden-sharing—must be primarily addressed outside of Washington, though Washington can provide needed encouragement and incentives to move in the right direction.

1. JOBS

The most straightforward way to help the cities is to provide jobs. Jobless citizens not only make no contribution to a community's revenues. They add greatly to its costs for welfare, crime, and associated bills.

As a starter, we need to get rid of the dominant economic idea of the last eight years that more joblessness is the way to fight inflation. Fortunately, there is now in place a Congressional budget procedure which safeguards against fiscal recklessness. There is now also in place a Congressional monetary procedure which looks to quarterly dialogue with the Federal Reserve as a means of assuring that money and credit policy will harmonize with fiscal policy. Thus there is no longer any excuse, if there ever was, for "fighting inflation" by adding to the cities' unemployed.

Overall fiscal and monetary policy, by itself, can reduce unemployment generally. But it cannot be asked to bring full employment into central city pockets. Long before, the more prosperous parts of the country would have become overheated. Therefore, a macroeconomic overall policy must be accompanied by a microeconomic structural policy, designed to bring jobs to people where *they* are, and people to jobs where the *jobs* are.

Millions of jobless are trapped in the central cities by poverty, race, or under-education, with only bootleg economic activities available—robbery, drug-pushing, prostitution, gambling. A three-grip handle on structural unemployment is needed:

a. Bring jobs to where the people are

Blue-collar jobs have been disappearing from the central city. Convincing employers to locate in the city—or even persuading existing ones not to leave—will not be an easy task. Nonetheless, the economic importance of providing jobs for central city residents, and the social desirability of encouraging smaller, human-scale plants within walking or easy commuting distance of workers' residences, suggests that every avenue be explored.

Let me suggest some.

Recent widespread abandonment in many central cities has created acres of rubble or empty buildings. To attract plants to these areas, state and local governments could assemble the land through tax foreclosures or eminent domain, and offer local tax concessions. They could then, with federal assistance, clear the land and provide utilities and transport. The result could be a form of urban renewal without the widespread and lamentable people removal which plagued that program in the past.

Washington could help by refocusing its Economic Development Administration grants and loans on high-unemployment central cities.

Federal tax policy could help, too. At present, the investment tax credit and tax-free municipal industrial revenue bonds encourage a firm to build costly new plant and equipment in an area with no unemployment problems rather than in a central city that may have a 20 percent jobless rate. Restricting the federal tax exemption for municipal industrial revenue bonds to areas of high unemployment, and allowing a greater investment tax credit for investment in such areas, would be helpful.

White-collar jobs, as well as blue-collar, ought to be hooked up to the central city unemployed. Many of these jobs—in education, government, finance, commerce, health—will continue to be located downtown, within range of the unemployed area. Central city high schools, vocational schools, and urban colleges ought to reorient their teaching, particularly of the 3 R's, to prepare young people for these jobs. Downtown service industries should be encouraged to provide employment opportunities for their graduates, thereby providing the pot of gold at the end of the educational rainbow. Cities must have adequate and regular revenues to provide the police, sanitation workers, school-teachers, health and recreation personnel needed to improve the quality of urban life.

The federal government, too, ought to have a well-thoughtout policy of decentralizing its operations so as to provide white-collar jobs in areas of central city joblessness. After many years of trying, I finally got a Federal Reserve office for my Milwaukee district, the last big city in the country without one, and today a large part of its paper-clearing operations are conducted by people who live in the central city neighborhood. In fact, the federal government should cease building new administrative headquarters in suburban Washington and instead build them where jobs are needed, just as Paris is decentralizing its once-central bureaucracy to the provinces.

b. Bring people to where the jobs are

Jobs have been moving to suburban locations within metropolitan areas, to outlying cities, and out of the colder regions of the Northeast and Midwest states to the South and Southwest. Even if the proposals I have suggested for bringing more jobs back to central cities are successful, the eventual out-movement of jobs is likely only to be moderated, not arrested. We must devise ways to bring people to where the jobs are.

For those so-near-and-yet-so-far suburban jobs, we can attempt to improve transportation networks. Most of our public transportation systems are presently focused on moving suburban and outlying city workers inward from their homes to the downtown city areas. Greater emphasis ought to be placed on moving central city residents outward towards job concentrations in suburban industrial parks, major shopping centers, and large institutions such as hospitals and schools.

Secondly, low- and moderate-income city residents must be given increased opportunities to *live* in suburban areas close to available jobs. Obviously, the success of such an outward movement depends on a hospitable outlook by the places of destination, without discrimination in jobs or housing. This means an end to suburban zoning and land development practices which exclude working families that cannot afford expensive homes. It means more effective administration of open housing and fair employment legislation. The federal government can improve suburban behavior by more effectively conditioning community development and other grant programs on equality of access to employment and homes.

A different set of solutions will be necessary to assist those who wish to move from job-shortage central cities to far-off job-surplus regions of the country.

At present there is no national employment placement system worthy of the name. The U.S. Employment Service, by operating mainly on a state-by-state basis rather than as a national service, does little to encourage inter-regional labor mobility. In any case, it functions more as a job listing than as a job matching service. Development of an effective national computerized service, matching job openings with the skills and interests of available and interested workers, ought not to be beyond our technological and administrative capabilities.

Beyond this, the federal government can assist by providing personalized retraining programs keyed to available jobs. It can also make available relocation aid, a device which many European countries have used with great success. An obvious starting point would be to provide a direct grant for moving expenses. The federal government has properly focused a great deal of attention and effort on the relocation of Cuban and Vietnamese refugees. It should do as much for our own citizens.

c. Provide interim national service jobs

The sad truth is that it will take time for overall macroeconomic policies and structural match-people-to-jobs microeconomic policies to produce much of a dent in the 40 percent central city youth unemployment rate. The nation cannot wait.

For those unable to obtain jobs through the approaches above, there should be an interim bridge of national service jobs. This means going well beyond the present Comprehensive Employment and Training Act, and avoiding today's bureaucratic limitations of state and local governments. These national service jobs could be out in the country, like FDR's Civilian Conservation Corps, or in the city itself—rehabilitating

homes, recycling waste, renewing neighborhoods, staffing day care centers and food programs. National service jobs could offer a decent job at a living wage, train enrollees for permanent private-sector employment down the line, accomplish much needed work which would otherwise go undone, and give young people a sense of cooperative purpose. It is a far superior approach to the payment of unemployment insurance and welfare benefits.

2. RESTRUCTURING FEDERAL AIDS

Fuller employment would by itself help our cities by substituting tax-paying citizens for tax-supported citizens. But Washington, as a part of a new national urban policy, must also restructure its aid programs:

Assume the costs of welfare, Medicaid, and other programs for those unable to work, thereby relieving states—and some cities as well—of fiscal burdens they can ill afford to bear. The nation's poor should be the responsibility of the nation, not of the cities and states where they happen to be concentrated.

Equalize the real value of federal cash transfer payments, such as social security and veteran's benefits. Our present system pays the same benefits everywhere, disregarding the 10–20 percent higher cost of living in the older and colder cities. It thus both short-changes the recipient and further complicates the older cities' fiscal problems. Cash transfers ought to be equalized by upping benefits where the cost of living is higher.

Re-examine federal grants, including general revenue-sharing and block grants for community development, mass transit, and social services, to eliminate present inequities toward central cities. Too much program money now goes to communities that do not require assistance, particularly wealthy suburbs. Formulas should be changed, or perhaps subsidiary block grants adopted, to favor the neediest areas. For instance, a current criterion for general revenue-sharing grants is average per capita income. Under this, a community with many poor people is short-changed if it also has many wealthy people.

The present counter-cyclical grant program, to recompense high-unemployment communities for temporary revenue losses, should be extended.

While Washington is at it, it should greatly simplify the red tape that it now imposes on localities, relying more on post-audits than on detailed preliminary clearances.

Beyond Washington, other entities—states, counties, cities, individual citizens, neighborhood associations, profit and non-profit enterprises—have the major role to play in the third and fourth goals of a national urban policy:

3. CONSERVING NEIGHBORHOODS, LAND AND ENERGY

We must focus on a human-scale neighborhood as the basic unit in urban revival. This is what Jane Jacobs was saying in "The Death and Life of Great American Cities" 15 years ago, and her advice should at last be heeded.

With the neighborhood as the new focus of attention, low-income groups should be encouraged to develop their own economic institutions, such as neighborhood credit unions, consumer cooperatives and development corporations. And local financial institutions, always so fearful of "credit allocation", must themselves do a better job to see that a reasonable share of the nation's capital is available to these neighborhood institutions.

The cities themselves must provide the level of services—police, street lighting, trash collection, and so on—needed to sustain the neighborhood as a viable community. They also ought to re-examine their property tax burden and its deadening effect on rehabilitation. For example, raising the tax on vacant central city land, and lowering the tax on improvements, could make rehabilitation of homes and commercial establishments more attractive to owners and investors, and reduce the misuse of scarce land. Another tax device deserving wider use is the property tax circuit-breaker, now in effect in some 25 states, which shields low-income homeowners from part of the property tax burden.

Too often in the past federal programs, particularly urban renewal and construction of the interstate highway system, have destroyed existing neighborhoods. Other federal programs—FHA and water and sewer grants—have in effect encouraged movements out of viable existing urban neighborhoods to the suburbs. Washington must change its emphasis to neighborhood conservation and rehabilitation.

The new emphasis on neighborhood conservation should encourage a cooperative spirit that is beginning to show itself, here and there, on the part of the country's financial institutions. Redlining is on the run, because of the disclosure act of 1975 that requires that banks and thrift institutions disclose the neighborhoods in which they do and do not make housing loans.

But this is purely negative. On the positive side, many banks and thrift institutions are lending skilled personnel toward neighborhood conservation activities, and are forming financial pools designed to spread the risk of rehabilitating declining neighborhoods. Much of this is in response to the insistent prodding of a variety of grassroots neighborhood groups which have sprung up in cities throughout the country.

Projects like Community Organizations Acting Together (COACT) in Philadelphia, Bedford Stuyvesant Corporation and Lincoln Savings Bank in Brooklyn, Community Development Revolving Loan Fund in Cincinnati, the Baltimore Department of Housing and Community Development's rehabilitation programs in southeast Baltimore, and the Federal Home Loan Bank Board's Neighborhood Housing Services in some 25 cities, are encouraging examples of recent public-private partnerships. They should multiply, perhaps with some very light-handed federal partial coinsurance.

Conserving existing neighborhoods also conserves scarce land. So does emphasis for future housing on multi-family homes, rowhouses, garden apartments, cluster dwellings, rather than single-family detached dwellings.

Above all, we ought to be conserving energy. Thus, to reduce wasted transportation, future urban policy should encourage people to live close to their work, shopping, and cultural activities. Urban freeways have about run their course. And innovative mass transit systems like San Francisco's BART and Washington's METRO are ferociously expensive. As a starter toward a more human-scale urban design, localities ought to consider modifying single-use local zoning ordinances which now artificially separate housing from work and shopping.

4. CREATING EQUITABLE METROPOLITAN BURDEN-SHARING

A fourth goal of a new urban policy is the more efficient and equitable management of large metropolitan areas. Good examples of desirable burden-sharing are the Toronto experience in two-tier metropolitan government (a large metropolitan government for fiscal equalization, with smaller units for close-to-home administration); the Greater Twin Cities experiment (with a share of metropolitan tax revenues channeled back to localities on an equalized basis); the metropolitan-area governments of Jacksonville and Indianapolis; the city-county consolidations of Miami-Dade County, Florida, and Nashville-Davidson County, Tennessee.

This is mainly a job for the states, which are sovereign over their metropoles. Washington, however, could give a nudge toward greater equity in metropolitan fiscal arrangements. It could tailor its educational assistance programs so as to encourage states to pay a larger share of local school costs. It could condition federal general revenue-sharing with the states by requiring them to develop their own plans for equitable metropolitan burden-sharing. The governors, who have heard Jimmy Carter pronounce his opposition to general revenue-sharing with the states, might find that preparing such plans was better than losing out entirely.

Such a new urban policy is not one to be handed down by Washington; nor, for that matter, to be developed solely by the locals. The new Administration, in conjunction with the new Congress, would do well to convene soon representatives of state and local government, individual citizens, financial institutions, the unions, businesses generally, to hammer out a tentative national urban policy. For this purpose, the President should have at his side a Coordinator of Cities to make congruent what goes on in the name of cities at HUD, DOT, HEW, Labor, Treasury, Commerce, Justice. For this purpose, the Senate and House Banking Committees should transcend their traditional housing jurisdiction to become truly the city committees.

How much will such a national urban policy cost? In fact, a great deal of what needs to be done is not to do expensive new things but simply to cease doing expensive old and wrong things. If the federal government would kindly stop helping to create the unemployment and inflation which have dogged our cities; if it would forget about urban renewal programs and urban expressways which chew up neighborhoods without compensating gains; if it would revise its tax laws so as to terminate incentives for plants to move out of central cities; if it would think of job-hungry central cities as the site for some of the decentralizable federal establishment; if it would concentrate its aid programs on the needy instead of scattering largess almost everywhere—we could be off to a good start.

And whatever the amount of federal outlay involved, I am confident that it will be less than if we wait until our older and colder cities are near death before we try to revive them.

CREDIT UNION MODERNIZATION ACT OF 1977

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Rhode Island (Mr. ST GERMAIN) is recognized for 5 minutes.

Mr. ST GERMAIN. Mr. Speaker, today Chairman HENRY S. REUSS and I are jointly introducing the Credit Union Modernization Act of 1977. This legislation is introduced at the request of Credit Union National Association, a major spokesman for the more than 23,000 nonprofit cooperatives. By so doing, we reaffirm our strong support for legislation which will enable the more than 32 million Americans who belong to credit unions to take advantage of the basic tools in today's consumer financial marketplace.

Chairman REUSS and I are in virtual agreement with the central thrust of this legislation, which is to enable credit unionism to continue to grow in this increasingly competitive economic environment. It should be strongly emphasized, however, that we both share similar reservations with certain aspects of this legislation which bear upon the relation-

ship to the powers and responsibilities of other types of financial institutions, both thrift and commercial. Such matters will be thoroughly discussed when this legislation is considered by the Subcommittee on Financial Institutions Supervision, Regulation and Insurance.

We would be remiss, indeed, if we failed to mention that such legislation as the Credit Union Modernization Act of 1977, and its predecessor legislation in the 94th Congress, were the result of years of hard work by our former beloved chairman, Wright Patman. Wright Patman's efforts on behalf of credit unions were an inspiration to all of us who served with him and who joined with him in the introduction of H.R. 6074 and H.R. 7020 of the 94th Congress.

By jointly introducing the Credit Union Modernization Act of 1977, Chairman REUSS and I pay tribute to Wright Patman, "The Father of American Credit Unionism," and pledge our support to carry on his untiring efforts on behalf of more than 32 million Americans whose consumer financial needs are provided on a nonprofit basis by their credit union.

The credit union modernization package has four main goals directed to enhancing the role of the credit union in the economic life of its members, their families and the community.

First. Modernization of credit union organizational and managerial structures;

Second. Improvement of credit union abilities to meet the increasing competition in the consumer credit and savings market by authorizing powers to fully serve the contemporary financial needs of members and their families;

Third. Establishment within the National Credit Union Administration of a multitiered liquidity system for State and federally chartered credit unions; and

Fourth. Reorganization of the NCUA to increase its efficiency and effectiveness.

Modernization of the Federal Credit Union Act is long overdue. Chairman REUSS and I urge our colleagues to join us in this effort to provide credit unions with the tools to meet the consumer financial needs of today and in the future.

VOTERS SPEAK OUT STRONGLY FOR FINANCIAL DISCLOSURE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. KASTENMEIER) is recognized for 5 minutes.

Mr. KASTENMEIER. Mr. Speaker, on November 2, 1976, the voters of two States had the opportunity to express their views on the issue of financial disclosure.

The citizens of Washington State overwhelmingly voted, 822,360 to 370,461, to require statements of financial disclosure for public officials running for or appointed to State office.

In Florida, the campaign for financial disclosure was somewhat more complex. A recalcitrant State legislature thwarted Governor Askew's efforts to strengthen the State's financial disclosure requirements. Governor Askew took his case directly to the people. He led a petition drive, which gathered 219,686 signatures, to add a Sunshine amendment to the Florida Constitution requiring full and public disclosure of financial interests for public officials and candidates. On election day, Florida voters emphatically passed, 1,534,960 to 427,779, the financial disclosure proposal, thus marking the first time in Florida history that its constitution was changed directly through the citizen initiative process.

Mr. Speaker, if the question of financial disclosure was left to the citizens to decide, we surely would have such a law. In previous Congresses, the House has refused to consider financial disclosure legislation. The time has come for the House to pay attention to the wishes of the public on this issue and to pass H.R. 1, the Financial Disclosure Act.

INTERNAL REVENUE SERVICE ESTABLISHING OMBUDSMEN "HOT LINE" OFFICES THROUGHOUT THE NATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. VANIK) is recognized for 5 minutes.

Mr. VANIK. Mr. Speaker, during 1976, the Internal Revenue Service experimented with ombudsmen "Hot Line" offices in 4 of its 58 district offices—Austin, Dallas, Milwaukee, and Detroit. The Ways and Means Oversight Subcommittee staff and members visited these offices during the year and observed that they were generally able to provide improved service and taxpayer satisfaction in "difficult" cases. The IRS is now extending this "Hot Line" program to all of its 58 district offices. There will be different startup dates and different staffing characteristics among the various offices, but most of them will be operational in the very near future.

These Hot Line offices will serve taxpayers who have a particularly difficult problem—that is, they have contacted the IRS once or twice previously about a lost refund check, an improper levy, an incorrect assessment, et cetera, and have received no response. The offices will seek to cut through the red tape and delays which can occur in a large organization such as the IRS to provide quick assistance to the taxpayer who has a legitimate problem.

A group of Senators and House Members, including myself, have introduced legislation, H.R. 9599, incorporating the idea of a Hot Line office within the IRS. I am extremely pleased that the IRS is administratively taking this action to implement this major improvement in consumer services. Commissioner Donald Alexander, Assistant Commissioner Robert Terry, Acting Assistant Commissioner James Owens, Taxpayer Service Director Stan Goldberg and his staff, are all to be commended for what I believe will be a major improvement in taxpayer service.

I must add that because of the extremely tight budget situation facing the IRS in the current fiscal year, it will be very difficult for the IRS to staff adequately these new offices. The first year of this program may be a bit difficult—but the program is beginning and I believe that it will improve as the IRS budget situation improves.

The need for an ombudsmen-type office is unquestionable. In November 1976, I wrote to the various House of Representatives offices' caseworkers asking how many substantive letters they received per month complaining about problems with the IRS. Some 205 of the 435 House offices have responded. On the average, these offices appear to receive seven complaints or cases a month. Extrapolating this figure to the full House, it appears that congressional offices—not counting Senate—receive some 37,000 constituent cases per year relating to taxpayer problems with the IRS.

Some of the caseworkers provided examples of their problems with the IRS—and others complimented the IRS employees for their courtesy and cooperation. I would like to add that while my subcommittee has found many cases where taxpayers were justifiably infuriated by the nonservice they received from the IRS, on the whole, we have found the IRS and its employees to be outstanding in their dedication and public service in what is one of the most difficult jobs in the Federal Government.

It is my hope that the new ombudsmen system will help reduce drastically the need for taxpayers to turn to their Congressman for what should be the routine resolution of case problems by the IRS. The new system should help eliminate the problems described by the congressional caseworkers in some of the following quotes:

We only receive one or two a month but the comments from the constituents reveal that IRS officials are uncooperative and the most grateful letters received from constituents are from those that we helped on IRS matters. They feel that there is finally someone who can help clear the maze IRS creates unnecessarily.

We deal mainly with the Greensboro and the Memphis IRS offices, and have found that our letters are answered quickly, efficiently and promptly. About 10 IRS problems come in each month, a large part of which are audits on old accounts resulting in additional liability, or refund checks which never arrive.

The main problem I have found in dealing with the IRS is that there is no one source to go to for information, or how to locate the information. The Congressional Affairs office does not seem to be as knowledgeable as some of the other agency offices. And, after three years of dealing with the agency, I have yet to find a good source for publications. The service given by the toll-free lines does not seem to be satisfactory at all.

So, from our experience, I really don't think a consumer ombudsman would be needed, although an improved information referral system would be ideal. (I guess the consumer person could do that, though).

We really don't have any cases that have dragged out—the IRS has been very helpful in replying as quickly as possible.

In our dealings with the IRS in San Francisco, we have had a lot of difficulty with IRS personnel in their not being helpful and not returning phone calls, and in giving the taxpayers a general "run-around". However, once we contacted Mr. Francis Browitt, District Director of the IRS in San Francisco, we were finally able to get some assistance in investigating taxpayers' complaints. Ms. Betty Colby of Mr. Browitt's staff

has also been helpful in investigating complaints and responding directly to the taxpayer.

We feel that a consumer ombudsmen within the IRS would be very helpful, if they really function to aid the concerned taxpayer, and not the bureaucratic organization of the IRS itself. We would appreciate your keeping us informed of any action in this regard.

Local IRS officials refuse to give any information regarding constituent difficulty unless permission is given to them in writing. Therefore, caseworker has found it to be more expedient in resolving constituent problems by contacting the technicians in the Ogden, Utah service center. They respond as quickly as possible and always are extremely courteous. Principal complaints from constituents is that they never speak to the same individual each time they call and when they ask for the name of that individual, they are treated most rudely.

I worked on a case where a company which had filed its quarterly estimated tax, was billed an additional $.04 (*four cents*), plus penalty and interest which netted $2.67. It was incredible what the company had already gone through before contacting our office. For a principle, the constituent had protested being billed an additional 4¢, pointing out that postage and labor alone was not warranted. However, he never was able to speak to the same person twice, and only received computer print-out replies.

In reference to your letter concerning casework and complaints directed toward the Internal Revenue Service, the I.R.S. bureaucracy here in Washington certainly leaves something to be desired. I have talked to as many as fourteen different people within the I.R.S. on one particular case, without receiving a specific answer.

However, we have had great success by directing all inquiries and casework to Mr. Claude A. Kyle, Director of the Southeast Regional Office, in Memphis, Tenn. Mr. Kyle always supplies prompt and explicit replies.

The main difficulty in trying to assist constituents who are having difficulties with IRS is in getting feedback from IRS. They have taken a very strict interpretation of the Privacy Act, and supply absolutely NO information to a Congressional office in response to an inquiry.

For example, a constituent may write stating dates and amounts of payments which he has made to IRS. We write to IRS asking that they check to see which payments haven't been received. They write back to us stating that they are unable to respond to the Congressman because of the Privacy Act, but that they will respond directly to the constituent. The constituent then writes to us saying that IRS has never answered the question. We again contact IRS which informs us that the requested information has been provided to the constituent.

The need for confidentiality is indeed understandable, but IRS has carried it a bit too far! When a constituent writes, supplying figures, dates, copies of tax returns, etc., there is no reason why IRS should not be able to respond. The present procedures make it impossible for a Congressman to do anything to help a constituent who is having problems with the IRS.

WASHINGTON, D.C., *December 17, 1976.*

Hon. CHARLES VANIK,
Chairman, Oversight Subcommittee, Committee on Ways and Means, Longworth House Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: I'm pleased you are investigating the need for some kind of consumer ombudsman within the Internal Revenue Service. As indicated on the form enclosed, my office received slightly more than three cases a month of individuals who have not been able to get satisfactory assistance from IRS and asked me to intercede on their behalf.

Many of these problems relate to missing refund checks. In most cases, IRS won't reissue the check until the original is located, which sometimes takes months. I would like to see a procedure developed whereby a replacement check could be issued more quickly to regular taxpayers. If it was determined later that the taxpayer had cashed both checks, appropriate steps could be taken to collect the overpayment.

I am also concerned by the number of taxpayers required to pay a penalty for not paying income taxes quarterly when they were not aware of this requirement. I think better publicity of this provision of the tax code would be helpful.

One of the most difficult problems called to my attention is repeated auditing. Some taxpayers are selected for audit year after year. If a taxpayer is called in for the third, fourth, or fifth year straight after no problems have been found in previous audits, he or she should be able to ask to be excused from the audit unless some new question is raised by the return different from the reasons for audit in the previous years.

I think the idea of a consumer ombudsman is good. One of the problems with the taxpayer service system is that taxpayers go to the same office to pay taxes as well as to try to solve problems. They believe IRS is more concerned about collection than locating lost checks—"Once they have my money, they just ignore me. If I don't pay them on time, they come after me immediately; if they don't pay me, it takes months to get any action and I can't do anything about it."

An office devoted solely to solving problems might change that image somewhat. It could also be more responsive to questions like "Why have I been audited four years in a row?" There is usually an answer to that question, if IRS would only take the time to find out and answer it. They could also answer questions about the law and its requirements, and I would emphasize—offer to put the answer in writing, even if the question is posed over the telephone. Too many times I've heard "I did it that way because somebody at IRS told me to over the phone, and now I'm being penalized for it. No, I didn't get the name."

I'm pleased to have the opportunity to express my concerns and make suggestions. If you have any questions or need additional information, please call my chief caseworker, Barbara Mathews, in my Portland office at FTS 423-2901.

With kind regards,
Sincerely,

LES AUCOIN,
Member of Congress.

THE ELECTORAL COLLEGE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 5 minutes.

Mr. GONZALEZ. Mr. Speaker, today, the President of the Senate will, in the presence of the Senate and House of Representatives, open all certificates cast by the electors of the electoral college and the votes will be counted. The person with the greatest number of votes is elected President. This is in accordance with the 12th amendment to our Constitution.

To most people this seems like a harmless ceremonial function carried out every 4 years to fulfill the requirements of our Constitution, but if we examine the situation more closely we will see that on a number of occasions in our Nation's 200-year history Congress has placed its seal of approval on what amounts to a fraudulent election.

Today we will be asked to approve the votes cast for President by electors from the 50 States, but among these electors we have a man from the State of Washington, who chose to ignore the pledge and promise he had made the Republican Party to vote for Gerald Ford and ROBERT DOLE. He instead voted for Ronald Reagan and ROBERT DOLE and violated a good part of the Washington election.

Why he chose to cast such a vote is not important. Maybe he was seeking a footnote in history or perhaps it was his way of demonstrating the weakness of the electoral college system. The fact remains that he violated the trust placed in him by those who chose him as an elector.

Mr. Speaker, the responsibility of Congress to see that our elections are free from any form of criminal behavior does not begin and end with the laws protecting the ballot box; it goes beyond that to the election itself. And when a "faithless" elector chooses to cast his vote for someone other than the person to whom he is pledged, does he not go against the will of the people?

There have been several court cases on this very matter, but the issue still remains unsettled. In Burroughs and Cannon against U.S., the Supreme Court held that Congress has a right to protect the choice of electors from fraud or corruption. But then in Ray against Blair, the Court reasserted the conception of electors as State officers. And while the matter is still in limbo, we are again confronted with a situation where the people of the State of Washington are being deprived of a vote for President which they were led to believe existed.

How long will it be before we put on end to this fraud? Fortunately none of the self-willed electors who have broken their pledges have been able to change the outcome of a Presidential election, and statistically the chances of this happening are not great. But the question remains, is an elector not chosen by the people of his State because his judgment is known, and not because the people have confidence in his judgment?

According to many constitutional scholars, the Constitution supports the independence of these electors, but the Constitution also contemplates an honest election.

It seems to me that our present system places a serious limitation on the public will in a Presidential election and I am sure that the majority of Americans do not realize this and would certainly not support such a system if they had a choice.

I hope that this Congress will take a serious look at the present method of voting by those chosen as electors in our electoral college system and enact the reforms necessary to insure our citizens that the candidates of their choice receive the electoral votes they rightfully deserve. Let us eliminate the "faithless elector" once and for all.

RETIREMENT OF MSGR. DANIEL B. O'ROURKE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, on Sunday, October 24, I was privileged to attend a Mass in honor of Msgr. Daniel B. O'Rourke, pastor of St. Mary of the Woods parish, who retired after 45 years of compassionate service to the people of our community.

Monsignor O'Rourke is an outstanding example in our Northwest Side Chicago community of resourceful dedication to high principle for he has been the spiritual guiding light and the driving force in the growth of St. Mary of the Woods parish.

During his 45-year career of service to the people of Chicago, Monsignor Dan took a strong interest in the young people of our community and provided the leadership in organizing sports activities and other programs to provide wholesome outlets for youthful energy. Ordained into the priesthood in 1931, his first assignment was St. Agatha's Parish, where he was supervisor of the parish athletic program.

It was at this time that I first met Msgr. Dan O'Rourke and out of this meeting grew a lifelong friendship which has lasted for over 40 years. He has remained a good friend of my family over all of these years, administering to our personal needs. My wife and I were married in 1935 at St. Agatha's where he performed the marriage ceremony.

I was delighted that on October 24 a special room was set aside for his old parishioners from St. Agatha's, and I had occasion to meet a few of them. It was a tremendously impressive evening with a great turnout of people who manifested their admiration, respect, and love for Monsignor Dan.

He was also the founder of St. Bartholomew's first social club for teenagers, and as the founding pastor of the new St. Mary of the Woods Parish, he devoted his creative energy and resourceful talent over the years to the education of the parish children.

Monsignor O'Rourke was recognized by the Pope in 1963, when he was elevated to membership in the official papal household with the rank of domestic prelate, and title of right reverend monsignor.

Not only has Daniel B. O'Rourke ministered to the material needs of his flock through the building of a new church, convent, and school in the St. Mary of the Woods parish, he has ministered to his parishioners' spiritual needs as well—through his attention to their joys and to their sorrows and through his untiring efforts to lift their spirits and enthusiasm for both personal and spiritual achievement.

Indeed, the retirement tribute to him is most appropriate and I was delighted to have a part in the occasion. I congratulate Father O'Rourke on his splendid record of achievement and I extend my warmest best wishes for many more years of good health and success in his life of service.

Mr. Speaker, a priestly chronology of the career of the Right Reverend Monsignor Daniel B. O'Rourke follows:

THE RIGHT REVEREND MONSIGNOR DANIEL B. O'ROURKE, PRIESTLY CHRONOLOGY

April 11, 1931: Ordained to the Holy Priesthood by His Eminence, George Cardinal Mundelein at St. Mary of the Lake Seminary.

April 12, 1931: Offered First Mass at St. Sabina, 78th and Throop, under founding pastor, Rt. Rev. Msgr. Thomas F. Egan.

June, 1931: Appointed Curate at St. Agatha parish, Douglas Boulevard and Kedzie. Pastors were Fr. William J. Mockenhaupt and Rt. Rev. Msgr. John B. Sprengel.

January, 1933: Named Regional Director of the Catholic Youth Organization by His Excellency, Archbishop Bernard J. Sheil.

July, 1937: Appointed Curate at St. Odilo parish, Berwyn, under pastor Fr. William Roberts.

July, 1938: Appointed Curate at St. Bartholomew parish, Patterson and Lavergne, under pastor Rt. Rev. Msgr. Jeremiah P. Holley.

June, 1943: Appointed Curate at St. James parish, Maywood, under pastor Fr. James O'Shea.

June, 1944: Appointed Curate at Resurrection parish, Jackson Boulevard and Leamington. Pastors were Rt. Rev. Msgr. Michael J. Sullivan and Rt. Rev. Msgr. William J. Gorman.

July, 1952: Named founding pastor of St. Mary of the Woods; celebrated first parish Mass in temporary store-front church at 6141 Touhy Avenue.

September, 1953: Opening of parish school in present location.

December, 1953: First Mass offered in original "new" church at Midnight on Christmas Eve.

September, 1954: Solemn Dedication of parish buildings by His Eminence, Samuel Cardinal Stritch.

February, 1956: Appointed Moderator, District No. 3, Archdiocesan Council of Catholic Women.

October, 1957: Added three classrooms, music room and gymnasium to parish school.

December, 1963: Named a Domestic Prelate with title of Right Reverend Monsignor by His Holiness, Paul VI.

October, 1965: Newly remodeled St. Mary of the Woods Church opened.

October, 1966: Solemn Dedication of church by His Eminence, John Cardinal Cody.

January, 1967: Named Deputy Vicar, Vicariate No. 2, Archdiocese of Chicago.

August, 1967: Appointed Chairman, Priests' Advisory Council and Moderator of Vicariate No. 2, Archdiocesan Council of Catholic Women.

April, 1971: Parish celebration of Monsignor's 40th anniversary of ordination.

July, 1976: Named by community civic organizations as Grand Marshall of area Bicentennial Parade and festivities on July 4.

FINANCIAL DISCLOSURE BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. RODINO) is recognized for 5 minutes.

Mr. RODINO. Mr. Speaker, earlier this week. I reintroduced legislation to require financial disclosure by candidates for Federal office, Members of Congress, the President, Vice President, and other employees and officers of the Federal Government.

This bill, H.R. 9, would be a positive step toward renewing public confidence and trust in the institutions of Government and those who administer them. It is not the events of recent years that have made this bill necessary, nor even the current allegations about public officials. Rather, it is the fact that those who elect and employ us—and in whose name we serve—have every right to expect of us the fullest financial disclosure possible.

In September 1975, when I introduced similar legislation for the first time I said:

It is essential that we eliminate the possibility of conflicts of interest and establish procedures to assure our citizens that the public interest is being properly and honestly served by their elected officials and Government employees.

That statement is as applicable today as it was then, and I believe that this measure is needed to safeguard the vital public trust.

Under this bill, elected Federal officials and certain key employees of the legislative, judicial, and executive branches would be required to file financial disclosure statements with the Comptroller General. The same requirements would apply to all candidates for Federal office, both in primary and general elections.

The information filed would include the amount and source of each item of income exceeding $100; the identity of assets and liabilities of more than $1,000; any dealings in securities and commodities in excess of $1,000; any real estate transactions of more than $1,000. The income and assets of immediate family members would be subject to the same reporting requirements.

Violators of the act could be punished by prison terms and substantial fines.

BARBARA JEAN DOWNEY BAYLY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KOCH) is recognized for 10 minutes.

Mr. KOCH. Mr. Speaker, it is with great sadness that I speak about the death early this morning of a member of my staff, Barbara Jean Downey Bayly. Barbara worked for me since I came to Congress 8 years ago. She set a high standard for my office and I know that many on Capitol Hill who worked with Barbara will remember her for her warmth, friendship, and abilities.

Barbara grew up in New York City, living at Stuyvesant Town in my district, and graduated from Marymount College.

Both in health and in illness, Barbara was remarkable. She was soft spoken, but underneath had a strength and tenacity that made her unique as an individual and effective as a legislative assistant. In looking back, one has to give Barbara much credit for her very significant contribution to the enactment of the Federal Privacy Act of 1974. Barbara's fairness, patience, and persistence were invaluable in weighing all the considerations associated with the privacy legislation and in working with me and others until the last details were agreed to.

Barbara also affected the lives of many young children—although they do not know it—in her work with the children and youth and infant and maternal care legislation. Here again her persever-

ance and patience was very important in enacting legislation that enabled maternal and family health clinics across the country to continue to provide millions of infants with quality medical care.

These are just two areas in which Barbara made a significant contribution. There are many more. But, what I and others will remember most was Barbara's good humor, the twinkle in her eye, and her never-failing fairness and good judgment. We will remember her as a friend.

During the past year as Barbara's health waned because of her illness, her friends grieved. But Barbara's remarkable courage and strength that prevailed until this morning also left us marveling at how courageous and strong a human being can be.

Barbara had a commitment to the highest principles of life and religion.

I share the grief of her loss with her husband, John, her parents, William and Marion Downey, and her brother, Morgan Downey. And my heart goes out to her daughter, Anne Louise, who just celebrated her first birthday on Christmas and now has lost her mother. But Anne Louise has a remarkable mother to be remembered and to be proud of in the years to come.

Considering Barbara's exemplary life, if anyone goes to heaven, she is surely there now. We will miss Barbara, while remembering her with warmth, affection, and admiration.

TRIBUTE TO ROBERT P. WILLIAMS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. MAHON) is recognized for 5 minutes.

Mr. MAHON. Mr. Speaker, we were saddened to learn yesterday of the passing of Bob Williams, a former member of the staff of the Committee on Appropriations. Bob served on the staff from 1933 until his retirement in 1965. A graduate of the University of Notre Dame, the National Law School, and a captain in the Navy during World War II, Bob was the editor for the committee at the time of his retirement.

During his 30 years of faithful service, Bob became one of the most accomplished students of this institution that it has been my honor to encounter. He was proud of this House and our country which he loved and we are proud of his lasting contribution to the work of the Committee on Appropriations. He spent many long hours on the job, and it was not uncommon to see him carrying home his briefcase full of transcript to work on late in the evening. Bob continued his work after retirement, publishing two books, one a historical volume entitled "The First Congress" and the second "The Bulls that Redeemed Me," a historical novel centered in his native Tennessee. He was indeed a scholar.

Mr. Speaker, on behalf of the members and staff of the Committee on Appropriations, I extend heartfelt sympathy to Bob's lovely wife Helen, his son Bob, Jr., and his daughter Kate. We on the committee will always cherish the memory of his sparkling wit and intellect.

TRIBUTE TO LATE HON. LINDSAY C. WARREN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. JONES) is recognized for 5 minutes.

Mr. JONES of North Carolina. Mr. Speaker, on December 28, 1976, the Honorable Lindsay C. Warren departed this Earth. Born in December 1889, he became a political leader and power in the State of North Carolina and later assumed the same position at the national level.

Not too many Members of this House assembled here today remember Lindsay Warren, but the few that might will never forget his dedication to principle and a man of uncompromising convictions. He was elected to the U.S. House of Representatives in 1924 where he served with distinction for 16 years, and was soon recognized as a prominent Member of the House leadership. In 1940, and for 14 additional years he served as Comptroller General of the United States, and became known as the "Watchdog of the Treasury," and according to one newspaper account, forced nearly $1 billion of illegal or erroneous Federal payments back into the public till.

By any criteria he was a giant among those in the political arena of this Nation. Those of us who were fortunate enough to know him personally could not help being influenced by this association. It has been said that few men in public life have been as colorful and as exemplary in their devotion to the public's interest as was Lindsay Warren.

It would be to the lasting benefit of this Nation if each generation could produce a man with the qualities of the late Lindsay Warren.

THE HEALTH SECURITY ACT OF 1977

(Mr. CORMAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. CORMAN. Mr. Speaker, on January 4 I introduced the Health Security Act of 1977, H.R. 21, along with 69 Members of the House of Representatives. A companion bill, S. 3, will be introduced in the Senate by Senator EDWARD KENNEDY.

Cosponsoring the Health Security Act of 1977, at this crucial juncture in the enactment of a comprehensive national health insurance program, are the following Members to date: Mr. PEPPER, Mr. RANGEL, Mr. STARK, Mr. MIKVA, Mr. ADDABBO, Mr. ANDERSON of California, Mr. ANNUNZIO, Mr. BALDUS, Mr. BEARD of Rhode Island, Mr. BIAGGI, Mr. BINGHAM, Mr. BLANCHARD, Mr. BRADEMAS, Mr. BRODHEAD, Mr. PHILLIP BURTON, Mr. CARNEY, Mrs. CHISHOLM, Mr. CLAY, Mr. CONYERS, Mr. CORNELL, Mr. DIGGS, Mr. DRINAN, Mr. ECKHARDT, Mr. EDWARDS of California, Mr. EILBERG, Mr. FASCELL, Mr. FORD of Michigan, Mr. FRASER, Mr. HARRINGTON, Ms. HOLTZMAN, Mr. HOWARD, Mr. KILDEE, Mr. KOCH, Mr. LEHMAN, Mr. MCCORMACK, Mr. MCFALL, Mr. MEEDS, Mr. METCALFE, Mrs. MEYNER, Mr. MINISH, Mr. MITCHELL of Maryland, Mr. MOAKLEY, Mr. MOSS, Mr. MURPHY of New York, Mr. NIX, Mr. NOLAN, Mr. NOWAK, Mr. OBERSTAR, Mr. OTTINGER, Mr. PRICE, Mr. REUSS, Mr. RICHMOND, Mr. RODINO, Mr. ROE, Mr. ROSENTHAL, Mr. ROYBAL, Mr. ST GERMAIN, Mr. SCHEUER, Mr. SEIBERLING, Mr. SOLARZ, Mr. STOKES, Mr. STUDDS, Mr. THOMPSON, Mr. TSONGAS, Mr. UDALL, Mr. VAN DEERLIN, Mr. WEAVER, Mr. WOLFF, and Mr. ZEFERETTI.

The Health Security Act is the product of 8 years of intensive study and development by the Committee for National Health Insurance. The committee is composed of more than 100 leaders from many fields, including representatives of labor, senior citizens, church and consumer organizations, health professionals, and public officials.

The bill is based on the principle that health care should be available according to an individual's needs, not rationed according to personal finances or delivered differently according to source of payment.

To secure health care as a right, the health security program has two basic principles. One is to establish universal and comprehensive insurance coverage which provides barrier-free access to needed health services. The second is to go beyond this traditional insurance approach and make serious improvements in the availability, quality, and cost of care.

The Health Security Act was first introduced in the 91st Congress as S. 4297. The act has been introduced with refinements in both the House and Senate during each of the succeeding Congresses.

The Health Security Act of 1977 is virtually unaltered from H.R. 21 of the 94th Congress. Only one perfecting change has been made in regard to the reimbursement determination process for hospitals.

Since the Committee for National Health Insurance began in 1969, the public and congressional support for this landmark legislation has increased steadily.

This expanding support has occurred despite the lack of leadership and regressive policies of the last two administrations. When the Health Security Act was first introduced, it was foreseen that enactment might be delayed until there was a cooperative administration.

This opposition has continued almost to the present moment with the patently absurd reasoning by President Ford's Council on Wage and Price Stability that national health insurance would necessarily worsen the inflation of health costs. The Council's blanket categorization disregards the cost controls and system improvements which must be included in a program if it is to succeed.

President-elect Carter's position on national health insurance is very encouraging. The House sponsors look forward to working closely with the new administration on this issue during the 95th Congress.

It is becoming increasingly clear that bold and forceful actions must be taken to bring about a reform of our health care system. This is especially true in regard to the way we, as families or a nation, pay for health care.

Support for comprehensive national health insurance arises out of the increasing need to spend health care dollars more effectively and efficiently.

The rapid and uncontrollable increases in costs under the existing methods of delivering and paying for care have become too burdensome.

Concern about the need for cost controls has increased in proportion to the skyrocketing of health costs. This concern will become more intense since there appears to be no cause for optimism that cost increases will moderate.

The total national health expenditure in fiscal year 1976 was $139 billion. This 1976 amount is more dramatic when viewed as more than three times the expenditure level of 10 years before, yet almost one-half the amount projected to be spent just 5 years later in 1981.

In recent memory, increases in the price of medical care services have consistently outpaced the cost of living as measured by the Consumer Price Index. The difference between these two indices has widened since the end of wage-price controls in 1974. In fact, the medical care services are currently increasing almost twice as fast as the overall CPI. Even in comparison to nonmedical services, medical care services increase faster.

There was a public outcry several weeks ago when the major steel producers announced 6-percent price hikes on some of their products. Much of the concern focused on possible consumer resistance when the hikes are reflected soon in the price of major durable goods, notably automobiles.

It is ironic that similar attention and analysis did not accompany the 21-percent increase for General Motor's health insurance premiums. This increase was noteworthy because General Motors pays more to Blue Cross-Blue Shield than it does to United States Steel, its major metal supplier.

The national insurance deliberations have been sidetracked for too long by a sham argument about program cost. Instead of a serious and forthright discussion about the merits of the various legislative proposals, the American people have suffered the deceit of partial cost estimates.

A start was made during the last year to expose the myths about the cost of national health insurance. Cost comparisons among national health insurance proposals are made now on the basis of estimated total national health costs under each of the proposals. In short, better data is available than just the first year Federal budget impact of the proposals.

This modest start at valid cost estimates was made by a Congressional Budget Office analysis and an actuarial study funded by the Department of Health, Education, and Welfare.

A brief description of relevant findings from the two works is interesting.

The Congressional Budget Office prepared an analysis of fiscal year 1977 health budget options, including first and fifth year cost estimates for three major national health insurance proposals.

Three findings from the analysis are of note. First, substantial increases in health expenditures will continue with or without a national insurance program. Second, the expansion of benefits under each of the proposals would increase expenditures initially as opposed to a simple continuation of current policy. Third, the only proposal which can control costs in the long term substantially below what would be spent under current policy is the "comprehensive tax financed" approach—that is, health security.

A recent report conducted for HEW, the Trapnell study, provides the most detailed cost data available to date on six major national health insurance proposals.

The Trapnell study disputes the criticism of health security opponents that the costs of the program would be exorbitant. Instead, the health security cost is estimated to be comparable to the proposals of the American Hospital Association and the American Medical Association. Specifically, the AHA bill is rated the most expensive and the AMA proposal slightly less than health security.

Furthermore, the range of cost estimates is narrow. The cheapest proposal, "Long-Ribicoff catastrophic," is only 6 percent less than health security. Considering the breadth of health security benefits, the health security program is apparently very cost-effective.

The most interesting finding is that of the increased expenditures projected under each of the proposals, health security would use the largest share for the provision of additional services, 85 percent, and the lowest share needed for higher administrative expenses, 9 percent. In contrast, under former President Nixon's comprehensive health insurance program—CHIP—only 53 percent of the increased expenditure would be for additional services and 40 percent would be consumed by administration.

The health security proposal also fares best in terms of saving from cost controls and fiscal relief to State and local governments.

Hopefully, a comprehensive national health insurance program can be enacted which reflects the lessons of medicare and medicaid.

These programs were designed to be mechanisms for paying bills, not necessarily for securing adequate health care. As a result, these programs cannot be expected, as presently constituted, to prevent a drastic increase in the costs of medical services and to improve substantially the quality and availability of comprehensive health services.

Efforts will be made in the coming months to strengthen medicare and medicaid against fraudulent and abusive practices. Although it is important to enact fraud and abuse safeguards, such legislation will not affect the basic problems in the health care system.

The public demand for an improved system of delivering and paying for comprehensive health services is mounting. With medical costs soaring, unnecessary delays in enacting such a program only speeds the erosion of the health care dollar.

With an active Congress and a supportive President we can make the dream of Franklin Delano Roosevelt—comprehensive health insurance for all Americans—a reality in this decade.

I include the following:

SECTION-BY-SECTION ANALYSIS OF THE HEALTH SECURITY ACT

TITLE I—HEALTH SECURITY BENEFITS

Part A—Eligibility for benefits

(Sections 11–12.) Every resident of the U.S. (and every non-resident citizen when in the U.S.) will be eligible for covered services. Reciprocal and "buy in" agreements will permit the coverage of groups of non-resident aliens, and in some cases benefits to U.S. residents when visiting in other countries.

Part B—Nature and scope of benefits: covered services

(Section 21.) Every eligible person is entitled to have payments made by the Board for covered services provided within the United States by a participating provider.

(Section 22.) All necessary professional services of physicians (including preventive care) are covered wherever furnished, with one quantitative limitation. Psychiatric services to an ambulatory patient are covered without limit if the patient seeks care in the organized setting of a group practice organization, a hospital out-patient clinic, or other comprehensive mental health clinic. In these kinds of organized settings, peer review and budgetary controls can be expected to curtail unnecessary utilization.

If the patient is consulting a solo practitioner, however, there is a limit of 20 consultations per benefit period. In communities where psychiatric services are in especially short supply, the Board may prescribe referral or other nonfinancial conditions to give persons most in need of services a priority of access to solo practitioners.

(Section 23.) Comprehensive dental services (exclusive of most orthodontial) are covered for children under age 15, with the covered age group increasing by two years each year until all those under age 25 are covered. (Persons once covered remain covered for the rest of their lives). This benefit is limited initially because, even with full use of dental auxiliaries, there is insufficient manpower to provide dental benefits to the entire population. However, the Board is authorized to expand the benefits more rapidly if availability of resources warrants, and the Board is required within seven years of the effective date of the legislation to establish a timetable for phasing in benefits for the entire population. To encourage the development of groups which provide comprehensive medical and dental services or comprehensive dental services, the Board is authorized to phase in full dental benefits more rapidly for the enrollees of those groups than for the general population.

(Section 24.) In-patient and out-patient hospital services and services of a home health agency are covered for the duration of the services, and skilled nursing home services are covered for limited periods. Pathology and radiology services are specifically included as parts of institutional services, thus reversing the practice of Medicare. Domiciliary or custodial care is specifically excluded in any institution, thus necessitating the two important restrictions on payments for institutional care:

(1) Payment for skilled nursing home care is limited to 120 days per benefit period, except that this limit may be increased either when the nursing home is owned or managed by a hospital and payment for care is made through the hospital's budget or for all nursing homes affiliated with hospitals. It is not practical to assume that the majority of nursing homes and extended care facilities in the country will be able to implement effective utilization review and control plans in the first years of Health Security. The demand for essentially domiciliary or custodial care in nursing homes is so overwhelming that an initial arbitrary

limit on days of coverage is necessary. Extension of the benefit is authorized when this becomes feasible.

(2) Many state hospitals do not provide optimal active treatment to their psychiatric patients but rather maintain them in a custodial setting. If Health Security provides unlimited coverage for patients in these hospitals, it might tend to freeze the level of care instead of stimulating these institutions to upgrade their medical care performance. Therefore, the psychiatric hospital benefit is limited to 45 days of *active treatment* during a benefit period.

(Section 25.) The bill provides coverage for two categories of drug use: prescribed medicines administered to in-patients or out-patients within participating hospitals or to enrollees of comprehensive health service organizations, and drugs necessary for the treatment of specified chronic illnesses or conditions requiring long or expensive drug therapy. This will provide coverage of most drug costs for individuals who require costly drug therapy.

The bill requires the Board and the Secretary of HEW to establish two lists of approved drugs. There will be a broad list of approved medicines available for use in institutions and by comprehensive health service organizations and a more restricted list which is available for use outside such organized settings. The restricted list shall stipulate which drugs on it shall be available for treatment of each of the specified chronic diseases. No such restrictions shall be placed upon drug therapy within an institutional setting.

Use of the restricted list will meet the most costly needs for drug therapy while restraining unnecessary utilization. The benefit is more liberal where adequate control mechanisms exist.

(Section 26.) The appliances benefit is similar in concept and operation to the drug benefit, subject to a limitation on aggregate cost. The Board shall prepare lists of approved devices, appliances or equipment which it finds are important for the maintenance or restoration of health, employability or self-management (taking into consideration the reliability and cost of each item). The Board will also specify the circumstances or the frequency with which the item may be prescribed at the cost of the Health Security program.

(Section 27.) The professional services of optometrists and podiatrists are covered, subject to regulations, as are diagnostic or therapeutic services furnished by independent pathology laboratories and radiology services. The care of a psychiatric patient in a mental health day care service is covered for up to 60 days (day care benefits are unlimited if furnished by a group practice organization, by a comprehensive mental health center, or by an approved mental health day care service). Ambulance and other emergency transportation services are covered, as well as non-emergency services where (as in some sparsely settled areas) transportation is essential to overcome special difficulty of access to covered services.

Supporting services such as psychological, physiotherapy, nutrition, social work and health education are covered if they are part of institutional services or are furnished by a group practice organization, individual practice association or certain public or non-profit organizations. This establishes the important principle that these and other supporting services should be provided as part of a coordinated program of health maintenance and care. Psychologists, physical therapists, social workers, etc. will not be permitted to establish independent practices and bill the program on a fee-for-service basis. This is intended to assure that whenever services of this nature are provided they are part of an organized plan of treatment and are germane to the overall care of the patient.

In addition to services available from hospitals, mental health centers or other providers, free-standing alcohol, drug abuse, family planning and rehabilitation centers would be recognized as providers if such centers have an agreement with the Board under section 49(a), (5), (6) and (7).

(Section 28.) Health services furnished or paid for under a workmen's compensation law are not covered. Reimbursement for loss of earnings is so closely interlocked with the health services aspects of workmen's compensation that absorption of the health services portion of workmen's compensation by Health Security could have the effect of delaying findings of eligibility for income payments.

School health services are covered only to the extent provided in regulations.

The Board may exclude from coverage medical or surgical procedures which are essentially experimental in nature. Individuals who enroll in a comprehensive health service organization or enroll themselves with a primary practitioner accepting capitation payments are not entitled to seek covered services from other providers of services (except as specified in regulations). Surgery primarily for cosmetic purposes is excluded from coverage.

The services of a professional practitioner are not covered if they are furnished in a hospital which is not a participating provider. This is intended to discourage physicians from admitting patients to hospitals which cannot or will not meet standards for participation in the program.

Part C—Participating providers of services

(Section 41(a).) Participating providers are required to meet standards established in this title or by the Board under Part H relating to quality of care. In addition, they must agree to comply with such requirements as the Board finds necessary, to assure to their employees, employment rights and working conditions similar to the guarantees of other workers. In addition, they must agree to provide services without discrimination, to make no charge to the patient for any covered service, and to furnish data necessary for utilization review by professional peers, statistical studies by the Board and by the Commission on the quality of the care and verification of information for payments.

(b) A provider's participation may be terminated under procedures described in part G of the bill.

(c) If a provider is merged, consolidated or reorganized, pre-existing employment rights shall be subject to reasonable requirements by the Board for protection of employees' rights.

(Section 42 (a).) Professional practitioners licensed when the program begins are eligible to practice in the State where they are licensed. All newly licensed applicants for participation must meet national standards established by the Board in addition to those required by his State. While stopping short of creating a Federal licensure system for health professionals, this will guarantee minimum national standards. A state-licensed practitioner who meets national standards will be qualified to provide Health Security covered services in any other state. (See also Section 56(a)(1)).

(b) For purposes of this title a doctor of osteopathy is a physician, as is a dentist when performing procedures which, in generally accepted medical practice, may be performed by either a physician or a dentist.

A doctor of optometry or podiatry qualified in accordance with subsection (a) is a physician when furnishing services which are covered services in accordance with regulations issued under Section 27(a) and which he is legally qualified to furnish in the state in which he furnished them.

(Section 43.) This section establishes conditions of participation for general hospitals similar to those required by Medicare. Two requirements not found in the Medicare program are: (1) that the hospital must not discriminate in granting staff privileges on any grounds unrelated to professional qualifications; (2) that the hospital establish a pharmacy and drug therapeutics committee for supervision of hospital drug therapy. Medicare allows any hospital accredited by the Joint Commission on the Accreditation of Hospitals (if it provides utilization review) to participate in the program, thus in effect delegating to the Commission the determination whether the standards are met. This title requires all participating hospitals to meet standards established by the Board.

(Section 44.) Psychiatric hospitals will be eligible to participate only if the Board finds that the hospital (or a distinct part of the hospital) is engaged in furnishing active diagnostic, therapeutic and rehabilitative services to mentally ill patients. Psychiatric hospitals are required to meet the same standards as those prescribed for general hospitals in Section 43, and such other conditions as the Board finds necessary to demonstrate that the institution is providing active treatment to its patients. These standards will exclude costs incurred by state mental institutions to the extent they serve domiciliary or custodial functions.

(Sections 45 and 46.) Section 45 establishes conditions of participation for skilled nursing homes similar to those established for extended care facilities under Medicare. Important differences, however, are the requirement for affiliation with a participating hospital or group practice organization (see Section 51(b)) and changes in the requirements for utilization review (see Section 50). Under Section 46 participation by home health agencies will be limited to public agencies and non-profit private organizations—proprietary home health agencies are specifically excluded.

(Section 47.) Subsection (a) describes a group practice organization (one type of health maintenance organization) which undertakes to provide an enrolled population either with complete health care or, at the least, with complete Health Security services (other than mental health or dental services) for the maintenance of health and the care of ambulatory patients. The bill, in its aim to improve the methods of delivery of health services, places much emphasis on the development of new organizations of this kind and the enlargement of old ones.

Other requirements are spelled out in this section: The organization must furnish medical services (and dental services if they are included) through prepaid group practice. Other services must be furnished by staff of the organization or by contractors for whom the organization assumes responsibility, except that institutional services may be provided by arrangements with other participating providers at the expense of the group practice organization. The organization must be non-profit, but it may utilize proprietary providers in fulfilling its responsibilities.

All persons living in or near a specified service area will be eligible to enroll during an annual open enrollment period, subject to the capacity of the organization to furnish care. Services must be reasonably accessible to persons living within the specified service area. Periodic consultation with representatives of enrollees is required, and they must be given opportunity to participate in policy formulation and in evaluation of operation. Professional policies and their effectuation, including monitoring the quality of services and their utilization, are to

be the responsibility of a committee or committees of physicians (and other health professionals where appropriate). Health education and the use of preventive services must be stressed, and lay persons are to be employed so far as is consistent with good medical practice. Charges for any services not covered by Health Security must be reasonable. Finally, the organization must agree to pay for services furnished by other providers in emergencies, either within the service area of the organization or elsewhere, but may meet this requirement to the extent feasible through reciprocal service arrangements with other organizations of like kind.

Subsection (b) makes clear that the organization, or professionals furnishing services for it, may also serve non-enrollees, with payment to be made to the organization, or, at its request, to such professionals.

(Section 48.) An individual practice association (another type of health maintenance organization) must be a non-profit organization, sponsored by a county or other local medical society, which meets all the conditions for participation by a group practice organization other than the requirement of group practice. All physicians practicing in the area (and all dentists if dental services are furnished) must be permitted to become professional members, subject only to criteria, approved by the Board, relating to professional qualifications. For professional services to enrollees, professional members may be compensated by the foundation by whatever method, including fee-for-service, may be agreed upon by it and its members.

Subsection (b) provides that a professional member may furnish services to persons not enrolled in the association and receive payment from the Board on the same basis as independent practitioners, except that if he is paid by capitation, salary, or stipend by the association, the payment for services to non-enrollees is to be made to the association.

(Section 49.) This section deals with several classes of health organizations that vary widely, even within a single class, in their structure and in the scope of the services which they offer. Because statutory specifications cannot well be tailored to so many variables, the section sets forth only a general statement of the kinds of organizations to which it relates and leaves participation of each organization to a case-by-case decision of the Board on such terms as the Board deems proper.

Subsection 49(a)(1) permits the participation of community health centers or the like which, though furnishing a broad range of ambulatory services, do not serve an enrolled or otherwise predetermined population and may not meet some other requirements of section 47(a). Subsection (a)(2) authorizes the Board to deal separately with the primary care portion of a system of comprehensive care where it is necessary to rely on arrangements with other providers, rather than on a unified structure, to round out the other elements of the system. Where organizations meeting the extensive requirements of section 47(a) or 48(a) are not available, these two paragraphs of section 49(a) will give the Board flexibility in furthering one of the bill's prime objectives, the development and broad availability of comprehensive services furnished on a coordinated basis.

Because of the extent to which mental health services are separated from other health care, subsection (a)(3) permits the Board to contract directly with public or other non-profit mental health centers and mental health and day care services.

If a state or local public health agency is providing preventive or diagnostic services, such as immunization or laboratory tests, the Board may under subsection (a)(4) contract with it for the continuance of these services.

In accordance with regulations, the Board may contract with free standing ambulatory treatment centers for alcoholism and/or drug abuse; for family planning services; and for rehabilitation services.

In the field of private practice, physicians or dentists or other practitioners may group themselves in a clinic, non-profit or proprietary, or in any number of other ways, and it may be more convenient both to them and to the Board to regard them as an entity than to deal with each practitioner separately. Subsection (a)(8) permits this. The Board will have wide discretion in contracting with such entities subject only to the limitation that, like other organizations described in section 49(a), the entity may not (under section 88(a)) be paid on a fee-for-service basis. Practitioners who elect that method of payment may of course pool their bills for submission to the Board, but there is no reason to contract with a unit for the payment of fees to it.

Subsection (b) makes clear that agreements with the Board under this section shall not (unless expressly so stipulated) preclude practitioners furnishing services under the agreements from furnishing other services as independent providers.

(Section 50.) This section specifies the broad and general conditions under which independent pathology laboratories, independent radiological services, providers of drugs, devices, appliances, equipment, or ambulance services may qualify as providers under Health Security. As under Medicare, a Christian Science Sanatorium qualifies if operated, or listed and certified, by the First Church of Christ, Scientist, Boston.

(Section 51.) The requirements of utilization review in hospitals and skilled nursing homes are in the main similar to those which Medicare has, since 1966, imposed with respect to services to aged patients. In Health Security the requirements will of course apply to the entire population. As in Medicare, the review is designed to serve a dual purpose: identification of certain specific misuses of the institutional services with a view to their termination, and a focusing of continuing attention and concern of the medical staff on the necessity for efficient utilization of institutional resources. Section 51(a) strengthens the educational aspect of the process by requiring specifically that records of reviews be maintained and statistical summaries of them be reported periodically to the institution and its medical staff (and, on request, to the Board). As under Medicare, the review committee will consist of two or more physicians, with or without other professional participation; and in the case of hospitals, will normally be drawn from the medical staff unless for some reason an outside group is required. For skilled nursing homes, on the other hand, section 51(c) departs from Medicare by permitting as an alternative that the Committee be established by the State or local public health agency under contract with the Board, or failing that, by the Board. If the nursing home operates under a consolidated budget with a hospital, the review will be made by the hospital committee. Like Medicare, Section 51(d) and (e) call for review of specific long-stay cases as required by regulations, and notification to the institution, the attending physician, and the patient when a decision adverse to further institutional services is made.

(Section 52.) Subsection (a) of Section 52 is also like Medicare in requiring a participating skilled nursing home to have in effect an agreement with at least one participating hospital for the transfer of patients and medical and other information as medically appropriate. Subsection (b) introduces a requirement, applicable two years after the effective date of health benefits to both skilled nursing homes and home health service agencies, of affiliation with a participating hospital or group practice organization. Unless the medical staff of the hospital or organization undertakes to furnish the professional services in the nursing home or the professional services of the home health service agency, that medical staff or a committee of it must assume responsibility for these services. Subsection (c) allows the Board to waive the application of either of these requirements to a skilled nursing home or a home health agency which the Board finds essential to the provision of adequate services, if (but only for as long as) lack of a suitable hospital or organization within a reasonable distance makes a transfer or an affiliation agreement impracticable.

(Section 53.) If the construction or substantial enlargement of a hospital, skilled nursing home, or ambulatory care facility has been undertaken after December 31 of the year of enactment, without either a State certificate of need or a prior approval by a planning agency designated by the governor of the State or the Board, section 53 precludes the institution from participating in the Health Security program, except that in case of enlargement, the Board may permit participation subject to reduction in reimbursement for services. This should greatly strengthen state and local planning authorities.

(Section 54.) This section prohibits double recovery in malpractice litigation by stipulating that no damages will be awarded to the injured party for remedial services which are available without cost under the Health Security program.

(Section 55.) Institutions of the Department of Defense and the Veterans' Administration, and institutions of the Department of Health, Education, and Welfare serving merchant seamen or Indians or Alaskan natives, are excluded by section 55 from serving as participating providers, as is also any employee of these institutions when he is acting as an employee. The Board will, however, provide reimbursement for any services furnished (in emergencies, for example) by these institutions or agencies to eligible persons who are not a part of their normal clientele. It will also provide reimbursement for services furnished by the Public Health Service under the Emergency Health Personnel Act of 1970.

(Section 56.) This section overrides, for purposes of the Health Security Program, State laws of several kinds which inhibit the utilization or the mobility of health personnel, cloud the legality of so-called "corporate practice" of health professions, or restrict the creation of group practice organizations. The authority of Congress to do this, in conjunction with a program of Federal expenditure to provide for the general welfare, flows from the Supremacy Clause of the Constitution and seems now to be clearly established. *Ivanhoe Irrigation District v. McCracken*, 357 U.S. 275 (1958); *King v. Smith*, 392 U.S. 309 (1968).

The first three paragraphs of subsection (a), while stopping short of creating a system of Federal licensure for health personnel, will greatly facilitate both the interstate mobility of State licensees and the effective use of ancillary personnel in the furnishing of health care. The dispensations contained in these paragraphs will be available to persons who meet national standards established by the Board.

Paragraph (1) permits a physician, dentist, optometrist, or podiatrist, licensed in one State and meeting the national standards, to furnish Health Security benefits in any other state, the scope of his permissible practice being governed by the law of the State in which he is practicing. This paragraph obviates the difficulty and cost which a practitioner may encounter, especially where reciprocity of licensure is not available, in taking up practice in a State in which he has not been licensed.

Paragraph (2) grants a similar authority to other health professional and non-professional personnel. For occupations such as pharmacy and professional nursing, which are subject to licensure in all States, a person can avail himself of this paragraph only if he is licensed in one State and meets the national standards; in other cases, where licensure is not universally required, compliance with national standards is sufficient. Here again, impediments to mobility created by existing licensure laws will be removed.

The restrictions which many professional practice acts impose on the use of lay assistants, and the legal uncertainties which often deter such use, discourage practices that can increase greatly, without sacrifice of safety, the volume of services which professionals can render. Accordingly, paragraph (3) of subsection (a) enables the Board to permit physicians and dentists, participating in public or non-profit hospitals and group practice organizations, to use ancillary health personnel, acting under professional supervision and responsibility, to assist in furnishing Health Security benefits. Such assistants may do only things which the Board has specified, and may be used only in the context of an organized medical staff or medical group. Persons employed as assistants must not only meet national standards for their respective occupations, but must also satisfy special qualifications that the Board may set for particular acts or procedures.

In the interest of encouraging salaried practice and the integration of professional practitioners into well-structured organizations for the delivery of health services, paragraph (4) of subsection (a) does away with the "corporate practice" rule insofar as it concerns participating public or other non-profit hospitals and group practice organizations. These institutions may employ physicians or make other arrangements for their services, unless in the unlikely event that the lay interference with professional acts or judgments should be threatened. No conflict of interest results from such arrangements; in the non-profit setting loyalty to employer and loyalty to patient run parallel.

Some state laws place restrictions of one kind or another on the incorporation of group practice organizations. When these restrictions prevent the State incorporation of an organization meeting the strict requirements of the Health Security Act, section 56(b) empowers the Secretary to incorporate it for purposes of the Act. Except for the special restrictions, State law will govern the corporation.

Part D—Trust Fund; Allocation of Funds for Services

(Section 61.) By section 406(a) of the present bill, section 1817 of the Social Security Act, creating the Federal Hospital Insurance Trust Fund, is amended and transferred to become section 61 of the Health Security Act. The fund will thus become the Health Security Trust Fund, succeeding to the assets and liabilities of both Medicare trust funds, and receiving the proceeds of the health security taxes imposed by title II of the Health Security Act and the authorized appropriations from general revenues equal to 100 percent of those tax receipts.

The Fund will also receive recoveries of overpayments, and receipts from loans and other agreements. To implement the role of the Trust Fund, the Managing Trustee (the Secretary of the Treasury) will make payments from the Trust Fund provided for under Title I, as the Board certifies, and with respect to administrative expenses as authorized annually by the Congress.

(Section 62.) The Health Security program is intended to operate on a budget basis overall. Accordingly, subsection (a) requires the Board to determine for each fiscal year the maximum amount which may be available for obligation from the Trust Fund. The amount so determined in advance (by March 1 preceding each fiscal year) shall not exceed the smaller of two stated limitations. The first limit is fixed on 200% of the expected net receipts from all the Health Security taxes (i.e., the tax receipts augmented by 100% thereof, to be appropriated into the Fund from general revenues of the Government.) The second limit, applicable to each fiscal year after the first full fiscal year of benefit operation (i.e., after fifteen months' availability of covered services), is an amount equal to the estimated obligations of the current year (within which the estimate is being made), subject to certain adjustments. Such adjustments will reflect change expected in: (A) the price of goods and services; (B) the number of eligible persons; (C) the number of participating professional providers, or the number or capacity of institutional or other participating providers so far as such changes are not already adequately reflected; and (D) the expected cost of program administration.

In the interest of prudent fiscal management, subsection (b) requires the Board to restrict its estimate of the amount available for obligation in the next fiscal year (in accordance with subsection (a)) if the Board estimates that the amount in the Trust Fund at the beginning of the next fiscal year will be less than one-quarter of the total obligations to be incurred for the current year, and that such restriction will not impair the adequacy or quality of the services to be provided. Also, the Board is required to reduce its alternative estimate of the maximum amount to be available if it finds that the aggregate cost to be expected has been reduced (or an expected increase has been lessened) through improvement in organization and delivery of service or through utilization control.

Subsection (c) provides against various other contingencies which may result in increase or decrease in the estimate of the maximum amount to be available for obligation in a next fiscal year. The amount may be modified before or during the fiscal year: if the Secretary of the Treasury finds that the expected Health Security tax receipts will differ by 1 percent or more from the estimate used under subsection (a); or if the Board finds that either its factors of expected change or the cost of administration is expected to differ from the estimate by 5 percent or more; or if an epidemic, disaster or other occurrence compels higher expenditure than had been expected. If, as a result, the maximum estimate has to be increased (rather than being decreased), the Board (through the Secretary) shall promptly report its action to the Congress with its reasons.

(Section 63.) Subsection (a) provides that separate accounts shall be established in the Health Security Trust Fund—a Health Services Account, a Health Resources Development Account, and an Administration Account, as well as a residual General Account. Subsection (b) provides that in each of the first two years of program operation, 2 percent of the Trust Fund shall be set aside for the Health Resources Development Fund; and the allocation shall increase by 1 percent at two-year intervals to 5 percent within the next 6 years. The money in this account will be used exclusively for the planning and system improvement purposes described in part F.

(c)(d) After deducting the amount approved by Congress and transferred to the Administration Account, the remainder of the monies shall be allocated to the Health Services Account, and shall be used exclusively for making payment for services in accordance with part E.

(Section 64.) This section provides for allocation of the Health Services Account among the regions of the country. (a) The allocation to each region shall be based on the aggregate sum expended during the most recent 12-month period for covered services (with appropriate modification for estimated changes in the price of goods and services, the expected number of eligible beneficiaries, and the number of participating providers). (b) In allocating funds to the regions the Board shall seek to reduce, and over the years gradually eliminate, existing differences among the regions in the average per capita amount expended upon covered health services (except when these reflect differences in the price of goods and services). To accomplish this, the Board will curtail increases in allocations to high expenditure regions and stimulate an increase in the availability and utilization of services in regions in which the per capita cost is lower than the national average. (c) A contingency reserve of up to 5% may be withheld from allocation. If the remaining funds available are inadequate, allocations will be reduced pro rata. (d) Allocations may be modified before or during a fiscal year if the Board finds this is necessary.

(Section 65.) The Board will divide the allocation to each region into funds available to pay for: institutional services; physician services; dental services; furnishing of drugs; furnishing of devices, appliances and equipment; and other professional and supporting services, including sub-funds for optometrists, podiatrists, independent pathology laboratories, independent radiology services, and other items. The percent allocated to each category of service may vary from region to region. In determining allocation to these funds they will be guided by the previous years' expenditures for each category of service but also take into account trends in the utilization of services and the desirability of stimulating improved utilization of preventive and ambulatory services.

(Section 66.) These regional funds will be sub-divided among the health service areas in each region, primarily upon the basis of the previous years' expenditure for each kind of service. Again, the Board will gradually attempt to achieve the equalization of services within each region by restraining the increase of expenditures in high cost areas and channeling funds into health service areas with a low level of expenditures.

(Section 67.) Before or during a fiscal year, the division of regional funds by classes of service or the allotments to health service areas may be modified if necessary or if indicated by newly acquired information.

(Section 68.) By the time Health Security benefits become available, the Government will be operating on a fiscal year beginning on October 1. This section accordingly allows the Board to make the initial determinations and allocations under this part either for the three-month period from the effective date of benefits on July 1 until the beginning of the next fiscal year or for the fifteen-month period which includes the next fiscal year.

Part E—Payment to providers of services

(Section 81.) Payments for covered services provided to eligible persons by participating providers will be made from the Health Services Account in the Trust Fund.

(Section 82.) This section delineates methods of paying professional practitioners. Every independent practitioner (physician, dentist, podiatrist, or optometrist) shall be entitled to be paid by the fee-for-service method (subsection (a)), the amounts paid being in accordance with relative value scales prescribed after consultation with the professions (subsection (g)). Each physician engaged in general or family practice of medicine in independent practice may elect to be paid by the capitation method if he agrees to furnish individuals enrolled on his list with all necessary and appropriate primary services, make arrangements for referral of

patients to specialists or institutions when necessary, and maintain records required for medical audit; and independent dentist practitioners may elect the capitation method of payment similarly (subsection (b)).

These requirements in connection with capitation payments are intended to assure that the physician (or dentist) provides to his patients all professional services within the range of his undertaking and secures other needed services by referral. Through regular medical audits, the Board will monitor the level and quality of care provided.

When necessary to assure the availability of services in a given area, subsection (c) permits paying an independent practitioner a full-time or part-time stipend in lieu of or as a supplement to other methods of compensation. This method of payment will be used selectively by the Board, mainly to encourage the location of practitioners in remote or deprived areas. Practitioners may also be reimbursed for the special costs of continuing education required by the Board and for maintaining linkages with other providers—for example, communication costs. Incentives operative under this provision will encourage physicians to improve the quality and continuity of patient care, even if the physician does not participate in a group practice. The Board may pay for specialized medical services on a per session or per case basis, or may use a combination of methods authorized by this section.

Subsection (d) defines the capitation method of payment.

Subsections (e), (f), (g). These subsections describe the method to be used in applying, as between practitioners electing the various methods of payments, the monies available in each health service area for payment to each category of professional providers. From the amount allocated to each service area, the Board will earmark funds sufficient to pay practitioners receiving stipends and for the professional services component of institutional budgets, such as hospitals. The remainder of the money will be divided to compute the per capita amount available for each category of service (i.e., physicians, dentists, podiatrists, optometrists) to the residents of the area. This per capita amount in each category will fix the capitation payments to organizations that undertake to provide the full range of services in that category to enrolled individuals. Lesser amounts will be fixed for more limited services. For example, if the per capita amounts available for physician and dental services are $65 and $25, respectively, primary physicians accepting capitation payments will receive the percentage of that $65 which is allocated for primary services, a medical society-sponsored individual practice association would receive the entire $65 for physician services, dentists furnishing all covered services would receive the $25 allocated for dental services, and organizations which undertake to provide all physician and dental services to enrolled individuals will receive $90 for each enrolled individual.

The budget per capita amount for each type of covered service (physician, dental, etc.) will be divided between the categories of providers of service according to the number of individuals who elect to receive care from those providers. For example, in a city of 100,000 people, 25,000 may enroll in a group practice organization. Using the figures cited in the example above, the Board will pay the group practice organization $1,625,000 ($65×25,000) for physician services. The other 75,000 individuals elect to receive their physician services from solo, fee-for-service practitioners. The Board will create a fund of $4,875,000 ($65×75,000) to pay all fee-for-service bills submitted by physicians in that community, in accordance with relative value scales and unit values fixed by the Board. The fund for fee payments will be augmented to the extent that some capitation payments have been lowered because they cover only primary services, and may be augmented further where a substantial volume of services is furnished, on a fee basis, to non-residents of the area.

Subsection (h) authorizes the Board to experiment with other methods of reimbursement so long as the experimental method does not increase the cost of service or lead to overutilization or underutilization of services.

(Section 83.) Hospitals will be paid on the basis of a predetermined annual budget covering their approved costs. To facilitate review of these budgets, the Board will institute a national uniform accounting system. Subsection (b) stipulates that the costs recognized for purposes of the budget will be those incurred in furnishing the normal services of the institution except as changed by agreement, or by order of the Board under section 134. This will enable the Board, on the basis of State and local planning, to eliminate, gradually, wasteful or duplicative services, and also to provide for an orderly expansion of hospital services where needed.

Physicians and other professional practitioners whose services are held out as available to patients generally (such as pathologists and radiologists) will be compensated through the institutional budget, whatever the method of compensation of such practitioners and whether or not they are employees of the hospital. This departs from the practice in Medicare which allows independent billing by such physicians. The institution's budget may also be increased to reflect the cost of owning or operating an affiliated skilled nursing home, or home health service agency. Hospital budgets will be reviewed by the Board, locally or regionally, which may permit participation by representatives of the hospitals in each region. Budgets may be modified before, during, or after the fiscal year if changes occur which make modification necessary.

(Section 84.) If an entire psychiatric hospital is found by the Board to be providing active treatment to its patients, and the institution is therefore primarily engaged in providing covered services to eligible beneficiaries, it will be paid on the same basis as a general hospital (on the basis of an approved annual budget). Otherwise the Board will negotiate a patient-day rate to be paid for each day of covered service provided to an eligible beneficiary.

(Section 85.) This section provides that skilled nursing homes and home health agencies will be paid in the same manner as a general hospital (on an approved annual budget basis). The Board may specify use of nationally uniform systems of accounting and may prescribe by regulation the items to be used in determining approved costs and the services which will be recognized in budgets.

(Section 86.) Reimbursement for drugs will be made to the dispensing agent on the basis of an official "product price" for each drug on the approved list, plus a dispensing fee in the case of an independent pharmacist. The official product price will be set at a level which will encourage the pharmacy to purchase substantial quantities of the drug (this should result in significant reductions in the unit cost of each drug). The official price may be modified regionally to reflect differences in cost of acquiring drugs. The Board will establish dispensing fee schedules for reimbursing independent pharmacies. These schedules will take into account regional differences in costs of operation, differences in volume, level of services provided and other factors.

(Section 87.) Subsections (a) and (b) provide that a group practice organization or individual practice association will be paid a basic capitation rate multiplied by the number of eligible enrollees. The amount of the capitation rate will be determined by the per capita amounts available for the several professional services in the area, and a rate fixed by the Board as the average reasonable and necessary cost per enrollee for other covered services.

Subsection (c) fixes capitation amounts for institutional services based on per diem rates derived from the budgets of participating institutional providers or institutions with which the organization or association may have a contractual agreement. The organization or association will be entitled to share in up to 75% of any savings which are achieved by lesser utilization of institutional services by its enrollees. Entitlement to such savings is conditional upon a finding by the Board that the services of the organization or association have been of high quality and adequate to the needs of its enrollees, and that the average utilization of hospital or skilled nursing services by the enrollees of the organization or association is less than the use of such services by comparable population groups not so enrolled but under otherwise comparable circumstances. This money may be used by the organization or association for any of its purposes, including the provision of services which are not covered under the Health Security program.

Subsection (e) directs the Board to allow organizations and associations to reinsure with the Board against catastrophic costs incurred on behalf of any one enrollee, against some or all of the costs of institutional care which it contracts out, and against some or all of the costs of out-of-area services.

Subsection (f) permits the Board to make an additional payment to a group practice organization for the cost of clinical education or training provided by the organization.

(Section 88.) Subsection (a) provides that an organization or agency with which the Board has entered into an agreement under section 49 (such as a neighborhood health center, a non-profit mental health center, or local public health agency furnishing preventive or diagnostic services) may be paid by any method agreed upon other than fee-for-service.

Subsection (b) provides that independent pathology or radiology services may be paid on the basis of an approved budget or such other methods as may be specified in regulations.

Subsection (c) leaves the method of payment for other types of supporting services to be specified in regulations.

(Section 89.) This section provides that the Board will reduce payments to institutional providers in accordance with findings by the Secretary that a facility or any part of a facility has not been built in compliance with the area health plan.

(Section 90.) All participating providers will be paid from the Health Services Account in the Trust Fund at such time or times as the Board finds appropriate (but not less often than monthly). The Board may make advance payment to supply providers with working funds when it deems advisable.

Part I—Development fund

Subpart 1—Planning: Funds to improve services and to alleviate shortage of facilities and personnel.

(Section 101.) This section sets forth the general purposes of subpart 1 of Part F. The subpart enables the Board, through selective financial assistance, to stimulate and assist in the development of comprehensive services, the education and training of health personnel who are in especially short supply, and the betterment of the organization and efficiency of the health delivery system. In carrying out these functions, the Board is to be guided by the planning with respect to health facilities and the organization of services which will be conducted under the

recently enacted title XV of the Public Health Services Act, when and as the new processes become operative. In the meantime it will be guided by such planning as is conducted by the Secretary under section 102. With respect to the supply and distribution of health personnel, the Board will also rely on planning conducted by the Secretary.

(Section 102.) Subsection (a) directs the Secretary, in effect, to fill in the gap in facility and services planning until the new processes can begin to produce results, addressing himself immediately to the most acute shortages and maldistributions of facilities and the most serious deficiencies in organization. He is directed to consult with, and utilize the experience and recommendations of, both existing State and local health planning agencies and the new agencies as they emerge.

Subsection (b) places on the Secretary a continuing duty to plan for improvement of the supply and distribution of health personnel, and to do this in consultation both with the health planning agencies and with appropriate professional organizations.

Thus, the bill takes advantage of the new legislation strengthening State planning agencies, focusing in them eventually the responsibility, visualized in the "Partnership-for-Health" legislation but in many States not realized as an operating reality, for pulling together all health planning efforts within their territories. Recognizing, however, that it will take time to make the new arrangements effective, the bill charges the Secretary with bringing all available experience and skills to bear on the immediate need to identify the most pressing requirements in preparation for the availability of Health Security benefits. These tasks will not be easy, but they are lent new urgency by the Health Security Program.

(Section 103.) In administering subpart 1, this section stipulates, the Board will give priority to improving comprehensive health services for ambulatory patients through the development or expansion of group practice organizations and community health centers, and primary care centers (where full service organizations are impractical), the recruitment and training of personnel, and the strengthening of coordination among providers of services. Funds will not be used to replace other Federal financial assistance, and may supplement other assistance only to meet specific needs of the Health Security program. Other Federal assistance programs are to be administered when possible to further the objectives of Part F, and the Board may provide loans or interest subsidies to help the beneficiaries of other programs to meet the requirements for non-Federal funds.

(Section 104.) Help of several kinds will be available under this section for the creation or the enlargement of group practice organizations to serve an enrolled population on a capitation basis, agencies such as neighborhood health centers which need not require enrollment in advance, primary care centers, or organizations furnishing comprehensive dental services. Grants may be made to any public or other non-profit organization (which need not be a health organization) to help meet the cost, other than construction cost, of establishing such organizations, and to existing organizations to help meet the cost of expansion: the maximum grants being, in the former case 90 percent of the cost, in the latter 80 percent. The Board may also provide technical assistance for these purposes. Loans may be made for the cost of necessary construction, subject to the same 90 and 80 percent limitations on amount. Finally, start-up costs of operation of these organizations may be underwritten, for five years in the case of organizations which must build up an enrollment to assure operating income, and in other cases until the Health Security program begins payment for services in the first year of entitlement to benefits. The effect of these several provisions is to reduce sharply, if not eliminate, the financial obstacles which have heretofore impeded the growth of group practice and similar organizations.

(Section 105.) This section contains a series of provisions to assist in the recruitment, education, and training of health personnel. The Board will establish priorities to meet the most urgent needs of the Health Security system, but the priorities will be flexible both as between different regions and from time to time. Professional practitioners will be recruited for service in shortage areas, both urban and rural, and in group practice organizations, and such practitioners may be given income guarantees. Other Federal assistance for health education and training will be availed of, but the Board may supplement the other assistance if the Board believes it inadequate to the needs, until Congress has had opportunity to review its adequacy. The training authorized includes retraining. It also includes the development of new kinds of health personnel to assist in furnishing comprehensive services, and the training of area residents to participate in personal health education and to serve liaison functions and serve as representatives of the community in dealing with health organizations. Grants may be made to test the utility of such personnel, and to assist in their employment before the effective date of health benefits. Education and training are to be carried out through contracts with appropriate institutions and agencies, and suitable stipends to students and trainees are authorized. Physicians will be recruited and trained to serve as hospital medical directors. Finally, special assistance may be given, both to institutions and to students, to meet the additional costs of training persons disadvantaged by poverty, membership in minority groups, or other cause.

(Section 106.) This section authorizes special improvement grants: first, to any public or other nonprofit health agency or institution to establish improved coordination and linkages with other providers of services; and, second, to the organizations described in section 104 to improve their utilization review, budget, statistical, or records and information retrieval systems, to acquire equipment needed for those purposes, or to acquire equipment useful for mass screening or for other diagnostic or therapeutic purposes.

(Section 107.) This section provides that loans under part F are to bear 3 percent interest and to be repayable in not more than 20 years. Other terms and conditions are discretionary with the Board, except for required compliance with the Davis-Bacon Act. Repayment of loans made from general appropriations will go to the general fund of the Treasury; repayment of later loans will revert to the Health Resources Development Account in the Trust Fund.

(Section 108.) This section specifies that payments under part F shall be in addition to, and not in lieu of, payments to providers under part E.

Subpart 2—Programs of Personal Care Services

(Section 111.) The purpose of this subpart is stated in this section, to encourage and assist in the development of community programs of maintaining in their own homes, by means of comprehensive health and personal care services, disabled or chronically ill persons who otherwise require or are likely to require institutional care. It is intended that a grant be made in any community that can develop a satisfactory program and such non-Federal financing as the Board finds appropriate.

(Section 112.) This section authorizes grants to public or nonprofit agencies for this purpose, each program being designed to serve a substantial urban or rural population. Grants may be made for up to four years, and shall be irrevocable except for cause.

(Section 113.) The services to be provided include, in addition to covered health services, combinations of personal care services (such as homemaker and home maintenance services, laundry, meals-on-wheels and other dietary services, help with transportation and shopping, and other appropriate services). Different services may be provided in different programs. Full coordination with existing community health or personal care programs is required. Committees are to be established, consisting of professionals and representatives of users of the services, to screen applications for assistance and monitor utilization.

(Section 114.) Grantees must evaluate their programs with respect both to benefits to users of the services and to the fiscal impact on the Health Security system. The Board is also to evaluate each program and summarize its conclusions in its annual reports to Congress.

(Section 115.) Within three years the Board is to make a comprehensive report to Congress on this program with an evaluation of its operation. The Board is to submit also its recommendations of methods of developing, as widely and rapidly as practicable, personal care services where they are then lacking, with a view to making such services generally available throughout the United States; its recommendations with respect to the continuing financial support of such programs; and its recommendations on the proper role of the Health Security program in providing long-term institutional care and in providing personal care services in lieu thereof.

Subpart 3—Availability of Funds

(Section 120.) For the two-year "tooling-up" period, appropriations of $200 and $400 million are authorized for financial assistance. Beginning with the effective date of health benefits, percentages of the Trust Fund expenditures will be earmarked for such assistance (section 63). From that date on, the leverage of these expanding funds will supplement and reinforce the incentives, which are built into the normal operation of the Health Security program, for improvement of the organization and methods of delivery of health services.

Part G—Administration

This part of the bill creates an administrative structure within the Department of Health, Education and Welfare with responsibility for administration of the Health Security program. Program policy will be made by a five-member Board, under the supervision of the Secretary of HEW. The Board will be assisted by a National Health Security Advisory Council which will recommend policy and evaluate operation of the program, and an Executive Director who will serve as Secretary to the Board and chief administrative officer for the program. Administration of the program will be greatly decentralized among the HEW Regional Offices. Regional and local health services advisory councils will advise on all aspects of the program in their regions and local areas. The Board may also appoint such professional or technical committees as it may deem necessary.

(Section 121.) This section establishes a five-member full-time Health Security Board serving under the Secretary of Health, Education, and Welfare. Board members will be appointed by the President with the advice and consent of the Senate, for five-year overlapping terms. Not more than three of the five appointees may be members of the same political party. A member who has served two consecutive terms will not be eligible for reappointment until two years after the expiration of his second term. One member of

the Board shall serve as chairman at the pleasure of the President.

(Section 122.) This section charges the Secretary of HEW and the Board with responsibility for performing the duties imposed by this title. The Board shall issue regulations with the approval of the Secretary. It is required to engage in the continuous study of operation of the Health Security program; and, with the approval of the Secretary, to make recommendations on legislation and matters of administrative policy, and to report to the Congress annually on administration and operations of the program. The report will include an evaluation of adequacy and quality of services, costs of services and the effectiveness of measures to restrain the costs. The Secretary of HEW is instructed to coordinate the administration of other health-related programs under his jurisdiction with the administration of Health Security, and to include in his annual report to the Congress a report on his discharge of this responsibility.

The Civil Service Commission is instructed to make every effort to facilitate recruitment and employment, to work in the Health Security Administration, of persons experienced in private health insurance administration and other pertinent fields.

Subsection (g) authorizes the Board to establish fifty positions, carrying salaries in the GS–16 to GS–18 range, in the professional, scientific, and executive service, to meet the need for highly qualified personnel both in research and development activities and in administration. It is expected that about half of these positions would be used for high-level administrative assignments, and the other half for the most responible professional and scientific work of the Board.

(Section 123.) This section creates the position of an Executive Director, appointed by the Board with the approval of the Secretary. The Executive Director will serve as secretary to the Board and shall perform such duties in administration of the program as the Board assigns to him. The Board is authorized to delegate to the Executive Director or other employees of HEW any of its functions or duties except the issuance of regulations and the determination of the availability of funds and their allocations to the regions.

(Section. 124.) This section provides that the program will be administered through the regional offices of the Health Security Board. It also directs the Board to establish local health service areas which shall be the same as the health service areas under the new title XV of the Public Health Service Act, except that with the approval of the Secretary the Board may divide such an area into two or more areas for the purposes of the health security program. These areas are to serve as local administrative units, with a local office in each, and perhaps suboffices. One of the responsibilities of these offices will be to investigate complaints about the administration of the program.

(Section 125.) Subsection (a) establishes a National Health Security Advisory Council, with the Chairman of the Board serving as the Council's Chairman and 20 additional members not in the employ of the Federal Government. A majority of the appointed members will be consumers who are not engaged in providing and have no financial interest in the provision of health services. Members of the Council representing providers of care will be persons who are outstanding in fields related to medical, hospital or other health activities or who are representatives of organizations or professional associations. Members will be appointed to four-year over-lapping terms by the Secretary upon recommendation by the Board.

Subsection (b) authorizes the Advisory Council to appoint professional or technical committees to assist in its functions. The Board will make available to the Council all necesary secretarial and clerical assistance. The Council will meet as frequently as the Board deems necessary, or whenever requested by seven or more members, but not less than four times each year.

Subsection (c) provides that the Advisory Council will advise the Board on matters of general policy in the administration of the program, the formulation of regulations and the allocation of funds for services. The Council is charged with responsibility for studying the operation of the program, and utilization of services under it, with a view to recommending changes in administration or in statutory provisions. They are to report annually to the Board on the performance of their functions. The Board, through the Secretary, will transmit the Council's report to the Congress together with a report by the Board on any administrative recommendations of the Council which have not been followed, and a report by the Secretary of his views with respect to any legislative recommendations of the Council.

(Section 126.) To further provide for participation of the community, the Board will appoint an advisory council for each region and local area. Each such Council would have a composition parallel to that of the National Council; and each will have the function of advising the regional or local representative of the Board on all matters directly relating to the administration of the program.

(Section 127.) The Board is authorized to appoint standing committees to advise on the professional and technical aspects of administration with respect to service, payments, evaluations, etc. These committees will consist of experts drawn from the health professions, medical schools or other health educational institutions, providers of services, etc. The Board is also authorized to appoint temporary committees to advise on special problems. The committees will report to the Board, and copies of their reports are to be made available to the National Advisory Council.

(Section 128.) Subsection (a) requires the Board to consult with appropriate State health and other agencies to assure the coordination of the Health Security program with State and local activities in the fields of environmental health, licensure and inspection, health education, etc.

Subsection (b) requires the Board, whenever possible, to contract with States to survey and certify providers (other than professional practitioners) for participation in the program. This is similar to Medicare except that the Board is given authority to establish the qualifications required of persons making the inspections.

Subsection (c) authorizes the Board to contract with State agencies to undertake health education activities, supervision of utilization review programs, and programs to improve the quality and coordination of available services in that State.

Subsection (d) requires the Board to reimburse States for the reasonable cost of performing such contract activities and authorizes the Board to pay all or part of the cost of training State inspectors to meet the qualifications established by the Board.

Subsection (e) directs the Board to make inspections if a State is unable or unwilling to do so.

Subsection (f) calls for the publication of the results of the inspections.

(Section 129). The Board is authorized to provide technical assistance either directly or through contract with a State to skilled nursing home and home health service agencies to supplement the skills of their permanent staff in regard to social services, dietetics, etc.

(Section 130.) Subsection (a) charges the Board with responsibility for informing the public and providers about the administration and operation of the Health Security program. This will include informing the public about entitlement to benefits and the nature, scope, and availability of services. Providers would be informed of the conditions of participation, methods and amounts of compensation, and administrative policies. In support of the program's effort to improve drug therapy, the Board is authorized with the approval of the Secretary, to furnish all professional practitioners with information concerning the safety and efficacy of drugs appearing on either of the approved lists (Section 25) indications for their use and contraindications. Information of this nature is not now always available to practitioners.

Subsection (b) requires the Board to make a continuing study and evaluation of the program, including adequacy, quality and costs of services. Subsection (c) authorizes the Board directly or by contract to make detailed statistical and other studies on a national, regional, or local basis of any aspect of the title, to develop and test incentive systems for improving quality of care, methods of peer review of drug utilization and of other service performances, systems of information retrieval, budget programs, instrumentation for multiphasic screening or patient services, reimbursement systems for drugs, and other studies which it considers would improve the quality of services or administration of the program.

Subsection (d) authorizes the Board to enter into agreements with providers to experiment with alternative methods of reimbursement which offer promises of improving the coordination of services, their quality or accessibility.

(Section 131.) Severe discrepancies exist today between the natonal need for various kinds of health manpower and the availability of clinical facilities to train such personnel. Certain specialties (such as surgery), in which there is a surplus of manpower, monopolize clinical training facilities to the disadvantage of specialties in short supply (such as primary or family practice), thus perpetuating the imbalance between supply and demand. This section gives the Board authority to bring the availability of clinical training facilities into balance with national or regional manpower needs by issuing training priorities for institutional providers participating in the program.

(Section 132.) This section grants authority to the Board, in accordance with regulations, to make determinations of who are participating providers of service, determinations of eligibility, of whether services are covered, and the amount to be paid to providers. The Board is granted authority to terminate participation of a provider who is not in compliance with qualifying requirements, agreements, or regulations. But unless the safety of eligible individuals is endangered, the provider shall be entitled to a hearing before the termination becomes effective.

(Section 133.) This section establishes procedures for hearings and for judicial review, similar to those under the Social Security Act.

(Section 134). This section has one of the bills most important provisions with respect to achieving improvement in coordination, availability, and quality of services. It greatly strengthens state and local planning agencies and gives the Board authority to curtail inefficient administration of participating institutional providers.

The Board is authorized to issue a direction to any participating provider (other than an individual professional practitioner) that, as a condition of participation, the provider add or discontinue one or more covered services. For example, if two community hospitals are operating maternity wards at low occupancy rates, the Board may require that one hospital cease to provide such service. A provider may be required to provide services in a new location, enter into arrangements for the

transfer of patients and medical records, or establish such other coordination or linkages of covered services as the Board finds appropriate.

In addition, if the Board finds that services furnished by a provider are not necessary to the availability of adequate services under this title and that their continuance is unreasonably costly, or that the services are furnished inefficiently (and that efforts to correct such inefficiency have proved unavailing) the Board may terminate participation of the provider.

No direction shall be issued under this section except upon the recommendation of, or after consultation with, the appropriate state health planning agency. And no direction shall be issued under this section unless the Board finds that it can be practicably carried out by the provider to whom it is addressed. The Board is required to give due notice and to establish and observe appropriate procedures for hearings and appeals, and judicial review is provided.

Part H—Quality of care

This part authorizes the Board, and charges it with the duty, to maintain and enhance the quality of care furnished under the Act. Section 141(a) sets forth this authority and this duty, to be discharged with the advice and assistance of, and in close collaboration with, the Commission on the Quality of Health Care created by an amendment of the Public Health Service Act contained in title III of the present bill.

Regulations under the part are to be issued before health security benefits become effective, and thereafter to be upgraded as rapidly as is practicable. Subsection (b) states as the objective the highest quality of care attainable throughout the nation, with exceptions to quality requirements only when, and as long as, they are necessary to avoid acute shortages of services. Subsection (c) calls for collaboration with the Commission, and stipulates that any failure to follow its recommendations shall be submitted to the Secretary and that, unless he directs the Board to adopt the recommended regulations, the reasons for not doing so must be published by the Board.

(Section 142.) The Board is to issue regulations requiring continuing professional education for physicians, dentists, optometrists, podiatrists. Reports of compliance with the regulations will be required and, after warning, practitioners may be disciplined for failure to comply.

(Section 143.) Subsection (a) provides that major surgery, and other procedures specified in regulations, are not covered services unless they are performed by a specialist, and (except in emergencies) are, to the extent prescribed in regulations, performed on referral by a physician engaged in general practice. Specialists, according to subsection (b) are those certified by the appropriate national specialty boards, with a five-year period allowed board-eligible physicians to obtain certification, and with a "grandfather" exception for certain physicians practicing when health security benefits go into effect.

Subsection (c) authorizes the Board to require, except in acute emergencies, consultation with an appropriate specialist, as a prerequisite to specified surgical procedures; in such cases subsection (d) enables the Board to require pathology reports and clinical abstracts or discharge reports.

(Section 144.) Subsection (a) requires that practitioners furnishing services on behalf of institutional or other providers meet the same qualifications that are demanded of independent practitioners. Subsection (b) authorizes the Board to make additional requirements, in the interest of the quality care and of safety of patients, for all providers other than professional practitioners. This is like the authority given the Secretary under the Medicare law, but with the notable difference that standards of the Joint Commission on the Accreditation of Hospitals constitute a minimum for Board requirements, rather than a maximum as under Medicare. Exceptions are permitted only, as stated in section 141, to avoid acute shortages of services.

(Section 145.) Although the provisions relating to professional standard review organizations, recently added to the Social Security Act, are repealed by section 405 of the bill, the Board is authorized, on recommendation of the Commission on the Quality of Health Care, to use organizations previously designated by the Secretary for the purposes of monitoring the quality of services, either institutional or noninstitutional. The Board may also use for this purpose similar organizations approved by it in the future.

(Section 146.) In exercising its authority under part H the Board is directed to take into account the findings of the Secretary's Commission on Medical Malpractice, and to seek to reduce the incidence of malpractice and to improve the availability of malpractice insurance.

Part I—Miscellaneous provisions

(Section 161.) This section contains definitions of certain terms used in the title.

(Section 162.) This section creates the offices of Deputy Secretary of Health, Education and Welfare and an Under Secretary for Health and Science in the Department of Health, Education and Welfare, and abolishes the office of Under Secretary of Health, Education and Welfare.

(Section 163.) This section stipulates that the effective date for entitlement for benefits will be July 1, of the second calendar year following enactment.

(Section 164.) Subsection (a) provides that an employer will not be relieved, by the enactment of the Health Security Act, of any existing contractual or other nonstatutory obligation to provide or pay for health services to his present or former employees and their families. An employer whose cost under such a contract, immediately before health security taxes go into effect, exceeds the cost to him of paying those taxes is required by subsection (b) to apply the excess, during the remaining life of the contract, first to the payment of health security taxes on behalf of his employees. If an excess still remains after meeting this obligation, and after an allowance for the cost of any continuing obligation to pay for health services not covered by Health Security, subsection (c) requires the employer to pay the amount of this remaining excess to those employees, former employees, and survivors who are beneficiaries of the pre-existing contract; but by agreement with the employees or their representatives, these funds may be applied to other employee benefits. Computations of the amounts involved are to be made on a per capita basis, as defined in subsection (d).

TITLE II—HEALTH SECURITY TAXES

Part A—Employment taxes

(Section 201.) Effective on January 1 of the second year after enactment, subsections (a) and (b) convert the existing Medicare hospital insurance payroll taxes into Health Security taxes and raise the rates to 1 percent on employees and 3.5 percent on employers. Subsection (c) sets the wage base for the employment tax at 150 percent of the Social Security wage base (or a tax base at present of $21,150 in conformity with the recent automatic increase of the Social Security tax base). This subsection also defines covered employment to include all substantial groups now excluded from social security tax coverage, except that State and local governments are excluded from the tax on employers.

(Section 202.) This section makes a number of conforming and technical amendments. Chief among these are provision for refund of excess taxes collected from an employee, who has held two or more jobs, on wages aggregating in a year more than the amount of the new wage base; exclusion of Health Security contributions from agreements with State governments for the social security coverage of State and Municipal employees (since these employees will contribute to Health Security through payroll taxes); and exclusion of Health Security contributions from agreements for the coverage of United States citizens employed by foreign subsidiaries of United States corporations (since these employees will not benefit materially from Health Security in its present form).

(Section 203.) This section excludes from the gross income of employees, for income tax purposes, payment by their employers of part or all of the Health Security taxes on the employees.

(Section 204.) This section spells out the effective dates of the new payroll tax provisions.

Part B—Taxes on self-employment income and unearned income

(Section 211.) Effective at the beginning of the second calendar year after enactment, this section converts the existing Medicare self-employment tax into a Health Security self-employment tax, sets the rate at 2.5 percent, and sets the maximum taxable self-employment income at $21,150 (with the same upward adjustment as in the employee tax for subsequent rises in average wage levels).

(Section 212.) Effective on the same date, this section adds a new 2½ percent Health Security tax on unearned income (unless such income is less than $400 a year), subject to the same maximum on taxable income as is applicable to the employee and self-employment taxes. Taxable unearned income is adjusted gross income up to the stated maximum, minus wages and self-employment income already taxed for Health Security purposes (excluding certain items of income (notably social security benefits) specifically excluded from the other taxes and excluding $5,000 in unearned income for persons over age 60.)

(Section 213.) This section makes appropriate changes in nomenclature and in the requirements of tax returns, including reports of estimated tax liability under the new tax on unearned income.

(Section 214.) This section details the specific effective dates of the taxes imposed by this part.

Part C—Income tax deductions for medical care

(Section 221.) This section amends the Internal Revenue Code so that no medical deductions shall be allowed for the cost of medical care which is covered by the Health Security Act on or after the effective date of health security benefits.

TITLE III—COMMISSION ON THE QUALITY OF HEALTH CARE

(Section 302.) The purpose of Title III is to create a Commission on the Quality of Health Care in order to improve health care in the United States. The Commission's function is:

To develop methods of measuring health care;

To develop standards for promoting health care of high quality;

To encourage the use of such measurements and standards under the provision of the Health Security Act.

(Section 302.) This section adds to the Public Health Service Act a new Title XVII, entitled "Commission on the Quality of Health Care."

(Section 1701, Public Health Service Act.) Subsection (a) establishes a Commission on the Quality of Health Care within the Department of Health, Education and Welfare.

The Commission will consist of eleven members who are to be appointed by the Secretary after consultation with the Health Security Board. The Commission is required to carry out the functions set forth under new sections 1702 and 1703.

Subsection (b) describes the requirements for the membership of the Commission. Seven of the members appointed must be repretatives of health service providers or representatives of non-governmental organizations that are engaged in the process of developing standards relating to the quality of health care. Four members must be representatives of consumers who are not engaged in and have no financial interest in the delivery of health care services. Commission members will be appointed to serve five year overlapping terms. Subsection (c) requires the Secretary to designate the Chairman of the Commission, who serves at the pleasure of the Secretary. Subsection (d) authorizes the Commission to employ needed personnel and appoint advisory committees. It also stipulates the conditions of employment and rates and terms of compensation.

(Section 1702, Public Health Service Act.) Subsection (a) defines the primary responsibilities of the Commission. The Commission is directed to initiate and continuously develop methods to assess the quality of health care delivered under the provisions of the Health Security Act; and to initiate and develop ways to use such assessments in order to maintain and improve the quality of health care delivered under the Act. The Commission is required to submit its findings and recommendations to the Secretary and the Health Security Board.

Specifically, the Commission is required to:

(1) collect data on a systematic and nationwide basis that will provide information on the (A) qualifications of health personnel and the adequacy and ability of health care facilities to provide quality health care; (B) the patterns of health care practices in actual episodes of care; (C) the utilization patterns for components of the health care system; and (D) the health of patients during and at the end of actual episodes of care and the relationship of the various factors outlined above to the health of such patients;

(2) use the data it collects to develop statistical norms and ranges to describe the factors outlined in paragraph (1). Such norms and ranges may be developed on a national or regional basis, for particular population groups, or on any other basis deemed most useful by the Commission;

(3) use such statistical norms and ranges as a basis for developing standards (and acceptable deviation from such standards) that will be useful in measuring, controlling, and improving the quality of health care; and

(4) make recommendations to the Secretary and the Health Security Board on the proper use of standards developed under the provisions of paragraph (3) in connection with the Board's continuing responsibility for the maintenance and improvement of the quality of the health care delivered under the Health Security Act. Such recommendations may also be used by the Secretary or the Board when developing proposals to amend the Health Security Act.

When carrying out its duties under the provisions of this subsection, the Commission is directed to give first priority to the quality of care delivered for those illnesses or conditions which have high incidence of occurrence within the population and which are responsive to medical or other treatment.

Subsection (b) requires the Commission to conduct a broad health care research program. Specifically, the objectives of the program are to:

(1) improve technologies for assessing health care quality;

(2) compare the quality of health care under alternative health delivery systems and methods of payment;

(3) analyze the effects of consumer health education and preventive health services:

(4) continue the studies made by the Secretary's Commission on Medical Malpractice. In this respect, the Commission is also required to evaluate any of the recommendations of the Secretary's Commission which the Health Security Board has put into effect or any other measures that the Board has established, which pertain to the incidence of malpractice, malpractice insurance, or malpractice claims;

(5) obtain other information that will be useful in order to accomplish the purposes of this new title of the Public Health Service Act and title I, part H, of the Health Security Act (concerning the maintenance and improvement of the quality of health care delivered under the Health Security Act).

Subsection (c) authorizes the Commission to provide technical assistance to enable participating providers to furnish the Board with information required by it for purposes of the Commission. The Commission is also authorized to provide technical assistance to participating providers who are developing and carrying out quality control programs.

(Section 1703, Public Health Service Act.) This section directs the Commission, even before it has developed standards under the preceding provisions, to give advice and recommendations to the Health Security Board concerning quality health care regulations.

(Section 1704, Public Health Service Act.) This section authorizes the Secretary to establish twenty-five positions on the staff of the Commission, carrying salaries in the GS–16 to GS–18 range, in the professional, scientific, and executive service, to meet the need for highly qualified personnel in the research and development activities of the Commission.

TITLE IV—REPEAL OR AMENDMENT OF OTHER ACTS

(Section 401.) This section repeals the Medicare and Federal Employee Health Benefit statutes on the date Health Security benefits become effective, but stipulates that this shall not affect any right or obligation incurred prior to that date.

(Section 402.) This section requires that after the effective date of benefits, no State shall be required to furnish any service covered under Health Security as a part of its State plan for participation under Medicaid, and that the Federal government will have no responsibility to reimburse any State for the cost of providing a service which is covered under Health Security. After the effective date of benefits, the Secretary of HEW shall prescribe by regulation the new minimum scope of services required as a condition of State participation under Title XIX. To the extent the Secretary finds practicable, the new minimum benefits will be designed to supplement Health Security—especially with respect to skilled nursing home services, dental services and the furnishing of drugs.

(Section 403.) This section provides that funds available under the Vocational Rehabilitation Act or the Maternal and Child Health title of the Social Security Act shall not be used to pay for personal health services after the effective date of benefits, except (to the extent prescribed in regulations by the Secretary of HEW) to pay for services which are more extensive than those covered under Health Security.

(Section 404.) This section makes applicable to Health Security the provisions recently added to the Social Security Act requiring reduction in reimbursement for care in facilities which have made substantial capital expenditures found by a State planning agency to be inconsistent with standards developed pursuant to the Public Health Service Act. Because the provision will continue to apply to the residual programs under titles V and XIX of the Social Security Act, the reductions will continue to be determined by the Secretary and his determinations are made binding on the board, as provided in section 89 of the bill.

(Section 405.) This section repeals the provisions recently added to the Social Security Act relating to professional standards review organizations. Section 145 of the bill permits the use of such organizations already designated by the Secretary, and approved by the Board and use of similar organizations in the future.

(Section 406.) Subsection (a) amends section 1817 of the Social Security Act, creating the Federal Hospital Insurance Trust Fund, and transfers it to become section 61 of the Health Security Act under the title "Health Security Trust Fund". The effect of this transfer is summarized in the description of title I, part D, of the present bill. Subsection (b) extends to the Health Security system the provisions of section 201(g) of the Social Security Act, authorizing annual Congressional determination of amounts to be available from the respective trust funds for the administration of the several national systems of social insurance. Subsections (c) and (d) contain conforming and technical provisions.

(Section 407.) This section makes a number of changes in title XV of the Public Health Service Act, which is the planning portion of the recently passed National Health Planning and Resources Development Act of 1974. Subsections (a) and (b) provide that the Secretary's guidelines on national health planning policy should be issued in twelve, rather than eighteen, months, and that they must emphasize the need for prompt action to meet the demands of the health security program. Under subsection (c), the DHEW Under Secretary for health and science replaces the Assistant Secretary on the National Council on Health Planning and Development, and the Chairman of the Health Security Board is added to the Council. Subsection (d) strikes out a requirement of coordination with Professional Standards Review Organizations, in view of the repeal of the PSRO provisions of the Social Security Act. Review and approval or disapproval of Federal grants and contracts by health systems agencies (subject to final decision by the Secretary) is extended, by subsection (e), to include Health Security Board grants and contracts under Part F of title I. Finally, section 1526 providing for grants for State demonstrations in rate regulation is repealed, since the Health Security Board will be fixing the amount of payments to participating providers of services.

(Section 408.) This section establishes the salary levels for the Deputy Secretary and the Under Secretary for Health and Science, Department of Health, Education, and Welfare, the Chairman of the Health Security Board, members of the Health Security Board and members of the Commission on the Quality of Health Care, and the Executive Director of the Health Security Board.

(Section 409.) This section removes the operations of the Health Security Trust Fund from the administrative budget of the United States, and directs that these operations be reported and projected in a separate statement, as was done with the Social Security trust funds until recently. The Government contribution to the Health Security system will continue to be shown as an expenditure in the administrative budget.

TITLE V—STUDIES RELATED TO HEALTH SECURITY

(Section 501.) This section directs the Secretary of Health, Education and Welfare in consultation with the Secretary of State and the Secretary of the Treasury to study

the coverage of health services for United States residents in other countries.

(Section 502.) Subsection (a) directs the Secretary of HEW to study means of coordinating the federal health care programs for merchant seamen, and for Indians and Alaskan natives, with the Health Security benefits program. The Secretary and the Administrator of Veterans' Affairs shall conduct a similar joint study of the means of coordinating veterans health care programs with the Health Security benefits program. A similar study is to be conducted, jointly with the Secretary of Defense, relating to the program of care, in civilian facilities, of the dependents of military personnel. Reports to the Congress and any legislative recommendations arising from the studies are required within three years after the enactment of the Health Security Act.

Subsection (b) requires the respective Secretaries and the Administrator to consult with representatives of the affected beneficiary groups, and to include a summary of their views in the reports to Congress.

With respect to the joint study to determine the most effective method of coordinating the Veterans' Administration Health Program with the Health Security program established under this bill, it is important to understand that there is no intention to require either the integration of the VA program into the Health Security Program, or even the consideration of such integration. Rather, the section recognizes that any national health security or health insurance program would be so pervasive as to require other federal health programs such as those of the Veterans' Administration to be effectively coordinated with them. Through such coordination, needless duplication and expenditures should be avoided.

(Section 503.) This section authorizes the appropriation of money needed for conducting the studies authorized in this title, and the use of experts and consultants and advisory committees, and of contracts for the collection of information or the conduct of research.

LEGISLATION AUTHORIZING METALLURGY RESEARCH CENTER IN SALT LAKE CITY, UTAH

(Mr. McKAY asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. McKAY. Mr. Speaker, I am today introducing legislation to increase the authorization for the construction of a metallurgy research center in Salt Lake City, Utah. Had the administration followed the intent of Congress in this matter, there would be no need for this legislation. The administration has systematically delayed the implementation of Public Law 92–287 since its enactment in 1972. The result has been an inflation of costs beyond the limit of the original authorizing legislation.

Public Law 92–287 provided authorization not to exceed $6 million for the establishment of a metallurgy research center to replace the facility now located in the middle of the University of Utah campus. The existing laboratory space is desperately needed for expanded energy research, and the university will obtain the existing facility at fair market value upon completion of the replacement facility.

Utah is located in the center of the West's reservoir of energy and mineral resources. Within its boundaries are large quantities of oil, natural gas, oil shale, tar sands, coal, and sizable geothermal resources. Development of these resources is crucial for reducing our dependence on oil imports. In addition, the programs carried on at the Metallurgy Research Center promise resource and energy conservation as well as environmental protection. Current research projects include the control of sulfur dioxide emissions, the recovery of plastic from automobile scrap, and the recovery of silver and copper from mill tailings.

When the administration failed to request funds for the facility in either the fiscal year 1974 or fiscal year 1975 budgets, Congress added $700,000 to the fiscal year 1975 Interior appropriation to complete an architecture and engineering study for the Metallurgy Research Center in Salt Lake City. The administration refused to obligate the funds during fiscal year 1975. When the House Interior Appropriations Subcommittee adopted report language in May 1976, directing the Bureau of Mines to complete the architecture and engineering study by January 1, 1977, the administration promptly sent a deferral notice to Congress refusing to spend the $700,000 for design of the facility.

The House passed House Resolution 1428 on August 24, 1976, disallowing the administration's deferral of design funds for the replacement facility. The administration continued to refuse to obligate funds for the Salt Lake Metallurgy Research Center until the House Interior Appropriations Committee initiated an impoundment investigation through GSA. After GSA served the Department of Interior with a notice of intent to sue for impoundment, the administration agreed to obligate the design funds. Despite this agreement, continued bureaucratic delays have prevented GSA from entering into a contract with the architects for the new facility.

The record of the administration in this matter is one of obstruction and impoundment. The will of Congress has been repeatedly thwarted by a recalcitrant administration. If the Salt Lake Metallurgy Research Center had proceeded to construction in an orderly fashion in 1972, it would have cost less than the $6 million authorized. Current estimates place the cost of the replacement facility at $9 million, but if the administration continues its foot-dragging the cost will undoubtedly rise again.

I ask my colleagues to join with me in requiring the administration to execute the will of Congress and build the Salt Lake Metallurgy Research Center. I am convinced that Congress will pass this bill to correct a situation created by administrative delay.

HUMANE SLAUGHTER ACT OF 1977

(Mr. BROWN of California asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. BROWN of California. Mr. Speaker, I am introducing a bill today which is entitled the "Humane Methods of Slaughter Act of 1977." It strengthens the Humane Slaughter Act of 1958, which applied only to those slaughterhouses selling meat to the Federal Government, by providing that Federal meat inspectors must include humane handling and slaughter methods as a requisite for approving domestic meat or the meat exported to the United States from foreign slaughterhouses.

Though there are very few slaughterhouses which will have to change their methods due to this bill—276 in the United States and about 2 percent of Australia and New Zealand's slaughterhouses—because most of them have voluntarily done so due to the economic benefits of the less-bruising methods provided in the 1958 law, I still feel that humane methods of slaughter should be nationalized.

With the constant invention of new technological marvels which have revolutionized our system for raising, killing, packing, and distributing meat, we, at least, should be able to insure all possible elimination of pain, discomfort, and terror that these animals undergo in the slaughtering process. This legislation would achieve such a purpose and I ask my colleagues to join me in supporting its rapid passage.

ACTIVE FORCE MILITARY MANPOWER STRENGTH ASSESSMENT AND RECRUITING RESULTS FOR THE TRANSITION QUARTER

(Mr. DAN DANIEL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DAN DANIEL. Mr. Speaker, during the period following adjournment of the 94th Congess the Department of Defense released its figures on the total active strength of the four military services as of the end of September 1976. In a continuing effort to keep the Members of the House apprised of the most recent information on the Department of Defense's recruiting results, I wish to supply the following statistics for the RECORD.

The total active strength of the four military services at the end of September 1976 was 2,084,000. This was more than 99 percent of the service' September objective of 2,102,000. All of the military services except the Marine Corps came within 1 percent of meeting their strength objective:

ACTIVE MILITARY STRENGTH—END OF SEPTEMBER 1976
[In thousands]

Service	Objective	Actual	Percent of objective
Army	790	783	99
Navy	532	528	99
Marine Corps	196	190	97
Air Force	584	583	99
DoD total	2,102	2,084	99

The Department of Defense announced that the Air Force exceeded its enlisted recruiting objective during the quarter ending September 30, 1976, but the other three services experienced 4 to 5 percent shortfalls. These recruiting shortfalls are due in part to the services' continued emphasis on recruiting high school diploma graduates. The 126,400 men and

women recruited during July–September 1976—the transition quarter—TQ—was 96.4 percent of the total objective of 131,000, but was about 9,200 above the number of men and women recruited during the corresponding quarter 1 year ago. Recruiting results for the first quarter of fiscal year 1976 and for the transition quarter are shown below:

ENLISTED ACCESSIONS
[All sources]

Service	July to September 1976			July to September 1975, actual
	Objective	Actual	Percent	
Army	59,400	57,100	96	47,600
Navy	35,200	33,400	95	32,200
Marine Corps	15,400	14,700	96	16,400
Air Force	21,100	21,300	101	21,100
DOD total [1]	131,000	126,400	96	117,200

[1] Numbers may not add due to rounding.

Each of the services, except the Marine Corps, registered a decrease in the proportion of high school diploma graduates during the transition quarter—TQ—as compared to the first quarter of fiscal year 1976. The services recruited 70.9 percent diploma graduates during the transition quarter compared to 77.6 percent during the first quarter of fiscal year 1976. An additional 4.3 percent of the current quarters' recruits held high school equivalency certificates. There were approximately 3,100 less diploma graduate enlistments during the transition quarter than for the corresponding quarter of fiscal year 1976. High school diploma graduate enlistments are shown below:

HIGH SCHOOL DIPLOMA GRADUATE ENLISTMENTS—NON PRIOR SERVICE, MEN AND WOMEN

Service	July to September			
	Number		Percent of total	
	Fiscal year 1976	Fiscal year 19TQ	Fiscal year 1976	Fiscal year 19TQ
Army	33,700	31,900	73	60
Navy	24,600	23,800	83	77
Marine Corps	10,800	10,800	68	76
Air Force	19,000	18,300	92	87
DOD total [1]	88,000	84,900	78	71

[1] Numbers may not add due to rounding.

The proportion of enlistees with average and above average mental ability—mental category I–III—enlisted during the transition quarter—TQ—was 95 percent. This was equal to the proportion attained during the first quarter of fiscal year 1976. The following table shows that the total number of enlistees in these mental categories in the transition quarter exceeded that of the first quarter of fiscal year 1976 by 5,800:

MENTAL CATEGORY I–III ENLISTMENTS—NON-PRIOR SERVICE, MEN AND WOMEN

Service	July to September			
	Number		Percent of total	
	Fiscal year 1976	Fiscal year 19TQ	Fiscal year 1976	Fiscal year 19TQ
Army	43,300	48,500	93	91
Navy	28,100	30,000	94	97
Marine Corps	15,500	13,700	98	96
Air Force	10,500	21,100	99+	99+
DOD total [1]	107,400	113,200	95	95

[1] Numbers may not add due to rounding.

It was also announced that the proportion of black enlistees in the transition quarter—TQ—was higher than the proportion of black enlistees in the first quarter of fiscal year 1976, while the proportion of women enlistees declined from 8 to 7 percent. Each service registered an increase in both the number and proportion of black enlistees during the transition quarter as compared to the first quarter of fiscal year 1976. The table below shows black and women accessions:

BLACKS AND WOMEN NONPRIOR SERVICE ACCESSIONS
[Fiscal years]

Service	Blacks (July to September)				Women (July to September)			
	Number		Percent of total		Number		Percent of total	
	1976	19TQ	1976	19TQ	1976	19TQ	1976	19TQ
Army	11,000	15,700	24	29	4,180	4,320	9	8
Navy	2,300	3,000	8	10	1,390	1,160	5	4
Marine Corps	2,500	2,600	16	18	360	340	2	2
Air Force	2,200	2,400	11	12	2,450	2,810	12	13
DOD total [1]	18,100	23,700	16	20	8,380	8,620	8	7

[1] Numbers may not add due to rounding.

RESERVE STRENGTH
[In thousands]

	End strength, August 1976 (preliminary)	Average strength	
		Actual, July to August 1976	Transition quarter authorized
Army National Guard	364.9	363.4	400.0
Army Reserve	193.1	193.3	219.0
Navy Reserve	96.8	96.9	106.0
Marine Corps Reserve	29.3	29.4	32.5
Air National Guard	91.0	90.8	94.9
Air Force Reserve	48.5	48.4	51.8
DOD total	823.5	822.2	904.1

PRESIDENT'S BUDGET TO IGNORE FORESTRY INCENTIVES PROGRAM

(Mr. SIKES asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SIKES. Mr. Speaker, it is very disappointing that advance indications are the budget to be submitted by President Ford contains no funds for a highly important program of national interest, the forestry incentives program.

Congress approved the forestry incentives program more than 3 years ago to help assure an adequate supply of timber for future generations. The program authorizes the Federal Government to share in the cost of planting seedlings or stand improvement practices in the small forestry holdings of private, nonindustrial owners. This involves a tremendous acreage, but many of the owners lack experience in forestry management.

Contrary to what many may believe, private landowners hold 59 percent of the timberland in this country. State and Federal holdings comprise about 28 percent and the remainder, about 13 percent, are in the hands of the forest products industry.

Holdings of less than 500 acres are eligible for assistance in the forestry incentives program. The total acreage is estimated to be 198,801,000. It is this large acreage that the President's budget seems to ignore. Further, the new budget also overlooks the fact that forestry work provides badly needed jobs in hard-pressed rural areas. FIP is not a make-work program. It is a means of providing meaningful employment to thousands who need work and at the same time it assures America of a future supply of an essential resource.

Last year the President proposed no funding for this program, but the Congress provided $18.75 million for forestry incentives. This stop-and-go policy is very damaging to an important program. The President's budget should reflect the desires of Congress and of the Nation's forest industry.

The individual forest landowner is starting to have second thoughts about the commitment of the Federal Government to carry through on a program approved time and again by the Congress. I agree with their concern when they see what appears to be indifference on the part of the administration to the future requirements for timber in this country. The requirements for wood and wood products are growing by leaps and bounds. Timber is a source of energy as well as a source of products—from homes to paper—required by a growing economy. We can add significantly to the timber supply through programs such as forestry incentives.

I have today forwarded a letter to the Director of the Office of Management

and Budget designate, Mr. Bert Lance, asking his support for this program which will benefit the entire Nation, provide badly needed jobs, and result in the continued production of an essential commodity.

The text of my letter follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C., January 6, 1967.

Hon. THOMAS BERT LANCE,
Carter-Mondale Transition Planning Group, Washington, D.C.

DEAR MR. LANCE: The Forestry Incentives Program, one of the most successful forestry programs in existence, is in peril unless at least $25 million is included in the Fiscal Year 1978 budget for its continuation.

The Forestry Incentives Program was enacted by the Congress more than three years ago and since that time the Congress has had to fight to keep it alive. Budget after budget has proposed zero funding. Even when funds were provided at the insistence of Congress, the Administration delayed release of the funds, thus limiting the effectiveness of the program.

This program is designed to assist the private, non-industry forest landowner in planting seedlings and in management of his lands. It is worth noting that about 60 percent of all land dedicated to the production of timber is in private hands. Of this large percentage, it is estimated that 198,801,000 acres is eligible for assistance under the Forestry Incentives Program. The United States cannot afford to have such a high percentage of its timber-producing land ignored by the federal government. It need not be. Congress has expressed its concern repeatedly by providing authority and funding. The first year of the program saw all available funds—$14.4 million—applied for within six months by 20,000 forest owners who wanted to plant or improve 400,000 acres of forest land.

Forests provide jobs. Forests provide us all with an essential commodity. We should not allow a substantial acreage to be ineffectively utilized. It would be a serious mistake to rely on state and federal holdings and industrial interests alone to meet the nation's timber demands.

If nothing else, we should have gained insight into the policy of American non-production of critical commodities by reviewing the history of our dependence on foreign oil. We can grow trees sufficient to meet all our requirements if only we will plant them and care for them.

The Forestry Incentives Program will help to meet our future timber requirements, but we must begin now to demonstrate effective backing for forestry incentives so that private forest landowners will know they can depend on needed assistance for planting and stand improvement.

I urge your support for the inclusion of at least $25 million in the FY1978 budget for this program, and I pledge my full support for the Forestry Incentives Program.

With best wishes, I am

Sincerely,

BOB SIKES.

NATIONAL HEALTH CARE ACT OF 1977

(Mr. BURLESON of Texas asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. BURLESON of Texas. Mr. Speaker, better health care is an objective all Americans share. It is a goal that we can attain now if we enlist all our resources, private and public, in a meaningful and workable partnership to frame solutions that are both realistic and effective.

In these days of grave and unsettling economic conditions, it is easy to delay or postpone solutions to problems that confront our society. Solution of our economic problems is the Nation's No. 1 priority. This is no time to enact a program of nationalized compulsory health insurance that would greatly increase Federal health care costs and place an excessive new strain on the Federal budget.

However, these realities do not mean that the Nation's health care problems need to be placed on the back burner in this Congress. I believe there is a workable solution that we in Congress can frame to bring our citizens better health care without the burden of excessive new taxes or federalization of our national health care system. That program is contained in a bill I introduced January 4, 1977—the National Health Care Act of 1977. I commend this legislation to my colleagues' thoughtful attention.

Mr. Speaker, I believe this legislation offers us the most effective, efficient and economical way to improve health care and extend its availability to all Americans. My bill would build on the present health delivery and insurance system with improved Federal standards and guidelines. It would not only improve protection for all Americans, but it would also help control the cost of health care. This bill would achieve these goals without destroying the present health care system which has served our Nation well. It would not create a burdensome and expensive Federal bureaucracy and it would not impose unconscionably higher taxes on our already overtaxed citizenry. It is time to improve our present health delivery and insurance system, not destroy it.

The National Health Care Act addresses the most complex problems—rising medical costs, lack of ambulatory health facilities, inadequate cost and quality controls, diffused leadership patterns, fear of catastrophic illness, and uneven benefit levels. It does so by the most efficient, least expensive methods, while blending the expertise and strengths of the major elements of the private sector with the unique capacities of Federal and State governments.

The National Health Care Act has important advantages over any Government-administered and financed program. For one thing, it would cost far less in Federal taxes and divert far fewer tax dollars from other high-priority social needs. I note, for comparison, that the Health Security Act, which was proposed in the last session of Congress, would require an increase in new Federal tax dollars of $130 billion by 1980, according to a cost study done for HEW in September 1976. The Nation cannot afford such a new expenditure. The legislation which I am introducing today would not create these excessive new taxes.

My bill would preserve freedom of choice for the consumer and encourage experimentation and innovation in the delivery of health care by avoiding any tampering with the workable procedures in the present system. It would thus not lead to the development of an inflexible health care system.

In addition, Mr. Speaker, the approach in this proposal will work to reduce the costs of present health care under medicare, medicaid, and other programs. In the long run it promises better health care for all people at lesser costs.

The National Health Care Act is realistic. It does not squander tax dollars but puts them only where they have to be spent. It phases in comprehensive benefits so that medical costs will not be pressured to new and higher levels. It balances a need for greater benefits for the poor and for those who are uninsurable with a realistic use of public funds.

The National Health Care Act uses the present tax system to encourage compliance with Federal health benefit standards. It uses private insurers for what they can do best—provide the marketing, actuarial, claims, and service know-how. It uses Government for what it can do best—to set standards and to provide for orderly improvement in the system.

Mr. Speaker, no health bill is more at the midpoint of desirable political compromise than my bill. No bill is more responsive to the essentiality of balancing fiscal restraint and social need.

The National Health Care Act contains several major provisions. First, it establishes cost and quality controls. All payments for health care under federally supported programs would be tied to prevailing fees and to peer review of those professional services that fall outside of professionally established guidelines, assuring appropriateness of treatment, quality of care, and reasonableness of physician fees.

The act would also help contain costs by encouraging comprehensive ambulatory health care centers, which are less costly than in-hospital care. This encouragement comes through the awarding of grants and loans for the construction and modernization of these centers.

This legislation sets minimum standards for health insurance policies. There are three types of plans: Those purchased by employers and employees, those purchased by individuals, and those offered through a State plan. Minimum standards for all these plans are the same and they would be phased in over a period of time. There would be a broad range of benefits for everyone regardless of income or physical condition.

Medical costs for the expenses of a catastrophic illness are fully covered. There is a limit of $1,000 on total copayment and deductible charges per family in any benefit year. This is adjusted downward according to ability to pay under the State plans.

The unemployed would be covered. These individuals would be covered for at least 2 months after they have been laid off. If they are still without income after that period, they would be enrolled in a State plan with the same minimum benefits that are established for employer-employee plans.

The poor and the near poor would be

enrolled in a State health care plan, which would be subsidized by State and Federal Government and managed by private insurance carriers. The risk for solvent individuals who are uninsurable solely for health reasons would be borne entirely by the health insurance industry.

The National Health Care Act is the one approach that provides for orderly, yet determined change with minimum dislocation and distortion and a maximum redirection of the system's proven vitality and talent. I invite my colleagues in the House to join me in sponsoring this bill and working for its enactment.

There follows a summary of the National Health Care Act of 1977:

THE NATIONAL HEALTH CARE ACT OF 1977

The National Health Care Act has five Titles.

Title I contains Findings and Declaration of Purpose.

Title II contains provisions to strengthen the health planning and health resource development process. It provides, among other things, for the establishment of health data consortiums, strengthens certificate-of-need programs, provides funds for the closing of surplus health facilities, and increased funding for health systems agencies.

Title III contains provisions to encourage comprehensive ambulatory health care centers. This encouragement comes through the awarding of grants and loans for the construction and modernization of ambulatory health care centers, which concentrate on ambulatory services and which meet certain other criteria. It also provides for the training of personnel for comprehensive ambulatory health care centers and professional standards review organizations.

Title IV establishes a Health Policy Board in the executive branch. The board will be made up of three members, appointed by the President with the advice and consent of the Senate. The board will be authorized to employ such staff as necessary to carry out its functions. Among those functions is the preparation for an annual health report of the President. The Title outlines the additional functions of the board as well as the issues to be examined in the President's report.

Title V. Provisions to make comprehensive health care insurance available to all. This title outlines a plan for the delivery of comprehensive health care insurance.

The bill sets minimum standards to be met by health insurance policies and provides incentives for compliance with these standards. There are three types of plans: those purchased by Employers and Employees, those purchased by individuals, and those offered through a State plan. Minimum standards for all these plans are the same and are phased in in two stages as follows:

PHASE I—1979

1. Unlimited hospital in and out-patient services for physical care.

2. All professional services for the diagnosis or treatment of injuries, illnesses or conditions other than dental and mental, by or at the direction of a physician.

3. The first 20 out-patient mental health visits.

4. 90 days hospitalization for mental conditions.

5. Drugs and contraceptive devices that require a prescription.

6. 180 days of skilled nursing care.

7. 270 days of home health care.

8. Use of radium or radioactive materials, oxygen, anesthetics, prostheses, and medical equipment.

9. Oral surgery on impacted teeth, and for a tooth root.

10. Diagnostic X-rays and laboratory tests performed other than while an inpatient in a hospital or skilled nursing facility.

11. Well child care, including immunizations for children under age five.

12. One oral examination per year, including prophylaxis, dental X-rays, topical application of fluoride and insertion of space maintainers, by a dentist or, at his direction, a dental hygienist, for children under age thirteen.

13. One eye refraction per year for children under age 13.

14. One pre-natal examination by a physician during each trimester of a pregnancy.

PHASE II—1987

15. Dental care for fillings and extractions.

16. Other dental services and prostheses, except orthodontia.

17. Services of a Physical Therapist.

18. Services of a Speech Therapist.

19. One eye refraction every three years.

20. Eye glasses, one per year for under 19, one every three years for over 19.

21. One hearing exam every three years.

22. Hearing aids, one per three years under 19, one per lifetime for over 19.

23. One physical every 5 years for individuals 5 years old or older.

24. Counseling on family planning and fitting of contraceptive device.

25. One PAP smear every 2 years for women 19 and over.

LIMITATION ON DEDUCTIBLES AND CO-PAYMENTS

The maximum allowable deductible is $100 and the maximum co-payment is 20 percent with the exception of items 3 and 16 in which the maximum is 50 percent.

To encourage out-patient treatment and diagnosis, a separate hospital deductible equal to the hospital's first day room and board charge is allowed.

Conversely, no co-payments or deductibles are allowed with regard to out-patient diagnostic x-rays and tests, well child care, oral and vision exams for children, and pre-natal care. A qualified plan must pay 100 percent of these benefits.

There is a limit of $1,000 on total co-payment and deductible charges per family in any benefit year. All these payments (deductible, co-payment, and total) are adjusted according to ability to pay under the state plan.

QUALIFIED EMPLOYEE HEALTH CARE PLANS

This plan would be purchased by the employer for the employees and their families. The maximum allowable employee contribution would be 50 percent of the cost of the plan, with a special income related limit on contributions by low income employees.

Provided that the plant at least met minimum standards, it would be deemed a Qualified Employee Plan (QEP), and the employee's share, if any, would be an allowable tax deduction.

Any employer whose health benefit plan does not meet the minimum standards in 1979 would lose 50 percent of his allowable income tax deduction attributable to his plan. After 1980 his deduction would be totally eliminated unless the minimum standards were met.

Further the plan must include the following:

Provisions to continue coverage of an employee who is laid off or terminated to the end of the second calendar month following the calendar month in which employment terminated. At the end of that period, the individual could be enrolled in the State plan, thus providing continuing health care coverage while unemployed.

Provisions to continue coverage of the dependents of an employee who dies to the end of the second calendar month following the calendar month in which death occurred.

Provisions to continue coverage a minimum of 30 months for an employee absent due to illness or injury.

Provisions to allow dependent children to be covered beyond the child's 19th birthday.

Provisions must be allowed for continuity of coverage during employment changes.

QUALIFIED INDIVIDUAL HEALTH CARE PLANS

A 100 percent income tax deduction would be allowed on any plan purchased by an individual from a third party carrier or health maintenance organization which meets the minimum standards. This would take effect upon passage of the Act which changes the current IRS deduction provision.

STATE HEALTH CARE PLANS FOR POOR AND NEAR POOR

Benefits: In order to be a qualified plan, the Qualified State Health Care Plan would have to provide exactly the same benefits as the Qualified Employee Health Care Plan and the Qualified Individual Health Care Plan. Deductibles and co-payments would be restricted and scaled to income.

Eligibility: Any individual or family (1) on welfare or (2) who has income of less than $5,000 as an individual, $7,500 as a family of two, or $10,000 as a family of three or more and is not eligible to join a qualified employee plan is eligible to join the State plan on a subsidized basis. The poor would pay no premium; others would pay a partial premium scaled to income. Laid-off employees who meet the income test for two consecutive months would also be eligible.

Administration: The plan would be administered by an administering carrier designated by the State and approved by the Secretary of HEW. The premium rates for the plan would be set by the carrier and reviewed by the State Insurance Commissioner and the Chief Actuary of the Social Security Administration.

Funding: The plan would be financed by the State, less the partial premiums paid by the insureds. The State, in return for having a qualified plan, would be reimbursed by the Federal government for from 70 to 90 percent of its cost, depending on the income level of the state. After July 1, 1979, no state would be reimbursed under Medicaid for any service included in health care benefits.

Cost Control: All payments for health care under Federally-supported programs would be tied to prevailing fees and to peer review of those professional services that fall outside of professionally established guidelines, assuring appropriateness of treatment, quality of care, and reasonableness of physician fees. Review and approval would come from an appropriate health services review organization or, in its absence, by the organizations administering Federal programs.

Benefits could be assigned physicians only if the physician agrees to accept assignments all of the time for all of his patients. Such physicians would be known as Particiapting Physicians, and their names would be made known to the public.

Payment to hospitals or other health care institutions under Federal programs would be subject to approval by a State Healthcare Institutions Cost Commission appointed by the Governor. All such institutions would be required to:

A. Have an active review committee to check appropriateness and quality of services.

B. Utilize a standard system of accounts and cost finding.

C. Use "prospective approved charges" for all patients. Such a system would involve review and approval in advance by the State Commission of the proposed charges, assuring charges reasonably related to the cost of effectively providing necessary services.

BENEFITS FOR THE PREVIOUSLY UNINSURABLE

The risk for those previously uninsurable for health reasons would be borne entirely by the health insurance industry.

HEALTH CARE PROGRAM COST

A cost study done for HEW by Gordon Trapnell Associates in September 1976 estimates that passage of the National Health Care Act would result in increased Federal expenditures of $7.7 billion by 1980.

CONGRESSIONAL PAY RAISE DEFERRAL ACT

(Mr. PEASE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PEASE. Mr. Speaker, on Tuesday, January 4, I was one of the four original sponsors of the Congressional Pay Raise Deferral Act. I am therefore pleased to note that Mr. WHALEN today reintroduced that legislation with 21 new cosponsors.

Of course, we expect many more Members to join us in supporting this important legislation—indeed, the bill attracted 85 cosponsors in the last Congress. However, I do think that you can get some measure of the breadth of support by looking at the fact that in just 2 days this proposal has already been sponsored by 25 Members who represent a complete ideological and geographic cross-section of the Congress.

In the very near future we will be circulating a "Dear Colleague" letter on this legislation, and I hope that many more Members will take that opportunity to join us as cosponsors of the Congressional Pay Raise Deferral Act.

RANKING MINORITY MEMBER IS CORRECT IN HIS OPPOSITION TO CHAIRMAN'S STATEMENT

(Mr. FRENZEL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. FRENZEL. Mr. Speaker, earlier the House was addressed by the distinguished gentleman from Pennsylvania (Mr. DENT) who was in the past several Congresses, the chairman of the Elections Subcommittee of the House Administration Committee. Immediately following, the distinguished gentleman from California (Mr. WIGGINS) who has been the ranking minority member of the Elections Subcommittee, expressed his opposition to the Dent statement and noted, correctly, that the individual opinion of a Member of Congress is of interest, but it does not necessarily represent a judgment of this body or any of its committees.

I should like to add my own personal judgment that, despite attempts by individual Members of Congress to give their statements some special standing by inserting them in the CONGRESSIONAL RECORD, such statements are always interesting, sometimes informative, and occasionally correct. But, they have neither the force of law, nor any special standing whatsoever.

While the only way we can write law in this body is to pass bills, all of us can express opinions. My own is that the gentleman from California is correct in his opposition to the statement of the gentleman from Pennsylvania.

States do have jurisdiction in these matters. The Roudebush case cited by the gentleman from California is a recent and vivid example. So are the cases of our colleague from Louisiana, Mr. MOORE, and our ex-colleague from New Hampshire, Mr. Wyman.

The House may exercise its ultimate jurisdiction later, but there is no question that the Texas court has its own jurisdiction in the Gammage-Paul case.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. EMERY) and to revise and extend their remarks and include extraneous matter:)

Mr. BAUMAN, for 15 minutes, today.
Mr. STEIGER, for 15 minutes, today.
Mr. HANSEN, for 60 minutes, on Tuesday, January 11.
Mr. PRITCHARD, for 5 minutes, today.

(The following Members (at the request of Mr. CAVANAUGH) to revise and extend their remarks and include extraneous matter:)

Mr. REUSS, for 30 minutes, today.
Mr. ST GERMAIN, for 5 minutes, today.
Mr. FLOOD, for 5 minutes, today.
Mr. KASTENMEIER, for 5 minutes, today.
Mr. VANIK, for 5 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. RODINO, for 5 minutes, today.
Mr. KOCH, for 10 minutes, today.
Mr. MAHON, for 5 minutes, today.
Mr. JONES of North Carolina, for 5 minutes, today.
Mr. DAN DANIEL, for 60 minutes, on January 11.
Mr. KOCH, for 60 minutes, on January 11.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. CORMAN, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the CONGRESSIONAL RECORD and is estimated by the Public Printer to cost $2,645.50.

(The following Members (at the request of Mr. EMERY), and to include extraneous material:)

Mr. COLLINS of Texas, in five instances.
Mr. COHEN in three instances.
Mr. RUPPE.
Mr. WIGGINS.
Mr. HORTON.
Mr. DERWINSKI in three instances.
Mr. MCCLORY in two instances.
Mr. RUDD in five instances.
Mr. HANSEN in four instances.
Mr. GILMAN.
Mr. MICHEL.
Mr. BOB WILSON.
Mr. ASHBROOK in two instances.

(The following Members (at the request of Mr. CAVANAUGH), and to include extraneous material:)

Mr. GONZALEZ in three instances.
Mr. ANDERSON of California in three instances.
Mr. KOCH in three instances.
Mr. DE LA GARZA in 10 instances.
Mr. ALEXANDER in 10 instances.
Mr. ROSENTHAL in 10 instances.
Ms. HOLTZMAN in 10 instances.
Mr. OTTINGER.
Mr. BLANCHARD.
Mr. BRINKLEY.
Mr. CONYERS in five instances.
Mr. JONES of North Carolina.
Mr. WAXMAN in two instances.
Mr. MIKVA in two instances.
Mr. MCDONALD in three instances.

ADJOURNMENT

Mr. CAVANAUGH. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 51 minutes p.m.) under its previous order, the House adjourned until Monday, January 10, 1977, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

[*Omitted from the Record of January 4, 1977*]

347. A letter from the Secretary of Transportation, transmitting the fifth annual report on the regulation of vessels carrying certain cargoes in bulk, pursuant to section 203 of the Ports and Waterways Safety Act of 1972; to the Committee on Merchant Marine and Fisheries.

348. A letter from the director, National Legislative Commission, The American Legion, transmitting the proceedings of the 58th annual national convention of The American Legion, the annual report, and the financial statement and independent audit of the organization (H. Doc. No. 95–30); to the Committee on Veterans' Affairs and ordered to be printed with illustrations.

349. A letter from the Chairman, U.S. Nuclear Regulatory Commission, transmitting the fifth report on abnormal occurrences at licensed nuclear facilities, covering the period April–June 1976, pursuant to section 208 of Public Law 93–438; jointly, to the Committee on Interior and Insular Affairs, and Interstate and Foreign Commerce.

350. A letter from the Under Secretary of Health, Education, and Welfare, transmitting the second annual report and analysis of the findings of medicare validation sample surveys of hospitals accredited by the Joint Commission on Accreditation of Hospitals, pursuant to section 1875(b) of the Social Security Act; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

RECEIVED FROM THE COMPTROLLER GENERAL

351. A letter from the Comptroller General of the United States, transmitting his review of the proposed rescissions and revised deferral of budget authority contained in the message from the President dated September 22, 1976 (House Document No. 94–620), pursuant to section 1014(b) and (c) of Public Law 93–344 (H. Doc. No. 95–31); to the Committee on Appropriations and ordered to be printed.

352. A letter from the Comptroller General of the United States, transmitting a report on improvements needed in the Federal Communications Commission's financial disclosure system; jointly, to the Com-

mittees on Government Operations, the Judiciary, and Post Office and Civil Service.

353. A letter from the Comptroller General of the United States, transmitting a report on an evaluation of the status of the Fast Flux Test Facility, Energy Research and Development Administration; jointly, to the Committees on Government Operations, and Science and Technology.

[*Submitted January 6, 1977*]

354. A letter from the Secretary of the Treasury, transmitting the fifth annual report of the Emergency Loan Guarantee Board, covering the period August 1, 1975, through September 30, 1976, pursuant to section 12 of Public Law 92–70; to the Committee on Banking, Finance and Urban Affairs.

355. A letter from the Secretary of the Treasury, transmitting a report on the state of the United States coinage; to the Committee on Banking, Finance and Urban Affairs.

356. A letter from the Attorney General, transmitting notice of three proposed new systems of records for the Department of Justice, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

357. A letter from the Chairman, Federal Power Commission, transmitting notice of the Commission's intention to adopt new or intended uses of information in certain of its existing records systems, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

358. A letter from the Acting Assistant Secretary of State for Congressional Relations, transmitting notice of a proposed license for the export of major defense equipment sold commercially (Transmittal No. MC–19–77), pursuant to section 36(c) of the Arms Export Control Act; to the Committee on International Relations.

359. A letter from the Acting Assistant Secretary of State for Congressional Relations, transmitting notice of a proposed license for the export of major defense equipment sold commercially (Transmittal No. MC–20–77), pursuant to section 36(c) of the Arms Export Control Act; to the Committee on International Relations.

360. A letter from the Acting Assistant Secretary of State for Congressional Relations, transmitting notice of a proposed license for the export of defense articles or services sold commercially (Transmittal No. MC–22–77), pursuant to section 36(c) of the Arms Export Control Act; to the Committee on International Relations.

361. A letter from the General Counsel, Federal Energy Administration, transmitting notice of a meeting related to the International Energy Program; to the Committee on Interstate and Foreign Commerce.

362. A letter from the Chairman, Federal Power Commission, transmitting a report on the requirements of the Federal Power Act and the Natural Gas Act which require, permit or induce the inefficient use of energy, pursuant to section 382(a)(3) of Public Law 94–163; to the Committee on Interstate and Foreign Commerce.

363. A letter from the Clerk, U.S. Court of Claims, transmitting a report on all judgments rendered by the Court of Claims during the year ended September 30, 1976, pursuant to 28 U.S.C. 791(c); to the Committee on the Judiciary.

364. A letter from the national executive director, American Veterans of World War II, Korea and Vietnam, transmitting the audit report of AMVETS for the year ended August 31, 1976, pursuant to section 3 of Public Law 88–504; to the Committee on the Judiciary.

365. A letter from the Administrator of General Services, transmitting a prospectus proposing a succeeding lease for space presently occupied at 2000 M Street, N.W., Washington, D.C., pursuant to section 7 of the Public Buildings Act of 1959, as amended; to the Committee on Public Works and Transportation.

RECEIVED FROM THE COMPTROLLER GENERAL

366. A letter from the Comptroller General of the United States, transmitting a report on problems in supporting weapons systems produced by other countries; jointly, to the Committees on Government Operations, and Armed Services.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

[*Introduced Jan. 4, 1977*]

By Mr. ABDNOR:

H.R. 122. A bill to prohibit travel at Government expense outside the United States by Members of Congress who have been defeated, or who have resigned, or retired; to the Committee on House Administration.

H.R. 123. A bill to provide for the compensation of innocent persons killed or injured or whose property was damaged in the course of the occupation of Wounded Knee, S. Dak., and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 124. A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits thereunder; to the Committee on Ways and Means.

By Mr. ABDNOR (for himself and Mr. PRESSLER):

H.R. 125. A bill to amend the act entitled "An Act authorizing the Secretary of the Interior to arrange with States or territories for the education, medical attention, relief of distress, and social welfare of Indians, and for other purposes", approved April 16, 1934 (48 Stat. 596; 25 U.S.C. 452 et seq.); to the Committee on Education and Labor.

By Mr. AMBRO:

H.R. 126. A bill to amend the Housing and Community Development Act of 1974 with regard to the definition of the term "city" as it is used in that act; to the Committee on Banking, Finance and Urban Affairs.

H.R. 127. A bill to amend the Internal Revenue Code of 1954 to allow individuals a credit against income tax for expenses paid by a taxpayer in connection with his education or the education of his spouse or any of his dependents at an institution of higher learning; to the Committee on Ways and Means.

H.R. 128. A bill to amend the Internal Revenue Code of 1954 to allow individuals who have attained age 65 a nonrefundable tax credit for property taxes paid by them on their principal residences or for a certain portion of the rent they pay for their principal residences; to the Committee on Ways and Means.

By Mr. ANDREWS of North Carolina:

H.R. 129. A bill to amend the Budget and Accounting Act, 1921, to emphasize the fact that the President's annual budget is a proposal or recommendation only, requiring action by the Congress (with or without modification) for its effectuation, and to require that Federal agencies make this fact clear in all of their budgetary statements and publications; to the Committee on Government Operations.

By Mr. DINGELL:

H.R. 130. A bill to provide for the protection of franchised distributors and retailers of motor fuel; to encourage conservation by requiring that information regarding the octane rating of automotive gasoline be disclosed to consumers; and to prevent deterioration of competition in gasoline marketing; to the Committee on Interstate and Foreign Commerce.

By Mr. ANDREWS of North Carolina:

H.R. 131. A bill to grant a Federal charter to the National Humanities Center; to the Committee on the Judiciary.

By Mr. ANNUNZIO:

H.R. 132. A bill to amend the Labor-Management Reporting and Disclosure Act of 1959 with respect to the terms of office of officers of local labor organizations; to the Committee on Education and Labor.

H.R. 133. A bill to amend the act of March 2, 1931, to provide that certain proceedings of the Italian American War Veterans of the United States, Inc., shall be printed as a House document, and for other purposes; to the Committee on House Administration.

H.R. 134. A bill to make additional immigrant visas available for immigrants from certain foreign countries, and for other purposes; to the Committee on the Judiciary.

H.R. 135. A bill to amend the Immigration and Nationality Act to facilitate the entry of foreign tourists into the United States, and for other purposes; to the Committee on the Judiciary.

H.R. 136. A bill to grant a Federal charter to the Italian American War Veterans of the United States; to the Committee on the Judiciary.

H.R. 137. A bill to amend title 38 of the United States Code to make certain that recipients of veterans' pension and compensation will not have the amount of such pension or compensation reduced because of increases in monthly social security benefits; to the Committee on Veterans' Affairs.

H.R. 138. A bill to amend chapter 59 of title 38, United States Code, to provide for the recognition of representatives of the Italian American War Veterans of the United States, and for other purposes; to the Committee on Veterans' Affairs.

H.R. 139. A bill to increase for a 5-year period the duty on certain hand tools, and for other purposes; to the Committee on Ways and Means.

H.R. 140. A bill to permit officers and employees of the Federal Government to elect coverage under the old-age, survivors, and disability insurance system; to the Committee on Ways and Means.

H.R. 141. A bill to amend the Internal Revenue Code of 1954 to allow a deduction, for income tax purposes, based on expenses incurred by the taxpayer for the higher education of his children; to the Committee on Ways and Means.

By Mr. ASHBROOK:

H.R. 142. A bill to authorize recomputation at age 60 of the retired pay of members and former members of the uniformed services whose retired pay is computed on the basis of pay scales in effect prior to January 1, 1972, and for other purposes; to the Committee on Armed Services.

H.R. 143. A bill to repeal sections 102 and 202 of the Flood Disaster Protection Act of 1973 which make flood insurance coverage and community participation in the national flood insurance program prerequisites for approval of any financial assistance in a flood hazard area, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. GRASSLEY:

H.R. 144. A bill to provide that Federal expenditures shall not exceed Federal revenues, except in time of war or grave national emergency declared by the Congress, and to provide for systematic reduction of the public debt; to the Committee on Ways and Means.

By Mr. ASHBROOK:

H.R. 145. A bill restricting funds used to aid India; to the Committee on International Relations.

H.R. 146. A bill to prohibit Soviet energy investments; to the Committee on International Relations.

H.R. 147. A bill to reduce payments to the

United Nations and its affiliated agencies; to the Committee on International Relations.

H.R. 148. A bill relating to the settlement of debts owed the United States by foreign countries; to the Committee on International Relations.

H.R. 149. A bill to protect the safety and welfare of American workers by providing for a uniform system of identification for all receptacles containing compressed gas; to the Committee on Interstate and Foreign Commerce.

H.R. 150. A bill to expand the medical freedom of choice of consumers by amending the Federal Food, Drug, and Cosmetic Act to provide that drugs will be regulated under that act solely to assure their safety; to the Committee on Interstate and Foreign Commerce.

H.R. 151. A bill to reaffirm the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering service in interstate and foreign commerce; to grant additional authority to the Federal Communications Commission to authorize mergers of carriers when deemed to be in the public interest; to reaffirm the authority of the States to regulate terminal and station equipment used for telephone exchange service; to require the Federal Communications Commission to make certain findings in connection with Commission actions authorizing specialized carriers, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 152. A bill to amend the Internal Security Act of 1950 to control and penalize terrorists, and for other purposes; to the Committee on the Judiciary.

H.R. 153. A bill to extinguish Federal court jurisdiction to require attendance at a particular school of any student because of race, color, creed, or sex; to the Committee on the Judiciary.

H.R. 154. A bill to limit the jurisdiction of the Supreme Court of the United States and of the district courts to enter any judgment, decree, or order, denying or restricting, as unconstitutional, voluntary prayer in any public school; to the Committee on the Judiciary.

H.R. 155. A bill to amend section 4 of the Internal Security Act of 1950; to the Committee on the Judiciary.

H.R. 156. A bill to repeal the Gun Control Act of 1968; to the Committee on the Judiciary.

H.R. 157. A bill to amend chapter 44 of title 18, United States Code, to exempt ammunition from Federal regulations under the Gun Control Act of 1968; to the Committee on the Judiciary.

H.R. 158. A bill to make it a Federal crime to kill or assault a fireman or law enforcement officer engaged in the performance of his duties when the offender travels in interstate commerce or uses any facility of interstate commerce for such purposes; to the Committee on the Judiciary.

H.R. 159. A bill to provide additional penalties for the use of firearms or destructive devices in the commission of certain crimes of violence; to the Committee on the Judiciary.

H.R. 160. A bill to amend the Marine Mammal Protection Act of 1972 to deny aid, credit, loans, or loan guarantees to nations under certain circumstances; to the Committee on Merchant Marine and Fisheries.

H.R. 161. A bill to provide that certain criminal penalties imposed as a result of the failure of an individual to answer to questions submitted in connection with a census or survey conducted under title 13, United States Code, shall not be applicable to any census taken under section 142 of such title; to the Committee on Post Office and Civil Service.

H.R. 162. A bill to remove certain criminal penalties imposed as a result of the failure of an individual to answer questions submitted in connection with a census or survey conducted under title 13, United States Code; to the Committee on Post Office and Civil Service.

H.R. 163. A bill to guarantee that every employee of the Federal Government shall have the right to refrain from union activity; to the Committee on Post Office and Civil Service.

H.R. 164. A bill to require that estimates of the average cost for each taxpaying family be included in all bills and resolutions of a public character introduced and reported in the Senate and the House of Representatives; to the Committee on Rules.

H.R. 165. A bill to amend the Internal Revenue Code of 1954 to allow an income tax credit for tuition expenses of the taxpayer or his spouse or a dependent at an institution of higher education, and an additional credit for gifts or contributions made to any institution of higher education; to the Committee on Ways and Means.

H.R. 166. A bill to amend title II of the Social Security Act to increase to $5,000 the amount of outside earnings permitted each year without deductions from benefits thereunder; to the Committee on Ways and Means.

H.R. 167. A bill to amend the Internal Revenue Code of 1954 to provide a basic $5,000 exemption from income tax, in the case of an individual or a married couple, for amounts received as annuities, pension, or other retirement benefits; to the Committee on Ways and Means.

H.R. 168. A bill to amend the Internal Revenue Code of 1954 to allow certain individuals a deduction for the expenses of operating a motor vehicle to transport their children to public school; to the Committee on Ways and Means.

H.R. 169. A bill to amend the Tariff Act of 1930 in regard to iron pipe fittings; to the Committee on Ways and Means.

H.R. 170. A bill to amend title XI of the Social Security Act to repeal the recently added provision for the establishment of professional standards review organizations to review services covered under the medicare and medicaid programs; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

H.R. 171. A bill entitled the "Economic Recovery and Sustained Growth Act of 1977"; jointly, to the Committee on Ways and Means, Rules, Banking, Finance and Urban Affairs, and Education and Labor.

By Mr. BAFALIS:

H.R. 172. A bill to amend section 5(a) of the Wild and Scenic Rivers Act by designating the Loxahatchee River in Florida as a potential addition to the National Wild and Scenic Rivers System; to the Committee on Interior and Insular Affairs.

H.R. 173. A bill to amend section 5(a) of the Wild and Scenic Rivers Act by designating the Myakka River in Florida as a potential addition to the National Wild and Scenic Rivers System; to the Committee on Interior and Insular Affairs.

By Mr. BENNETT:

H.R. 174. A bill to amend title 10, United States Code, to regulate the discharge of members of the Armed Forces, and for other purposes; to the Committee on Armed Services.

H.R. 175. A bill to amend the Strategic and Critical Materials Stock Piling Act, and for other purposes; to the Committee on Armed Services.

H.R. 176. A bill to permit the National Park Service to accept privately donated funds and to expend such funds on property on the National Register of Historic Places; to the Committee on Interior and Insular Affairs.

H.R. 177. A bill to amend the Federal Aviation Act of 1958 to require regulations prohibiting air carriers from dispensing alcoholic beverages and tobacco without charge to passengers aboard air carrier aircraft; to the Committee on Public Works and Transportation.

H.R. 178. A bill to extend to all unmarried individuals the full tax benefits of income splitting now enjoyed by married individuals filing joint returns; and to remove rate inequities for married persons where both are employed; to the Committee on Ways and Means.

H.R. 179. A bill to amend title II of the Social Security Act to remove the earnings limitation and to permit benefit payments to a widower, parent, or child despite his or her marriage if such marriage is annulled; to the Committee on Ways and Means.

By Mr. BIAGGI:

H.R. 180. A bill to amend the Elementary and Secondary Education Act of 1965 to assist school districts to carry out school security plans to reduce crime against children, employees, and facilities of their schools, to provide for the reporting of crimes committed in schools, and for other purposes; to the Committee on Education and Labor.

H.R. 181. A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968 to require as a condition of assistance under such act that law enforcement agencies have in effect a binding law enforcement officers' bill of rights; to the Committee on the Judiciary.

H.R. 182. A bill to amend title I of the Omnibus Crime Control and Safe Streets Act of 1968 to provide assistance to prevent police layoffs caused by budgetary problems; to the Committee on the Judiciary.

H.R. 183. A bill to amend section 924 of title 18 to increase the penalties for certain offenses relating to firearms, and to provide mandatory minimum penalties in certain circumstances; to the Committee on the Judiciary.

H.R. 184. A bill to simplify the tonnage measurement of certain vessels; to the Committee on Merchant Marine and Fisheries.

H.R. 185. A bill to amend section 2632 of title 10, United States Code, to provide the Secretary of the department in which the Coast Guard is operating with the authority to transport Coast Guard employees to and from certain places of employment; to the Committee on Merchant Marine and Fisheries.

H.R. 186. A bill to implement the Convention on the International Regulations for Preventing Collisions at Sea, 1972; to the Committee on Merchant Marine and Fisheries.

H.R. 187. A bill to revise and improve the laws relating to the documentation of vessels, and for other purposes; to the Committee on Merchant Marine and Fisheries.

H.R. 188. A bill to amend the Intervention on the High Seas Act to implement the Protocol Relating to Intervention on the High Seas in Cases of Marine Pollution by Substances Other Than Oil, 1973; to the Committee on Merchant Marine and Fisheries.

H.R. 189. A bill to amend the Federal Boat Safety Act of 1971 in order to provide for an annual "National Safe Boating Week", and for other purposes; to the Committee on Post Office and Civil Service.

H.R. 190. A bill to amend the Internal Revenue Code of 1954 to allow a deduction to individuals who rent their principal residences for a portion of the real property taxes paid or accrued by their landlords; to the Committee on Ways and Means.

H.R. 191. A bill to amend title II of the Social Security Act to reduce from 60 to 45 the age at which a woman otherwise qualified may become entitled to widow's insurance benefits; to the Committee on Ways and Means.

H.R. 192. A bill to amend title IV of the Social Security Act to eliminate the present 10-percent limitation on the propor-

tion of the total number of recipients of aid to families with dependent children in any State who may receive such aid in the form of restricted or protective payments; to the Committee on Ways and Means.

By Mr. BINGHAM:

H.R. 193. A bill to amend the Elementary and Secondary Education Act of 1965 to assist school districts to carry out locally approved school security plans to reduce crime against children, employees, and facilities of their schools; to the Committee on Education and Labor.

H.R. 194. A bill to make requirements with respect to the disclosure of marital status the same for men and women in matters relating to voting qualifications in Federal elections; to the Committee on House Administration.

H.R. 195. A bill to designate a segment of the Delaware River flowing between the State of New York and the State of Pennsylvania as a component of the National Wild and Scenic Rivers System, and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 196. A bill to prohibit the introduction, or manufacture for introduction, into interstate commerce of tear gas, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 197. A bill to amend the Immigration and Nationality Act, to make it unlawful to knowingly hire an alien not lawfully admitted into the United States, and for other purposes; to the Committee on the Judiciary.

H.R. 198. A bill for the relief of certain residents of Northern Ireland; to the Committee on the Judiciary.

H.R. 199. A bill to amend the Urban Mass Transportation Act of 1964 to insure that transportation facilities built and rolling stock purchased with Federal funds are designed and constructed to be accessible to the physically handicapped and the elderly; to the Committee on Public Works and Transportation.

H.R. 200. A bill to provide for judicial review of administrative determinations made by the Board of Veterans' Appeals; to the Committee on Veterans' Affairs.

H.R. 201. A bill to amend the Internal Revenue Code of 1954 to provide a basic $5,000 exemption from income tax for amounts received as annuities, pensions, or other retirement benefits; to the Committee on Ways and Means.

H.R. 202. A bill to amend the Internal Revenue Code of 1954 to provide, in the case of an individual, a credit (not to exceed $200) or a deduction (not to exceed $800) for public transit fare expenditures incurred in traveling to and from work; and in the case of a handicapped individual unable to use public transportation, a credit (not to exceed $750) or a deduction (not to exceed $3,000) for reasonable transportation expenses incurred in traveling to and from work; to the Committee on Ways and Means.

H.R. 203. A bill to permit officers and employees of the Federal Government to elect coverage under the old-age, survivors, and disability insurance system; to the Committee on Ways and Means.

H.R. 204. A bill to provide for the monthly publication of a Consumer Price Index for the Elderly which shall be used in the provision of cost-of-living benefit increases authorized by title II of the Social Security Act; to the Committee on Ways and Means.

H.R. 205. A bill to facilitate the economic adjustment of communities, industries, and workers who may be substantially and seriously affected by reductions in defense contracts and facilities which are undertaken to realine defense expenditures with changed national security requirements and to prevent the ensuing dislocations from contributing to or exacerbating recessionary effects on the aforementioned groups; jointly, to the Committees on Banking, Finance and Urban Affairs, Armed Services, Education and Labor, Government Operations, and Ways and Means.

H.R. 206. A bill to provide that all petroleum imported into the United States after September 1, 1977 shall not be available for purchase other than by the Government of the United States; jointly to the Committees on Interstate and Foreign Commerce, and Ways and Means.

By Mr. BOLAND:

H.R. 207. A bill to extend to all unmarried individuals the full tax benefits of income splitting now enjoyed by married individuals filing joint returns, and to remove rate inequities for married persons where both are employed; to the Committee on Ways and Means.

H.R. 208. A bill to increase for a 5-year period the duty on certain hand tools, and for other purposes; to the Committee on Ways and Means.

H.R. 209. A bill to create the Young Adult Conservation Corps to complement the Youth Conservation Corps; to the Committee on Education and Labor.

By Mr. BRINKLEY:

H.R. 210. A bill to establish the Federal Housing Administration as an independent Federal agency and to provide a statutory basis for the administration by such agency of standard risk programs under the National Housing Act; to the Committee on Banking, Finance and Urban Affairs.

H.R. 211. A bill to amend the Public Health Service Act to improve the national cancer program and to authorize increased appropriations for such program for the next 4 fiscal years, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 212. A bill to provide that the park referred to as the East Lake Park located within the West Point Lake project on the Chattahoochee River, Ga., shall hereafter be known and designated as the "R. Shaefer Heard Park"; to the Committee on Public Works and Transportation.

H.R. 213. A bill to amend the Internal Revenue Code of 1954 to allow a credit against income tax to individuals for certain expenses incurred in providing higher education; to the Committee on Ways and Means.

By Mr. KASTENMEIER:

H.R. 214. A bill to require a subpena or other judicial order prior to the inspection of bank, credit or telephone toll records by an officer, employee, or agent of the United States, to regulate the use of mail covers, and to regulate the interception of wire or oral communications by communications common carriers, and for other purposes; jointly to the Committees on Banking, Finance and Urban Affairs and the Judiciary.

By Mr. WHALEN:

H.R. 215. A bill to protect citizens' privacy rights, establishing guidelines for access to third party records, regulating the use of mail covers, liimting telephone service monitoring, and protecting nonaural wire communications; jointly to the Committees on Banking, Finance and Urban Affairs and the Judiciary.

By Mr. BRINKLEY:

H.R. 216. A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits thereunder; to the Committee on Ways and Means.

By Mr. BRINKLEY (for himself, Mr. FLYNT, Mr. MATHIS, Mr. GINN, Mr. YOUNG of Georgia, Mr. LEVITAS, Mr. MCDONALD, Mr. BARNARD, Mr. EVANS of Georgia, and Mr. JENKINS):

H.R. 217. A bill to amend the Federal Civil Defense Act of 1950 to allow Federal civil defense funds to be used by local civil defense agencies for natural disaster relief, and for other purposes; to the Committee on Armed Services.

By Mr. BRINKLEY (for himself, Mr. FLYNT, Mr. MATHIS, Mr. GINN, Mr. YOUNG of Georgia, Mr. LEVITAS, Mr. MCDONALD, Mr. BARNARD, Mr. EVANS of Georgia, and Mr. JENKINS):

H.R. 218. A bill to incorporate the Gold Star Wives of America; to the Committee on the Judiciary.

H.R. 219. A bill to designate the new general medical and surgical Veterans' Administration hospital to be located adjacent to the Medical College of Georgia in Augusta, Ga., as the "Robert G. Stephens, Jr., Veterans' Administration Hospital"; to the Committee on Veterans' Affairs.

By Mr. BRINKLEY (for himself, Mr. NICHOLS, and Mr. DANIELSON):

H.R. 220. A bill to provide for the establishment within the National Cemetery System of the Fort Mitchell Regional Veterans' Cemetery in Russell County, Ala.; to the Committee on Veterans' Affairs.

By Mr. BRODHEAD:

H.R. 221. A bill to amend the Clean Air Act to provide a postponement of certain motor vehicle emission standards through model year 1979; to the Committee on Interstate and Foreign Commerce.

By Mr. CHAPPELL:

H.R. 222. A bill to amend title 10, United States Code, to provide a new Assistant Secretary of Defense for Reserve Affairs and to change the existing position of Assistant Secretary of Defense for Manpower and Reserve Affairs to Assistant Secretary of Defense for Manpower; to the Committee on Armed Services.

H.R. 223. A bill to amend the Export-Import Bank Act of 1945 to authorize the President to suspend credit for exports to certain countries; to the Committee on Banking, Finance and Urban Affairs.

H.R. 224. A bill to amend the Occupational Safety and Health Act of 1970, and for other purposes; to the Committee on Education and Labor.

H.R. 225. A bill to provide Federal assistance to States to enable them to provide day care services for children from needy families where the parents are working, training, or incapable of self-support; to the Committee on Education and Labor.

H.R. 226. A bill to amend the Freedom of Information Act to exempt naval nuclear propulsion information from disclosure in the absence of a finding that such disclosure will not be inimical to the interests of the United States; to the Committee on Government Operations.

H.R. 227. A bill to provide for a study of a certain segment of the Oklawaha River for potential addition to the National Wild and Scenic Rivers System; to the Committee on Interior and Insular Affairs.

H.R. 228. A bill to amend title XVIII of the Social Security Act to provide for the administrative and judicial review of claims (involving the amount of benefits payable) which arise under the supplementary medical insurance program; to the Committee on Interstate and Foreign Commerce.

H.R. 229. A bill to amend title XIX of the Social Security Act to impose certain requirements relating to the discharge or transfer of medicaid patients from skilled nursing or intermediate care facilities, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 230. A bill to authorize the Attorney General to exchange criminal record information with certain State and local agencies; to the Committee on the Judiciary.

H.R. 231. A bill to establish an Antitrust Revision Commission; to the Committee on the Judiciary.

H.R. 232 A bill to assist in combating crime by reducing the incidence of recidivism, providing improved Federal, State, and local correctional facilities and services,

strengthening control over probationers, parolees, and persons found not guilty by reason of insanity, and for other purposes; to the Committee on the Judiciary.

H.R. 233. A bill to authorize the Secretary of the Interior to classify and inventory wetland resources, to measure wetlands degradation, to evaluate the environmental contribution of natural wetlands, and for other purposes; to the Committee on Merchant Marine and Fisheries.

H.R. 234. A bill to amend title 13 of the United States Code to require the compilation of current data on total population between censuses and to require the use of such current data in the administration of Federal laws in which population is a factor; to the Committee on Post Office and Civil Service.

H.R. 235. A bill to amend the Act of August 13, 1946, to increase the Federal contribution to 90 percent of the cost of shore restoration and protection projects; to the Committee on Public Works and Transportation.

H.R. 236. A bill to establish the Mineral Conservation Research and Development Commission within the National Science Foundation, and to provide for the inventory of major nonfuel raw materials and the development of substitute materials; to the Committee on Science and Technology.

H.R. 237. A bill to amend title 38 of the United States Code to permit veterans to determine how certain drugs and medicines will be supplied to them; to the Committee on Veterans' Affairs.

H.R. 238. A bill to provide for a Veterans' Administration hospital in the Halifax area of Volusia County, Fla.; to the Committee on Veterans' Affairs.

H.R. 239. A bill to provide for the establishment of a national cemetery in Florida; to the Committee on Veterans' Affairs.

H.R. 240. A bill to amend title 38 of the United States Code so as to treat certain expeditionary campaigns as periods of war for the purposes of such title; to the Committee on Veterans' Affairs.

H.R. 241. A bill to amend title II of the Social Security Act to eliminate the 5-month waiting period which is presently a prerequisite of eligibility for disability insurance benefits or the disability freeze; to the Committee on Ways and Means.

By Mr. CHAPPELL (for himself, Mr. LOTT, and Mr. ROBINSON):

H.R. 242. A bill to amend title II of the Social Security Act to provide that an individual may qualify for disability insurance benefits and the disability freeze if he has 40 quarters of coverage, regardless of when such quarters were earned; to the Committee on Ways and Means.

By Mr. CHAPPELL:

H.R. 243. A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits thereunder; to the Committee on Ways and Means.

H.R. 244. A bill to amend the Clean Air Act and to the Federal Water Pollution Control Act to provide that compliance orders shall include cost-benefit analyses; jointly to the Committees on Interstate and Foreign Commerce, and Public Works and Transportation.

H.R. 245. A bill to create a Marine Resources Conservation and Development Fund; to provide for the distribution of revenues from Outer Continental Shelf lands; and for other purposes; jointly, to the Committees on the Judiciary, Merchant Marine and Fisheries, and Interior and Insular Affairs.

By Mr. CHAPPELL (for himself, Mr. BEVILL, and Mr. MOORHEAD of California):

H.R. 246. A bill to amend the Internal Revenue Code of 1954 to exclude from gross income certain amounts received by members of certain firefighting and rescue units; to the Committee on Ways and Means.

By Mrs. COLLINS of Illinois:

H.R. 247. A bill to amend the Truth in Lending Act to require lenders to post current interest rates charged for various categories of loans to consumers; to the Committee on Banking, Finance and Urban Affairs.

H.R. 248. A bill to amend the Truth in Lending Act to prohibit discrimination on account of age in credit card transactions; to the Committee on Banking, Finance and Urban Affairs

H.R. 249. A bill to protect purchasers and prospective purchasers of condominium housing units, and residents of multifamily structures being converted to condominium units, by providing for the establishment of national minimum standards for condominiums (to be administered by a newly created Assistant Secretary in the Department of Housing and Urban Development), to encourage the States to establish similar standards, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

H.R. 250. A bill to amend the Elementary and Secondary Education Act of 1965 to preserve the eligibility of certain children for assistance through grade three, notwithstanding improvements in their reading aptitude; to the Committee on Education and Labor.

H.R. 251. A bill to provide that certain services under the Older Americans Act of 1965 be delivered by personnel trained in the field of aging and to encourage the development of training programs in the field of aging under the Higher Education Act of 1965; to the Committee on Education and Labor.

H.R. 252. A bill to make it an unfair practice for any retailer to increase the price of certain consumer commodities once he marks the price on any such consumer commodity, and to permit the Federal Trade Commission to order any such retailer to refund any amounts of money obtained by so increasing the price of such consumer commodity; to the Committee on Interstate and Foreign Commerce.

H.R. 253. A bill to amend title 5, United States Code, to require certain Federal agencies to provide to certain employees notice of procedures through which such employees may challenge actions taken against them by such agencies; to the Committee on Post Office and Civil Service.

H.R. 254. A bill to amend the Internal Revenue Code of 1954 to provide an additional personal exemption for certain elderly individuals whose spouses have died; to the Committee on Ways and Means.

H.R. 255. A bill to amend title XVIII of the Social Security Act to provide for coverage under part B of medicare for routine Papanicolaou test for the diagnosis of uterine cancer; jointly to the Committee on Ways and Means, and Interstate and Foreign Commerce.

By Mr. CONTE:

H.R. 256. A bill to establish a bureau of agricultural statistics for the purpose of monitoring the changes in prices which occur in the price of agricultural commodities from the time they are sold by the farmer until the time when the consumer purchases such commodities or products thereof, and for the purpose of making recommendations to the Congress with respect to correcting situations in which the retail price of an agricultural commodity, or product thereof, rises while the price received by the farmer for the same commodity decreases; to the Committee on Agriculture.

H.R. 257. A bill to authorize the disposal of silver from the national stockpile; to the Committee on Armed Services.

H.R. 258. A bill to establish in the Department of Housing and Urban Development a direct low-interest loan program to assist homeowners and other owners of residential structures in purchasing and installing more effective insulation and heating equipment; to the Committee on Banking, Finance and Urban Affairs.

H.R. 259. A bill to prohibit State and local law from permitting construction which interferes with sunlight necessary for solar heating and cooling equipment; to the Committee on Banking, Finance and Urban Affairs.

H.R. 260. A bill to create the Young Adult Conservation Corps to complement the Youth Conservation Corps; to the Committee on Education and Labor.

H.R. 261. A bill to amend the Higher Education Act of 1965 to require the Commissioner of Education to make payments of interest for eligible students within thirty days of receipt of a proper voucher, and for other purposes; to the Committee on Education and Labor.

H.R. 262. A bill to authorize the Commissioner of Education to make grants for teacher training, pilot and demonstration projects, and comprehensive school programs, with respect to health education and health problems; to the Committee on Education and Labor.

H.R. 263. A bill to amend the National Labor Relations Act to provide that the duty to bargain collectively includes bargaining with respect to retirement benefits for retired employees; to the Committee on Education and Labor.

H.R. 264. A bill to prohibit discriminatory employment practices with respect to physically handicapped persons; to the Committee on Education and Labor.

H.R. 265. A bill to terminate age discrimination in employment; to the Committee on Education and Labor.

H.R. 266. A bill to amend the Comprehensive Employment and Training Act of 1973 to provide that a unit or combination of units of general local government having a population of 50,000 or more shall be eligible to be a prime sponsor, and for other purposes; to the Committee on Education and Labor.

H.R. 267. A bill to amend the Occupational Safety and Health Act of 1970 to provide additional consultation and education to employers, and for other purposes; to the Committee on Education and Labor.

H.R. 268. A bill to establish a national adoption information exchange system; to the Committee on Education and Labor.

H.R. 269. A bill to prohibit travel at Government expense outside the United States by Members of Congress who have been defeated, or who have resigned, or retired; to the Committee on House Administration.

H.R. 270. A bill to amend the Wild and Scenic Rivers Act to designate a certain portion of the St. John River in Maine as a potential addition to the National Wild and Scenic Rivers System; to the Committee on Interior and Insular Affairs.

H.R. 271. A bill to amend the National Trails System Act to authorize a feasibility study for the establishment of certain bicycle trails; to the Committee on Interior and Insular Affairs.

H.R. 272. A bill to direct the President to halt all exports of gasoline, distillate fuel oil, and propane gas until he determines that no shortage of such fuels exists in the United States; to the Committee on International Relations.

H.R. 273. A bill to amend the Interstate Commerce Act to provide assistance in rebuilding the Nation's railroad rights-of-way, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 274. A bill to provide for the protection of franchised distributors and retailers of motor fuel; to prevent deterioration of competition in gasoline retailing; and to encourage conservation by requiring that infor-

mation regarding the octane rating of automotive gasoline be disclosed to consumers; to the Committee on Interstate and Foreign Commerce.

H.R. 275. A bill to prohibit any increase in the price of certain consumer commodities by any retailer once a price is placed on any such commodity by such retailer, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 276. A bill to give consumers the right of choice over automotive parts and service for their vehicles and to prevent a monopoly in the sale of aftermarket parts and service, amend the Clean Air Act to provide that the manufacturer's performance warranty with respect to the motor vehicle emission system shall be for 12,000 miles or 12 months, whichever first occurs; to the Committee on Interstate and Foreign Affairs.

H.R. 277. A bill to amend the Public Health Service Act to promote the health and welfare of children in need of adoption by facilitating their placement, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 278. A bill to provide for accelerated research and development in the care and treatment of autistic children, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 279. A bill to amend the Public Health Service Act to provide assistance for the planning and development of schools of veterinary medicine; to the Committee on Interstate and Foreign Commerce.

H.R. 280. A bill to improve existing tertiary eye centers, to examine the delivery of eye care to the general public, and to study the feasibility of implementing a system of tertiary eye care centers throughout the United States; to the Committee on Interstate and Foreign Commerce.

H.R. 281. A bill to amend the Communications Act of 1934 to establish orderly procedures for the consideration of applications for renewal of broadcast licenses; to the Committee on Interstate and Foreign Commerce.

H.R. 282. A bill to amend title XVIII of the Social Security Act to provide for the administrative and judicial review of claims (involving the amount of benefits payable) which arise under the supplementary medical insurance program; to the Committee on Interstate and Foreign Commerce.

H.R. 283. A bill to amend section 204 of the War Claims Act of 1948 to permit adjudication of the claims of additional persons for certain World War II losses, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 284. A bill to establish a National Commission on Regulatory Reform; to the Committee on Interstate and Foreign Commerce.

H.R. 285. A bill to protect the constitutional right of privacy of individuals concerning whom identifiable information is recorded by enacting principles of information practices in furtherance of articles I, III, IV, V, IX, and XIV of amendments to the U.S. Constitution; to the Committee on the Judiciary.

H.R. 286. A bill to require in all cases court orders for the interception of communications by electronic and other devices, for the entering of any residence, for the opening of any mail, for the inspection or procurement of certain records, and for other purposes; to the Committee on the Judiciary.

H.R. 287. A bill to amend title 5 of the United States Code in order to extend cost-of-living increases in benefits under chapter 81 of such title (relating to compensation for work injuries) to certain widows, children, and parents of members of the military reserves; to the Committee on Post Office and Civil Services.

H.R. 288. A bill to amend title 5, United States Code to provide that law enforcement service performed while in the Coast Guard shall be included in determining whether an individual qualifies for immediate retirement as a law enforcement officer or firefighter under section 8336 (c) of such title; to the Committee on Post Office and Civil Service.

H.R. 289. A bill to designate the birthday of "Susan B. Anthony" as a legal public holiday; to the Committee on Post Office and Civil Service.

H.R. 290. A bill to amend the Local Public Works Capital Development and Investment Act of 1976 to change the priority the Secretary of Commerce gives to certain factors for purposes of approving applications submitted pursuant to the act, and to increase the authorization; to the Committee on Public Works and Transportation.

H.R. 291. A bill to create a Joint Committee on Intelligence Operations; to the Committee on Rules.

H.R. 292. A bill to direct the Administrator of Energy Research and Development to establish a system of research and development of energy-conserving industrial technologies with due regard for the need to operate such a system in a manner which will stimulate depressed sectors of the American economy; to the Committee on Science and Technology.

H.R. 293. A bill to amend title 38 of the United States Code to promote the care and treatment of veterans in State veterans' homes; to the Committee on Veterans' Affairs.

H.R. 294. A bill to insure that recipients of veterans' pension and compensation will not have the amount of such pension or compensation reduced, or entitlement thereto discontinued, because of increases in monthly social security benefits; to the Committee on Veterans' Affairs.

H.R. 295. A bill to extend to all unmarried individuals the full tax benefits of income splitting now enjoyed by married individuals filing joint returns; and to remove rate inequities for married persons where both are employed; to the Committee on Ways and Means.

H.R. 296. A bill to amend the Internal Revenue Code of 1954 to allow a credit against income tax to individuals for certain expenses incurred in higher education; to the Committee on Ways and Means.

H.R. 297. A bill to amend the Internal Revenue Code of 1954 to provide income tax simplification, reform, and relief for small business; to the Committee on Ways and Means.

H.R. 298. A bill to amend section 167 of the Internal Revenue Code of 1954 to encourage landlords to meet minimal housing standards by disallowing the depreciation deduction to a landlord who has been convicted of violating a housing code; to the Committee on Ways and Means.

H.R. 299. A bill to amend the Internal Revenue Code of 1954 to allow a deduction to individuals who rent their principal residences for a portion of the real property taxes paid or accrued by their landlords; to the Committee on Ways and Means.

H.R. 300. A bill to amend the Internal Revenue Code of 1954 to provide a tax credit with respect to housing senior citizens in the principal residence of the taxpayer; to the Committee on Ways and Means.

H.R. 301. A bill to amend the Internal Revenue Code of 1954 to exclude from gross income the first $5,000 of interest received on certain savings deposits in the case of individuals over 65 years of age; to the Committee on Ways and Means.

H.R. 302. A bill to provide an income tax credit for savings for the payment of post-secondary educational expenses; to the Committee on Ways and Means.

H.R. 303. A bill to provide for the conservation of energy by amending the Internal Revenue Code of 1954 to allow a refundable tax credit for certain building insulation and heating improvements; to the Committee on Ways and Means.

H.R. 304. A bill to amend the Internal Revenue Code of 1954 to provide income tax incentives for the modification of certain facilities and vehicles so as to remove architectural and transportational barriers to the handicapped and elderly; to the Committee on Ways and Means.

H.R. 305. A bill to amend the Internal Revenue Code of 1954 to treat the amounts paid for custodial care by institutions of certain dependents as amounts paid for medical care; to the Committee on Ways and Means.

H.R. 306. A bill to amend the Internal Revenue Code of 1954 to require the establishment of formal procedures and criteria for the selection of individual income tax returns for audit, to inform individuals of the reasons why their returns were selected for audit, and for other purposes; to the Committee on Ways and Means.

H.R. 307. A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits thereunder; to the Committee on Ways and Means.

H.R. 308. A bill to amend title II of the Social Security Act to provide that any individual may qualify for disability insurance benefits and the disability freeze if he has 20 quarters of coverage (and meets the other conditions of eligibility therefor), regardless of when such quarters were earned; to the Committee on Ways and Means.

H.R. 309. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

H.R. 310. A bill to amend title II of the Social Security Act to provide for the entitlement of disabled widows and widowers to unreduced widow's and widower's insurance benefits without regard to age; to the Committee on Ways and Means.

H.R. 311. A bill to amend title XVIII of the Social Security Act to provide that the periodic adjustments made in the inpatient hospital deductible shall hereafter reflect increases in social security cash benefits rather than increases in the cost of inpatient hospital services; to the Committee on Ways and Means.

H.R. 312. A bill to amend the Mineral Leasing Act of 1920 and the Trans-Alaska Pipeline Authorization Act to require the development of a plan to assure the equitable allocation of available crude oil and petroleum products, and for other purposes; jointly, to the Committees on Interior and Insular Affairs, and International Relations.

H.R. 313. A bill to amend the Small Business Act, as amended, and the Concessions Policy Act of 1965, and for other purposes; jointly, to the Committees on Interior and Insular Affairs, and Small Business.

By Mr. THOMPSON (for himself and Mr. CORMAN):

H.R. 314. A bill to amend the Service Contract Act of 1965 to extend its coverage to professional employees; to the Committee on Education and Labor.

By Mr. CONTE:

H.R. 315. A bill to amend the Social Security Act to direct the Secretary of Health, Education, and Welfare to develop standards relating to the rights of patients in certain medical facilities, jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

H.R. 316. A bill to amend the Social Security Act to provide for inclusion of the services of licensed (registered) nurses under medicare and medicaid; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. CORNELL:

H.R. 317. A bill to amend the Internal Revenue Code of 1954, the Social Security Act, and other laws to provide effective welfare reform by replacing public assistance and food stamps with a system of allowances and refundable credits, and for other purposes; to the Committee on Ways and Means.

By Mr. ROBERT W. DANIEL, JR.:

H.R. 318. A bill to provide that the changes made by the Tax Reform Act of 1976 to the exclusion for sick pay shall only apply to taxable years beginning after December 31, 1976; to the Committee on Ways and Means.

By Mr. DE LA GARZA:

H.R. 319. A bill to amend the Housing Act of 1949 to provide that certain places within standard metropolitan statistical areas be considered rural areas for purposes of title V of that act; to the Committee on Banking, Finance and Urban Affairs.

H.R. 320. A bill to authorize the Secretary of the Interior to establish the Palo Alto Battlefield National Historic Site in the State of Texas, and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 321. A bill to authorize the Secretary of the Interior to establish the Resaca de la Palma Battlefield National Historic Site in the State of Texas, and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 322. A bill to require the submission, prior to publication in the Federal Register, to the appropriate committees of the Congress, of all regulations proposed to be promulgated by Federal departments and agencies; to the Committee on the Judiciary.

H.R. 323. A bill to strengthen the penalty provisions of the Gun Control Act of 1968; to the Committee on the Judiciary.

H.R. 324. A bill to prohibit the relocation of the Border Patrol Academy maintained by the U.S. Immigration and Naturalization Service at Los Fresnos, Tex., to the Federal Law Enforcement Training Center at Glynco, Ga.; to the Committee on the Judiciary.

H.R. 325. A bill to amend the Tariff Schedules of the United States to raise the value limit for personal articles which may be imported duty free by returning residents, and for other purposes; to the Committee on Ways and Means.

Mr. DELANEY:

H.R. 326. A bill to amend the Export Administration Act of 1969 to provide for the regulation of the export of agricultural commodities; to the Committee on International Relations.

H.R. 327. A bill to amend the Federal Food, Drug, and Cosmetic Act to require the labels on all foods to disclose each of their ingredients; to the Committee on Interstate and Foreign Commerce.

H.R. 328. A bill to prohibit the expenditure of Federal funds by the Secretary of Health, Education, and Welfare to promote the fluoridation of public water supplies; to the Committee on Interstate and Foreign Commerce.

H.R. 329. A bill to amend the Federal Food, Drug, and Cosmetic Act to ban the usage of diethylstilbestrol (DES) as a growth stimulant; to the Committee on Interstate and Foreign Commerce.

H.R. 330. A bill to prohibit the use of appropriated funds to carry out or assist research on living human fetuses; to the Committee on Interstate and Foreign Commerce.

H.R. 331. A bill to eliminate racketeering in the sale and distribution of cigarettes and to assist State and local governments in the enforcement of cigarette taxes; to the Committee on the Judiciary.

H.R. 332. A bill to amend title 18 of the United States Code to make it a Federal crime to carry out any research activity on a human fetus or to intentionally take any action to kill or hasten the death of a human fetus in any federally supported facility or activity; to the Committee on the Judiciary.

H.R. 333. A bill to amend title II of the Social Security Act to increase to $5,000 the amount of outside earnings which (subject to further increases under the automatic adjustment provisions) is permitted an individual each year without any deductions from benefits thereunder; to the Committee on Ways and Means.

H.R. 334. A bill to amend the Internal Revenue Code of 1954 to increase for taxable years beginning after December 31, 1978, the personal income tax exemptions of a taxpayer (including the exemption for a spouse, the exemptions for dependents, and the additional exemptions for old age and blindness); to the Committee on Ways and Means.

H.R. 335. A bill to amend the Internal Revenue Code of 1954 to provide individuals a limited exclusion from gross income for interest on deposits in certain savings institutions; to the Committee on Ways and Means.

H.R. 336. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

H.R. 337. A bill to amend titles IV, XI, and XIX of the Social Security Act to increase the Federal matching rate for purposes of reimbursement to States under the programs of aid to needy families with children and medical assistance; jointly to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. DELLUMS:

H.R. 338. A bill to amend title 10, United States Code, to provide for identification of positions in the Department of Defense which can be filled by civilian employees and to prohibit assignment of active-duty military personnel to such positions unless such personnel meet the civilian qualifications for such positions, and for other purposes; to the Committee on Armed Services.

H.R. 339. A bill to require educational institutions engaged in interscholastic athletic competition to employ certified athletic trainers; to the Committee on Education and Labor.

H.R. 340. A bill to provide the protection of the safety and health standards under the Occupational Safety and Health Act of 1970 for individuals participating in athletic contests between secondary schools or between institutions of higher education; to the Committee on Education and Labor.

H.R. 341. A bill to establish minimum prison and parole standards in the United States, and for other purposes; to the Committee on the Judiciary.

H.R. 342. A bill to amend title 28, United States Code, to provide more effectively for bilingual proceedings in all district courts of the United States, and for other purposes; to the Committee on the Judiciary.

H.R. 343. A bill to establish the office of Assistant Secretary of Defense for Equal Opportunity, and for other purposes; to the Committee on Armed Services.

H.R. 344. A bill to amend the Civil Rights Act of 1964 to eliminate employment discrimination on the basis of military discharge status; to the Committee on Education and Labor.

H.R. 345. A bill to amend the Age Discrimination in Employment Act of 1967 to extend the protection of that act to employees of States and their political subdivisions; to the Committee on Education and Labor.

H.R. 346. A bill to amend the Budget and Accounting Act of 1921 to provide for investigations and expenditures analyses of the use of public funds; to the Committee on Government Operations.

H.R. 347. A bill to help preserve the separation of powers and to further the constitutional prerogatives of Congress by providing for congressional review of executive agreements; jointly to the Committees on International Relations, and Rules.

H.R. 348. A bill to provide for the receipt of testimony and information from executive agencies and bodies; to the Committee on the Judiciary.

H.R. 349. A bill to exonerate and to provide for a general and unconditional amnesty for certain persons who have violated or are alleged to have violated laws in the course of protest against the involvement of the United States in Indochina, and for other purposes; to the Committee on the Judiciary.

H.R. 350. A bill to prevent lawless and irresponsible use of firearms, by requiring national registration of firearms, by establishing minimum standards for licensing possession of firearms, and to prohibit the importation, manufacture, sale, purchase, transfer, receipt, possession, or transportation of handguns; to the Committee on the Judiciary.

By Mr. DEVINE:

H.R. 351. A bill to establish national policies to promote the adoption of Government programs which can be expected to provide the greatest net public benefit and to prevent Government programs from having unreasonable public costs, to establish a system requiring regulatory cost benefit assessments to be prepared for any proposed legislation or regulation which may have a significant economic impact, and for other purposes; to the Committee on Government Operations.

By Mr. DUNCAN of Oregon:

H.R. 352. A bill to amend section 19 of the National Labor Relations Act to provide that all employees covered by that act who are members of a bona fide religion which has historically held conscientious objections to joining or financially supporting labor organizations shall not be required to join or so support any such organization as a condition of employment; to the Committee on Education and Labor.

By Mr. DUNCAN of Oregon (for himself, Mr. ROE, Mr. SEIBERLING, Mr. SIMON, Mr. SLACK, Ms. SPELLMAN, Mr. ULLMAN, Mr. VAN DEERLIN, Mr. VENTO, Mr. WEAVER, Mr. CHARLES WILSON of Texas, Mr. WHITLEY, Mr. WINN, and Mr. WOLFF):

H.R. 353. A bill to establish a conservation corps in the Departments of Agriculture and Interior, and for other purposes; to the Committee on Education and Labor.

By Mr. DUNCAN of Oregon (for himself, Mr. AUCOIN, Mr. BEARD of Rhode Island, Mr. BROWN of California, Mr. CARNEY, Mr. DINGELL, Mr. EILBERG, Ms. FENWICK, Mr. GILMAN, Mr. HUGHES, Mr. JOHNSON of California, Mr. KOCH, Mr. LAGOMARSINO, Mr. LEGGETT, Mr. MCCORMACK, Mr. MCKAY, Mr. MAZZOLI, Mr. MEEDS, Mrs. MEYNER, Mr. MIKVA, Mr. MITCHELL of Maryland, Mr. MOAKLEY, Mr. OTTINGER, Mr. PRITCHARD, and Mr. ROBERTS):

H.R. 389. A bill to prohibit travel at Government expense outside the United States by Members of Congress who have been defeated, or who have resigned, or retired; to the Committee on House Administration.

H.R. 390. A bill to provide a remedy for sex discrimination by the insurance business with respect to the availability and scope of insurance coverage for women; to the Committee on Interstate and Foreign Commerce.

H.R. 391. A bill to limit the jurisdiction of the Supreme Court of the United States and of the district courts to enter any judgment, decree, or order, denying or restricting, as unconstitutional, voluntary prayer in any public school; to the Committeee on the Judiciary.

H.R. 392. A bill to amend title IV of the Civil Rights Act of 1964 to prohibit federally ordered assignment of teachers or students on racial and other similar grounds; to the Committee on the Judiciary.

H.R. 393. A bill to amend title 5, United States Code, to reduce from 60 to 55 the age after which the remarriage of a surviving spouse will not cause the loss of such spouse's civil service survivors annuity, and for other purposes; to the Committee on Post Office and Civil Service.

H.R. 394. A bill to repeal section 3108 of title 5, United States Code, which prohibits the employment by the United States and the District of Columbia of individuals employed by detective agencies; to the Committee on Post Office and Civil Service.

H.R. 395. A bill to amend chapter 10 of title 36, United States Code, to define the "Star-Spangled Banner," and for other purposes; to the Committee on Post Office and Civil Service.

H.R. 396. A bill to amend title 38 of the United States Code to make certain that recipients of veterans' pension and compensation will not have the amount of such pension or compensation reduced because of certain increases in monthly social security or railroad retirement benefits; to the Committee on Veterans' Affairs.

H.R. 397. A bill to amend title 38 of the United States Code so as to entitle veterans of World War I and their widows and children to pension on the same basis as veterans of the Spanish-American War and their widows and children, respectively, and to increase pension rates; to the Committee on Veterans' Affairs.

H.R. 398. A bill to amend the Internal Revenue Code of 1954 to allow a taxpayer a deduction from gross income for expenses paid by him for the education of any of his dependents at an institution of higher learning; to the Committee on Ways and Means.

H.R. 399. A bill to amend the Internal Revenue Code of 1954 to allow a deduction to individuals who rent their principal residences for a portion of the real property taxes paid or accrued by their landlords; to the Committee on Ways and Means.

H.R. 400. A bill to amend the Internal Revenue Code of 1954 to exclude from gross income the interest on deposits in banks and certain other savings institutions; to the Committee on Ways and Means.

H.R. 401. A bill to amend the Internal Revenue Code of 1954 to provide that advertising of alcoholic beverages is not a deductible expense; to the Committee on Ways and Means.

H.R. 402. A bill to amend title XI of the Social Security Act to repeal the provision for the establishment of Professional Standards Review Organizations to review services covered under the medicare and medicaid programs; jointly to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mrs. HOLT (for herself, Mr. MARTIN, and Mr. MOORHEAD of California):

H.R. 403. A bill to amend the Congressional Budget Act of 1974 to establish in the Congress a zero-base budgeting process, with full congressional review of each Federal program at least once every 6 years; to the Committee on Rules.

By Ms. HOLTZMAN:

H.R. 404. A bill to provide a remedy for sex discrimination by the insurance business with respect to the availability and scope of insurance coverage for women; to the Committee on Interstate and Foreign Commerce.

H.R. 405. A bill to amend the Clean Air Act to prohibit the use of tolls on New York City bridges for purposes of the applicable air quality implementation plan; to the Committee on Interstate and Foreign Commerce.

H.R. 406. A bill to amend titles 18 and 28 of the United States Code to provide that an individual appearing before certain grand juries can be imprisoned for contempt for no more than 6 months and for other purposes; to the Committee on the Judiciary.

H.R. 407. A bill to amend title VI of the Civil Rights Act of 1964 to prohibit sex discrimination in programs and activities receving Federal financal assistance; to the Committee on the Judiciary.

H.R. 408. A bill to amend the Federal Rules of Evidence to protect the privacy of rape victims and for other purposes; to the Committee on the Judiciary.

H.R. 409. A bill to amend section 101(b) of the Immigration and Nationality Act; to the Committee on the Judiciary.

H.R. 410. A bill to amend the Immigration and Nationality Act to exclude from admission into and to deport from the United States all aliens who persecuted others on the basis of religion, race, national origin, or political opinion; to the Committee on the Judiciary.

H.R. 411. A bill to restore citizenship to persons who renounced or otherwise lost American nationality because of opposition to American military action in Indochina, and for other purposes; to the Committee on the Judiciary.

H.R. 412. A bill to amend the Immigration and Nationality Act to exclude from admission into and to deport from the United States all aliens who persecuted others on the basis of religion, race, or national origin under the direction of the Nazi government of Germany; to the Committee on the Judiciary.

H.R. 413. A bill to amend the Urban Mass Transportation Act of 1964 to require public hearings before any increase in fares and for other purposes; to the Committee on Public Works and Transportation.

H.R. 414. A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits thereunder; to the Committee on Ways and Means.

H.R. 415. A bill to amend the Social Security Act to make certain that recipients of supplemental security income benefits, recipients of aid to families with dependent children, and recipients of assistance or benefits under the veterans' pension and compensation programs and certain other Federal and federally assisted programs will not have the amount of such benefits, aid, or assistance reduced because of post-1974 increases in monthly social security benefits; to the Committee on Ways and Means.

H.R. 416. A bill to amend title II of the Social Security Act to provide that an individual may simultaneously receive (without any reduction or offset) both an old-age or disability insurance benefit and a widow's or widower's insurance benefit; to the Committee on Ways and Means.

H.R. 417. A bill to permit officers and employees of the Federal Government to elect coverage under the old-age, survivors, and disability insurance system; to the Committee on Ways and Means.

Ms. HOLTZMAN (for herself, Mr. RODINO, and Mr. ROSENTHAL):

H.R. 418. A bill to amend title 18 of the United States Code to prohibit certain forms of economic coercion based on religion, race, national origin, sex, or certain other factors; to the Committee on the Judiciary.

Mr. HORTON:

H.R. 419. A bill to designate the birthday of "Susan B. Anthony" as a legal public holiday; to the Committee on Post Office and Civil Service.

H.R. 420. A bill to amend the act of August 13, 1946, relating to Federal participation in the cost of protecting the shores of the United States, its territories and possessions, to include privately owned property; to the Committee on Public Works and Transportation.

By Mr. HORTON (for himself and Mr. STEED):

H.R. 421. A bill to amend the Tariff Act of 1930 and the Tariff Schedules of the United States to reduce the burden of paperwork involved in the customs entry process for travelers and goods entering the United States; to the Committee on Ways and Means.

By Mr. HUGHES:

H.R. 422. A bill to amend the Tariff Schedules of the United States to provide duty-free treatment of any aircraft engine used as a temporary replacement for an aircraft engine being overhauled within the United States if duty was paid on such replacement engine during a previous importation; to the Committee on Ways and Means.

H.R. 423. A bill to amend the Tariff Schedules of the United States by repealing item 807 of schedule 8, part 1, subpart B; to the Committee on Ways and Means.

By Mr. KAZEN:

H.R. 424. A bill to authorize the establishment of the San Antonio Missions National Historical Park in the State of Texas, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. KELLY:

H.R. 425. A bill to establish the death penalty for the commission of certain Federal offenses, and for other purposes; to the Committee on the Judiciary.

By Mr. KEMP:

H.R. 426. A bill to amend the Internal Revenue Code of 1954 and certain other provisions of law to provide for automatic cost-of-living adjustments in the income tax rates, the amount of the standard, personal exemption, and depreciation deductions, and the rate of interest payable on certain obligations of the United States; to the Committee on Ways and Means.

By Mr. KEMP (for himself) Mr. ABDNOR, Mr. ARMSTRONG, Mr. BAUMAN, Mr. BROYHILL, Mr. LOTT, Mr. MARTIN, Mr. MOORHEAD of California, Mr. JOHN T. MYERS, and Mr. SYMMS):

H.R. 427. A bill to provide for permanent tax reductions for individuals and businesses in order to expand both job opportunities and productivity in the private sector of the economy; to the Committee on Ways and Means.

By Mr. KETCHUM:

H.R. 428. A bill to amend the Voting Rights Act of 1965 to limit certain aspects of its coverage for other than racial groups; to the Committee on the Judiciary.

By Mr. KOCH:

H.R. 429. A bill to provide Federal grants to be awarded by the Commissioner of Education for the purpose of paying operating expenses of public libraries, in amounts which match the amount of certain private contributions; to the Committee on Education and Labor.

H.R. 430. A bill to amend the Civil Rights Act of 1964 to provide that, except in certain limited circumstances, it shall be an unlawful employment practice for an employer to request that an employee or an applicant for employment provide military discharge papers or other service-connected records; to the Committee on Education and Labor.

H.R. 431. A bill to amend the Public Health Service Act to provide for the protection of the public health from unnecessary medical exposure to ionizing radiation; to the Committee on Interstate and Foreign Commerce.

H.R. 432. A bill to amend certain provisions of the Controlled Substances Act relating to marihuana; to the Committee on Interstate and Foreign Commerce.

H.R. 433. A bill to restrict the disclosure of information in the possession of telephone companies or telegraph companies concerning members of the news media; to the Committee on Interstate and Foreign Commerce.

H.R. 434. A bill to protect the constitutional rights of citizens of the United States and to prevent unwarranted invasion of their privacy by prohibiting the use of the polygraph for certain purposes; to the Committee on the Judiciary.

H.R. 435. A bill to amend the Internal Revenue Code of 1954 to increase to $1,500 the personal income tax exemptions of a taxpayer (including the exemption for a spouse, the exemptions for dependents, and the additional exemptions for old age and blindness); to the Committee on Ways and Means.

H.R. 436. A bill to amend the Internal Revenue Code of 1954 to provide that blood donations shall be considered as charitable contributions deductible from gross income; to the Committee on Ways and Means.

H.R. 437. A bill to amend the Internal Revenue Code of 1954 to disallow the business expense tax deduction for first-class air and rail travel in excess of the coach fare for such travel and for other expenses; to the Committee on Ways and Means.

H.R. 438. A bill to amend the Internal Revenue Code of 1954 to provide that the 4-percent excise tax on the net investment income of a private foundation shall not apply to a private foundation organized and operated exclusively as a library, museum, or similar educational institution; to the Committee on Ways and Means.

H.R. 439. A bill to amend the Internal Revenue Code of 1954 to allow a tax credit for certain contributions of literary, musical or artistic compositions; to the Committee on Ways and Means.

H.R. 440. A bill to amend the Internal Revenue Code of 1954 to provide that landlords using an accrual method of accounting may not deduct real property taxes on their rental property until such taxes are paid; to the Committee on Ways and Means.

H.R. 441. A bill to amend the Internal Revenue Code of 1954 to provide a tax credit for tenants of houses or apartments for their proportionate share of the real property taxes and interest paid or incurred by their landlords; to the Committee on Ways and Means.

H.R. 442. A bill to amend title II of the Social Security Act to reduce from 20 to 10 years the length of time a divorced woman's marriage to an insured individual must have lasted in order for her to qualify for wife's or widow's benefits on his wage record; to the Committee on Ways and Means.

H.R. 443. A bill to amend part B of title IV of the Social Security Act to provide, as the primary form in which services are to be furnished under the child-welfare services program, for supportive day treatment and in-home services to children and families; to the Committee on Ways and Means.

H.R. 444. A bill to amend title XVI of the Social Security Act to provide that support and maintenance (in cash or kind) furnished to an eligible individual by members of his or her immediate family shall be disregarded (and shall not serve to reduce his or her supplemental security income benefits) to the extent that it does not exceed $200 a month; to the Committee on Ways and Means.

H.R. 445. A bill to establish a commission to study the results of racial integration of public schools, the use of busing to achieve racial integration of the public schools, and other questions relating to the quality of public schools; jointly, to the Committees on Education and Labor, and the Judiciary.

By Mr. KOCH (for himself, Mr. PATTISON of New York, Mr. AMBRO, Mr. BINGHAM, Mr. HOWARD, Mr. BRODHEAD, Mr. DELLUMS, Mr. DOWNEY, Mr. DRINAN, Mr. EDGAR, Mr. HANLEY, Mr. HUGHES, Ms. KEYS, and Mr. MAZZOLI):

H.R. 446. A bill to establish a Commission on the Humane Treatment of Animals; to the Committee on Agriculture.

By Mr. KOCH (for himself, Mr. PATTISON of New York, Mrs. MEYNER, Mr. MOAKLEY, Mr. MURPHY of Illinois, Mr. PEPPER, Mr. RICHMOND, Mr. RODINO, Mr. ROSENTHAL, Mr. SOLARZ, Mr. WAXMAN, Mr. CHARLES WILSON of Texas, Mr. WIRTH, and Mr. WOLFF):

H.R. 447. A bill to establish a Commission on the Humane Treatment of Animals; to the Committee on Agriculture.

By Mr. KOCH (for himself and Mr. BIAGGI):

H.R. 448. A bill to amend the Rehabilitation Act of 1973, and for other purposes; to the Committee on Education and Labor.

By Mr. KOCH (for himself and Mr. ZEFERETTI):

H.R. 449. A bill to amend the Fair Labor Standards Act of 1938 to require that the operation of a schoolbus be treated under that act as oppressive child labor for employees under the age of 18; to the Committee on Education and Labor.

By Mr. KOCH (for himself, Mr. HARRINGTON, Mrs. MEYNER, Mr. ROSENTHAL, and Mr. WOLFF):

H.R. 450. A bill to eliminate maintenance of internal security as a purpose for which foreign military sales may be made and military assistance may be furnished; to the Committee on International Relations.

By Mr. KOCH (for himself, Mr. BINGHAM, Mr. JOHN L. BURTON, Mr. DELLUMS, Mr. FRASER, Mr. HARRINGTON, Ms. HOLTZMAN, Mr. MCCLOSKEY, Mr. MILLER of California, Mr. STUDDS, and Mr. WEISS:

H.R. 451. A bill to prohibit discrimination on the basis of affectional or sexual preference, and for other purposes; to the Committee on the Judiciary.

By Mr. KOCH (for himself and Mr. PEPPER):

H.R. 452. A bill to amend the Social Security Act to improve the survey and certification process, ratesetting and fiscal audit methods, and general regulation of nursing homes and intermediate care facilities under the medicaid program, and to provide for medical, psychological, and social assessment of long-term care patients under both the medicare and medicaid programs; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. KOCH (for himself and Mr. PEPPER):

H.R. 453. A bill to amend part B of title XVIII of the Social Security Act to broaden the coverage of home health services under the supplementary medical insurance program and remove the 100-visit limitation presently applicable thereto, and to eliminate the requirement that an individual need skilled nursing care in order to qualify for such services, to amend part A of such title to liberalize the coverage of posthospital home health services thereunder, to amend title XIX of such act to require the inclusion of home health services in a State's medicaid program and to permit payments of housing costs under such a program for elderly persons who would otherwise require nursing home care, to provide expanded Federal funding for congregate housing for the displaced and the elderly, and for other purposes; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. LAGOMARSINO:

H.R. 454. A bill to require the payment of interest by Federal agencies on overdue contract payments, to amend the Office of Federal Procurement Policy Act, and for other purposes; to the Committee on Government Operations.

H.R. 455. A bill to amend title 39, United States Code, to provide for the mailing of correspondence to Members of the Congress free of postage, and for other purposes; to the Committee on Post Office and Civil Service.

H.R. 456. A bill to amend the Postal Revenue and Federal Salary Act of 1967 to abolish the Commission on Executive, Legislative and Judicial Salaries; to the Committee on Post Office and Civil Service.

H.R. 457. A bill to require that the President suspend air transportation rights of any foreign nation which assists air terrorists, and for other purposes; to the Committee on Public Works and Transportation.

H.R. 458. A bill to provide for the elimination of inactive and overlapping Federal programs, to require authorizations of new budget authority for Government programs and activities at least every 4 years, to establish a procedure for zero-base review and evaluation of Government programs and activities every 4 years, and for other purposes; to the Committee on Rules.

H.R. 459. A bill to amend the Internal Revenue Code of 1954 to allow individuals who have attained age 65 a nonrefundable tax credit for property taxes paid by them on their principal residences or for a certain portion of the rent they pay for their principal residences; to the Committee on Ways and Means.

H.R. 460. A bill to establish a method whereby the Congress (acting in accordance with specified procedures) may prevent the adoption by the executive branch of rules or regulations which are contrary to law or inconsistent with congressional intent or which go beyond the mandate of the legislation which they are designed to implement; jointly, to the Committees on the Judiciary and Rules.

By Mr. LE FANTE:

H.R. 461. A bill to amend the Civil Rights Act of 1964 to make it an unlawful employment practice to discriminate against individuals who are physically disabled because of such disability; to the Committee on Education and Labor.

By Mr. LEHMAN:

H.R. 462. A bill to establish a Commission on the Humane Treatment of Animals; to the Committee on Agriculture.

H.R. 463. A bill to authorize equalization of the retired pay of certain members and former members of the uniformed services; to the Committee on Armed Services.

H.R. 464. A bill to amend the National Housing Act to prohibit Federal Housing Administration insurance of blanket mortgages on condominium projects, and Federal National Mortgage Association purchases of conventional condominium mortgages, where the developer retains or will retain a leasehold interest in the common areas and facilities of the project involved; to the Committee on Banking, Finance and Urban Affairs.

H.R. 465. A bill to amend the Age Discrimination in Employment Act of 1967 to increase coverage under that act, and for other purposes; to the Committee on Education and Labor.

H.R. 466. A bill to amend the Older Americans Act of 1965 to provide nutrition programs for handicapped dependents of older Americans; to the Committee on Education and Labor.

H.R. 467. A bill to amend the Federal Reports Act, and for other purposes; to the Committee on Government Operations.

H.R. 468. A bill to provide for the protection of franchised distributors and retailers of motor fuel; to the Committee on Interstate and Foreign Commerce.

H.R. 469. A bill to reform residential electric utility rates; to the Committee on Interstate and Foreign Commerce.

H.R. 470. A bill to amend title 18, United States Code, so as to establish certain guidelines for sentencing, establish a U.S. Commission on Sentencing, and for other purposes; to the Committee on the Judiciary.

H.R. 471. A bill to discourage the use of painful devices in the trapping of animals and birds; to the Committee on Merchant Marine and Fisheries.

H.R. 472. A bill to amend title 39, United States Code, to provide that buildings constructed for use by the U.S. Postal Service shall be designed and constructed in a manner making them accessible to the physically handicapped; to the Committee on Post Office and Civil Service.

H.R. 473. A bill to amend the Federal Water Pollution Control Act to increase the penalties for discharging oil and hazardous substances; to the Committee on Public Works and Transportation.

H.R. 474. A bill to amend title 38 of the United States Code to make certain that recipients of veterans' pension and compensation will not have the amount of such pension or compensation reduced because of increases in monthly social security benefits; to the Committee on Veterans' Affairs.

H.R. 475. A bill to provide for a national cemetery in the area of Broward County or Dade County, Fla., to the Committee on Veterans' Affairs.

H.R. 476. A bill to amend title 38, United States Code, to eliminate the time period in which a veteran has to use his educational benefits and to extend the months of eligibility from 36 to 45 months; to the Committee on Veterans' Affairs.

H.R. 477. A bill to extend to all unmarried individuals the full tax benefits of income splitting now enjoyed by married individuals filing joint returns; to the Committee on Ways and Means.

H.R. 478. A bill to amend the Internal Revenue Code of 1954 to require that charitable

organizations which solicit contributions from the public pay out at least half of their gross revenues in charitable activities, and for other purposes; to the Committee on Ways and Means.

H.R. 479. A bill to allow a credit against Federal income taxes or a payment from the U.S. Treasury for State and local real property taxes or an equivalent portion of rent paid on their residences by individuals who have attained age 65; to the Committee on Ways and Means.

H.R. 480. A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits thereunder; to the Committee on Ways and Means.

H.R. 481. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

H.R. 482. A bill to amend title II of the Social Security Act to provide that an insured individual otherwise qualified may retire and receive full old-age insurance benefits, at any time after attaining age 60, if he has been forced to retire at that age by a Federal law, regulation, or order; to the Committee on Ways and Means.

H.R. 483. A bill to amend the Tariff Schedules of the United States; to the Committee on Ways and Means.

H.R. 484. A bill to amend title 18, United States Code, and title 23, District of Columbia Code, to grant to courts power to deny pretrial release to persons charged with the commission of certain crimes of violence; jointly, to the Committee on the Judiciary, and the District of Columbia.

H.R. 485. A bill to amend the Small Business Act to establish within the Small Business Administration a new direct low-interest loan program to assist homeowners and builders in purchasing and installing solar energy equipment; jointly, to the Committees on Small Business, and Banking, Finance and Urban Affairs.

By Mr. LEHMAN (for himself and Mr. SIMON):

H.R. 486. A bill to provide for the reinstatement of civil service retirement survivor annuities for certain widows and widowers whose remarriages occurred before July 18, 1966, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. LENT:

H.R. 487. A bill to authorize the Secretary of Housing and Urban Development to make grants to local agencies for converting closed school buildings to efficient alternate uses, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

H.R. 488. A bill to prohibit commercial flights by supersonic aircraft into or over the United States; to the Committee on Public Works and Transportation.

H.R. 489. A bill to amend the Internal Revenue Code of 1954 to provide a basic $5,000 exemption from income tax, in the case of an individual or a married couple, for amounts received as annuities, pensions, or other retirement benefits; to the Committee on Ways and Means.

H.R. 490. A bill to provide a deduction for income tax purposes, in the case of a disabled individual, for expenses for transportation to and from work; and to provide an additional exemption for income tax purposes for a taxpayer or spouse who is disabled; to the Committee on Ways and Means.

H.R. 491. A bill to amend the Internal Revenue Code of 1954 to allow a credit against income tax to individuals for certain expenses incurred in higher education; to the Committee on Ways and Means.

H.R. 492. A bill to suspend until the close of January 3, 1979, the rate of duty on menadione dimethylpyrimidinol bisulphite (MPB); to the Committee on Ways and Means.

By Mr. LLOYD of California:

H.R. 493. A bill to amend chapter 44 of title 18 of the United States Code (respecting firearms) to penalize the use of firearms in the commission of any felony and to increase the penalties in certain related existing provisions; to the Committee on the Judiciary.

H.R. 494. A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits thereunder; to the Committee on Ways and Means.

H.R. 495. A bill to permit either House of Congress to disapprove certain rules proposed by executive agencies; jointly, to the Committees on the Judiciary, and Rules.

By Mrs. LLOYD of Tennessee:

H.R. 496. A bill to amend the Food Stamp Act of 1964 to prohibit any individual from receiving food stamps who receives at least one-half of his income from any other individual who is a member of another household which is ineligible for food stamps; to the Committee on Agriculture.

H.R. 497. A bill to establish a Bureau of Agricultural Statistics for the purpose of monitoring the changes in prices which occur in the price of agricultural commodities from the time they are sold by the farmer until the time when the consumer purchases such commodities or products thereof, and for the purpose of making recommendations to the Congress with respect to correcting situations in which the retail price of an agricultural commodity, or product thereof, rises while the price received by the farmer for the same commodity decreases; to the Committee on Agriculture.

H.R. 498. A bill to foster and continue the family farm in the United States by providing young farmers with the necessary assistance to purchase family farm units, and for other purposes; to the Committee on Agriculture.

H.R. 499. A bill to prohibit any change in the status of any member of the uniformed services who is in a missing status under chapter 10 of title 37, United States Code, until the provisions of the Paris Peace Accord of January 27, 1973, have been fully complied with, and for other purposes; to the Committee on Armed Services.

H.R. 500. A bill to amend the Federal Civil Defense Act of 1950 to allow Federal civil defense funds to be used by local civil defense agencies for natural disaster relief, and for other purposes; to the Committee on Armed Services.

H.R. 501. A bill to amend the Truth in Lending Act to prohibit discrimination on account of age in credit card transactions; to the Committee on Banking, Finance and Urban Affairs.

H.R. 502. A bill to repeal sections 102 and 202 of the Flood Disaster Protection Act of 1973 which make flood insurance coverage and community participation in the national flood insurance program prerequisites for approval of any financial assistance in a flood hazard area, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

H.R. 504. A bill to expand the membership of the Advisory Commission on Intergovernmental Relations to include elected school board officials; to the Committee on Government Operations.

H.R. 505. A bill to prevent famine and establish freedom from hunger by increasing world food production through the development of land-grant type universities in agriculturally developing nations; to the Committee on International Relations.

H.R. 506. A bill to limit U.S. contributions to the United Nations; to the Committee on International Relations.

H.R. 507. A bill to authorize interest subsidy payments to assist nursing homes in repair and renovation in order to comply with Federal standards; to the Committee on Interstate and Foreign Commerce.

H.R. 508. A bill to amend title VI of the Public Health Service Act to provide for the making of direct loans for the construction and rehabilitation of nursing homes owned and operated by churches and other nonprofit organizations; to the Committee on Interstate and Foreign Commerce.

H.R. 509. A bill to provide 100 percent Federal funding of financial audits of facilities participating in medicare and medicaid conducted by State personnel; to the Commttee on Interstate and Foreign Commerce.

H.R. 510. A bill to amend title 19 of the Social Security Act to require States to establish ombudsman programs to investigate nursing home compliants and represent consumer interests; to the Committee on Interstate and Foreign Commerce.

H.R. 511. A bill to provide for protection of franchised dealers in petroleum products; to the Committee on Interstate and Foreign Commerce.

H.R. 512. A bill to amend title VII of the Public Health Service Act to provide for the making of grants to appropriate colleges and universities to assist them in establishing graduate programs for nurses in geriatrics and gerontology; to the Committee on Interstate and Foreign Commerce.

H.R. 513. A bill to reaffirm the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce; to reaffirm the authority of the States to regulate terminal and station equipment used for telephone exchange service; to require the Federal Communications Commission to make certain findings in connection with Commission actions authorizing specialized carriers; and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 514. A bill to amend the Fair Packaging and Labeling Act to require the disclosure by retail distributors of retail unit prices of consumer commodities, and for other purpses; to the Committee on Interstate and Foreign Commerce.

H.R. 515. A bill to amend the Public Health Service Act to provide for the screening and counseling of Americans with respect to Tay-Sachs disease; to the Committee on Interstate and Foreign Commerce.

H.R. 516. A bill to provide for additional sentences for commission of a felony with use of a firearm; to the Committee on the Judiciary.

H.R. 517. A bill to require candidates for Federal office, Members of the Congress, and officers and employees of the United States to file statements with the Comptroller General with respect to their income and financial transactions; to the Committee on the Judiciary.

H.R. 518. A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968 to require as a condition of assistance under such act that law enforcement agencies have in effect a binding law enforcement officers' bill of rights; to the Committee on the Judiciary.

H.R. 519. A bill to amend title 39, United

States Code, to provide that buildings constructed for use by the U.S. Postal Service shall be designed and constructed in a manner making them accessible to the physically handicapped; to the Committee on Post Office and Civil Service.

H.R. 520. A bill to amend section 15d of the Tennessee Valley Authority Act of 1933 to provide that expenditures for pollution control facilities will be credited against required power investment return payments and repayments; to the Committee on Public Works and Transportation.

H.R. 521. A bill to amend the Congressional Budget Act of 1974 to require full congressional review of each Federal program once every 2 years under zero-base budgeting procedures; to the Committee on Rules.

H.R. 522. A bill to authorize the Administrator of the National Aeronautics and Space Administration to conduct research and development programs to increase knowledge of tornadoes, hurricanes, large thunderstorms, and other types of short-term weather phenomena, and to develop methods for predicting, detecting, and monitoring such atmospheric behavior; to the Committee on Science and Technology.

H.R. 523. A bill to allow the States to use supplementary security income payments plus a State supplement of not less than $100 per resident per month to provide care for residents in nonmedical shelter care facilities; to the Committee on Ways and Means.

H.R. 524. A bill to provide for the modification of the medicare reimbursement formula to allow small hospitals in rural areas with low occupancy to provide long-term care but only in those areas where there are no appropriate nursing home beds available; to the Committee on Ways and Means.

H.R. 525. A bill to amend the Internal Revenue Code of 1954 to restrict the authority for inspection of tax returns and the disclosure of information contained therein, and for other purposes; to the Committee on Ways and Means.

H.R. 526. A bill to amend the Internal Revenue Code of 1954 to allow an income tax credit or an income tax deduction for certain expenditures of a taxpayer relating to the thermal design of the residence of such taxpayer; to the Committee on Ways and Means.

H.R. 527. A bill to extend to all unmarried individuals the full tax benefits of income splitting now enjoyed by married individuals filing joint returns; and to remove rate x inequities for married persons where both are employed; to the Committee on Ways and Means.

H.R. 528. A bill to amend title II of the Social Security Act that an individual may qualify for disability insurance benefits and the disability freeze if he has 40 quarters of coverage, regardless of when such quarters were earned; to the Committee on Ways and Means.

H.R. 529. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for expenses incurred by a taxpayer in making repairs and improvements to his residence, and to allow the owner of rental housing to amortize at an accelerated rate the cost of rehabilitating or restoring such housing; to the Committee on Ways and Means.

H.R. 530. A bill to assure that an individual or family whose income is increased by reason of a general increase in monthly social security benefits will not, because of such general increase, suffer a loss of or reduction in the benefits the individual or family has been receiving under certain Federal or federally assisted programs; to the Committee on Ways and Means.

H.R. 531. A bill to extend from 1 year to 2 years the maximum period which may elapse between the sale of a residence and the purchase of another in order that gain from such sale will not be recognized for Federal income tax purposes; to the Committee on Ways and Means.

H.R. 532. A bill to permit either House of Congress to disapprove certain rules proposed by executive agencies; jointly, to the Committees on the Judiciary, and Rules.

H.R. 533. A bill to amend title XVIII of the Social Security Act to establish a program of long-term care services within the medicare program, to provide for the creation of community long-term care centers and State long-term care agencies as part of a new administrative structure for the organization and delivery of long-term care services, to provide a significant role for persons eligible for long-term care benefits in the administration of the program, and for other purposes; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

H.R. 534. A bill to amend part B of title XVIII of the Social Security Act to broaden the coverage of home health services under the supplementary medical insurance program and remove the 100-visit limitation presently applicable thereto, to amend part A of such title to liberalize the coverage of posthospital home health services thereunder, to amend title XIX of such act to require the inclusion of home health services in a State's medicaid program and to permit payments of housing costs under such a program for elderly persons who would otherwise require nursing home care, to require contibutions by adult children toward their parents' nursing and home health care expenses under the medicaid program, to provide expanded Federal funding for congregate housing for the displaced and the elderly, and for other purposes; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

H.R. 535. A bill to amend the Social Security Act to provide for a system of inspections of State inspection and enforcement mechanisms with regard to facilities receiving payments under titles XVIII and XIX; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

H.R. 536. A bill to amend the Social Security Act to provide for inclusion of the services of licensed (registered) nurses under medicare and medicaid; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

H.R. 537. A bill to amend the Social Security Act to provide for placing responsibility for medical care provided by skilled nursing facilities under titles XVIII and XIX in a medical director; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

H.R. 538. A bill to require admissions contracts between nursing homes participating in Federal programs and the patients they serve; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

H.R. 539. A bill to amend titles II and XVIII of the Social Security Act to include qualified drugs, requiring a physician's prescription or certification and approved by a formulary committee, among the items and services covered under the hospital insurance program; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

H.R. 540. A bill to amend titles 18 and 19 of the Social Security Act to require that only licensed personnel may set up or distribute medications in skilled nursing facilities; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

H.R. 541. A bill to require physician visits to patients in skilled nursing facilities at least once every 30 days; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

H.R. 542. A bill to require the immediate reporting of epidemic diseases or accidents in nursing homes participating in Federal programs; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

H.R. 543. A bill to amend title XVIII of the Social Security Act to authorize the provision of intermediate care services under medicare, and for other purposes; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

H.R. 544. A bill to amend title XVIII of the Social Security Act to require the continued application of the nursing salary cost differential which is presently allowed in determining the reasonable cost of inpatient nursing care for purposes of reimbursement to providers under the medicare program; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. McCORMACK:

H.R. 545. A bill to provide for the alleviation of high ground-water conditions in and adjacent to the town of Moses Lake, Wash., and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. FISH:

H.R. 872. A bill to prohibit travel at Government expense outside the United States by Members of Congress who have been defeated, or who have resigned, or retired; to the Committee on House Administration.

H.R. 873. A bill to reduce pollution which is caused by litter composed of soft drink and beer containers, and eliminate the threat to the Nation's health, safety, and welfare which is caused by such litter by banning such containers when they are sold in interstate commerce on a no-deposit, no-return basis; to the Committee on Interstate and Foreign Commerce.

H.R. 874. A bill to amend the Internal Revenue Code of 1954 to permit an exemption of the first $5,000 of retirement income received by a taxpayer under a public retirement system or any other system if the taxpayer is at least 65 years of age; to the Committee on Ways and Means.

H.R. 875. A bill to amend the Internal Revenue Code of 1954 to allow a deduction to individuals who rent their principal residences for a portion of the real property taxes paid or accrued by their landlords; to the Committee on Ways and Means.

H.R. 876. A bill to amend title II of the

Social Security Act to provide that the automatic cost-of-living increases in benefits which are authorized thereunder may be made on a semiannual basis (rather than only on an annual basis as at present); to the Committee on Ways and Means.

H.R. 877. A bill to provide for the monthly publication of a consumer price index for the aged which shall be used in the provision of cost-of-living benefit increases authorized by title II of the Social Security Act; to the Committee on Ways and Means.

H.R. 878. A bill to amend title II of the Social Security Act to eliminate the duration-of-marriage requirements (and other special requirements) which are presently applicable in determining whether a person is the widow of an insured individual for benefit purposes; to the Committee on Ways and Means.

H.R. 879. A bill to amend the Social Security Act to provide for a minimum annual income (subject to subsequent increases to reflect the cost of living) of $3,850 in the case of elderly individuals and $5,200 in the case of elderly couples; to the Committee on Ways and Means.

H.R. 880. A bill to amend title XVIII of the Social Security Act to authorize payment under the medicare program for certain services performed by chiropractors; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. FISH (for himself and Mr. PATTISON of New York):

H.R. 881. A bill to terminate the granting of construction licenses of nuclear fission powerplants in the United States pending action by the Congress following a comprehensive 5-year study of the nuclear fuel cycle, with particular reference to its safety and environmental hazards, to be conducted by the Office of Technology Assessment, and for other purposes; jointly, to the Committees on Interior and Insular Affairs, Interstate and Foreign Commerce, and International Relations.

By Mr. FISH (for himself, Mr. PATTISON of New York, Mr. OTTINGER, Mr. RICHMOND, Mr. CONYERS, Mr. BADILLO, Mr. WOLFF, Mr. HARRINGTON, Mr. RODINO, Mr. SIMON, Mr. DELLUMS, Mr. BEDELL, Mr. WEAVER, Mr. ZEFERETTI, Mr. SEIBERLING, Ms. HOLTZMAN, Mr. ROSENTHAL, and Mr. BLOUIN):

H.R. 882. A bill to terminate the granting of construction licenses of nuclear fission powerplants in the United States pending action by the Congress following a comprehensive 5-year study of the nuclear fuel cycle, with particular reference to its safety and environmental hazards, to be conducted by the Office of Technology Assessment, and for other purposes; jointly, to the Committee on Interior and Insular Affairs, Interstate and Foreign Commerce, and International Relations.

By Mr. FISH (for himself, Mr. MOORHEAD of California, and Mr. HORTON):

H.R. 883. A bill to amend the Internal Revenue Code of 1954 to allow a deduction from gross income for social agency, legal, and related expenses incurred in connection with the adoption of a child by the taxpayer; to the Committee on Ways and Means.

By Mr. FLYNT:

H.R. 884. A bill to direct the Secretary of Housing and Urban Development to convey certain lands to the city of Fayetteville, Ga.; to the Committee on Banking, Finance and Urban Affairs.

H.R. 885. A bill to amend the Occupational Safety and Health Act of 1970 to provide that where violations are corrected within the prescribed abatement period no penalty shall be assessed; to the Committee on Education and Labor.

H.R. 886. A bill to amend the Occupational Safety and Health Act of 1970 to require the Secretary of Labor to recognize the difference in hazards to employees between the heavy construction industry and the light residential construction industry; to the Committee on Education and Labor.

H.R. 887. A bill to establish a department of education; to the Committee on Government Operations.

H.R. 888. A bill to require that the U.S. Government prepare and make public annual consolidated financial statements utilizing the accrual method of accounting, and for other purposes; to the Committee on Government Operations.

H.R. 889. A bill requiring that each Member of Congress be notified of the intended disposition of federally owned real property in the district he represents; to the Committee on Government Operations.

H.R. 890. A bill to amend title 44, United States Code, to provide for 98 copies of the daily edition of the Congressional Record to be furnished to each Representative, Delegate, and Resident Commissioner in Congress; to the Committee on House Administration.

H.R. 891. A bill to reduce payments to the United Nations and its affiliated agencies; to the Committee on International Relations.

H.R. 892. A bill to amend the Uniform Time Act; to the Committee on Interstate and Foreign Commerce.

H.R. 893. A bill to make more uniform with the general requirements of the Federal Food, Drug, and Cosmetic Act certain provisions relating to the labeling and notification of colored margarine and colored oleomargarine; and to provide for uniform standards and specifications for colored margarine and colored oleomargarine; to the Committee on Interstate and Foreign Commerce.

H.R. 894. A bill to amend title 18 of the United States Code to prohibit the transportation or use in interstate or foreign commerce of counterfeit, fictitious, altered, lost, or stolen transportation tickets; to the Committee on the Judiciary.

H.R. 895. A bill to amend title 18 and title 28 of the United States Code with respect to the trial and review of criminal actions involving obscenity, and for other purposes; to the Committee on the Judiciary.

H.R. 896. A bill to amend chapter 44 of title 18 of the United States Code (respecting firearms) to penalize the use of firearms in the commission of any felony and to increase the penalities in certain related existing provisions; to the Committee on the Judiciary.

H.R. 897. A bill to abolish the Commission on Executive, Legislative, and Judicial Salaries; to the Committee on Post Office and Civil Service.

H.R. 898. A bill to amend title 38, United States Code; to the Committee on Veterans' Affairs.

H.R. 899. A bill to amend title 38 of the United States Code with respect to the payment of certain benefits under that title; to the Committee on Veterans' Affairs.

H.R. 900. A bill to amend title II of the Social Security Act to provide that a beneficiary who dies shall (if otherwise qualified) be entitled to a prorated benefit for the month of his death; to the Committee on Ways and Means.

H.R. 901. A bill amending title 5 of the United States Code to improve agency rulemaking by expanding the opportunities for public participation, by creating procedures for congressional review of agency rules, and by expanding judicial review, and for other purposes; jointly, to the Committees on the Judiciary and Rules.

By Mr. FORD of Tennessee:

H.R. 902. A bill to amend the Fair Packaging and Labeling Act to require that packaged consumer commodities be labeled to show their selling price; to the Committee on Interstate and Foreign Commerce.

H.R. 903. A bill to amend the Federal Aviation Act of 1958, as amended to broaden the power of the Civil Aeronautics Board to grant relief by exemption in certain cases, and for other purposes; to the Committee on Public Works and Transportation.

H.R. 904. A bill to amend title 38 of the United States Code to make certain that recipients of veterans' pension and compensation will not have the amount of such pension or compensation reduced because of increases in monthly social security benefits; to the Committee on Veterans' Affairs.

H.R. 905. A bill to amend the Internal Revenue Code of 1954 to encourage the employment of handicapped individuals by providing a tax credit for a certain portion of the wages paid to such individuals; to the Committee on Ways and Means.

By Mr. GONZALEZ:

H.R. 906. A bill to prohibit fuel adjustment clauses in utility rate schedules; to the Committee on Interstate and Foreign Commerce.

H.R. 907. A bill to amend the Internal Revenue Code of 1954; to the Committee on Ways and Means.

By Mr. GRADISON:

H.R. 908. A bill to provide improved and expedited procedures for foreclosure of multifamily mortgages owned or held by the United States pursuant to the National Housing Act and other Federal laws; to the Committee on Banking, Finance and Urban Affairs.

H.R. 909. A bill to provide for additional sentences for commission of a felony with use of a firearm; to the Committee on the Judiciary.

H.R. 910. A bill to amend title 39, United States Code, to prohibit certain franked mailings by Members of the Congress during certain periods before elections; to the Committee on Post Office and Civil Service.

By Mr. HAMMERSCHMIDT:

H.R. 911. A bill to amend the Occupational Safety and Health Act of 1970 to provide that any employer who successfully contests a citation or penalty shall be awarded a reasonable attorney's fee and other reasonable litigation costs; to the Committee on Education and Labor.

H.R. 912. A bill to amend the Communications Act of 1934 in order to prohibit the television broadcasting of programs portraying nudity, obscenity, or explicit sexual activity which is offensive to the public taste and morals; to the Committee on Interstate and Foreign Commerce.

H.R. 913. A bill to provide that in civil actions where the United States is a plaintiff, a prevailing defendant may recover a reasonable attorney's fee and other reasonable litigation costs; to the Committee on the Judiciary.

H.R. 914. A bill to amend title 38 of the United States Code in order to provide mortgage protection life insurance to certain veterans unable to acquire commercial life insurance because of service-connected disabilities; to the Committee on Veterans' Affairs.

H.R. 915. A bill to amend title 38, United States Code, to increase the rates of disability compensation for disabled veterans and to increase the rates of dependency and indemnity compensation; to the Committee on Veterans' Affairs.

H.R. 916. A bill to amend title 38, United States Code, to provide supplemental pension payments to a surviving spouse of a war veteran if such spouse has attained age 78 years; to the Committee on Veterans' Affairs.

H.R. 917. A bill to amend title 38, United States Code, to increase the rates of vocational rehabilitation, educational assistance, and special training allowance paid to eligi-

ble veterans and persons, and for other purposes; to the Committee on Veterans' Affairs.

H.R. 918. A bill to amend title 38 of the United States Code in order to extend the preference accorded Veterans' Administration medical and health personnel for attendance at regional medical education centers, and for other purposes; to the Committee on Veterans' Affairs.

H.R. 919. A bill to amend title 38 of the United States Code in order to expand the authority of the Administrator of Veterans' Affairs to extend medical services to veterans of World War I, and for other purposes; to the Committee on Veterans' Affairs.

H.R. 920. A bill to amend title 38, United States Code, in order to revise the provisions therein relating to the construction, alteration, and acquisition of medical facilities under the jurisdiction of Veterans' Affairs; to the Committee on Veterans' Affairs.

H.R. 921. A bill to amend title 38, United States Code, relating to the authority of the Administrator of Veterans' Affairs to readjust the schedule of ratings for the disabilities of veterans; to the Committee on Veterans' Affairs.

H.R. 922. A bill to repeal the earnings limitation of the Social Security Act; to the Committee on Ways and Means.

H.R. 923. A bill to establish a method whereby the Congress (acting in accordance with specified procedures) may prevent the adoption by the executive branch of rules or regulations which are contrary to law or inconsistent with congressional intent or which go beyond the mandate of the legislation which they are designed to implement; jointly, to the Committees on the Judiciary and Rules.

H.R. 924. A bill to amend title XVIII of the Social Security Act to authorize payment under the medicare program for certain services performed by chiropractors; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

H.R. 925. A bill to amend title XVIII of the Social Security Act to authorize payment under the supplementary medical insurance program for optometric and medical vision care; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. HANSEN (for himself, Mr. ABDNOR, Mr. GRASSLEY, Mr. THONE, Mr. BROYHILL, Mr. FRENZEL, Mr. FREY, and Mr. MOORHEAD of California):

H.R. 926. A bill; Government Executive Analysis and Reform (GEAR) Commission Act of 1977; to the Committee on Government Operations.

By Mr. HARRINGTON:

H.R. 927. A bill to establish a program of full employment, vocational training, and employment placement for all young Americans willing and able to work, and for other purposes; to the Committee on Education and Labor.

H.R. 928. A bill to amend the Local Public Works Capital Development and Investment Act of 1976 to increase the authorization, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. HARRINGTON (for himself, Mr. DELLUMS, Mr. DODD, Mr. EDWARDS of California, Mr. EILBERG, Mr. FORD of Tennessee, Mr. HARRIS, Mr. HAWKINS, Ms. KEYS, Mr. MIKVA, Mr. MOAKLEY, Mr. PATTISON of New York, Mr. ROSENTHAL, Mr. WAXMAN, and Mr. ZEFERETTI):

H.R. 929. A bill to prohibit the control of alternative energy sources by integrated oil companies; to the Committee on the Judiciary.

By Mr. HIGHTOWER:

H.R. 930. A bill to require a periodic review and justification of the continued existence of certain Federal regulatory agencies and to provide for the elimination of such agencies or their successor agencies after a specified period of time, and for other purposes; jointly, to the Committees on Government Operations and Rules.

By Mrs. HOLT:

H.R. 931. A bill to provide for payments in lieu of real property taxes, with respect to certain real property owned by the Federal Government; to the Committee on Government Operations.

H.R. 932. A bill to assure the continued dedication of the United States to quality education and the neighborhood school concept; jointly, to the Committees on the Judiciary and Education and Labor.

H.R. 933. A bill to provide that the changes made by the Tax Reform Act of 1976 to the exclusion for sick pay shall only apply to taxable years beginning after December 31, 1976; to the Committee on Ways and Means.

By Ms. HOLTZMAN (for herself, Mr. BINGHAM, Mr. JOHN L. BURTON, Mrs. CHISHOLM, Mr. CONYERS, Mr. LAFALCE, Mr. LUNDINE, Mrs. MEYNER, Mr. MOAKLEY, Mr. MURPHY of New York, Mr. NOWAK, Mr. OTTINGER, Mr. ROSENTHAL, Mr. SCHEUER, Mr. WEISS, Mr. WOLFF, and Mr. ZEFERETTI):

H.R. 934. A bill to amend titles IV, XI, and XIX of the Social Security Act to increase the Federal matching rate for purposes of reimbursement to States under the programs of aid to needy families with children and medical assistance; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. HUGHES:

H.R. 935. A bill to establish a policy for the management of oil and natural gas in the Outer Continental Shelf; to protect the marine and coastal environment; to amend the Outer Continental Shelf Lands Act; and for other purposes; jointly, to the Committees on Interior and Insular Affairs, the Judiciary, and Merchant Marine and Fisheries.

By Mr. JEFFORDS (for himself, Mr. FISHER, Mr. UDALL, Mr. BINGHAM, Mr. EMERY, Mr. KREBS, Mrs. CHISHOLM, Mr. DELLUMS, Mr. BEDELL, Mr. SEIBERLING, Mr. AUCOIN, Mr. MOFFETT, Mr. SCHEUER, Mr. HARRINGTON, Mr. TSONGAS, Mr. FRASER, Mr. KOCH, Mr. OTTINGER, Mr. WEAVER, Mr. DUNCAN of Oregon, Mr. EDGAR, Mr. RICHMOND, Mr. CHARLES H. WILSON of California, Mr. STUDDS, and Mr. MOAKLEY):

H.R. 936. A bill to require a refund value for certain beverage containers, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. JEFFORDS (for himself, Mr. BADILLO, Mr. WEISS, and Mr. KILDEE):

H.R. 937. A bill to require a refund value for certain beverage containers, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. KASTENMEIER:

H.R. 938. A bill to protect the public health and welfare by providing certain minimum standards of sanitation for imported dairy products; to the Committee on Agriculture.

H.R. 939. A bill to provide price support for milk at not less than 90 percent of parity with quarterly adjustments for the period beginning April 1, 1977 and ending on March 31, 1979; to the Committee on Agriculture.

H.R. 940. A bill to amend title 18 of the United States Code to provide a code of accountability and liability for Government officials engaged in making and implementing national security policy; to the Committee on the Judiciary.

H.R. 941. A bill to amend the Clayton Act to provide for additional regulation of certain anticompetitive developments in the agricultural industry; to the Committee on the Judiciary.

H.R. 942. A bill to amend title 39, United States Code, to establish procedures to regulate the manner in which the U.S. Postal Service may close post offices serving rural areas and small communities and towns; to the Committee on Post Office and Civil Service.

H.R. 943. A bill to exempt from Federal income taxation certain nonprofit corporations all of whose members are tax-exempt credit unions; to the Committee on Ways and Means.

H.R. 944. A bill to establish a Federal Oil and Gas Corporation; jointly, to the Committees on Interior and Insular Affairs, Interstate and Foreign Commerce, and Science and Technology.

By Mr. KASTENMEIER (for himself and Mr. RAILSBACK):

H.R. 945. A bill to amend the Consolidated Farm and Rural Development Act, to provide an alternate method of making loans for acquisition and improvements of the farm, needed by farm families, including young farmers, and to provide the borrower family with adequate standards of living and the consumer with reasonable prices for dairy and other agricultural products, as well as to maintain and improve national health, and for other purposes; to the Committee on Agriculture.

By Mr. KASTENMEIER (for himself, Mr. RAILSBACK, Mr. ASHLEY, Mr. AU COIN, Mr. BADILLO, Mr. BALDUS, Mr. BAUCUS, Mr. BONKER, Mr. BRODHEAD, Mr. JOHN L. BURTON, Mr. PHILLIP BURTON, Mr. CARR, Mrs. CHISHOLM, Mr. EDGAR, Mr. EMERY, Mr. FORD of Tennessee, Mr. FRASER, Mr. GILMAN, Mr. GRADISON, Mr. HANNAFORD, Mr. HARKIN, Mr. HARRINGTON, Mr. HILLIS, Mr. HUGHES, and Mr. JENRETTE):

H.R. 946. A bill to require candidates for Federal office, Members of the Congress, and officers and employees of the United States to file statements with the Comptroller General with respect to their income and financial transactions; to the Committee on the Judiciary.

By Mr. KASTENMEIER (for himself, Mr. RAILSBACK, Ms. KEYS, Mr. KOCH, Mr. KREBS, Mr. LEHMAN, Mr. LENT, Mr. MCHUGH, Mr. MADIGAN, Mr. MAGUIRE, Mr. MEEDS, Mrs. MEYNER, Mr. MOAKLEY, Mr. MOTTL, Mr. NOLAN, Mr. OBERSTAR, Mr. OTTINGER, Mr. PATTISON of New York, Mr. PRITCHARD, Mr. REUSS, Mr. RICHMOND, Mr. ROSENTHAL, Mr. SANTINI, Mrs. SPELLMAN, and Mr. STARK):

H.R. 947. A bill to require candidates for Federal office, Members of the Congress, and officers and employees of the United States to file statements with the Comptroller General with respect to their income and financial transactions; to the Committee on the Judiciary.

By Mr. KASTENMEIER (for himself, Mr. RAILSBACK, Mr. STUDDS, Mr. THONE, Mr. TRAXLER, Mr. VANIK, Mr. WAXMAN, Mr. WEAVER, Mr. WIRTH, Mr. WOLFF, Mr. ZABLOCKI, Mr. LLOYD of California, Mr. ROE, and Mr. JEFFORDS):

H.R. 948. A bill to require candidates for Federal office, Members of the Congress, and officers and employees of the United States to file statements with the Comptroller General with respect to their income and financial transactions; to the Committee on the Judiciary.

By Mr. KOCH:

H.R. 949. A bill to amend the Museum Services Act to increase the authorization of appropriations for the purpose of making grants under such act; to the Committee on Education and Labor.

H.R. 950. A bill to provide that the place of birth of an individual issued a U.S. passport shall not be disclosed in the passport and to eliminate the requirement that the passport of an individual seeking entry into the United States disclose such individual's place of birth; to the Committee on International Relations.

H.R. 951. A bill to amend the Public Health Service Act to establish a program of Federal financial assistance for research programs and specialized treatment centers for the study and treatment of problems respecting human fertility and sterility and the human reproductive process, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 952. A bill to amend the Social Security Act to replace existing Federal public assistance and welfare programs with a single program under which all residents of the United States are guaranteed an adequate minimum income, with incentives to work for those who are able to do so, and for other purposes; to the Committee on Ways and Means.

H.R. 953. A bill to authorize the Secretary of the Treasury to provide loan guarantees for the debts of municipalities; jointly, to the Committees on Banking, Finance and Urban Affairs and Ways and Means.

H.R. 954. A bill to amend the Internal Revenue Code of 1954 to increase the excise tax on cigarettes, and to amend the Public Health Service Act to establish a trust fund to be used to fund the research programs of the National Cancer Institute; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. KOCH (for himself and Mr. WIRTH):

H.R. 955. A bill to authorize the Secretary of Transportation to make grants for the construction of bikeways; to the Committee on Public Works and Transportation.

By Mr. LAGOMARSINO:

H.R. 956. A bill to amend the Export Administration Act of 1969; to the Committee on International Relations.

H.R. 957. A bill to provide for the establishment of a National Voluntary Medical and Hospital Services Insurance Act; to the Committee on Interstate and Foreign Commerce.

By Mr. LEHMAN:

H.R. 958. A bill to amend title XVIII of the Social Security Act to eliminate all the deductibles, coinsurance, and time limitations presently applicable to benefits thereunder; to eliminate medicare taxes as the method of financing hospital insurance benefits and premium payments as the method of financing supplementary medical insurance benefits (so that all benefits under such title will be financed from general revenues); to provide payment for eye care, dental care, hearing aids, prescription drugs, prosthetics, one physical checkup a year, preventive care, diagnosis of breast cancer, services of certain psychologists, services of registered nurses, and certain other items not now covered; and to provide for the administrative and judicial review of claims (involving the amount of benefits payable) which arise under the supplementary medical insurance program; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. LEVITAS:

H.R. 959. A bill amending title 5 of the United States Code to improve agency rulemaking by expanding the opportunities for public participation, by creating procedures for congressional review of agency rules, and by expanding judicial review, and for other purposes; jointly, to the Committees on the Judiciary and Rules.

H.R. 960. A bill amending title 5 of the United States Code to improve agency rulemaking by expanding the opportunities for public participation, by creating procedures for congressional review of future agency rules, and by expanding judicial review, and for other purposes; jointly, to the Committees on the Judiciary and Rules.

H.R. 961. A bill amending title 5 of the United States Code to improve agency rulemaking by expanding the opportunities for public participation, by creating procedures for congressional review of agency rules imposing certain sanctions, and by expanding judicial review, and for other purposes; jointly, to the Committees on the Judiciary and Rules.

By Mr. LLOYD of California:

H.R. 962. A bill to provide for the elimination of inactive and overlapping Federal programs, to require authorizations of new budget authority for Government programs and activities at least every 4 years, to establish a procedure for zero-base review and evaluation of Government programs and activities every 4 years, and for other purposes; to the Committee on Rules.

H.R. 963. A bill to abolish certain Federal regulatory agencies and to bring about the abolition of certain Federal regulatory agencies or their successor agencies after a specified period of time, and for other purposes; jointly, to the Committees on Government Operations and Rules.

By Mr. MINISH:

H.R. 964. A bill to prohibit the use of dogs by the Department of Defense in connection with the research, testing, development, or evaluation of radioactive, chemical, or biological warfare agents, and to require the Department of Defense to develop and use, where feasible, alternative, nonanimal methods of experimentation; to the Committee on Armed Services.

H.R. 965. A bill to authorize and direct the General Accounting Office to audit the Federal Reserve Board, the Federal Advisory Council, the Federal Open Market Committee, and the Federal Reserve banks and their branches; to the Committee on Banking, Finance and Urban Affairs.

H.R. 966. A bill to amend title II of the Social Security Act to permit the payment of benefits to a married couple on their combined earnings record, to provide that remarriage shall not affect entitlement to widow's, widower's, or parent's benefits, to liberalize the earnings test, and to extend an individual's benefit entitlement through the month of his or her death, and to amend title XVIII of such act to provide coverage under the supplementary medical insurance program for clinical psychologist's services and for certain tests and examinations given for the detection of breast cancer; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. MOAKLEY:

H.R. 967. A bill to amend title 49, United States Code, relating to the payment of the cost of any inspection or quarantine service required to be performed by the Federal Government or any agency thereof at airports of entry or other places of inspection as a consequence of the operation of aircraft during regularly established hours of service on Sundays or holidays; to the Committee on Public Works and Transportation.

H.R. 968. A bill to amend the Internal Revenue Code of 1954 to remove certain restrictions which prevent recent graduates from educational institutions from using income averaging; to the Committee on Ways and Means.

By Mr. MOORHEAD of California:

H.R. 969. A bill to transfer jurisdiction over the food stamp program to the Secretary of Health, Education, and Welfare; to the Committee on Agriculture.

H.R. 970. A bill to amend the Occupational Safety and Health Act of 1970 to provide that any employer who successfully contests a citation or penalty shall be awarded a reasonable attorney's fee and other reasonable litigation costs; to the Committee on Education and Labor.

H.R. 971. A bill to prohibit travel at Government expense outside the United States by Members of Congress who have been defeated, or who have resigned, or retired; to the Committee on House Administration.

H.R. 972. A bill relating to the settlement of debts owed the United States by foreign countries; to the Committee on International Relations.

H.R. 973. A bill to limit U.S. contributions to the United Nations; to the Committee on International Relations.

H.R. 974. A bill to amend the Uniform Time Act of 1966 to provide that daylight savings time shall begin on the last Sunday in February of each year; to the Committee on Interstate and Foreign Commerce.

H.R. 975. A bill to provide that in civil actions where the United States is a plaintiff, a prevailing defendant may recover a reasonable attorney's fee and other reasonable litigation costs; to the Committee on the Judiciary.

H.R. 976. A bill to amend section 1951, title 18, United States Code, act of July 3, 1946; to the Committee on the Judiciary.

H.R. 977. A bill to amend title 5, United States Code, to exclude individuals who are not citizens of the United States from appointment in the competitive service, and for other purposes; to the Committee on Post Office and Civil Service.

H.R. 978. A bill to amend the Congressional Budget Act of 1974 to establish in the Congress a zero-base budgeting process, with full congressional review of each Federal program at least once every 6 years; to the Committee on Rules.

H.R. 979. A bill to amend title 38 of the United States Code in order to provide mortgage protection life insurance to certain veterans unable to acquire commercial life insurance because of service-connected disabilities; to the Committee on Veterans' Affairs.

H.R. 980. A bill to amend the Internal Revenue Code of 1954 to allow a deduction from gross income for social agency, legal, and related expenses incurred in connection with the adoption of a child by the taxpayer; to the Committee on Ways and Means.

H.R. 981. A bill to amend the Internal Revenue Code of 1954 to increase the excise tax on cigarettes, and to amend the Public Health Service Act to establish a trust fund to be used to fund the research programs of the National Cancer Institute; to the Committee on Ways and Means.

H.R. 982. A bill to amend the Internal Revenue Code of 1954 to allow a credit against income tax to individuals for certain expenses incurred in higher education; to the Committee on Ways and Means.

H.R. 983. A bill to amend the Internal Revenue Code of 1954 to provide that blood donations shall be considered as charitable contributions deductible from gross income; to the Committee on Ways and Means.

H.R. 984. A bill to repeal the earnings limitation of the Social Security Act; to the Committee on Ways and Means.

H.R. 985. A bill to amend title II of the Social Security Act to permit the payment of benefits to a married couple on their combined earnings record where that method of computation produces a higher combined

benefit; to the Committee on Ways and Means.

H.R. 986. A bill to provide that certain employers contracting with the Federal Government may compute wages on the basis of a 4-day workweek consisting of 10-hour workdays; jointly, to the Committees on Education and Labor and the Judiciary.

H.R. 987. A bill to amend XVIII of the Social Security Act to include hearing aids and dentures among the items and services for which payment may be made under the supplementary medical insurance program; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. MOSS (for himself, Mr. EDWARDS of California, Mr. CHARLES WILSON of Texas, Mr. CARNEY, Mr. LEFANTE, Mr. HANNAFORD, Mr. JEFFORDS, Mr. HARRIS, Mr. KREBS, Mr. BUCHANAN, Mr. RUNNELS, Mr. GONZALEZ, Mr. DUNCAN of Oregon, Mr. BINGHAM, and Mr. WIRTH):

H.R. 988. A bill to exercise the power of the Congress under article IV of the Constitution to declare the effect of certain State judicial proceedings respecting the custody of children; to the Committee on the Judiciary.

By Mr. MOSS (for himself, Mr. EDWARDS of California, Mr. NEDZI, Mr. OTTINGER, Mr. BUTLER, Mr. BEDELL, Mr. ROSE, Mr. STEIGER, Mr. DELLUMS, Mr. LAGOMARSINO, Mr. DOWNEY, Mr. MINETA, Mrs. SPELLMAN, and Mr. SISK):

H.R. 989. A bill to exercise the power of the Congress under article IV of the Constitution to declare the effect of certain State judicial proceedings respecting the custody of children; to the Committee on the Judiciary.

By Mr. MURPHY of New York:

H.R. 990. A bill to authorize research, development, and demonstration projects relating to new techniques to protein production, fertilizer production, and processing vegetable protein, and an education program to encourage market acceptance of products produced by such methods; to the Committee on Agriculture.

H.R. 991. A bill to provide that the sons and daughters of recipients of the Distinguished Service Cross, the Navy Cross, or the Air Force Cross may be admitted to the service academies on the same basis as sons and daughters of recipients of the Congressional Medal of Honor; to the Committee on Armed Services.

H.R. 992. A bill to amend title 10 of the United States Code in order to provide former members and their dependents medical and dental care in uniformed services facilities during the 60-day period after discharge or separation, and to make such persons eligible for post exchange and commissary privileges during such 60-day period; to the Committee on Armed Services.

H.R. 993. A bill to amend title 10 of the United States Code to prohibit contracting for the construction of vessels for the U.S. Navy at places outside of the United States; to the Committee on Armed Services.

H.R. 994. A bill to establish a loan program to assist industry and businesses in areas of substantial unemployment to meet pollution control requirements; to the Committee on Banking, Finance and Urban Affairs.

H.R. 995. A bill to establish a National Bank for Cooperative Housing to aid in financing the purchase and construction of low- and middle-income cooperative housing; to the Committee on Banking, Finance and Urban Affairs.

H.R. 996. A bill to create a National Landlord and Tenant Commission, to establish housing courts, and to define or to provide therefor the rights, obligations, and liabilities of landlords and tenants so as to regulate the activities of the commercial rental housing operations which affect the stability of the economy, the amount of a person's real income, the travel of goods and people in commerce, and the general welfare of all citizens of this Nation; to the Committee on Banking, Finance and Urban Affairs.

H.R. 997. A bill to authorize a White House Conference on Education; to the Committee on Education and Labor.

H.R. 998. A bill to provide that local educational agencies shall not receive Federal financial assistance unless they provide educational services to all handicapped children at levels of expenditure at least equal to expenditures for other children; to the Committee on Education and Labor.

H.R. 999. A bill to authorize grants to States for the establishment of vision screening programs for public school students; to the Committee on Education and Labor.

H.R. 1000. A bill to provide for the development and implementation of programs for youth camp safety; to the Committee on Education and Labor.

H.R. 1001. A bill to authorize the Secretary of Labor to provide for the development and implementation of programs of units of local government to provide comprehensive year-round recreational opportunities for the Nation's underprivileged youth, and for other purposes; to the Committee on Education and Labor.

H.R. 1002. A bill to provide for the monthly publication of a Consumer Price Index for the Elderly and to provide for studies to be made with regard to utilizing such index in determining cost-of-living adjustments authorized in certain Federal programs for individuals who are at least 62 years of age; to the Committee on Education and Labor.

H.R. 1003. A bill to establish a Department of Health; to the Committee on Government Operations.

H.R. 1004. A bill to require the President to include in the budget transmitted to Congress additional information showing the regional impact of the budget proposals by State and congressional districts, and for other purposes; to the Committee on Government Operations.

H.R. 1005. A bill to provide that the Secretary of State shall make certain compensatory payments to States and political subdivisions with respect to United Nations property tax exemptions; to the Committee on Government Operations.

H.R. 1006. A bill requiring that each Member of Congress be notified of the intended disposition of federally owned real property in the district he represents; to the Committee on Government Operations.

H.R. 1007. A bill to provide that the library of New York Law School shall be considered a designated depository for Federal Government publications; to the Committee on House Administration.

H.R. 1008. A bill to amend the Legislative Reorganization Act of 1970 to provide seminars to freshmen Members of the Congress, and for other purposes; to the Committee on House Administration.

H.R. 1009. A bill to authorize the construction and maintenance of the General Draza Mihailovich Monument in Washington, D.C., in recognition of the role he played in saving the lives of approximately 500 U.S. airmen in Yugoslavia during World War II; to the Committee on House Administration.

H.R. 1010. A bill to establish the National Trust for the Preservation of Historic Ships; to the Committee on House Administration.

H.R. 1011. A bill to amend the Foreign Assistance Act of 1961 so as to provide for reductions in aid to countries in which property of the United States is damaged or destroyed by mob action; to the Committee on International Relations.

H.R. 1012. A bill to amend the Communications Act of 1934 that licenses for the operation of broadcasting stations may be issued and renewed for terms of 4 years, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 1013. A bill to amend the Communications Act of 1934 to provide that certain television broadcasting stations must include foreign language subtitles in programs of local origin; to the Committee on Interstate and Foreign Commerce.

H.R. 1014. A bill to amend section 223 of the Communications Act of 1934 to prohibit harassing telephone calls made to collect alleged debts, and to inform the public of their right to be free from harassing, coercive, abusive, and obscene telephone calls; to the Committee on Interstate and Foreign Commerce.

H.R. 1015. A bill to strengthen and clarify the law prohibiting the introduction, or manufacture for introduction, of switchblade knives into interstate commerce; to the Committee on Interstate and Foreign Commerce.

H.R. 1016. A bill to amend the Flammable Fabrics Act to extend the provisions of that act to construction materials used in the interiors of homes, offices, and other places of assembly or accommodation, and to authorize the establishment of toxicity standards; to the Committee on Interstate and Foreign Commerce.

H.R. 1017. A bill to establish a program to facilitate the purchase of life insurance by cancer victims; to the Committee on Interstate and Foreign Commerce.

H.R. 1018. A bill to establish a Health Action Corps; to the Committee on Interstate and Foreign Commerce.

H.R. 1019. A bill to amend the National Traffic and Motor Vehicle Safety Act of 1966 to provide for the installation of passive restraints for occupant crash protection in new passenger cars, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 1020. A bill to establish a grant-in-aid program to encourage the licensing by the States of motor vehicle mechanics; to the Committee on Interstate and Foreign Commerce.

H.R. 1021. A bill to provide for the establishment of the Electric Power Production Authority in the Department of Commerce, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 1022. A bill to provide for protection of franchised dealers in petroleum products; to the Committee on Interstate and Foreign Commerce.

H.R. 1023. A bill to amend the Public Health Service Act to provide for a National Center for Clinical Pharmacology, to provide support for the study of clinical pharmacology and clinical pharmacy, and to provide for review of drug prescribing; and to amend the Federal Food, Drug, and Cosmetic Act to provide for additional regulation of drug promotions, to provide for recordkeeping and reporting for all drugs, to provide for certification of programs respecting manufacturers' representatives, to provide for the submission of data relating to therapeutic equivalence of drugs, to provide for the certification of certain drugs, to provide for a national drug compendium, to provide additional drug information to consumers, to establish a code system for the identification of all drugs, to provide for the recall of adulterated or misbranded foods, drugs, and cosmetics, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 1024. A bill to amend the Immigration and Nationality Act, and for other purposes; to the Committee on the Judiciary.

H.R. 1025. A bill to amend the Immigration and Nationality Act to make additional immigrant visas available for immigrants from

certain foreign countries, and for other purposes; to the Committee on the Judiciary.

H.R. 1026. A bill to amend title 18 of the United States Code to prohibit bribery of State and local law enforcement officers and other elected or appointed officials; to the Committee on the Judiciary.

H.R. 1027. A bill to amend title 18 of the United States Code to establish an Office of the U.S. Correctional Ombudsman; to the Committee on the Judiciary.

H.R. 1028. A bill to amend title 18 of the United States Code to prohibit the transportation or use in interstate or foreign commerce of counterfeit, fictitious, altered, lost, or stolen airline tickets; to the Committee on the Judiciary.

H.R. 1029. A bill to make it a Federal crime to kill or assault a fireman or law enforcement officer engaged in the performance of his duties when the offender travels in interstate commerce or uses any facility of interstate commerce for such purpose; to the Committee on the Judiciary.

H.R. 1030. A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968 to provide a system for the redress of law enforcement officers' grievances and to establish a law enforcement officers' bill of rights in each of the several States, and for other purposes; to the Committee on the Judiciary.

H.R. 1031. A bill to eliminate racketeering in the sale and distribution of cigarettes and to assist State and local governments in the enforcement of cigarette taxes; to the Committee on the Judiciary.

H.R. 1032. A bill to authorize the Federal Bureau of Investigation to exchange fingerprint information with registered national security exchanges and related agencies; to the Committee on the Judiciary.

H.R. 1033. A bill to provide for the redistribution of unused quota numbers; to the Committee on the Judiciary.

H.R. 1034. A bill to protect the constitutional rights of professional athletes; to the Committee on the Judiciary.

H.R. 1035. A bill to regulate lobbying and related activities; to the Committee on the Judiciary.

H.R. 1036. A bill to amend the act of December 27, 1950, to require public notice of request to waive certain navigation laws requirements; to the Committee on Merchant Marine and Fisheries.

H.R. 1037. A bill to require that a percentage of U.S. oil imports be carried on U.S.-flag vessels; to the Committee on Merchant Marine and Fisheries.

H.R. 1038. A bill to amend section 27 of the Merchant Marine Act of 1920, to provide a monetary penalty for the transportation of merchandise in violation of the coastwise laws; to the Committee on Merchant Marine and Fisheries.

H.R. 1039. A bill to amend the Merchant Marine Act of 1920, in order to provide that the coastwise laws shall extend to the Virgin Islands with respect to the transportation of crude oil, residual fuel oil, and refined petroleum products; to the Committee on Merchant Marine and Fisheries.

By Mr. CORMAN (for himself, Mr. ANDERSON of California, Mr. BOLLING, Mr. CARNEY, Mr. CLAY, Mr. CONYERS, Mr. DANIELSON, Mr. DIGGS, Mr. DRINAN, Mr. ECKHARDT, Mr. EDWARDS of California, Mr. EILBERG, Mr. HARRINGTON, Mr. JOHNSON of California, Mr. KOCH, Mr. MAGUIRE, Mr. MITCHELL of Maryland, Mr. MOSS, Mr. NIX, Mr. PRICE, Mr. RODINO, Mr. ROSENTHAL, Mr. ROYBAL, Mr. STARK, and Mr. STUDDS):

H.R. 1040. A bill to broaden the income tax base, provide equity among taxpayers, and to otherwise reform the income, estate, and gift tax provisions; to the Committee on Ways and Means.

By Mr. CORMAN (for himself, Mr. DELLUMS, Mr. HAWKINS, Mr. MEEDS, Mr. CHARLES H. WILSON of California, and Mr. WON PAT):

H.R. 1041. A bill to broaden the income tax base, provide equity among taxpayers, and to otherwise reform the income, estate, and gift tax provisions; to the Committee on Ways and Means.

By Mr. RICHMOND:

H.R. 1042. A bill to provide an opportunity to individuals to make financial contributions, in connection with the payment of their Federal income tax, for the advancement of the arts and the humanities; to the Committee on Ways and Means.

By Mr. MURPHY of New York:

H.R. 1043. A bill to provide for the increase of capacity and the improvement of operations of the Panama Canal, and for other purposes; to the Committee on Merchant Marine and Fisheries.

H.R. 1044. A bill to provide partial reimbursement for losses incurred by commercial fishermen as a result of restriction imposed on domestic commercial fishing by a State or the Federal Government; to the Committee on Merchant Marine and Fisheries.

H.R. 1045. A bill to clarify the shipping laws with respect to the certification and inspection requirements which apply to articulated tug-barge systems; to the Committee on Merchant Marine and Fisheries.

H.R. 1046. A bill to amend title 5, United States Code, to permit Federal, State, and local officers and employees to take an active part in political management and in political campaigns; to the Committee on Post Office and Civil Service.

H.R. 1047. A bill to protect the civilian employees of the exective branch of the U.S. Government in the enjoyment of their constitutional rights and to prevent unwarranted governmental invasions of their privacy; to the Committee on Post Office and Civil Service.

H.R. 1048. A bill to prohibit the furnishing of mailing lists and other lists of names or addresses by Government agencies to the public in connection with the use of the U.S. mails, and for other purposes; to the Committee on Post Office and Civil Service.

H.R. 1049. A bill to provide for posting information in post offices with respect to registration, voting, and communicating with lawmakers; to the Committee on Post Office and Civil Service.

H.R. 1050. A bill to designate the birthday of Martin Luther King, Jr., as a legal public holiday; to the Committee on Post Office and Civil Service.

H.R. 1051. A bill to designate the birthday of Susan B. Anthony as a legal public holiday; to the Committee on Post Office and Civil Service.

H.R. 1052. A bill to amend section 401(j) of the Federal Aviation Act of 1958, to provide that no air carrier shall discontinue service, in whole or in part, unless such discontinuance is found to be in the public interest by the Civil Aeronautics Board after public hearings; to the Committee on Public Works and Transportation.

H.R. 1053. A bill to amend the Federal Aviation Act of 1958 to safeguard American citizens from racial and religious discrimination by foreign nations while traveling abroad; to the Committee on Public Works and Transportation.

H.R. 1054. A bill to amend the Federal Aviation Act of 1958 to authorize reduced rate transportation for young people on a space-available basis; to the Committee on Public Works and Transportation.

H.R. 1055. A bill to amend the Federal Aviation Act of 1958 in order to authorize free or reduced-rate transportation to handicapped persons and persons who are 65 years of age or older, to amend the Interstate Commerce Act to authorize free or reduced-rate transportation for persons who are 65 years of age or older, and to provide new and improved transportation programs for the handicapped and the elderly; to the Committee on Public Works and Transportation.

H.R. 1056. A bill to amend the Federal Aviation Act of 1958 to authorize reduced-rate transportation for elderly people on a space-available basis; to the Committee on Public Works and Transportation.

H.R. 1057. A bill to amend the Federal Aviation Act of 1958 to protect airline ticket agents from liability for the usage of stolen airline tickets; to the Committee on Public Works and Transportation.

H.R. 1058. A bill to amend the Federal Aviation Act of 1958 to improve prevention of aircraft and airport violence, and for other purposes; to the Committee on Public Works and Transportation.

H.R. 1059. A bill to require the Secretary of Transportation to prescribe regulations governing the humane treatment of animals transported in air commerce; to the Committee on Public Works and Transportation.

H.R. 1060. A bill to provide for a national educational campaign to improve safety on the highways by improving driver skill, driver attitudes, and driver knowledge of highway regulations; to the Committee on Public Works and Transportation.

H.R. 1061. A bill to provide financial aid to local fire departments in the purchase of advanced firefighting equipment; to the Committee on Science and Technology.

H.R. 1062. A bill to provide financial aid for local fire departments in the purchase of firefighting suits and self-contained breathing apparatus; to the Committee on Science and Technology.

H.R. 1063. A bill to amend the Small Business Act to make loans available for small businesses suffering economic injuries as the result of the disruption of operations and services of public utilities; to the Committee on Small Business.

H.R. 1064. A bill to amend title II of the Social Security Act to permit the payment of benefits to a married couple on their combined earnings record where that method of computation produces a higher combined benefit; to the Committee on Ways and Means.

H.R. 1065. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

H.R. 1066. A bill to amend title II of the Social Security Act to increase to $7,500 the amount of outside earnings which (subject to further increases under the automatic adjustment provisions) is permitted an individual each year without any deductions from benefits thereunder; to the Committee on Ways and Means.

H.R. 1067. A bill to amend title II of the Social Security Act to provide a 50-percent across-the-board increase in benefits thereunder, with the resulting benefit costs being borne equally by employers, employees, and the Federal Government; to the Committee on Ways and Means.

H.R. 1068. A bill to amend title XVI of the Social Security Act to provide for emergency assistance grants to recipients of supplemental security income benefits, to authorize cost-of-living increases in State supplementary payments as well as in such benefits, to prevent reductions in such benefits because of social security benefit increases, to permit payment of such benefits directly to drug addicts and alcoholics (without a third-party payee) in certain cases, and to continue on a permanent basis the provision making sup-

plemental security income recipients eligible for food stamps, and for other purposes; to the Committee on Ways and Means.

H.R. 1069. A bill to amend section 103 of the Internal Revenue Code of 1954; to the Committee on Ways and Means.

H.R. 1070. A bill to amend the Internal Revenue Code of 1954 to allow a deduction from gross income for donations of blood to nonprofit blood banks and other nonprofit organizations; to the Committee on Ways and Means.

H.R. 1071. A bill to amend the Internal Revenue Code of 1954 to provide that the first $5,000 of compensation paid to law enforcement officers shall not be subject to the income tax; to the Committee on Ways and Means.

H.R. 1072. A bill to amend the Internal Revenue Code of 1954 to treat a portion of tuition paid to certain educational institutions as a charitable contribution; to the Committee on Ways and Means.

H.R. 1073. A bill to amend the Internal Revenue Code of 1954 to allow a credit against the individual income tax for tuition paid for the elementary or secondary education of dependents; to the Committee on Ways and Means.

H.R. 1074. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for income tax purposes of certain expenses incurred by the taxpayer for the education of a dependent; to the Committee on Ways and Means.

H.R. 1075. A bill to amend the Internal Revenue Code of 1954 to encourage higher education, and particularly the private funding thereof, by authorizing a deduction from gross income of reasonable amounts contributed to a qualified higher education fund established by the taxpayer for the purpose of funding the higher education of his dependents; to the Committee on Ways and Means.

H.R. 1076. A bill to amend the Internal Revenue Code of 1954 to exclude from gross income $500 of interest on savings in the case of an individual taxpayer; to the Committee on Ways and Means.

H.R. 1077. A bill to amend the Internal Revenue Code of 1954 to provide reasonable and necessary income tax incentives to encourage the utilization of recycled solid waste materials and to offset existing income tax advantages which promote depletion of virgin natural resources; to the Committee on Ways and Means.

H.R. 1078. A bill to amend the Internal Revenue Code of 1954 to provide an additional income tax exemption for a taxpayer, his spouse, or his dependent, who is disabled; to the Committee on Ways and Means.

H.R. 1079. A bill to extend to all unmarried individuals the full tax benefits of income splitting now enjoyed by married individuals filing joint returns; and to remove rate inequities for married persons where both are employed; to the Committee on Ways and Means.

H.R. 1080. A bill to promote the employment of unemployed Vietnam veterans in employment reflecting experience or providing training; to the Committee on Ways and Means.

H.R. 1081. A bill to promote the employment of unemployed Vietnam veterans; to the Committee on Ways and Means.

H.R. 1082. A bill to promote the employment of unemployed handicapped Vietnam veterans; to the Committee on Ways and Means.

H.R. 1083. A bill to amend the Tariff Schedules of the United States to repeal the special tariff treatment accorded to articles assembled abroad with components produced in the United States; to the Committee on Ways and Means.

H.R. 1084. A bill to permit officers and employees of the Federal Government to elect coverage under the old-age, survivors, and disability insurance system; to the Committee on Ways and Means.

H.R. 1085. A bill to promote the employment of unemployed Vietnam veterans; to the Committee on Ways and Means.

H.R. 1086. A bill to promote the employment of unemployed prisoners of war and missing in action Vietnam veterans; to the Committee on Ways and Means.

H.R. 1087. A bill to provide for a national educational campaign to combat the lack of consciousness of the public as to the danger of improper uses of motor vehicles on the highways, and to impose an additional tax of one-tenth of a cent per gallon on gasoline and other motor fuels to pay for the costs of such campaign; to the Committee on Ways and Means.

H.R. 1088. A bill to amend titles 10 and 37 of the United States Code in order to provide to members of the Armed Forces who were in a missing status for any period during the Vietnam conflict double credit for such period for retirement purposes and certain additional benefits and to provide such members certain medical benefits, to provide double retirement credit to Federal employees in such status during such conflict, and for other purposes; jointly, to the Committees on Armed Services and Post Office and Civil Service.

H.R. 1089. A bill to create a national system of health security; jointly, to the Committees on Interstate and Foreign Commerce and Ways and Means.

H.R. 1090. A bill to establish a program of comprehensive medical, hospital, and dental care as protection against the cost of ordinary and catastrophic illness by requiring employers to make insurance available to each employee and his family, by Federal financing of insurance for persons of low income, in whole or in part according to ability to pay, and by assuring the availability of insurance to all persons regardless of medical history, and on a guaranteed renewable basis; jointly, to the Committees on Interstate and Foreign Commerce and Ways and Means.

H.R. 1091. A bill to amend the Maritime Academy Act of 1958 in order to authorize the Secretary of the Navy to appoint students at State maritime academies and colleges as reserve midshipmen in the U.S. Navy, and for other purposes; jointly, to the Committees on Merchant Marine and Fisheries and Armed Services.

H.R. 1092. A bill to amend the National Environmental Policy Act of 1969 to provide for class actions in the U.S. district courts against persons responsible for creating certain environmental hazards; jointly, to the Committees on Merchant Marine and Fisheries and the Judiciary.

H.R. 1093. A bill to provide for additional Federal financial participation in expenses incurred in providing benefits to Indians, native Hawaiians, and other aboriginal persons, under certain State public assistance programs established pursuant to the Social Security Act; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. MURTHA:

H.R. 1094. A bill to provide for the burial in the Memorial Amphitheater of the National Cemetery at Arlington, Va., of the remains of an unknown American who lost his life while serving overseas in the Armed forces of the United States during the Vietnam conflict; to the Committee on Veterans' Affairs.

By Mr. GARY A. MYERS:

H.R. 1095. A bill to allow fire departments to transmit nonemergency communications relating to official fire department business over fire department radiofrequencies; to the Committee on Interstate and Foreign Commerce.

H.R. 1096. A bill to amend the Atomic Energy Act of 1954 to provide criminal penalties for offenses committed under the act with the intent to convert nuclear material or facilities; to the Committee on the Judiciary.

H.R. 1097. A bill to require Members of the Congress and officers and employees of the United States to file statements with the Comptroller General with respect to their income and financial transactions; to the Committee on the Judiciary.

H.R. 1098. A bill to amend title 39, United States Code, to increase to 60 days the period before an election during which a Member of, or Member-elect to, the Congress may not make a mass mailing as franked mail if such Member or Member-elect is a candidate in such election; to the Committee on Post Office and Civil Service.

H.R. 1099. A bill to create a joint committee on intelligence operations; to the Committee on Rules.

H.R. 1100. A bill to amend the Internal Revenue Code of 1954 to provide a deduction for certain employment-related expenses paid or incurred by a handicapped individual; to the Committee on Ways and Means.

H.R. 1101. A bill to amend the Internal Revenue Code of 1954 to provide that the special expenses incurred in maintaining a retarded or handicapped individual shall be allowable as a medical deduction without regard to the 3-percent floor; to the Committee on Ways and Means.

H.R. 1102. A bill to provide an opportunity to individuals to contribute $1, in connection with the payment of their Federal income tax, to the U.S. Olympic Fund, and for other purposes; to the Committee on Ways and Means.

H.R. 1103. A bill to provide for the Federal payment of State unemployment compensation benefits which are paid to individuals who are unemployed because of the natural gas shortage; to the Committee on Ways and Means.

H.R. 1104. A bill to strengthen Federal nepotism laws as they pertain to Members and employees of the Congress, and for other purposes; jointly, to the Committees on Post Office and Civil Service and House Administrations.

By Mr. NICHOLS (for himself and Mr. DAN DANIEL):

H.R. 1105. A bill to amend chapter 49 of title 10, United States Code, to prohibit unionization of the Armed Forces; to the Committee on Armed Services.

By Mr. NICHOLS (for himself and Mr. BRINKLEY):

H.R. 1106. A bill to provide for the establishment within the National Cemetery System of the Fort Mitchell Regional Veterans' Cemetery in Russell County, Ala.; to the Committee on Veterans' Affairs.

By Mr. O'BRIEN:

H.R. 1107. A bill to amend the Civil Rights Act of 1964 to make it an unlawful employment practice to discriminate against individuals who are physically handicapped because of such handicap; to the Committee on Education and Labor.

H.R. 1108. A bill to amend section 404(b) of the Federal Aviation Act of 1958 to provide that no physically handicapped individual shall be denied air transportation solely because of such physical handicap, and for other purposes; to the Committee on Public Works and Transportation.

H.R. 1109. A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits thereunder; to the Committee on Ways and Means.

H.R. 1110. A bill to allow a credit against Federal income taxes or a payment from the U.S. Treasury for State and local real property taxes or an equivalent portion of rent paid on their residences by individuals who have attained age 65; to the Committee on Ways and Means.

H.R. 1111. A bill to assure the continued dedication of the United States to quality education and the neighborhood concept; jointly, to the Committees on the Judiciary and Education and Labor.

By Mr. PATTEN:

H.R. 1112. A bill to amend the Tariff Schedules of the United States by repealing item

807.00 of schedule 8, part 1, subpart B; to the Committee on Ways and Means.

H.R. 1113. A bill to amend the Social Security Act to provide for inclusion of the services of licensed (registered) nurses under medicare and medicaid; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. PEPPER (for himself and Mr. KOCH):

H.R. 1114. A bill to amend the Public Health Service Act to provide additional programs of assistance for health personnel training programs and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. PEPPER:

H.R. 1115. A bill to amend the Age Discrimination in Employment Act of 1967 to provide that all Federal employees described in section 15 of such act shall be covered under the provisions of such act regardless of their age; to the Committee on Education and Labor.

H.R. 1116. A bill to amend title XVIII of the Social Security Act to remove all limits on the number of home health visits for which payment may be made under both part A and part B (eliminating the requirement of prior hospitalization in the case of home health care under part A), to include additional types of services as home health care, to provide coverage for preventive care under part B, to provide coverage for services furnished in outpatient rehabilitation facilities and elderly day care centers, to improve the administration of the medicare program, and for other purposes; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

H.R. 1117. A bill to establish within the Department of Health, Education, and Welfare a Home Health Clearinghouse to provide elderly persons with a single place where they can obtain complete information on the Federal health programs available to them, and to create within the Department an Assistant Secretary for Elderly Health with responsibility for all health and health-related matters involving the elderly; jointly, to the Committees on Interstate and Foreign Commerce and Ways and Means.

H.R. 1118. A bill to amend the Older Americans Act and the Public Health Service Act to provide expanded counseling assistance for the elderly sick and disabled; to the Committee on Education and Labor.

H.R. 1119. A bill to amend the Older Americans Act of 1965 to provide grants to organizations for providing legal assistance to poor, elderly individuals in connection with their entitlement to home health services under titles XVIII, XIX, and XX of the Social Security Act; jointly, to the Committees on Education and Labor and the Judiciary.

H.R. 1120. A bill to amend title XX of the Social Security Act to provide for the reallotment of unused social services funds, in any fiscal year, to States which will use such funds during the succeeding year in furnishing services aimed at preventing or reducing inappropriate institutional care by making home or community care available; to provide additional Federal matching for multipurpose senior center programs; and to provide for the standardization of eligibility requirements for the funding of senior centers; to the Committee on Ways and Means.

H.R. 1121. A bill to amend the National Housing Act and other acts for the purpose of providing assistance for outpatient geriatric clinics and for multipurpose senior centers, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

H.R. 1122. A bill to amend the Internal Revenue Code of 1954 to allow a deduction to taxpayers who contribute the right to use certain real property to charitable organizations for outpatient geriatric clinics or for multipurpose senior centers; to the Committee on Ways and Means.

H.R. 1123. A bill to amend the Older Americans Act of 1965 to authorize funds for the establishment and operation of multipurpose senior centers, and for other purposes; jointly, to the Committees on Education and Labor, Interstate and Foreign Commerce, and Ways and Means.

H.R. 1124. A bill making a supplemental appropriation for payments under home health service grants and making an appropriation for payments under multipurpose senior center grants; to the Committee on Appropriations.

H.R. 1125. A bill to amend the Social Security Act to provide that any patient of a long-term care institution participating in the medicare or medicaid program, or otherwise receiving funds under that act, shall have the right to terminate his or her contract with such institution upon giving reasonable advance notice, and to expressly prohibit such an institution from requiring any patient to turn over to it any income received by him or her after such notice is given; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

H.R. 1126. A bill to promote the provision and availability of necessary health services for the elderly by expanding existing programs of grants for home health services, requiring the inclusion of specified preventive and home health services under the medicaid program and making various improvements in the administration of such program, providing assistance to demonstration and pilot projects for home health and supportive services (including demonstration grants for community care), and authorizing grants for annual health fairs and mobile geriatric health units, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 1127. A bill to amend title XVIII of the Social Security Act to include dental care, eye care, hearing aids, physical checkups, and foot care among the items and services for which payment may be made under the supplementary medical insurance program, and to provide safeguards against consumer abuse in the provision of these items and services; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

H.R. 1128. A bill to amend title XIX of the Social Security Act to provide that medicaid is a payor of last resort and to permit recovery by States from certain estates of medicaid expenses incurred by individuals before reaching the age of 65; to the Committee on Interstate and Foreign Commerce.

H.R. 1129. A bill to amend the Social Security Act to require automatic sprinkler systems in all nursing facilities and intermediate care facilities certified for participation in the medicare or medicaid program, and to provide for direct low-interest Federal loans to assist such facilities in constructing or purchasing and installing automatic sprinkler systems; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

H.R. 1130. A bill to amend title XVIII of the Social Security Act to provide long-term care services as a part of the hospital insurance program, to encourage the creation of community long-term care centers to assist in providing such services, and for other purposes; jointly, to the Committees on Interstate and Foreign Commerce and Ways and Means.

H.R. 1131. A bill to amend the Federal Aviation Act of 1958 to authorize reduced rate transportation for certain additional persons on a space-available basis; to the Committee on Public Works and Transportation.

H.R. 1132. A bill to amend the Internal Revenue Code of 1954 to exempt from excise tax certain buses purchased by nonprofit organizations or by other persons for exclusive use in furnishing transportation for State or local governments or nonprofit organizations; to the Committee on Ways and Means.

H.R. 1133. A bill to amend the Interal Revenue Code of 1954 to provide that the amount of the charitable deduction allowable for expenses incurred in the operation of a highway vehicle will be determined in the same manner as the business deduction for such expenses; to the Committee on Ways and Means.

H.R. 1134. A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits thereunder; to the Committee on Ways and Means.

H.R. 1135. A bill to terminate age discrimination in employment; to the Committee on Education and Labor.

H.R. 1136. A bill to amend the Social Security Act to revise and expand various provisions relating to home health and other long-term care services under the medicare program, and for other purposes; jointly, to the Committees on Banking, Finance and Urban Affairs, Interstate and Foreign Commerce, and Ways and Means.

H.R. 1137. A bill to direct the Coordinating Council on Juvenile Justice and Delinquency Prevention to organize and convene a national conference on learning disabilities and juvenile delinquency and for other purposes; to the Committee on Education and Labor.

By Mr. PERKINS:

H.R. 1138. A bill to assist the States and local educational agencies in providing educational programs of high quality in elementary and secondary schools and to assist the States in equalizing educational opportunity, and for other purposes; to the Committee on Education and Labor.

H.R. 1139. A bill to extend through fiscal year 1982 certain child nutrition programs under the National School Lunch Act and the Child Nutrition Act of 1966; to the Committee on Education and Labor.

H.R. 1140. A bill to establish an executive department to be known as the Department of Education, and for other purposes; to the Committee on Government Operations.

H.R. 1141. A bill to amend the Railroad Retirement Act of 1974 to provide that any railroad employee may retire on full annuity at age 55 with 30 years' service, and to provide for payment of full spouse's annuities at age 55 (or reduced spouse's annuities at age 52); to the Committee on Interstate and Foreign Commerce.

H.R. 1142. A bill to provide additional assistance to the Energy Research and Development Administration for the advancement of nonnuclear energy research, development, and demonstration; to the Committee on Science and Technology.

H.R. 1143. A bill to amend title 38 of the United States Code to provide that monthly social security benefit payments shall not be considered to be income for the purpose of determining eligibility for a pension under that title; to the Committee on Veterans' Affairs.

H.R. 1144. A bill to amend title II of the Social Security Act to provide that an individual may qualify for disability insurance benefits and the disability freeze if he has 40 quarters of coverage, regardless of when such quarters were earned; to the Committee on Ways and Means.

H.R. 1145. A bill to amend title II of the Social Security Act to eliminate the reduction in disability insurance benefits which is presently required in the case of an individual receiving workmen's compensation benefits; to the Committee on Ways and Means.

H.R. 1146. A bill to amend title II of the Social Security Act so as to liberalize the

conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

H.R. 1147. A bill to amend title II of the Social Security Act to make it clear that an individual who loses his or her entitlement to child's insurance benefits by reason of marriage may again become entitled to such benefits if divorced (while still otherwise entitled) before attaining age 22; to the Committee on Ways and Means.

H.R. 1148. A bill to amend title II of the Social Security Act to make it clear that entitlement of an employee's survivor to an annuity under the Railroad Retirement Act of 1937, without any entitlement to a death payment under such act on account of such employee's death, will not prevent a lump-sum death payment from being made on such employee's wage record under the old-age, survivors, and disability insurance program; to the Committee on Ways and Means.

H.R. 1149. A bill to amend title II of the Social Security Act to reduce from 60 to 45 the age at which a woman otherwise qualified may become entitled to widow's insurance benefits; to the Committee on Ways and Means.

H.R. 1150. A bill to amend title II of the Social Security Act to increase to $750 in all cases the amount of the lump-sum death payment thereunder; to the Committee on Ways and Means.

H.R. 1151. A bill to amend titles II and XVIII of the Social Security Act to provide medicare coverage for disabled individuals under age 65 from the first month of their entitlement to benefits based on disability, in cases where the individuals involved are becoming reentitled to such coverage after a previous coverage period which ended during the preceding 5 years; to the Committee on Ways and Means.

H.R. 1152. A bill to amend title XVIII of the Social Security Act to authorize payment under the supplementary medical insurance program for optometric and medical vision care; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. PICKLE:

H.R. 1153. A bill to exempt from Federal income taxation certain nonprofit corporations all of whose members are tax-exempt credit unions; to the Committee on Ways and Means.

H.R. 1154. A bill to amend Public Law 88-482; to the Committee on Ways and Means.

H.R. 1155. A bill to amend the Federal Trade Commission Act to provide that exclusive territorial arrangements used in the distribution or sale of a trademarked soft drink product or a trademarked private label food product shall not be deemed unlawful per se; jointly, to the Committees on Interstate and Foreign Commerce and the Judiciary.

H.R. 1156. A bill to amend part B of title XI of the Social Security Act to assure appropriate participation by optometrists in the peer review and related activities authorized under such part; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. PICKLE (for himself and Mr. RISENHOOVER):

H.R. 1157. A bill to provide a comprehensive program to improve cargo security for property being transported in interstate and foreign commerce; jointly, to the Committees on Interstate and Foreign Commerce, Public Works and Transportation, Ways and Means, and Merchant Marine and Fisheries.

By Mr. QUILLEN:

H.R. 1158. A bill to amend the Railroad Retirement Act of 1974 to change benefit eligibility requirements so that individuals who have completed 30 years of service as an employee and have attained the age of 55 years are eligible and so that certain other individuals who have attained the age of 55 years and are related to employees are also eligible; to the Committee on Interstate and Foreign Commerce.

H.R. 1159. A bill to remove from the Supreme Court of the United States and the district courts of the United States any jurisdiction over cases relating to voluntary prayer in any public school or public building; to the Committee on the Judiciary.

H.R. 1160. A bill to require that burials be permitted in national cemeteries on weekends and holidays; to the Committee on Veterans' Affairs.

H.R. 1161. A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits thereunder; to the Committee on Ways and Means.

H.R. 1162. A bill to amend title II of the Social Security Act to provide that widow's insurance benefits shall be payable at age 50, without actuarial reduction and without regard to disability; to the Committee on Ways and Means.

By Mr. REGULA (for himself, Mr. BLOUIN, Mr. COUGHLIN, Mr. DEVINE, Mr. EDGAR, Mrs. FENWICK, Mr. HAMMERSCHMIDT, Mr. KINDNESS, Mr. KOCH, Mrs. LLOYD of Tennessee, Mr. MCHUGH, Mr. RINALDO, Mr. SEIBERLING, and Mr. WHITEHURST):

H.R. 1163. A bill to provide that the changes made by the Tax Reform Act of 1976 to the exclusion for sick pay shall only apply to taxable years beginning after December 31, 1976; to the Committee on Ways and Means.

By Mr. RICHMOND:

H.R. 1164. A bill to amend section 2 of the National Housing Act with regard to a guaranteed loan program designed to encourage the acquisition and installation of solar energy thermal conversion systems in dwelling units; to the Committee on Banking, Finance and Urban Affairs.

H.R. 1165. A bill to amend the Solar Heating and Cooling Demonstration Act of 1974 to provide for a demonstration program with specified goals, schedules, and funding with respect to the application of solar heating in greenhouses, crop-drying structures, livestock shelters, and other nonresidential agricultural structures, and for other purposes; jointly, to the Committees on Science and Technology and Agriculture.

H.R. 1166. A bill to amend the Consolidated Farm and Rural Development Act with regard to a program designed to encourage the acquisition and installation of solar energy thermal conversion systems in residential structures located on a family farm; to the Committee on Agriculture.

H.R. 1167. A bill to amend the Internal Revenue Code of 1954 to allow a taxpayer to amortize over a 60-month period solar heating and cooling equipment which is placed in service for nonresidential structures, and to allow an investment tax credit with respect to such equipment; to the Committee on Ways and Means.

H.R. 1168. A bill to establish within the Federal Energy Administration a program of Federal matching grants to assist States and localities in providing solar energy systems for public buildings and facilities; to the Committee on Banking, Finance and Urban Affairs.

H.R. 1169. A bill providing for a study of anaerobic digesters and a demonstration project for their use on family farms; to the Committee on Agriculture.

H.R. 1170. A bill to amend the U.S. Housing Act of 1937 to enable local public housing agencies to enter into security arrangements designed to prevent crimes and otherwise insure the safety and well-being of public housing tenants; to the Committee on Banking, Finance and Urban Affairs.

H.R. 1171. A bill to provide a comprehensive program of employment services and opportunities for middle-aged and older Americans; jointly, to the Committees on Education and Labor and Post Office and Civil Service.

H.R. 1172. A bill to amend title II of the Social Security Act to reduce from 20 to 5 years the length of time a divorced woman's marriage to an insured individual must have lasted in order for her to qualify for wife's or widow's benefits on his wage record; to the Committee on Ways and Means.

By Mr. RINALDO:

H.R. 1173. A bill to provide for additional sentences for commission of a felony with use of a firearm; to the Committee on the Judiciary.

H.R. 1174. A bill to amend the Urban Mass Transportation Act of 1964 to increase the amount of the Federal grant which may be made for certain mass transportation projects from 80 to 90 percent of the costs of such projects; to the Committee on Public Works and Transportation.

H.R. 1175. A bill to insure that recipients of veterans' pension and compensation will not have the amount of such pension or compensation reduced, or entitlement thereto discontinued, because of increases in monthly social security benefits; to the Committee on Veterans' Affairs.

H.R. 1176. A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits thereunder; to the Committee on Ways and Means.

By Mr. ROBERTS:

H.R. 1177. A bill to increase the production, transportation, and conversion of coal as a source of energy; to the Committee on Interstate and Foreign Commerce.

H.R. 1178. A bill to amend the Civil Rights Act of 1964 to provide for freedom of choice in student assignments in public schools; to the Committee on the Judiciary.

H.R. 1179. A bill to amend title IV of the Social Security Act to improve and make more realistic various provisions relating to eligibility for aid to families with dependent children and the administration of the aid to families with dependent children program, and for other purposes; to the Committee on Ways and Means.

By Mr. RODINO:

H.R. 1180. A bill to regulate lobbying and related activities; to the Committee on the Judiciary.

H.R. 1181. A bill to provide for the appointment of additional district court judges and for other purposes; to the Committee on the Judiciary.

H.R. 1182. A bill to amend title 18, United States Code, so as to establish certain guidelines for sentencing, establish a U.S. Commission on Sentencing, and for other purposes; to the Committee on the Judiciary.

H.R. 1183. A bill to provide for grants to States for the payment of compensation to persons injured by certain criminal acts and omissions, and for other purposes; to the Committee on the Judiciary.

By Mr. ROE:

H.R. 1184. A bill to establish grants for research endeavors for the purpose of assisting in the development and utilization of new and improved methods of food and fertilizer production; to the Committee on Agriculture.

H.R. 1185. A bill to establish a Commission on the Humane Treatment of Animals; to the Committee on Agriculture.

H.R. 1186. A bill to amend title 10 of the United States Code in order to provide that no veteran may be denied care or treatment under the CHAMPUS program for any service-connected disability solely because care or treatment for such disability is available at Veterans' Administration medical facilities; to the Committee on Armed Services.

H.R. 1187. A bill to require that any person holding a federally related home mortgage shall provide certain services and follow

certain procedures before instituting foreclosure proceedings with respect to such mortgage; to the Committee on Banking, Finance and Urban Affairs.

H.R. 1188. A bill to authorize the Secretary of Housing and Urban Development to make grants to local agencies for converting closed school buildings to efficient, alternate uses, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

H.R. 1189. A bill to amend the National Housing Act and other acts for the purpose of providing assistance for outpatient geriatric clinics and for multipurpose senior centers, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

H.R. 1190. A bill to protect purchasers and prospective purchasers of condominium housing units, and residents of multifamily structures being converted to condominium units, by providing for the establishment of national minimum standards for condominiums (to be administered by a newly created Assistant Secretary in the Department of Housing and Urban Development), to encourage the States to establish similar standards, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

H.R. 1191. A bill to authorize the Administrator of the National Fire Prevention and Control Administration to make grants to volunteer fire departments which are unable to purchase necessary firefighting equipment because of the increased cost of such equipment as the result of inflation; to the Committee on Banking, Finance and Urban Affairs.

H.R. 1192. A bill to amend the Elementary and Secondary Education Act of 1965 to provide emergency financial assistance to local education agencies in order to maintain essential elementary and secondary education services at a quality level; to the Committee on Education and Labor.

H.R. 1193. A bill to amend the Higher Education Act of 1965 to establish a student internship program to offer students practical involvement with elected officials on local and State levels of government and with Members of Congress; to the Committee on Education and Labor.

H.R. 1194. A bill to amend title IV of the Higher Education Act of 1965 to provide for a national student financial assistance data bank; to the Committee on Education and Labor.

H.R. 1195. A bill to require recipients of Federal aid to higher education to provide senior citizens with access, on a space-available basis, to already scheduled courses and programs; to the Committee on Education and Labor.

H.R. 1196. A bill to amend the Older Americans Act and the Public Health Service Act to provide expanded counseling assistance for the elderly sick and disabled; to the Committee on Education and Labor.

H.R. 1197. A bill to amend the National Labor Relations Act to provide that the duty to bargain collectively includes bargaining with respect to retirement benefits for retired employees; to the Committee on Education and Labor.

H.R. 1198. A bill to amend the National Labor Relations Act to make it an unfair labor practice to discharge an employee because he testifies before any committee of the Congress, and for other purposes; to the Committee on Education and Labor.

H.R. 1199. A bill to amend the Comprehensive Employment and Training Act of 1973 to provide that a unit of general local government having a population of 50,000 or more shall be eligible to be a prime sponsor; to the Committee on Education and Labor.

H.R. 1200. A bill to prohibit discriminatory employment practices with respect to physically handicapped persons; to the Committee on Education and Labor.

H.R. 1201. A bill to establish a commission to develop measures for improving the method of collecting and analyzing national employment and unemployment information and statistics; to the Committee on Education and Labor.

H.R. 1202. A bill to provide emergency financial assistance to assure that there are adequate levels of police and fire personnel to provide for the public safety of citizens residing in areas which have been forced, due to severe financial hardship, to lay off public safety officers; to the Committee on Education and Labor.

H.R. 1203. A bill to establish an Executive Department to be known as the Department of Education, and for other purposes; to the Committee on Government Operations.

H.R. 1204. A bill to establish a department of senior citizens affairs, and for other purposes; to the Committee on Government Operations.

H.R. 1205. A bill to amend the Budget and Accounting Act, 1921, to require that all departmental budget requests made to the Office of Management and Budget with respect to any fiscal year be submitted to the Congress along with the President's budget for such year, and that officials of the Office of Management and Budget, when requested to do so by the appropriate committees of the Congress, testify before such committees on the President's budget and on such departmental budget requests; to the Committee on Government Operations.

H.R. 1206. A bill to establish an office within the Congress with a toll-free telephone number to be known as the congressional advisory legislative line (CALL), to provide the American people with free and open access to information, on an immediate basis, relating to the status of legislative proposals pending before the Congress; to the Committee on House Administration.

H.R. 1207. A bill to designate certain endangered public lands for preservation as wilderness, to provide for the study of additional endangered public lands for such designation, to further the purposes of the Wilderness Act of 1964, and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 1208. A bill to prohibit certain incompatible activities within any area of the national park system, and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 1209. A bill to establish a Hudson River Compact Commission composed of the Secretary of the Interior and representatives from the States of New York, New Jersey, Vermont, Massachusetts, and Connecticut so that the Commission may negotiate a compact to develop, preserve, and restore the resources of the Hudson River Basin and its shores, and to authorize certain necessary steps to be taken to protect those resources from adverse Federal actions until the States concerned and the Congress have the opportunity to act on that compact; to the Committee on Interior and Insular Affairs.

H.R. 1210. A bill to authorize the Secretary of the Interior to establish a National Law Enforcement Heroes Memorial within the District of Columbia, and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 1211. A bill to reduce the payments by the United States to the United Nations, and for other purposes; to the Committee on International Relations.

H.R. 1212. A bill to require the submission of reports to the Congress prior to the issuance of a license for the export of certain arms, ammunition, or implements of war; to the Committee on International Relations.

H.R. 1213. A bill to establish a National Foreign Investment Control Commission to prohibit or restrict foreign ownership control or management control, through direct purchase, in whole or part; from acquiring securities or certain domestic issuers of securities, by merger, tender offer, or any other means; control of certain domestic corporations or industries, real estate, or other natural resources deemed to be vital to the economic security and national defense of the United States; to the Committee on Interstate and Foreign Commerce.

H.R. 1214. A bill to provide technical and financial assistance for the development of management plans and facilities for the recovery of energy and other resources from discarded materials and for the safe disposal of discarded materials, to regulate the management of hazardous waste, and to reclaim waters damaged by sludge and sewage; to the Committee on Interstate and Foreign Commerce.

H.R. 1215. A bill to reform residential electric utility rates; to the Committee on Interstate and Foreign Commerce.

H.R. 1216. A bill to amend the Flammable Fabrics Act to extend the provisions of that act to construction materials used in the interiors of homes, offices, and other places of assembly or accommodation, and to authorize the establishment of toxicity standards; to the Committee on Interstate and Foreign Commerce.

H.R. 1217. A bill to assist the construction and operation of burn facilities; to the Committee on Interstate and Foreign Commerce.

H.R. 1218. A bill to authorize the Secretary of Health, Education, and Welfare to establish a medical malpractice reinsurance program, and to conduct experiments and studies on medical malpractice; to the Committee on Interstate and Foreign Commerce.

H.R. 1219. A bill to amend title VII of the Public Health Service Act to provide for the making of grants to appropriate colleges and universities to assist them in the establishment and operation of programs for the training of physicians' assistants; to the Committee on Interstate and Foreign Commerce.

H.R. 1220. A bill to amend title VII of the Public Health Service Act to train certain veterans, with appropriate experience as paramedical personnel, to serve as medical assistants in long-term health care facilities; to the Committee on Interstate and Foreign Commerce.

H.R. 1221. A bill to establish the National Diabetes Advisory Board and to take other actions to insure the implementation of the long-range plan to combat diabetes; to the Committee on Interstate and Foreign Commerce.

H.R. 1222. A bill to amend the Community Mental Health Centers Act to require States which receive assistance under that act to establish and maintain mental health advocacy services; to the Committee on Interstate and Foreign Commerce.

H.R. 1223. A bill to establish the Federal right of every unemancipated child to be supported by such child's parent or parents and, therefore, to confer upon certain local courts of the District of Columbia and every State and territory of the United States jurisdiction to enforce such right regardless of such child's residence; to the Committee on the Judiciary.

H.R. 1224. A bill to amend the Omnibus Crime Control and Safe Streets Acts of 1968 to add a requirement that the comprehensive State plan include provisions for attention to the special problems of prevention, treatment, and other aspects of crimes against the elderly; to the Committee on the Judiciary.

H.R. 1225. A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968 to require as a condition of assistance under such act that law enforcement agencies have in effect a binding law enforcement officers' bill of rights; to the Committee on the Judiciary.

H.R. 1226. A bill to provide a penalty for unlawful assault upon policemen, firemen, and other law enforcement personnel, and for other purposes; to the Committee on the Judiciary.

H.R. 1227. A bill to amend title 18 of the United States Code to provide the death penalty for certain destructive acts to airports, airplanes, and related things and places; to the Committee on the Judiciary.

H.R. 1228. A bill to provide for additional sentences for commission of a felony with use of a firearm; to the Committee on the Judiciary.

H.R. 1229. A bill to amend the Legal Services Corporation Act to provide legal assistance to older persons in connection with their participation in certain health insurance and medical assistance programs under the Social Security Act; to the Committee on the Judiciary.

H.R. 1230. A bill to permit collective negotiation by professional retail pharmacists with third-party prepaid prescription program administrators and sponsors; to the Committee on the Judiciary.

H.R. 1231. A bill to incorporate the Gold Star Wives of America; to the Committee on the Judiciary.

H.R. 1232. A bill to incorporate the Italian American War Veterans of the United States, Inc.; to the Committee on the Judiciary.

H.R. 1233. A bill to grant a Federal charter to the Athenia Veterans Post, Inc.; to the Committee on the Judiciary.

H.R. 1234. A bill to amend the National Environmental Policy Act to provide for the filing of certain supplemental information statements; to the Committee on Merchant Marine and Fisheries.

H.R. 1235. A bill to amend the Federal employee health insurance provisions of title 5, United States Code, to require that notice and hearing be provided before the effective date of any reduction of health benefits or any exclusion of any type of provider of health services; to the Committee on Post Office and Civil Service.

By Mr. ROBERTS:

H.R. 1236. A bill to abolish the U.S. Postal Service, to repeal the Postal Reorganization Act, to reenact the former provisions of title 39, United States Code, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. ROE:

H.R. 1237. A bill to amend title 39, United States Code, to provide that buildings constructed for use by the U.S. Postal Service shall be designed and constructed in a manner making them accessible to the physically handicapped; to the Committee on Post Office and Civil Service.

H.R. 1238. A bill to amend title 39, United States Code, to extend the period during which preferential mail rates shall apply with respect to certain publications mailed by veterans' organizations; to the Committee on Post Office and Civil Service.

H.R. 1239. A bill to amend title 39, United States Code, as enacted by the Postal Reorganization Act, to facilitate direct communication between officers and employees of the U.S. Postal Service and Members of Congress, and for other purposes; to the Committee on Post Office and Civil Service.

H.R. 1240. A bill to amend the Urban Mass Transportation Act of 1964 to increase the amount of the Federal grant which may be made for certain mass transportation projects from 80 to 90 percent of the costs of such projects; to the Committee on Public Works and Transportation.

H.R. 1241. A bill to amend title 23, United States Code, to insure that no State will be apportioned less than 80 percent of its tax contribution to the Highway Trust Fund; to the Committee on Public Works and Transportation.

H.R. 1242. A bill to amend the Federal Aviation Act of 1958 to authorize reduced-rate transportation for young people on a space-available basis; to the Committee on Public Works and Transportation.

H.R. 1243. A bill to provide Federal loan guarantee for certain common carriers of express; to the Committee on Public Works and Transportation.

H.R. 1244. A bill to amend the Federal Aviation Act of 1958 in order to authorize free or reduced-rate transportation to handicapped persons and persons who are 65 years of age or older, to amend the Interstate Commerce Act to authorize free or reduced-rate transportation for persons who are 65 years of age or older, and to provide new and improved transportation programs for the handicapped and the elderly; to the Committee on Public Works and Transportation.

H.R. 1245. A bill to provide that all federally assisted public mass transportation facilities, equipment, and services be adapted to accommodate the needs of elderly and handicapped persons; to the Committee on Public Works and Transportation.

H.R. 1246. A bill to provide for certain research and demonstration respecting the disposal of sludge, the reclamation of waters damaged by sludge and sewage, the regulation of hazardous sludge, assistance to State and local governments for the removal of sludge and other solid waste from waters and shoreline areas, and to provide that grants for waste treatment works shall be made only if such works provide for environmentally sound sludge management; to the Committee on Public Works and Transportation.

H.R. 1247. A bill to provide for grants and technical assistance for the construction or acquisition by certain State and local authorities of facilities for the use or disposal of sewage sludge; to the Committee on Public Works and Transportation.

H.R. 1248. A bill to amend title II of the Federal Water Pollution Control Act to provide for State certification; to the Committee on Public Works and Transportation.

H.R. 1249. A bill to provide for the elimination of inactive and overlapping Federal programs, to require authorizations of new budget authority for Government programs and activities at least every 4 years, to establish a procedure for zero-base review and evaluation of Government programs and activities every 4 years, and for other purposes; to the Committee on Rules.

H.R. 1250. A bill to create a joint congressional committee on foreign investment control in the United States; to the Committee on Rules.

H.R. 1251. A bill to amend the Small Business Act and Small Business Investment Act of 1958 to provide additional assistance under such acts, to create a pollution control financing program for small business, and for other purposes; to the Committee on Small Business.

H.R. 1252. A bill to provide financial aid to local fire departments in the purchase of advanced firefighting equipment; to the Committee on Science and Technology.

H.R. 1253. A bill to provide financial aid for local fire departments in the purchase of firefighting suits and self-contained breathing apparatus; to the Committee on Science and Technology.

H.R. 1254. A bill to amend title 38, United States Code, to authorize expenditures by the Administrator of Veterans' Affairs for repair of certain dwellings; to the Committee on Veterans' Affairs.

H.R. 1255. A bill to amend title 38 of the United States Code in order to extend specially adapted housing benefits to certain disabled veterans; to the Committee on Veterans' Affairs.

H.R. 1256. A bill to amend title 38 of the United States Code in order to authorize the Administrator of Veterans' Affairs to make scholarship grants to individuals attending medical schools on the condition that such individuals will serve in Veterans' Administration facilities for a certain period of time upon completion of professional training, and for other purposes; to the Committee on Veterans' Affairs.

H.R. 1257. A bill to amend section 618 of title 38, United States Code, in order to authorize the Administrator to expand the current program providing therapeutic and rehabilitation activities for certain veterans, and for other purposes; to the Commitee on Veterans' Affairs.

H.R. 1258. A bill to amend the Social Security Act and the Internal Revenue Code of 1954 to provide for Federal participation in the costs of the social security program, with a substantial increase in the contribution and benefit base and with appropriate reductions in social security taxes to reflect the Federal Government's participation in such costs; to the Committee on Ways and Means.

H.R. 1259. A bill to amend the Internal Revenue Code of 1954 to provide for the payment of interest at a rate of 5 percent on excess amounts withheld from individuals' wages; to the Committee on Ways and Means.

H.R. 1260. A bill to amend the Internal Revenue Code of 1954 and certain other provisions of law to provide for automatic cost-of-living adjustments in the income tax rates, the amount of the standard, personal exemption, and depreciation deductions, and the rate of interest payable on certain obligations of the United States; to the Committee on Ways and Means.

H.R. 1261. A bill to amend the Internal Revenue Code of 1954 to provide a tax credit of $250 to an individual for expenditures for health insurance premiums; to the Committee on Ways and Means.

H.R. 1262. A bill to amend the Internal Revenue Code of 1954 to permit an exemption of the first $7,500 of income received by a taxpayer who is 65 years of age or older; to the Committee on Ways and Means.

H.R. 1263. A bill to amend the Internal Revenue Code of 1954 to permit an exemption of the first $5,000 of retirement income received by a taxpayer under a public retirement system or any other system if the taxpayer is at least 65 years of age; to the Committee on Ways and Means.

H.R. 1264. A bill to amend the Internal Revenue Code in 1954 to exclude from gross income $500 of interest on savings in the case of an individual taxpayer; to the Committee on Ways and Means.

H.R. 1265. A bill to amend the Internal Revenue Code of 1954 to provide for individual supplemental retirement savings; to the Committee on Ways and Means.

H.R. 1266. A bill to amend the Internal Revenue Code of 1954 to allow individuals a deduction for amounts paid or incurred for repairs or improvements of, or additions to, their principal residences; to the Committee on Ways and Means.

H.R. 1267. A bill to amend the Internal Revenue Code of 1954 to encourage businesses to purchase surplus school or hospital buildings from governmenal and nonprofit entities by providing rapid amortization for such buildings; to the Committee on Ways and Means.

H.R. 1268. A bill to amend the Internal Revenue Code of 1954 to provide for adjustment in the dollar limitations for purposes of the retirement income credit in order to make the tax benefits accorded to retirement income comparable to those accorded to social security income; to the Committee on Ways and Means.

H.R. 1269. A bill to amend the Internal Revenue Code of 1954 to allow an income tax deduction for depreciation on capital expenditures incurred in connecting residential sewer lines to municipal sewage systems; to the Committee on Ways and Means.

H.R. 1270. A bill to amend the Internal Revenue Code of 1954 to allow certain indi-

viduals who have attained age 65 or who are disabled a refundable tax credit for property taxes paid by them on their principal residences or for a certain portion of the rent they pay for their principal residences; to the Committee on Ways and Means.

H.R. 1271. A bill to amend the Internal Revenue Code of 1954 to provide an additional itemized deduction in the case of an individual who rents his principal residence (or who rents a site for a mobile home used as his principal residence; to the Committee on Ways and Means.

H.R. 1272. A bill to amend the Internal Revenue Code of 1954 to provide an additional itemized deduction for individuals who rent their principal residences; to the Committee on Ways and Means.

H.R. 1273. A bill to amend the Internal Revenue Code of 1954 to deny the deduction of any expenditure of any oil company for advertising not directly related to the sale of products or services; to the Committee on Ways and Means.

H.R. 1274. A bill to amend the Internal Revenue Code of 1954 to provide that blood donations shall be considered as charitable contributions deductible from gross income; to the Committee on Ways and Means.

H.R. 1275. A bill to amend the Internal Revenue Code of 1954 to provide that advertising of alcoholic beverages is not a deductible expense; to the Committee on Ways and Means.

H.R. 1276. A bill to amend the Internal Revenue Code of 1954 to treat the amounts paid for custodial care by institutions of certain dependents as amounts paid for medical care; to the Committee on Ways and Means.

H.R. 1277. A bill to amend the Internal Revenue Code of 1954 to allow a deduction to taxpayers who contribute the right to use certain real property to charitable organizations for outpatient geriatric clinics or for multipurpose senior centers; to the Committee on Ways and Means.

H.R. 1278. A bill to amend the Internal Revenue Code of 1954 to provide that pensions paid to retired policemen or firemen or their dependents, or to the widows or other survivors of deceased policemen or firemen, shall not be subject to the income tax; to the Committee on Ways and Means.

H.R. 1279. A bill to amend the Internal Revenue Code of 1954 to exclude from gross income certain amounts received by members of certain firefighting and rescue units; to the Committee on Ways and Means.

H.R. 1280. A bill to amend the Internal Revenue Code of 1954 to exclude from gross income certain amounts received by members of certain firefighting and rescue units; to the Committee on Ways and Means.

H.R. 1281. A bill to amend the Internal Revenue Code of 1954 to exempt nonprofit volunteer firefighting or rescue organizations from the Federal excise taxes on gasoline, diesel fuel, and certain other articles and services; to the Committee on Ways and Means.

H.R. 1282. A bill to amend the Internal Revenue Code of 1954 to provide an additional personal exemption of $750 for certain volunteer firemen; to the Committee on Ways and Means.

H.R. 1283. A bill to amend the Internal Revenue Code of 1954 to provide a deduction for clothing purchased and used by taxpayers serving in volunteer firefighting organizations; to the Committee on Ways and Means.

H.R. 1284. A bill to provide that State and local sales taxes paid by individuals shall be allowed as a credit against their liability for Federal income tax instead of being allowed as a deduction from their gross income; to the Committee on Ways and Means.

H.R. 1285. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for State and local public utility taxes; to the Committee on Ways and Means.

H.R. 1286. A bill to provide that service charges paid by property owners to independent sewerage authorities shall be tax deductible as part of the real property tax paid on said properties; to the Committee on Ways and Means.

H.R. 1287. A bill to provide income tax incentives for the modification of certain facilities so as to remove architectural and transportational barriers to the handicapped and elderly; to the Committee on Ways and Means.

H.R. 1288. A bill to provide for an immediate 15 percent cost-of-living increase in social security benefits; to the Committee on Ways and Means.

H.R. 1289. A bill to amend titles II, VII, XI, XVI, XVIII, and XIX of the Social Security Act to provide for the administration of the old-age, survivors, and disability insurance program, the supplemental security income program, and the medicare program by a newly established independent Social Security Administration, to separate social security trust fund items from the general Federal budget, to prohibit the mailing of certain notices with social security and supplemental security income benefit checks, and for other purposes; to the Committee on Ways and Means.

H.R. 1290. A bill to amend title II of the Social Security Act to provide that an individual may qualify for disability insurance benefits and the disability freeze if he has 40 quarters of coverage, regardless of when such quarters were earned; to the Committee on Ways and Means.

H.R. 1291. A bill to amend title II of the Social Security Act to provide that all benefits based upon the attainment of age will be payable at age 60, subject to actuarial reduction; to the Committee on Ways and Means.

H.R. 1292. A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits thereunder; to the Committee on Ways and Means.

H.R. 1293. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

H.R. 1294. A bill to amend title II of the Social Security Act to provide in certain cases for an exchange of credits between the old-age, survivors, and disability insurance system and the civil service retirement system so as to enable individuals who have coverage under both systems to obtain maximum benefits based on their combined service; to the Committee on Ways and Means.

H.R. 1295. A bill to amend title II of the Social Security Act to permit a State, under its section 218 agreement, to terminate social security coverage for State or local policemen or firemen without affecting the coverage of other public employees who may be members of the same coverage group (and to permit the reinstatement of coverage for such other employees in certain cases where the group's coverage has previously been terminated); to the Committee on Ways and Means.

H.R. 1296. A bill to amend title II of the Social Security Act to provide that the remarriage of a widow, widower, or parent shall not terminate his or her entitlement to widow's, widower's, or parent's insurance benefits or reduce the amount thereof; to the Committee on Ways and Means.

H.R. 1297. A bill to amend title II of the Social Security Act so as to prohibit any reduction in the monthly benefits of a fully insured individual, who is otherwise entitled to old-age insurance benefits, by reason of any outside earnings which may be received by such insured individual; to the Committee on Ways and Means.

H.R. 1298. A bill to amend title XVI of the Social Security Act to direct the Secretary, in determining the extent to which the value of an individual's home is excludable for purposes of establishing his or her eligibility for supplemental security income benefits, to take into account regional variations in the market prices of homes and to make periodic adjustments reflecting changes in land and home values; to the Committee on Ways and Means.

H.R. 1299. A bill to amend part A of title XVIII of the Social Security Act to authorize payment for emergency inpatient hospital service furnished outside the United States, to a qualified individual whose principal residence is within the United States, without regard to where the emergency occurred; to the Committee on Ways and Means.

H.R. 1300. A bill to amend section 218 of the Social Security Act to require that States having agreements entered into thereunder will continue to make social security payments and reports on a calendar-quarter basis; to the Committee on Ways and Means.

H.R. 1301. A bill to amend the Tariff Schedules of the United States by repealing item 807 of schedule 8, part 1, subpart B; to the Committee on Ways and Means.

H.R. 1302. A bill to amend the Fair Labor Standards Act of 1938, to require prenotification to affected employees and communities of dislocation of business concerns, to provide assistance (including retraining) to employees who suffer employment loss through the dislocation of business concerns, to business concerns threatened with dislocation, and to affected communities, to prevent Federal support for unjustified dislocation, and for other purposes; jointly, to the Committees on Education and Labor and Banking, Finance and Urban Affairs.

H.R. 1303. A bill to provide joint and survivors' annuity benefits under private pension plans based upon the participant's vested benefit; jointly, to the Committees on Education and Labor and Ways and Means.

H.R. 1304. A bill to amend the Outer Continental Shelf Lands Act to provide a procedure for congressional disapproval of offshore oil and gas leases; jointly, to the Committees on Interior and Insular Affairs and Rules.

H.R. 1305. A bill to establish a National Energy and Conservation Corporation (AM POWER), and for other purposes; jointly, to the Committees on Interior and Insular Affairs and Science and Technology.

H.R. 1306. A bill to establish a National Resource Information System, and for other purposes; jointly, to the Committees on Interstate and Foreign Commerce and Interior and Insular Affairs.

H.R. 1307. A bill to establish within the Department of Health, Education, and Welfare a Home Health Clearinghouse to provide elderly persons with a single place where they can obtain complete information on the Federal health programs available to them, and to create within the Department an Assistant Secretary for Elderly Health with responsibility for all health and health-related matters involving the elderly; jointly, to the Committees on Interstate and Foreign Commerce and Ways and Means.

H.R. 1308. A bill to amend the Civil Rights Act of 1968 and title 5 of the National Housing Act to prevent discrimination based on marital status; jointly, to the Committees on the Judiciary and Banking, Finance and Urban Affairs.

H.R. 1309. A bill to amend the Public Buildings Act of 1959 in order to preserve buildings of historical or architectural significance through their use for Federal public building purposes, and to amend the act of August 12, 1968, relating to the accessibility of certain buildings to the physically handicapped; jointly, to the Committees on Public Works and Transportation and Government Operations.

H.R. 1310. A bill to amend the Social Security Act to direct the Secretary of Health, Education, and Welfare to develop standards relating to the rights of patients in certain

medical facilities; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

H.R. 1311. A bill to amend XVIII of the Social Security Act to provide for the coverage of certain psychologists' services under the supplementary medical insurance benefits program established by part B of such title; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

H.R. 1312. A bill to amend title XVIII of the Social Security Act to authorize payment under the medicare program for certain services performed by chiropractors; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

H.R. 1313. A bill to amend title XVIII of the Social Security Act to include, as a home health service, nutritional counseling provided by or under the supervision of a registered dietitian; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

H.R. 1314. A bill to amend title XVIII of the Social Security Act to provide for coverage under part B of medicare for routine Papanicolaon tests for the diagnosis of uterine cancer; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

H.R. 1315. A bill to amend title XVIII of the Social Security Act to authorize payment under the supplementary medical insurance program for certain diagnostic tests and examinations given for the detection of breast cancer; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

H.R. 1316. A bill to amend titles II and XVIII of the Social Security Act to include qualified drugs, requiring a physician's prescription or certification and approved by a formulary committee, among the items and services covered under the hospital insurance program; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

H.R. 1317. A bill to amend the Social Security Act to provide for inclusion of the services of licensed (registered) nurses under medicare and medicaid; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

H.R. 1318. A bill to amend the Social Security Act to provide for the updating of safety provisions in skilled nursing facilities; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

H.R. 1319. A bill to amend the Social Security Act to require automatic sprinkler systems in all nursing facilities and intermediate care facilities certified for participation in the medicare or medicaid program, and to provide for direct low-interest Federal loans to assist such facilities in constructing or purchasing and installing automatic sprinkler systems; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. ROE (for himself and Mr. NOWAK):

H.R. 1320. A bill to amend title III of the act of March 3, 1933, commonly referred to as the "Buy American Act", with respect to determining when the cost of certain articles, materials, or supplies is unreasonable; to define when articles, materials, and supplies have been mined, produced, or manufactured in the United States; to make clear the right of any State to give preference to domestically produced goods in purchasing for public use; and for other purposes; to the Committee on Government Operations.

By Mr. ROGERS:

H.R. 1321. A bill to amend the Tax Reform Act of 1976 to extend for 1 year the effective date of the provision relating to changes in exclusions for sick pay; to the Committee on Ways and Means.

By Mr. ROGERS (for himself and Mr. BAFALIS):

H.R. 1322. A bill to provide for the transfer of the Mar-A-Lago National Historic Site from the United States to the Marjorie Merriweather Post Foundation of the District of Columbia; to the Committee on Interior and Insular Affairs.

By Mr. ROONEY:

H.R. 1323. A bill to amend the National Traffic and Motor Vehicle Safety Act of 1966 to require the promulgation of minimum safety standards for schoolbus external warning devices; to the Committee on Interstate and Foreign Commerce.

H.R. 1324. A bill to amend the Interstate Commerce Act to provide for the regulation of common carriers of coal by pipeline, to grant certain powers to such common carriers, to prohibit such common carriers from using the power of eminent domain to acquire lands owned by railroads or other common carriers, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. ROONEY (for himself and Mr. ECKHARDT):

H.R. 1325. A bill to amend the National Traffic and Motor Vehicle Safety Act of 1966 to provide improved enforcement of motor carrier safety regulations by the Secretary of Transportation; to protect motor carrier employees against discrimination for reporting violations of such regulations; and for other purposes; to the Committee on Public Works and Transportation.

By Mr. SARASIN:

H.R. 1326. A bill to provide for the development and implementation of programs for youth camp safety; to the Committee on Education and Labor.

By Mr. SARASIN (for himself and Mr. STEIGER):

H.R. 1327. A bill to amend the Occupational Safety and Health Act of 1970 to provide additional consultation and education to employers, and for other purposes; to the Committee on Education and Labor.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

[*Introduced Jan. 4, 1977*]

By Mr. ANDERSON of California:
H.R. 1392. A bill for the relief of Maria Miraflor Carabbacan; to the Committee on the Judiciary.
H.R. 1393. A bill for the relief of William R. Rawlings; to the Committee on the Judiciary.

By Mr. ANDERSON of California (by request):
H.R. 1394. A bill for the relief of certain former flight engineers of Western Airlines; to the Committee on the Judiciary.

By Mr. ANNUNZIO:
H.R. 1395. A bill for the relief of Continental Chemiste Corp.; to the Committee on the Judiciary.
H.R. 1396. A bill for the relief of Mrs. Sun Pok Winer; to the Committee on the Judiciary.
H.R. 1397. A bill for the relief of Frank Cappuccio; to the Committee on the Judiciary.
H.R. 1398. A bill for the relief of Modern Life and Accident Insurance Co. of Chicago; to the Committee on the Judiciary.

By Mr. BINGHAM:
H.R. 1399. A bill for the relief of Kenneth and Jacqueline Traylar; to the Committee on the Judiciary.

By Mr. BOLAND:
H.R. 1400. A bill for the relief of Stefan Kowalik; to the Committee on the Judiciary.

By Mr. CHAPPELL:
H.R. 1401. A bill for the relief of Lillian June Demers; to the Committee on the Judiciary.
H.R. 1402. A bill for the relief of Rosario A. Calvin; to the Committee on the Judiciary.

By Mr. COCHRAN:
H.R. 1403. A bill to authorize the Secretary of the Interior to convey the interest of the United States in certain lands in Adams County, Miss., notwithstanding a limitation in the Color-of-Title Act (45 Stat. 1069, as amended; 43 U.S.C. 1068); to the Committee on Interior and Insular Affairs.

By Mr. CONTE:
H.R. 1404. A bill for the relief of Smith College, Northampton, Mass.; to the Committee on Ways and Means.

By Mr. DELLUMS:
H.R. 1405. A bill for the relief of Jennet Juanita Miller; to the Committee on the Judiciary.
H.R. 1406. A bill for the relief of Lilia Araujo; to the Committee on the Judiciary.
H.R. 1407. A bill for the relief of Mrs. Dorothy S. Eaton; to the Committee on the Judiciary.

By Mr. DODD:
H.R. 1408. A bill for the relief of Robert Allain; to the Committee on the Judiciary.

By Mr. DOWNEY:
H.R. 1409. A bill for the relief of Marilyn Ina Williams; to the Committee on the Judiciary.

By Mr. DRINAN:
H.R. 1410. A bill for the relief of Benjamin R. Lucardie; to the Committee on the Judiciary.
H.R. 1411. A bill for the relief of Daniela Wittman; to the Committee on the Judiciary.
H.R. 1412. A bill for the relief of Jesse Epstein; to the Committee on the Judiciary.

By Mr. EDGAR:
H.R. 1413. A bill for the relief of Robert H. Glazier; to the Committee on the Judiciary.

By Mr. EDWARDS of Alabama:
H.R. 1414. A bill for the relief of Camilla A. Hester; to the Committee on the Judiciary.

By Mr. EILBERG:
H.R. 1415. A bill for the relief of Ball State University and the American Association of Colleges for Teacher Education; to the Committee on the Judiciary.

By Mrs. HOLT:
H.R. 1416. A bill for the relief of Bruce M. Davidson; to the Committee on Armed Services.

By Mr. HORTON:
H.R. 1417. A bill for the relief of Dr. Ming Derek Chan, Belle May Chan, Evelyn Chan, and Jeannie Chan; to the Committee on the Judiciary.

By Mr. HUBBARD:
H.R. 1418. A bill for the relief of Dr. Emmanuel Najera Macaraeg; to the Committee on the Judiciary.
H.R. 1419. A bill for the relief of Dr. Kok Liong Tan and his wife, Gloria Siao Tan; to the Committee on the Judiciary.

By Mr. HYDE:
H.R. 1420. A bill for the relief of Umberto Ruffolo; to the Committee on the Judiciary.

By Mr. KASTENMEIER:
H.R. 1421. A bill for the relief of Felipe B. Manalo and Maria Monita A. Manalo; to the Committee on the Judiciary.

By Mr. KAZEN:
H.R. 1422. A bill for the relief of Julio Ortiz-Medina; to the Committee on the Judiciary.

By Mr. KETCHUM:
H.R. 1423. A bill for the relief of Marcial Caceres Ortiz; to the Committee on the Judiciary.

By Mr. LAGOMARSINO:
H.R. 1424. A bill for the relief of Jusus Reveles y Rivera; to the Committee on the Judiciary.

By Mr. LENT:
H.R. 1425. A bill for the relief of Norman Shubinsky; to the Committee on the Judiciary.

By Mr. MEEDS:
H.R. 1426. A bill for the relief of Markku Tuomas MXX Niemela; to the Committee on the Judiciary.

By Mr. METCALFE:
H.R. 1427. A bill for the relief of Marie Grant; to the Committee on the Judiciary.
H.R. 1428. A bill for the relief of Mrs. Angelita Short; to the Committee on the Judiciary.

By Mr. MICHEL:
H.R. 1429. A bill for the relief of Cecilia L. P. Thieman; to the Committee on the Judiciary.
H.R. 1430. A bill for the relief of Jonathon Juco and Jonard Juco; to the Committee on the Judiciary.

By Mr. MOORHEAD of California:
H.R. 1431. A bill for the relief of Blase A. Bonpane; to the Committee on the Judiciary.

By Mr. MOORHEAD of Pennsylvania:
H.R. 1432. A bill for the relief of Mrs. Desoline Sciulli; to the Committee on the Judiciary.

By Mr. MURPHY of New York:
H.R. 1433. A bill for the relief of Col. George Benson, U.S. Army, retired; to the Committee on the Judiciary.

By Mr. NATCHER:
H.R. 1434. A bill for the relief of Dr. Orlando Fusilero Bravo; to the Committee on the Judiciary.

By Mr. PATTEN:
H.R. 1435. A bill for the relief of the Zena Co.; to the Committee on the Judiciary.

By Mr. PICKLE:
H.R. 1436. A bill for the relief of William H. Klusmeier, publisher of the Austin Citizen, of Austin, Tex.; to the Committee on the Judiciary.

By Mr. QUIE:
H.R. 1437. A bill for the relief of Soo Jin Lee; to the Committee on the Judiciary.

By Mr. RAILSBACK:
H.R. 1438. A bill for the relief of Philip H. Ward; to the Committee on the Judiciary.

By Mr. ROBINSON (by request):
H.R. 1439. A bill for the relief of Beulah C. Shifflett; to the Committee on the Judiciary.

By Mr. SMITH of Iowa:
H.R. 1440. A bill for the relief of Eun Kyung Park and Sang Hyuk Park; to the Committee on the Judiciary.
H.R. 1441. A bill for the relief of Neil R. Fairbanks; to the Committee on the Judiciary.
H.R. 1442. A bill for the relief of Col. Paul M. Thompson, U.S. Air Force; to the Committee on the Judiciary.

By Mrs. SMITH of Nebraska:
H.R. 1443. A bill for the relief of Leung, Tak-Ming; to the Committee on the Judiciary.
H.R. 1444. A bill for the relief of Cabigon, Enrico Froilan; to the Committee on the Judiciary.

By Mr. STEERS:
H.R. 1445. A bill for the relief of Comdr. Edward White Rawlins, U.S. Navy (retired); to the Committee on the Judiciary.

By Mr. STEIGER:
H.R. 1446. A bill for the relief of Lester Bruce Priday; to the Committee on the Judiciary.
H.R. 1447. A bill for the relief of Fred L. Timm and Leona M. Timm; to the Committee on the Judiciary.

By Mr. TEAGUE:
H.R. 1448. A bill for the relief of C. L. Adkins and Son Construction Co.; to the Committee on the Judiciary.

By Mr. BOB WILSON:
H.R. 1449. A bill for the relief of Geoffrey Parnham; to the Committee on the Judiciary.
H.R. 1450. A bill for the relief of Hildegard G. Blakeley; to the Committee on the Judiciary.

By Mr. YOUNG of Florida:
H.R. 1451. A bill for the relief of Suzanne Lee Esper; to the Committee on the Judiciary.

By Mr. ANDERSON of California:
H. Res. 83. Resolution to refer H.R. 1394, a bill for the relief of certain former employees of Western Airlines, to the Chief Commissioner of the U.S. Court of Claims; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

24. By the SPEAKER: Petition of the Fourth Northern Mariana Islands Legislature, Susupe, Saipan, Mariana Islands, Trust Territory of the Pacific Islands, relative to approval of the Constitution of the Commonwealth of the Northern Mariana Islands; to the Committee on Interior and Insular Affairs.

25. Also, petition of Emitt S. Bleeker, Atwater, Calif., relative to redress of grievances; to the Committee on the Judiciary.

26. Also, petition of R. Keith Higginson, Director, State of Idaho Department of Water Resources, Boise, relative to the proposed national dam safety program; jointly, to the Committees on Public Works and Transportation, Interior and Insular Affairs, and Agriculture.

27. Also, petition of L. Napoleon Cooper, Washington, D.C., relative to granting a congressional charter to "Project 76 An-American Affair, Inc."; to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

THE APPROVAL OF WESTWAY IS AN ENVIRONMENTAL AND FINANCIAL FIASCO THAT THE CARTER ADMINISTRATION SHOULD TRY TO CORRECT

HON. EDWARD I. KOCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. KOCH. Mr. Speaker, today Secretary of Transportation William T. Coleman announced his approval of the interstate highway segment proposed to be built on the West Side of New York in landfill in the Hudson River. This project is estimated to cost $1.2 billion at the present time, but will only provide 4.2 miles of roadway from the Battery in Lower Manhattan to 42d Street in New York City. Along with a number of my colleagues from New York City I signed a statement today that summarizes our views on the situation. Briefly we believe that the authority which exists in the Highway Act to substitute mass transit projects for this interstate segment should be employed. Even if the predominate share of the $1.2 billion were to be spent for mass transit improvements, there would still be money available for providing a suitable and small highway on New York's West Side.

I am appending a copy of the statement, together with a copy of a most heartening letter I recently received from the Secretary of Transportation-designate, Brock Adams, and a kind note from a busy man, President-elect Jimmy Carter:

HOUSE OF REPRESENTATIVES,
Tuesday, January 4, 1977.

As Members of the New York City Congressional delegation, concerned with the transportation needs of the entire City of New York, we are opposed to the expenditure of $1.2 billion on a four mile highway on the West Side of Manhattan. We believe that instead the money should be used on upgrading and expanding the City's mass transit system, and providing a small arterial roadway on the West Side.

Secretary of Transportation William T. Coleman's step in advancing the approval of the Westway project must be criticized. Basically, the EIS does not justify the expenditure of $1.2 billion on this highway. Further, with the Ford Administration's defeat at the polls last November, a decision of this magnitude should have been deferred to the new Administration.

Notwithstanding the Secretary's actions today, we, as Members of the Congressional delegation, will continue to fight Westway through the authorization and appropriation processes of Congress. The project has a long way to go before construction actually gets underway.

There has been much talk in recent weeks of $5–$8 billion in private development associated with Westway. But, this is merely window dressing. It relates to private investment in the City in the next ten years throughout the five boroughs, not just what is directly associated with Westway. Furthermore, there's no list of specific projects nor commitments by private developers—just an index of broad categories in which investment is expected.

But, there is a silver lining in every cloud. This year we can expect the Congress to approve a revised cost estimate for the highway of between $800 million and $1.2 billion. This will secure the estimate for transfer later to a mass transit project which would provide the same, if not more, job opportunities for the construction industry as Westway.

What is significant is that soon the City of New York will have allocated to it approximately $1 billion in transportation funds. We should look at the Westway proposal from this point of view and determine how $1 billion can best serve the City's needs: on a 4.2 mile highway or in upgrading and expanding our mass transit system that carries 85% of our City's workers and employees. We believe that a transit investment will better serve the City's economy and transportation requirements.

Edward I. Koch, Ben Rosenthal, Ted Weiss, Elizabeth Holtzman, Charles Rangel, Jonathan Bingham, and Shirley Chisholm.

JIMMY CARTER,
December 17, 1976.

To Congressman Ed Koch:

I appreciate your sharing your concerns with me. I am forwarding your letter to Brock Adams, Secretary of Transportation Designate.

Keep me posted on any new developments.

Sincerely,

JIMMY CARTER.

HOUSE OF REPRESENTATIVES,
Washington, D.C., December 27, 1976.

Hon. EDWARD I. KOCH,
U.S. House of Representatives
Washington, D.C.

DEAR ED: President-elect Carter has sent me your letter concerning the up-coming Department of Transportation decision on the West Side Highway project in New York.

It is my understanding that Secretary Coleman had not, as of the date of my most recent meeting with him, made a decision on this project. It is possible that he will make such a decision before January 20th. However, under the law, the environmental impact statement must remain at the Council on Environmental Quality for 30 days, a period which will run into the tenure of the new Administration. Thus, I will have the opportunity to review this major project, and I intend to discuss it fully with Mayor Beame and Governor Carey.

I agree that this project has very significant transportation, financial, and land use policy implications. I would hope that we can approach it on the basis of what makes the best long-term sense for the future of New York City within the constraints of the Federal highway and transit programs. The final decision on selecting a highway or a transit alternative rests with the States and local officials, and I would hope to contribute to that decision through a careful examination of the facts and the Federal options.

With best regards,

BROCK ADAMS, M.C.

THE POLITICAL COSTS OF A TV WASTELAND

HON. WILLIAM J. HUGHES

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. HUGHES. Mr. Speaker, New Jersey is one of only two States in the country not to have its own major television station. The other is Delaware.

On Sunday, January 2, 1977, the Washington Post featured on its editorial page an article by Mr. Frank Mankiewicz which describes in some depth the adverse impact this had had on a geographical area that is the eighth most populous in the country.

The author makes a convincing case for having a VHF station located in New Jersey. As he points out, "70 percent of the people in New Jersey rely on television for most of their news; 50 percent say they get all their news from the tube."

The enormity of this fact is most evident by the fact that local, State, and Federal elected officials have a very difficult time discussing issues and options with the people of New Jersey since television coverage is, to put it mildly, skimpy.

I earnestly solicit the support of my colleagues in this Chamber for the efforts of the Coalition for Fair Broadcasting, which is continuing to press this matter before the Federal Communications Commission—FCC—and other forums.

Mr. Speaker, I would like to share the substance of that Washington Post article with my colleagues.

The article follows:

THE POLITICAL COSTS OF A TV WASTELAND

(By Frank Mankiewicz)

Can it be that the people of New Jersey, responding perhaps to some emerging national stereotype, care less and are less informed about public affairs in their state than citizens elsewhere? Why is it that comedians, game show panelists and late-night celebrity interviewers can get the same laugh now from just saying "New Jersey" as their counterparts on radio a generation ago got from the magic syllables, "Brooklyn?" Is it something in the Jersey air, in addition to the noxious fumes the rest of us Eastern corridor people breathe?

In spite of the laughter from our television screens, New Jersey is not some rural backwater. It is the eighth most populous state in the union, the most densely populated, the most industrialized and the third highest in per capita income. In addition, it also ranks high in average level of education.

Given all these facts, the level of political awareness is astonishingly low. Now political awareness, to begin with, is almost always a function both of education and of income. Voting statistics, for example, demonstrate that people vote more often the better educated they are and the more money they have. (Those two factors are related, of course; people with a lot of education make more money than people who do not.) In addition, whenever public opinion samples are taken to find out if citizens can identify their public officials (a favorite pastime of pollsters in non-election years, when the pickings are slim), it is the better educated and those from the higher socio-economic levels who score the highest.

But New Jersey citizens—despite their education and their affluence—rank very low—indeed last—in these political awareness tests. In a Harris poll in 1973, 59 per cent of all Americans could name one U.S. Senator from their state, and 39 per cent could name both. But in the Garden State, even though both senators have considerable seniority, only 32 per cent could name either one, and only 25 per cent could name both.

Even worse were the results of a 1972 sampling by the New Jersey Poll. In that year—an election year—only 19 per cent could identify Clifford Case as a candidate for the Senate, even though he was then seeking (successfully, as it turned out) his fourth six-year term. Only 5 per cent could identify his Democratic opponent. In northern New Jersey, more people know about Mayor Abe Beame of New York than about Mayor Kenneth Gibson of Newark, and in the south, the major political figures are Frank Rizzo and Hugh Scott, both Pennsylvanians. No polls have been taken recently, but any astute New Jersey political observer would venture the opinion that Pat Moynihan, the senator-elect from New York, is better-known in the state than either Sen. Case, now in his 23d year in the Senate, or Sen. Harrison Williams, a senator since 1964 and a major committee chairman.

NO HOME BASE

The answer, of course, is that there is something in the air. And what is in the air over New Jersey consists of signals from seven New York television stations and four from Philadelphia—and none from New Jersey. None, count 'em, none. New Jersey is one of only two states without a television channel in the VHF (2 to 13) band, the only one which really counts so far. Delaware is the other, although the Philadelphia educational channel is actually located in Wilmington.

And since television is not—at the bottom line—a public trust by which news and entertainment is given to the public, and certainly not a great educational machine mirroring our society and increasing our understanding of it, but only the cheapest device yet discovered by which large audiences can be delivered to advertisers who will pay substantial sums for the delivery, New Jerseyans are simply part of two of those audiences—in this case the New York and Philadelphia "media markets."

As such, the fact that they are in another state is ignored, along with the imperatives that fact is thought—outside of television—to include. If the governor of New Jersey has a message for his fellow citizens, for example, he must leave the state in order to deliver it through the medium most of them use for news. Like Americans elsewhere, 70 per cent of the people in New Jersey rely on television for most of their news; 50 per cent say they get *all* their news from the tube.

The audience for New York and Philadelphia television stations includes, in each case, somewhere between 25 and 30 per cent New Jersey viewers. No station maintains studio facilities in New Jersey, and reporting is sporadic. For a New York station, getting news from New Jersey requires sending a crew: a correspondent, an electrician, a sound man, a cameraman and at least one producer/director type. It requires them to shoot their story, get back to New York (probably fighting the traffic), edit and develop the film, and get it on the air by 5 or 6 p.m.

Barring all that, the New York station can do one of the following things: get the story early in the morning (afternoon events are skimpily covered almost everywhere; in New Jersey they are almost never covered at all) and hope it will stand up; take it over the wire and read it in front of a still photograph, if you have one; or—better yet—scrub the whole thing and do something in midtown Manhattan. Needless to say, the last of these is almost always the most appealing alternative.

In addition, advertisers are affected by the relatively low share of the audience to be found in New Jersey. Many New Jersey advertisers—including, most of all, political candidates—simply cannot afford to pay for an audience three-fourths of whose members are geographically unable to buy the product. Thus, the New Jersey voter makes up his mind on local and state-wide elections and issues with little or no assistance from television—either from the news or from commercials.

GRESHAM'S TV LAW

Some results are clear, others subject to some informed speculation. The nature of television news is that the exciting and the controversial, the "visual" and, above all, the quick will survive the editorial process; the complex, difficult and abstract will wind up on the cutting room floor. It is this Gresham's Law of television news that will put a night-time fire in your living room any evening that film of one is available, that will (and did) show you a presidential candidate every evening carrying his garment bag off an airplane but rarely if ever tell you what he believes, and that denies Americans any cognizance through their most-used news medium of the tough economic issues which increasingly dominate our lives.

And it is that Law—In a Medium in Which a News Piece Takes a Minute and an "In-Depth" Piece Takes Two Minutes, the Simple Will Drive Out the Complex—which gives the people of New Jersey a picture of their state as one in which there is a lot of violent crime and frequent natural disasters, and damn little else.

The director of the New Jersey Poll, Stephen Salmore, has been quoted as suggesting that. major New Jersey economic problems continue to fester as a direct result of the absence of television, and he makes a persuasive case. According to Salmore, as well as most serious analysts of New Jersey's economy, much of the state's problem is due to the fact that it is the only industrial state without a real income tax, and property taxes are at their realistic limits. (A recent compromise regressive income tax is regarded as a start, but a weak one.)

Both Republican and Democratic governors tried for years to get an income tax, says Salmore, but failed even though a steady majority of the voters favored it in the form it was offered. The explanation, he says, is that television provides the indispensable link between politicians and the public, and in New Jersey this link is missing. The result is that special interests can apply pressure on individual legislators without having to worry about countervailing public pressures. A governor can't "go over the heads" of the legislators or the lobbyists; there's nowhere overhead to go—at least not in New Jersey.

THE MAKING OF A WASTELAND

How did all this happen? The history is instructive. By 1952, the Federal Communications Commission, operating under rules which require all major population areas to be served by some television, but anxious to award more channels to the larger cities where competition could better thrive, ended a four-year freeze on television licenses and began assignments to the major "markets." New York got channels 2, 4, 5, 7, 9 and 11 (in that signal area), Philadelphia got 3, 6 and 10, New Haven got 8, and channel 13 was assigned to Newark.

The management of the Newark channel ran up sizeable losses in those early years and in 1961, under considerable pressure from FCC Chairman Newton Minow, the commission approved its sale to a New York-based educational group. Today, it operates as WNET, one of the few public channels on the VHF spectrum, but it is still licensed technically to Newark.

It was that vestigial tie to Newark which led to an out-of-court "settlement" at the time the channel went across the river. Then-Gov. Robert Meyner extracted from the new owners a pledge that the station would provide a "substantial amount" of New Jersey programming and would maintain a studio in Newark.

All New Jersey public officials, now allied in a Coalition for Fair Broadcasting, agree that WNET has not fulfilled its end of the bargain. The Coalition went so far as to bring an action before the FCC in 1974 asking a review of the situation in which New Jersey has become in fact the "vast wasteland" Minow once chose as a metaphoric description for all of television. The Commission record on the matter is a classic example of marching up the hill and then, in response to what the New Jersey Coalition says is industry pressure, marching right back down again.

The FCC issued, in effect, three orders this year before it finally disposed of the whole thing. First, in March, it found a need for improved VHF service in New Jersey (there is some UHF service, but no one seriously argues that it begins to meet the state's needs, the signals are scattered, weak and under-financed), and ruled that it could be met by increased VHF "presence." It was "presence" New Jersey has always sought—either by the transfer of a station to the state or at least a requirement that one of the New York and Philadelphia stations maintain a full equipped studio in New Jersey.

In the March statement, the FCC asked for guidance and comment on how to define "presence" and whether "programming standards" sohuld be imposed. "Imposing" program standards is one of those phrases like "forced busing"; it's easy to tell what side of the argument is held by the speaker. The FCC, of course, imposes standards all the time—like Equal Time or Fairness or Public Service programs—and the broadcasters accept this "imposition" as a condition of their valuable licenses, but no one likes to admit it. It weakens, some say destroys, the arguments against "censorship."

The response to the March request was predictable. The New Jersey Coalition gave it as its opinion that "presence" meant just that—a studio, just like a real television station. The New York and Philadelphia licensees, including all three networks (they all own New York stations, and CBS owns one in Philly, too), said *they* thought they were doing just fine in New Jersey, and "presence" could be satisfied by stringers and a "New Jersey desk" in the New York newsroom. Since New Jersey news makes up around 10 per cent of all news broadcast in the markets, and since one station said it would satisfy the FCC standard, at least in part, by encouraging its executives to give speeches at New Jersey civic clubs, one can imagine the reaction from the Coalition.

In July, the FCC issued its second report, watering down the earlier conclusion of need for greater coverage and seeming almost to apologize to the New York and Philadelphia licensees for causing so much trouble. It asked for voluntary plans and issued some weak minimum "presence" guidelines. In September, the stations submitted their proposals (only one of the 10 proposed meeting even the weak "presence" guidelines). In October, the New Jersey Coalition objected; in November, the FCC approved the voluntary plans. There will be no studio in New Jersey, and the Coalition will doubtless appeal to the federal courts.

The question of "presence" is an interesting one. The Coalition for Fair Broadcasting—characterized in the industry as "do-gooders" and politicians—is on pretty firm economic ground when it asks for a commitment to a broadcasting studio. The do-gooders understand that, if there is a fully equipped studio, complete with cameras, lights, sets, an art department and production people, including well-paid union technicians, then the company's accountants will demand, even if no one else does, that they be used. And the only way to use them

would be to get something of New Jersey on the air—in New Jersey. But even if the Court of Appeals, or a reconstituted FCC, sees it that way, it's still a long way off. In the meantime, New Jersey television audiences can take comfort in the fact that even 200 years ago Ben Franklin called the state "a keg tapped at both ends."

* * * * *

Defenders of television's status quo sometimes point to Washington as an area where a bi-state (in this case, tri-state) market is adequately served. If the citizens of Montgomery and Prince Georges counties and of Northern Virginia can do without a VHF television station and be content with what they get from four District of Columbia channels, they ask, why does New Jersey complain so?

The answer, of course, is that the Washington "market" happens to coincide, almost exactly, with the metropolitan area—which is not the case, let us say, with New York City and New Jersey north of Trenton. In the Washington market, roughly one-third of the audience lives in the District, one-third in Maryland and one-third in Virginia. More important, most of Maryland and most of Virginia *are* covered by local VHF stations—in Baltimore, Salisbury, Richmond and Norfolk, for instance.

Finally, because the audience is not divided as lopsidedly as it is in New Jersey, Washington's stations give a considerable amount of coverage to Maryland and Virginia *vis-a-vis* the District. I don't have the monitoring statistics, but it looked to me as though Marvin Mandel had as much coverage as Joseph Yeldell.

And the true difference, when you get right down to it, is that the Maryland and Virginia suburbs which depend for television on Washington are truly suburbs, much of whose life and activity is involved with what happens in the District. We work here, we shop here, we are affected by its traffic, its government—we are even taxed by it. That is true of *some* of New Jersey, but only some.

FRANK MANKIEWICZ.

THE FEDERAL GRANT AND COOPERATIVE AGREEMENT OF 1977

HON. FRANK HORTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. HORTON. Mr. Speaker, the 94th Congress passed, in the closing days of its session, S. 1437, a bill "to distinguish Federal grant and cooperative agreement relationships from Federal procurement relationships, and for other purposes." The President withheld approval of the bill, in a memorandum of disapproval dated October 22, 1976. This legislative action was the final one taken by the President.

The bill, originally introduced as H.R. 15499, the Federal Grants and Agreement Act of 1976, was strongly supported by State and local governments and their public interest groups, the American Bar Association, the Chamber of Commerce, the Commission on Federal Paperwork, of which I am chairman, and many voluntary and charitable organizations. The proposal was developed directly from recommendations made by the Commission on Government Procurement.

In my testimony supporting last year's bill, I pointed out that the bill would "provide uniform guidelines to distinguish control and the use of grants, procurement contracts and cooperative agreements by Federal agencies based on the fundamental purpose of the transaction and what kind of relationship is expected between the Government and a recipient."

Second, it mandates a study that should lead to the development of a comprehensive system of guidance for Federal assistance programs.

The problems which this legislation is designed to correct continue to exist. Clarification of Federal-recipient relationships through standardization of legal instruments offers an opportunity for changing the causes of the redtape, paperwork problems. It is one weapon in an arsenal of many, including reorganization of Federal program and fiscal relationships, opening up Government to broader citizen input, and more thoughtful consideration by Members of Congress of the potential redtape implications of bills which they pass.

Support for the legislation continues to exist. I am introducing it today, therefore, in hope that this Congress will quickly consider and pass it, and that the President will affirm his commitment to more responsive and efficient Government through his approval.

HUNTINGTON WOODS RHODES SCHOLAR

HON. JAMES J. BLANCHARD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. BLANCHARD. Mr. Speaker, too often the accomplishments of women have not been matched by recognition of their abilities and talents. I would like to note that the Rhodes Scholarship awards this year reflect some changes in this situation. This year, for the first time, women were allowed to compete, and 12 American women were chosen as Rhodes Scholars.

I am very pleased that one of my constituents, Denise Thal of Huntington Woods, Mich., was named to be among this group, and I would like to take this opportunity to applaud Ms. Thal's achievements. The following article from the Royal Oak Daily Tribune describes her fine accomplishments:

HUNTINGTON WOODS WOMAN BREAKS BARRIERS FROM TENNIS TO RHODES SCHOLAR

(By John Basch)

Breaking the male-only barrier is nothing new to Denise Thal, a 21-year-old Huntington Woods resident.

She is one of 12 women who Sunday were awarded Rhodes scholarships for study at Oxford University, England. Women were not permitted to compete for the scholarship until this year.

A National merit scholar at Berkley High School where she was graduated in 1973, Miss Thal first gained headlines as a 16-year-old tennis player on Berkley's boys' high school team.

In April 1972, she became the first girl in South Oakland to compete against boys in interscholastic competition after Federal Judge Damon Keith issued an injunction permitting girls to play on boys' teams.

Miss Thal made her prep debut on the boys' team with a 6–4, 6–3 victory over a Southfield boy. She played third singles on the boys' team and was ranked second among girls 16 and under by the Southeastern Michigan Tennis Association. She played No. 1 singles on the boys' team during her senior year.

Daughter of Mr. and Mrs. Bruce E. Thal, 13300 Victory, she is the only Michigan resident to be awarded the prestigious scholarship.

She majored in economics and was captain of the women's tennis team at Radcliffe. She will receive her degree in economics from Harvard and plans to study a program of economics, philosophy and political science at Oxford.

The scholarship, financed by money left in the will of British philanthropist and colonialist Cecil Rhodes, was initiated in 1903, one year after Rhodes' death.

Rhodes Scholars are appointed for two years of study in the University of Oxford. Costs of tuition, expenses and travel are paid by Rhodes Trustees.

ELECTION CONTESTS

HON. FRANK THOMPSON, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. THOMPSON. Mr. Speaker, I feel that it would be appropriate, at this time, to advise the Members of the House with regard to election contests arising out of the 1976 congressional elections.

Article 1, section 5, of the U.S. Constitution provides that—

Each house shall be the Judge of the Elections Returns and Qualifications of its own members. . . .

Under this constitutional authority the House has over the years resolved election contests dealing with congressional primary elections as well as general election contests. In fact, in 1969, the House enacted a Contested Elections Act (2 U.S.C., section 381, et seq). Under the Rules of the House of Representatives, these contested election matters are within the jurisdiction of the Committee on House Administration.

There are currently pending before the Committee on House Administration, seven election contests, five dealing with general elections and two dealing with primaries. I am confident that the committee will proceed to deal with these contested election cases as expeditiously as possible.

Contests, in order of filing with the House of Representatives, are as follows:

First. Dr. Edward Pierce against Carl Pursell, Second Congressional District, Michigan; filed November 29, 1976.

Second. James A. Moreau against Richard Tonry, First Congressional District, Louisiana; filed December 3, 1976.

Third. Elsa Hill against William Clay, First Congressional District, Missouri; filed December 8, 1976.

Fourth. Joann Saunders against Richard Kelly, Fifth Congressional District, Florida; filed December 10, 1976.

Fifth. Samuel Young against Abner Mikva, 10th Congressional District, Illinois; filed December 20, 1976.

Sixth. Ron Paul against Bob Gammage, 22d Congressional District, Texas, filed December 20, 1976.

Seventh. Albert Dehr against Robert Leggett, Fourth Congressional District, California; filed January 3, 1977.

CONTINUING CARE CONSUMER PROTECTION ACT

HON. WILLIAM S. COHEN

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. COHEN. Mr. Speaker, earlier this week I introduced legislation known as the Continuing Care Consumer Protection Act. The continuing care contract is an arrangement whereby a resident in a home for the aging makes a lump sum payment for continuing housing, social, and medical services. In most cases, this care is promised for life.

Continuing care was originally charitable in nature. Groups sponsoring homes for the aging would accept total assignment of assets by the poor for care, supplementing such payments with their own resources. With the advent of social security and, subsequently, medicare, medicaid, and SSI, however, this situation changed. Continuing care arrangements ceased to be purely a benevolent means to care for the destitute, but now are a means to acquire capital to build or renovate a physical structure and finance operating expenses.

This new construction is needed. Upward of 3 million elderly Americans lack adequate care and housing. The Federal Government, however, is not providing sufficient permanent financing to meet this need. The primary Federal source of funds for nonprofit sponsors of homes for the aging is section 202 of the 1959 Housing Act, through which direct loans are made to nonprofit sponsors for constructing and renovating housing for the elderly and handicapped. In fiscal year 1976, $750 million was made available for all section 202 applicants. However, there was a demand for between $5 and $9 billion in aid. Moreover, section 202 provides funds for brick and mortar only, not for support services.

Commercial money markets are reluctant to loan money to nonprofit sponsors of homes for the aging because the nonprofit sponsors do not have an equitable interest in the project in need of financing. This equity can be provided by selling continuing care to residents. The residents, of necessity, are required to provide the capital by which the home is built, renovated, and operated. If nonprofit sponsors were able to obtain adequate financing other than through the use of these contracts, the continuing care contract probably would not be as common.

Many criticisms have been leveled at these contracts by both providers and consumers of care. Some homes are currently in receivership or threatened with bankruptcy, because adequate reserves have not been maintained to provide the kinds of services promised consumers in original contracts. Contracts are sometimes confusing as far as what services are to be provided. High entrance fees prevent the poor, as well as minorities, from having access to some homes. The resident is deprived of substantially all future bargaining power over the quality of care he receives. The facility receives compensation which is inversely proportional to the patient's longevity. And some types of continuing care policies may be inequitable in that they force the wealthy and middle class to subsidize the poor.

Providers also face problems in accepting continuing-care residents. A home may find it difficult to live up to its promises to deliver service because of unforseen expenditures or inflation. Life expectancy figures, upon which payment is computed, may be unreliable. The tax exempt status of homes is jeopardized if they discharge the indigent. And homes may be prevented from or restricted in their applications for Federal or State funds for their residents who have willingly surrendered their assets for care.

Despite these limitations, the fact that contracts continue to be written indicates that continuing care has many advantages. It offers one the independence of having his or her own place in a community without the chores of maintaining a house. It provides security, companionship, and care without the threat of a future financial drain on relatives when properly drawn and executed.

My bill seeks to curb the potential abuses of the consumer, while at the same time protecting an alternative financing mechanism which serves the interests of the elderly. Of most importance, the legislation requires a written contract containing a financial disclosure statement on the institutions' ownership, income sources, projected costs, and debts; a complete description of services included in the contract and those services of the home which are not a part of the contract, but which may be secured for additional cost; a complete outline of the financial arrangements agreed upon by both parties; conditions for termination of the contract; the period of time for which the contract is in effect; and a refund policy. With reference to the last requirement, a GAO report in March 1976, was critical of the fact that Federal regulations are silent as to the disposition of personal funds of transferred or deceased residents in long-term care facilities. Certainly, the proper disposal of resident funds should be extended to those lump-sump payments which often represent a lifetime of saving.

Furthermore, the participating institution must be audited annually, and maintain a reserve of those lump-sum payments it receives which are necessary to meet its obligations as determined by the Secretary of Health, Education, and Welfare.

Failure to comply with those requirements would make the home guilty of a misdemeanor and subject to fines. The home would be barred from issuing any more contracts until the deficiency was corrected. Finally, any resident holding a contract who was injured as a result of noncompliance would be guaranteed access to Federal court.

Some State governments have already recognized the importance and need to regulate these contracts for the protection of the consumer. My bill would not disturb these arrangements, as long as the State does not ban such contracts and existing State regulations are at least as stringent as those imposed by this measure. In fact, the Continuing Care Consumer Protection Act not only acknowledges but encourages the States to assume an active role in this important area.

We have the opportunity to protect these financial arrangements to the benefit of all concerned. I commend this legislation to my colleagues.

NORTH CHICAGO VA HOSPITAL DIRECTOR QUANDT SHOWS SKILL IN EMERGENCY

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. McCLORY. Mr. Speaker, whether Americans today live in large urban clusters or in rural communities, they still venerate those earliest traditions of our pioneer days: Neighborliness and courage and innovation in the face of crisis. Let me cite this example:

Shortly before noon on a cold November 29, 1976, fire knocked out the heating plant at the Great Lakes Naval Training Center in my 13th Congressional District. That plant also provides heat for the North Chicago Veterans' Administration Hospital, the Nation's largest.

Within hours, a fleet of buses, ambulances, and other emergency vehicles began the orderly evacuation of more than 800 patients to nearby military and private hospitals and to VA hospitals in the Chicago and Wisconsin areas, because temperatures that night were expected to drop below zero.

Marjorie R. Quandt, director of the North Chicago VA Hospital, bought 300 space heaters to keep comfortable those patients awaiting transfer and to care for the 477 others who would remain that night at the hospital, because they were too seriously ill or too handicapped to be moved. She also rented three emergency boilers from commercial businesses for standby use should they be needed.

And the community reached out. As Director Quandt wrote in a thank-you letter published in the Waukegan, Ill., News-Sun, offers of housing, transportation, food, and "most of all themselves" from individuals, businesses, industries, hospitals, and military bases poured in:

> We here at North Chicago VA Hospital are very thankful that we have neighbors who are so generous and responsive.

An 87-year-old patient at North Chicago put it more graphically in an interview with a News-Sun reporter:

> I'll tell you, those doctors and nurses here did a hell of a job. I haven't seen one of those hundreds of dollars a day hospitals that would do as much for you.

And the newspaper itself, in an editorial of commendation, said this:

Much of the success of the operation, which went so smoothly, can be credited to Marjorie R. Quandt, Director of the institution, and members of her staff who remained at their posts until the last ambulance left the hospital.

Mr. Speaker, within about 24 hours, the patients had returned in a reverse cavalcade of vehicles. The heating plant had returned to operation. The crisis was over. Women and men had reacted quickly, wisely, and well, and they had reached out as neighbors and friends to help those in need.

Mr. Speaker, I would like to take this opportunity to express my personal thanks to Director Quandt, the staff at the North Chicago VA Hospital, and all the hundreds and hundreds of others in Lake County and elsewhere who turned a day of possible tragedy into a day to remember with thanks.

OSHA INSPECTIONS STOPPED

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. HANSEN. Mr. Speaker, the Occupational Safety and Health Administration has stopped all inspections in Idaho pending legal appeal. Now such inspections should be stopped in all other areas under OSHA's jurisdiction as well in the sense of equal justice for all Americans which is guaranteed every citizen by the U.S. Constitution.

It was in this spirit of equal justice and protection for all citizens that yesterday I sent letters to Secretary of Labor Usery, to U.S. Attorney General Levi, and to OSHA Administrator Corn asking for an abatement of all OSHA inspections across the Nation.

Mr. Speaker, I deem it my responsibility to advise my colleagues and their constituents that further inspections of a nonuniform nature violate the equal protection of the laws guaranteed by the Constitution. It is in this respect which I submit the contents of my letter to Secretary Usery as well as an article from the Idaho Statesman newspaper of January 6, 1977:

JANUARY 4, 1977.

Hon. W. J. USERY,
Secretary of Labor,
Washington, D.C.

DEAR SECRETARY USERY: Regarding the decision of a Federal Three Judge Court in Idaho declaring inspection authority, Section 8(a) of the OSHA Act, unconstitutional and void, I commend administrative actions of yesterday causing OSHA inspections in Idaho to cease pending appeal.

However, under the concept of equal justice for all citizens such OSHA inspections should also immediately be terminated for all other areas under OSHA's jurisdiction. Not only is this a matter of equal justice but it is a matter of legal reality since necessary precedent exists for individual rejection of warrantless searches or inspections by any citizen in the Nation.

Certainly government activities of this nature should not be enforced only against the acquiescing citizen who is either not informed of his basic rights or who is without the means or determination to protect such rights. I urge you to take this request for equal justice into early and serious consideration and act swiftly to grant proper relief.

I am hopeful of a reply at your earliest convenience.

Sincerely,

GEORGE HANSEN,
Member of Congress.

OSHA INSPECTIONS STOPPED IN IDAHO

WASHINGTON.—The Occupational Safety and Health Administration (OSHA) has temporarily halted safety inspections in Idaho after a court ruling that inspections of businesses without the owners' permission are unconstitutional, the Department of Labor announced Wednesday.

OSHA announced it will appeal last week's court ruling to the U.S. Supreme Court, and meanwhile will seek a stay in the ruling. The agency said it will halt inspections until the motion for the stay can be heard.

On Dec. 30, a three-man constitutional court in Idaho agreed with Pocatello businessman Bill Barlow that OSHA inspections without his permission violated the Constitution's Fourth Amendment prohibition against unreasonable searches. Congress had given the agency no power to force inspections, the court said.

OSHA administrator Morton Corn, an assistant secretary of Labor, said he is "deeply concerned about the implications of the court's decision. OSHA will actively pursue all legal avenues of recourse open to us."

Rep. George Hansen, R-Idaho, chairman of a national campaign to abolish the safety-inspection law, called the halt in inspections "entirely proper. . . . Until the Supreme Court rules on this matter. OSHA should cease and desist in all inspections."

Even if the court ruling is immediately stayed, Hansen said, businessmen should refuse OSHA inspectors entry, citing the Barlow case. "That stay won't help them if citizens are brave enough to stand up to OSHA," Hansen said. "But for any timid person not willing to stand up to the government, it could be a problem."

He said the Dec. 30 decision "is the first time a federal court has put an agency out of business," and said it will have national impact.

Hansen maintains that state and local governments are adequate to regulate industrial safety, and said a ballooning federal bureaucracy under OSHA has performed in a high-handed and arbitrary manner.

The agency, created in 1970 to cut down the number of worker accidents, has been engulfed in controversy and is held up by some congressmen as the prime example of an insensitive government bureaucracy.

Hansen and Rep. Steve Symms, R-Idaho, jointly introduced bills in Congress Wednesday proposing repeal of the Occupational Safety and Health Act and the 1968 Gun Control Act.

Hansen and Symms said in a joint statement: "OSHA has been ruled unconstitutional and this should give added support to our bill to repeal the act."

The representatives said the gun-control act requires, among other things, that records of the purchase of firearms be provided to the U.S. Treasury Department.

"This type of control has proven ineffective as a crime control measure because in ever increasing numbers individual citizens are rejecting all such controls," they said.

Hansen and Symms said "the trend is obviously clear and Congress simply must represent the people—these bills do just that."

TELEPHONES IN THE UNITED STATES

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. COLLINS of Texas. Mr. Speaker, most of the time we Americans do not pause and realize how many good things we have in the United States. I use and appreciate my telephone. I guess a kind word will come as a surprise to the telephone company, but you will be interested in some telephone research that I just completed.

Presently in the United States we have 657 telephones per 1,000 inhabitants. That is more than one phone for every two individuals. This figure compares with 594 per 1,000 in Sweden, 350 per 1,000 in Britain, 217 per 1,000 in France and 200 per 1,000 in Greece. A city-to-city comparison is also interesting. The town of Richardson, Tex., has 69,000 inhabitants. Richardson boasts 65,716 telephones or a 95-percent rate of phone distribution. Compare this figure to that of Frankfurt, Germany, a modern, Western European city of almost identical size. Frankfurt has 70,000 inhabitants but only 11,727 phones. Its rate of distribution is only 16 percent.

Installation waiting period is also a factor in measuring the quality of telephone service. The average time it takes to have a phone installed in the United States is less than a week and often less than 2 days. It takes a minimum of 1 month in Greece, 2 years in Norway, and from 18 months to 5 years in France.

Rising phone costs have caused users to grumble, but let us compare. In the United States, with established credit, there is no deposit on residential telephones. Costs vary, but the average monthly rate is $9 to $10. In Greece and Italy, it costs $140 to have a phone installed. In Japan, a $500 bond must be purchased plus the installment fee of $167. In France, it is $182 for installation, $8.50 a month and 9 cents a call. In Guatemala, obtaining one of rare new phone lines costs $1,000.

But beyond all these measures of phone quality, the ultimate test is telephone reliability. In this country, the phone system is regarded internationally as giving excellent service. In Britain about half of all phones are out of order during any one period. In France, due to obsolete circuitry, it frequently is necessary to try the same number 20 times before the correct party is reached. In Guatemala and Spain, you can barely hear your party.

Thought-provoking stories have been told by American travelers abroad about misadventures with foreign telephone systems:

Then there's the matter of the telephone coin return boxes in England. I learned about them the hard way. I made a long-distance call from a London airport putting countless large British coins into the box at the operator's directions. The called party wasn't home.

I hung up and waited for the money to return. Nothing. I groped for a return box, found none, and in panic tried to locate my operator again. I got another, instead, who explained to me that British phones have no return coin mechanism.

"So what," I asked, "happens to my money?"

"You can place the call later or we'll mail you a check."

I asked them to try the call later. The operator took the pay phone number and told me to stand by there in an hour.

The airport was crowded, and when I returned to the phone at the appointed time, seven people were lined up to use it. It took me 25 minutes to work my way to the phone and another 10 to locate the right operator who told me cheerfully that my line had been busy. He put through my call again, the people still weren't home, and we set another rendezvous.

Once past customs, there was another delay so I explained to the uniformed man in charge that I was expecting a phone call Out There and would he mind if . . . Yes, he would mind. Once through customs, nobody (he stressed the word twice, frowning) gets back.

That is English telephones, and I am proud that I have the American telephone system.

THE CONSTITUTIONAL CRISIS IN STATE ELECTION LAWS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. McDONALD. Mr. Speaker, many of the Presidential electors, whose votes were just counted to elect the next President of the United States, were chosen under State election laws which have serious constitutional defects. I discussed with some of my colleagues whether a challenge should have been made to the receipt of those electoral college votes by the Congress today.

The decision was made that there was too little time and procedural difficulties in making the challenge for it to be effectively brought before Congress.

I emphasize, however, that the constitutional issues are important, and must be resolved for the political health of the Nation.

Since 1888, the States of the Union have increasingly adopted in their election codes provisions which give undue advantages to representatives of the existing political party structures, and place serious handicaps on independent candidates and party candidates whose views differ from the then current leadership of their parties. Especially in the 20th century, millions of Americans feel they are not truly represented by those who have been elected as their "representatives."

I believe this is part of the reason that the voter turnout, in terms of percentage of eligible voters, for President in 1976 was the lowest in 50 years, and also why all national polls describe a massive dissatisfaction by tens of millions of voters with the current "major" parties.

More important, I believe that many of the restrictions on candidates and their potential voters who seek to present new or different ideas are flatly contrary to the U.S. Constitution.

For example, George Washington, Thomas Jefferson, John Quincy Adams, Woodrow Wilson, and Abraham Lincoln, among other Presidents, would have been prevented from running in many of the States, or would have lost their election, had the current laws applied in their years.

Aside from the constitutional issues, unless changes are made in our election laws we will see a continuation and acceleration in the trend toward a monopoly by the traditional Republican and Democratic parties—not only in terms of access to the ballot, but access to the media and access to public funds—although there should be no public funds for political candidates—as well.

Listed below are the most important constitutional defects in the State election laws which applied to the Presidential election of 1976 which my initial research has brought to light. Most of these constitutional points have been favorably decided by the Supreme Court of the United States or by the highest courts in Massachusetts, Oklahoma, and other States.

The constitutional crisis which almost arose this year will probably confront us all in 1980 unless States conform their election laws to the Constitution, preferably by choice rather than court compulsion.

The list follows:

ARKANSAS

Arkansas Code 3–105(c) is unconstitutional for requiring excessive petition signatures. 3–113(a) has been declared unconstitutional in federal court for excessively early deadline.

CALIFORNIA

California petition law was declared unconstitutional by state courts in 1976, but the strongest challenging candidate was not permitted on the ballot.

CONNECTICUT

Connecticut General Statutes § S9–453a to 9–453s 1976 Supp. unconstitutionally require every petition-gatherer to go personally to the town clerk of every signer (up to 169 of them) to swear he gathered the signatures, a geographically impossible task.

DELAWARE

The Delaware Code unconstitutionally provided *no* method by which a candidate not belonging to a political party, could run for President.

DISTRICT OF COLUMBIA

D.C. Code 1–1101, et seq., did not allow a candidate who is not a member of a political party to run for President. It still requires a petition candidate to file before the time required of non-petition candidates. The major challenger was excluded from the ballot.

FLORIDA

Florida statutes §§ 99.152 and 99.153 provided *no* method for a candidate, not belonging to a political party, to appear on the ballot for President.

GEORGIA

Georgia Election Code requires an unconstitutionally-high number of petition signatures. The major challenger was excluded.

HAWAII

Hawaii election law unconstitutionally forbids voters from casting write-in votes for President.

IDAHO

Idaho Code 34–711 does *not* permit a candidate for President who is not a member of a political party. The state conceded the unconstitutionality of its law *after* the election. The major challenger was excluded.

ILLINOIS

Illinois Revised Statutes, chap. 46, §§ 21–1 and 21–2, did not provide a method for a candidate, not belonging to a political party, to run for President.

INDIANA

Indiana Election Law is unconstitutional in having no state control over the accuracy of local board petition counting, in its verification of signatures, and in its failure to permit voters to write-in for President. The major challenger was excluded from the ballot.

KANSAS

Kansas Statutes Annotated, 25–301, were unconstitutional for preventing a candidate, not a member of any political party, from running for President.

KENTUCKY

Kentucky Revised Statutes Annotated 119.310(f) was unconstitutional for allowing nomination for President only by political parties.

MARYLAND

Annotated Code of Maryland, Article 33, Section 7-a is unconstitutional for requiring petition candidates for President to file months before major party candidates must file. The major challenger was excluded from the ballot.

MASSACHUSETTS

General Laws of Mass., Chap. 53, Sections 7, 11 and 12, and Chapter 6, Sections 29–32 are unconstitutional for failure to provide for state control over the accuracy of local board petition counts.

MICHIGAN

Mich. Codified Laws Annotated § 168.685 was unconstitutional for failure to permit a candidate, not a member of a political party, to run for President.

MISSOURI

Revised Statutes of Missouri § 120.240.1 and 120.340.1 were unconstitutional for their excessively early deadline for filing petition signatures. § 111.351 was unconstitutional for preventing a candidate, not a member of a political party, from running for President.

NEBRASKA

Nebraska Revised Statutes 32–504, 32–556, 32–561 and 32–4.108 were unconstitutional for failure to allow a candidate, not belonging to a political party, to run for President.

NEVADA

Nevada Revised statutes 293.063, 293.177(4) and 293.195 are unconstitutional for failure to permit a candidate, not belonging to a political party, to run for President. They further unconstitutionally bar write-in votes. The major challenger was excluded from the ballot.

NEW YORK

Section 138(8) of the New York Election Law is unconstitutional for preventing a candidate from appearing on the ballot even though he had admittedly filed sufficient signatures, state-wide, and distributed in congressional districts. The major challenger was excluded from the ballot.

OKLAHOMA

Oklahoma Statutes, Article X, § 10–101, et seq., were unconstitutional for failure to permit a candidate, not belonging to a political party, to run for President.

RHODE ISLAND

Rhode Island General Laws, Title 17, Chapter 16, § 12 and 17–16–8(a) are unconstitutional for excessively early deadline, and for a distribution requirement that permitted one signature in the least populous county to outweigh 112 signatures state-wide. The

major challenger was excluded from the ballot.

TENNESSEE

Tennessee Code Annotated § 2–514(g) was unconstitutional for preventing the name of the Presidential Candidate to be printed with those of his electors, on the ballot.

TEXAS

Texas Election Code, Article 11.01 to 11.05, and 13.50, are unconstitutional for failure to permit a candidate, not belonging to a political party, to run for President, or to run for Presidential elector.

UTAH

Utah Code Annotated, § 20–4–3, is unconstitutional for failure to permit a candidate, not belonging to a political party, from running for President, or for Presidential Elector.

VIRGINIA

The Virginia Election Code is unconstitutional for failure to permit write-in votes for President.

WASHINGTON

The Annotated Code of Washington 29.71. 020 was unconstitutional for permitting selection of Presidential Electors by political parties only, excluding non-party members.

WEST VIRGINIA

W. Va. Code Annotated, Chap. 3, Art. 5, § 23–24, are unconstitutional for excessively early petition filing deadline, collection by magisterial district, with collectors residing in each district. The major challenger was excluded from the ballot.

SURVIVOR BENEFIT PLAN

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. BOB WILSON. Mr. Speaker, I was pleased to join Tuesday with my distinguished House Armed Services Committee colleague from New York (Mr. STRATTON) in introducing legislation to complete the improvements we initiated last year to the survivor benefit plan for military retirees.

In mid-September the House passed H.R. 14773, a comprehensive series of amendments to bring the survivor benefit plan into conformity with its original intent: a plan based closely, in terms of both costs and benefits, on the survivor annuity plan available to civil service annuitants. Due to the shortness of time, the Senate approved only part of the House bill and deferred action on the remainder, which we have reintroduced.

First, this bill would authorize cost-of-living raises for widows covered by the retired serviceman's family protection plan. This plan, also known as RSFPP, was established in the early 1950's as an actuarial-equivalent plan, that is, the deductions from the retired pay of the participants, plus interest, would pay for the survivor benefits authorized. Unfortunately, the cost of the RSFPP annuity in relation to the benefit provided was quite high, and the majority of retirees did not elect to join. RSFPP provides no cost-of-living raises whatsoever. As a result, RSFPP widows have received no change in their annuities since the husband's deaths 5, 10, or even 20 years ago. According to Defense Department figures, the average RSFPP annuity is $1,600 annually; but many widows receive less than $100 monthly.

We made a serious omission by failing to provide cost-of-living raises for RSFPP widows when we established the new survivor benefit plan in 1972. The legislation we have introduced would correct this by providing future cost-of-living raises for RSFPP widows. Additionally, although no retroactive benefits would be paid, the first raise would be equal to the amount that the Consumer Price Index has increased since 1972, more than 40 percent. Retirees who participate in the retired serviceman's family protection plan paid dearly for that coverage. Inflation has eroded many of these annuities to a pittance, and we have an obligation to act quickly to rectify this situation.

The second part of this legislation deals with the social security offset portion of the military survivor benefit plan. When the full House considers this bill, I will go into the details of the offset at greater length. However, in the interest of brevity so early in the session, I will summarize the thrust of this section of the legislation.

Under the military survivor benefit plan, at age 62 the widow's survivor annuity, for which her husband paid with reductions in retired pay during his lifetime, is reduced dollar-for-dollar by social security benefits attributable to the late husband's military service. The principle of a 100-percent offset is intrinsically highly questionable; the myriad complexities of figuring social security entitlement make it much more so. In practical application, the 100-percent offset makes the survivor benefit plan a bad investment for many retirees. As those retiring in the future have an increasing amount of social security coverage, the problem will be magnified.

Our intention in establishing the survivor benefit plan in 1972 was to provide an attractive, equitable survivor annuity plan at a fair price. We anticipated participation of up to 85 percent of retirees. According to Defense Department testimony, the percentage of new retirees who elected to participate in SBP dropped from 61 percent in fiscal year 1974 to 55 percent in fiscal year 1975. The social security offset is the reason most frequently cited by retiring servicemen for opting out of the survivor benefit plan. I am confident that a reduction in the offset will have a substantial impact on future enrollment trends.

The legislation we have introduced would reduce the social security offset from 100 percent to 50 percent. Additionally, it would eliminate the offset entirely for a widow who is receiving no social security benefits from the late husband's military service. Although there are several situations where this may occur, the most common is the widow who has worked for many years and earned her own social security benefits. In such a case, even though she receives no social security benefits from her late husband's account, her SBP annuity is reduced dollar-for-dollar for those nonexistent benefits. Also removed are the offset for a widow under age 62 with one child, since widows with two or more children are already subject to no offset, and the offset for Reserve retirees whose only active service after 1956 consisted of short periods of training. It is important to emphasize that these changes merely seek equity with other Federal retirement programs.

Since House passage of H.R. 14773 last September, one additional problem has come to the fore. It was the intent of the House Armed Services Committee that the costs of providing survivor coverage be the same as the civil service survivor annuity program, namely 2½ percent of the first $300 of retired pay base designated for survivor coverage and 10 percent of the remainder. Retired pay and the survivor annuity are both subject to the periodic cost-of-living raises authorized by law for Federal retirees, civilian and military.

In order to keep pace with the increased value of the survivor annuity, and the added cost to the Government, the amount of the reduction from retired pay is also increased with each Consumer Price Index raise for retirees.

Due to the wording of the law, the military retiree is paying more for this coverage than his civil service counterpart. To illustrate, let us take a hypothetical 5 percent cost-of-living raise for Federal retirees. In the case of the civil service retiree, his retired pay is increased by 5 percent, the amount of his designated survivor benefit is increased by 5 percent, and the reduction from his retired pay to provide the survivor benefit is also increased by 5 percent. The system works differently for the military retiree. Like the civil servant, his retired pay and the designated survivor annuity are both increased by 5 percent. The cost of providing the survivor annuity is recalculated, however, at 10 percent. It is easy to see that in the course of a few years the military retiree will be paying considerably more for the same survivor coverage afforded his civil service counterpart.

As a result, we are including a technical amendment to title 10 to assure that cost-of-living increases for military survivor benefits are computed in the same manner as that used for civil service retirees. This was our original intent when the survivor benefit plan was enacted in 1972 and I am confident we can clarify the situation by the language incorporated in this bill.

To recap, the legislation we have introduced is the portion of H.R. 14773 deleted by the Senate in the final, hectic preadjournment days and a technical amendment to clarify the method for calculating cost-of-living increases. We are not breaking new ground legislatively, but rather tying up the loose ends. Those Members who were here in the last session will recall the long series of suspension bills which we considered on September 20 and 21 and the massive number which went down to defeat, as the House critically eyed each suspension. H.R. 14773 was overwhelmingly affirmed by a 379 to 6 vote. Part of the bill was subsequently agreed to by the Senate and enacted as Public Law 94–496. The facts have not changed since last September.

In fact, the need for action becomes more critical with each new military retiree who does not elect survivor benefit plan coverage because of the full offset of social security benefits. I am hopeful that we will be able to get Armed Services Committee and full House approval in the early days of the 95th Congress. The costs of this legislation are small, but the benefits to the individual, military family and to the morale of our Armed Forces are great indeed.

There are several other survivor benefit plan issues to which I hope the Armed Services Committee will devote considerable time and attention later this year, specifically the reopening of participation in the survivor benefit plan to those who declined to elect coverage initially because of its serious shortcomings and the provision of more adequate benefits to widows whose husbands died before the survivor benefit plan went into operation. Initially, I urge the House to reaffirm its nearly unanimous passage of H.R. 14773 last September 20 by approving the remaining sections of the bill, as introduced Tuesday, expeditiously. This will complete the work we began with H.R. 14773 by bringing the military survivor benefit plan into conformity with the civil service system, as Congress originally intended.

NATALIE "TONI" KIMMEL

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. WAXMAN. Mr. Speaker, an extraordinary person, Natalie "Toni" Kimmel, will be honored on the occasion of her installation for a sixth term as president of the Studio City Democratic Club. The occasion coincides with the 25th anniversary of this club, which is and has been since its inception, a strong link in the Democratic Party structure in California. Toni's arrival in California 25 years ago was fortunate for the newly formed Democratic Club, her energetic activities through the years have involved her in many club offices.

Toni and her husband, Jess Kimmel, were involved with the theatre. Before the arrival of her three children, Tina, Peter and Kathy, Toni was a singer and actress. Jess, a producer and director on Broadway, became a pioneer in TV. With the death of her husband, Toni became an agent and casting director—but, even with the necessity of working and raising her family, she found time and energy to support the causes she believes in. Her contributions to her community, her State, and to the Democratic Party, have never been sufficiently acknowledged. Toni is a mover and a shaker who becomes totally involved in the organizations and people she helps with her strength, she is creative and imaginative and it is an honor to have a woman of her caliber in our midst. Always involved, totally committed, Toni Kimmel richly deserves the recognition which I ask the Members to join me in offering her, and to note the occasion of Toni's accession to the presidency of the Studio City Democratic Club for the sixth time, at a banquet to be held on January 15, 1977, celebrating that club's silver jubilee.

PLAIN TALK ON FARM RESERVES

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. MICHEL. Mr. Speaker, the Princeton, Ill., Bureau County Record recently published remarks made by former Secretary of Agriculture Earl Butz on the subject of farm reserves. As the Record points out:

Secretary Butz' plain truths are worthy of a hearing by all policy makers in government. . . .

As one who has long favored reliance on private enterprise in agriculture, instead of what Secretary Butz calls "Big Daddy" Government intervention, I want to take this opportunity to bring his refreshing remarks to your attention.

At this time I therefore request permission to insert into the RECORD "Our Opinion: Plain Talk on Farm Reserves" from the Bureau County Record, December 14, 1976:

OUR OPINION: PLAIN TALK ON FARM RESERVES

Dr. Earl L. Butz, former secretary of agriculture, spoke at the recent American Bankers association Agriculture Credit conference in New Orleans.

Dr. Butz' analysis of the current farm policy, along with his criticisms of policies of the past and his warning to those who would direct agricultural policy toward the conditions that existed prior to encouragement of full production appears to us an accurate picture. We endorse the philosophy expressed in the following excerpts from the former secretary's address to the banking group at New Orleans. He said:

With the government no longer competing against farmers, production records of U.S. farmers during the past few years have been phenomenal.

There is a great deal of agitation these days to get government back into the "strategic reserve" position. Some people just have short memories. We were in that position for 40 years, except for war-time intervals. But, in those days we didn't call them reserves. We called them surpluses. Regardless of what we call them government-owned commodities have the same negative impact on farm prices—and on incentives to increase production.

Once we quit trying to have "Big Daddy" run American agriculture from Washington, farmers moved quickly to demonstrate their superior managerial capacity and initiative.

In 1966, 1967, and 1968, farmers harvested an average annual wheat crop of 1.4 billion bushels. The three-year average for corn was 4.5 billion bushels. For cotton, the average annual productions was 9.3 million bales.

For the three-year period 1974, 1975, and 1976, the average annual production of wheat was 2.0 billion bushels, for corn 5.4 billion bushels, and for cotton 10.0 million bales. And bear in mind that this includes the drouth year of 1974.

This policy of abundant production means reasonably-priced food for American consumers. Any production plant, whether it is a farm, or a factory, or a foundry, has a higher unit cost of production when operated at only a fractional part of capacity. The American farm is no exception. The farm's lowest unit cost comes when the farm is producing fully. This opportunity is available under farm policy.

All-out American agricultural production requires export markets to help utilize the abundance. Otherwise, U.S. production would have to be cut back, which would lead to higher production costs and higher food prices. The average American family today gets food for 17 per cent of take-home pay. This compares with 22 per cent 25 years ago—a time when take-home pay was at a much lower level than now. Our positive food policy allows Americans to eat better than any other people in the world.

Our food policy of plenty makes it possible to expand federal assistance to low income persons throughout the United States.

The cost of child nutrition programs, including the National School Lunch and School Breakfast programs, now runs more than $2 billion each year. Over 25 million youngsters receive subsidized meals or milk under USDA child nutrition programs.

Shipments of food overseas under concessional terms continue at a lofty level. On top of this, our agricultural exports have risen from $5.7 billion in the late 1960's to over $22 billion this year.

The point is that none of these achievements would have been possible under a system of curtailment.

Now, let's take a hard look headon at this erroneous notion that the United States has a weak reserve system. We have the strongest reserve system we've ever had. Our reserves are in the hands of farmers—they're owned by country elevators—they're controlled by the trade—they're not piled up in government-owned steel bins somewhere in the Midwest.

Let's put to rest, once and for all, the mistaken idea that consumers are threatened because farmers won't sell their commodities. Farmers didn't produce wheat and corn and soybeans just to store and look at them. They're for sale. I've seen no bread shelf empty because farmers wouldn't sell wheat. I've seen no ships idle in ports because wheat, or other grain, was not available to be loaded.

We have a wonderful mechanism in America that allows us to get wheat when we need it. It's called price, and if wheat does not seem to be coming to market fast enough, just put another quarter-a-bushel on the price and watch it come out of the bins.

A lot of our U.S. grain is fed to livestock to make more desirable steaks and roasts for America's dinner table. Large numbers of cattle are in the nation's feedlots right now being finished for the market. We have an estimated year's food reserve for America on the hoof—in barnyards and feedlots, in pastures, and on the range.

As for international reserves, it's quite true that the world doesn't need a better system of international grain reserves. For decades, nations of the world let the United States and Canada carry most of the grain reserves. However, these two countries didn't carry these reserves as the result of any carefully thought out plan or agreement. We did it as the embarrassing result of an ill-conceived farm policy. We did our dead level best not to hold farm commodities as a reserve.

Two years ago, at the World Wheat council in London, the United States proposed international guidelines on food reserves, whereby each country would predetermine its own method of reserve accumulation and management.

Other nations have been slow to adopt these recommendations. Many still expect the United States and Canada will continue to bear the lion's share of reserves.

Such an attitude is unrealistic and completely behind the times. It's high time that

major food purchasing nations assume some responsibility for their own needs, including reserves. The best and most efficient way to do this is through the market system. But, of course, as long as other nations believe American taxpayers will provide the reserves they need, there is no incentive for them to assume the responsibility for themselves.

The market system is based on a philosophy of free enterprise profit. Only as farmers see a chance for profit will they continue to produce the abundance which has made American agriculture the envy of the world. This lesson has not yet been learned by agriculture in some social and economic and political systems.

Too many people seem to believe that world food conferences produce food, or that the Department of Agriculture produces food, or even that political platforms or national conventions produce food.

The plain truth is that only farmers produce food, and they do it only when they have the incentive and the managerial freedom to achieve their individual economic goals.

Secretary Butz' plain truths are worthy of a hearing by all policy makers in government and private enterprise and even by individual citizens who have been reading and hearing myths about agricultural production and the price of food for so long they have become completely misled.

TENTH CONGRESSIONAL DISTRICT NEWSLETTER AND OFFICE FUNDS

HON. ABNER J. MIKVA

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. MIKVA. Mr. Speaker, the following is a report of the receipts and expenditures of the 10th Congressional District newsletter fund:

Tenth Congressional District newsletter fund report, July 1, 1976, to December 31, 1976

Balance: July 1, 1976	$266.67
Receipts:	
Contribution from Citizens for Mikva	13,750.00
Total receipts	13,750.00
Expenditures:	
Printing and production	14,003.69
Total expenditures	14,003.69
Balance Dec. 31, 1976	12.98

Mr. Speaker, the following is a report of the receipts and expenditures of the 10th District office fund, a fund used exclusively to cover nonpolitical expenses in connection with my congressional office:

The Congressional District office fund report, July 1, 1976, to December 31, 1976

Balance: July 1, 1976	$78.74
Receipts:	
Contribution from Citizens for Mikva	600.00
Total receipts	600.00
Expenditures:	
Petty cash	60.00
Subscriptions	398.96
Memberships	53.50
Office supplies	49.10
Miscellaneous	59.75
Total expenditures	621.31
Balance Dec. 31, 1976	57.43

A TASK FORCE TO STUDY REAL PROPERTY TAXES

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. GILMAN. Mr. Speaker, near the conclusion of the 94th Congress, I introduced for study purposes, H.R. 15694, proposing the creation of a task force on the taxation of real property by State and local governments, to study and evaluate ways to help State and local governments reduce their dependence on real property taxation and to find alternative revenues to support schools, social service programs, public works projects, fire and police protection, and other costly governmental programs demanded by the public.

Mr. Speaker, to help alleviate the crushing real property tax burdens on low- middle- and fixed-income taxpayers, who are paying more than their fair share of taxes for these services, I am today reintroducing this legislation, cosponsored by 19 of my colleagues. No longer can our taxpayers absorb the crushing real property taxes imposed by the plethora of government programs and services.

Real estate taxes for the support of school and local government services have reached alarming proportions. In the last 6 years, these taxes, in my congressional district in Orange County, N.Y., have soared from nearly $50 million to well over $90 million. Moreover, it is not uncommon for a taxpayer in my district to pay real estate taxes of $2,600 on a $5,200 home of which approximately $1,500 is allocated to the local school district. For fiscal year 1975, the national average per capita real estate tax was $241.60, while the per capita real property tax paid by New York State taxpayers was $368.72, establishing New York as the fourth most expensive State for real property taxpayers—exceeded only by Massachusetts, New Jersey, and California. In many communities, particularly in the States of New York, New Jersey, Ohio, and Oregon, taxpayers have refused to vote tax-rate increases to meet operational costs of local schools. Some of my hard pressed constituents have advised me that they plan to sell their homes rather than pay exorbitant real estate taxes; others have resorted to seeking "mail-order ministries" in order to achieve a tax exempt status for their alleged "parish house," thereby imposing unfair tax burdens on the nonordained citizens.

Mr. Speaker, the message is clear and urgent. Our Nation's taxpayers have reached the limits of their ability to absorb astronomical real State taxes, runaway welfare expenditures, the costs of escalating social service programs, soaring utility bills, growing Federal and State income taxes, and substantial State and municipal sales taxes. They are being crushed by the high costs of living in an economy already strained by the high rate of inflation and unemployment. For more background, I refer my colleagues to my detailed CONGRESSIONAL RECORD statements of September 23 and 27, 1976, pages 32276–32277 and 32794–32795.

Under my proposal, a 24-member task force appointed by the President and the congressional leadership, composed of Federal, State, and local governmental officials, members of the academic community and groups concerned with real property taxation would study and evaluate, but not be limited to, the following critical areas:

Waiver of the Federal Government's immunity to State and local taxation;

Federal grant-in-aid and loan programs to State and local governments;

Utilization of alternative forms of revenues;

Redistribution of State and local government taxation;

Consolidation of political subdivisions and other taxing districts in order to more equitably distribute the tax burdens;

The tax burdens of persons and organizations with regard to the income produced by their real property; and

Reduction of real property taxes through Federal tax relief, real property tax exemptions, and the taxation of property owned by tax-exempt persons and organizations.

The Real Property Task Force would be required to submit its report, findings, and recommendations within 1 year after appointment to the President and to the Congress.

Mr. Speaker, in the interest of alleviating the onerous tax burden on our homeowners and in order to reduce the dependence of State and local governments on real property taxation, I am inserting at this point in the RECORD the complete text of my bill and would welcome my colleagues support of this legislation which so vitally affects all of our congressional districts:

H.R. —

A bill to establish a task force to study and evaluate the taxation of real property by State and local governments, the effects of such taxation on certain taxpayers, and the feasibility of Federal taxation and other policies designed to reduce the dependence of State and local governments on such taxation

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TASK FORCE ON THE TAXATION OF REAL PROPERTY BY STATE AND LOCAL GOVERNMENTS

SECTION 1. (a) There is established a Task Force on the Taxation of Real Property by State and Local Governments (hereinafter in this Act referred to as the "Task Force") which shall consist of twenty-four members who shall be appointed in accordance with this section.

(b)(1) The President shall appoint as members of the Task Force four individuals who are officials of the executive branch of the Federal Government.

(2) The majority leader of the Senate, after consultation with the minority leader of the Senate, shall appoint four Senators as members of the Task Force. No more than two of such four Senators shall be affiliated with the same political party.

(3) The Speaker of the House of Representatives, after consultation with the minority leader of the House of Representatives, shall appoint four Representatives as members of the Task Force. No more than

two of such four Representatives shall be affiliated with the political party.

(c)(1) The President, the majority leader of the Senate, and the Speaker of the House of Representatives, after consultation among themselves, shall each appoint as members of the Task Force four individuals not officers or employees of the United States who, because of their knowledge, expertise, diversity of experience, and disinguished service in their professions, are particularly qualified for service on the Task Force.

(2) In making appointments under this subsection, the President, majority leader of the Senate, and the Speaker of the House of Representatives shall take care that the following interested parties are adequately represented by the members so appointed:

(A) State and local governments.

(B) Members of the academic community concerned with the taxation of real property.

(C) Citizens groups and associations concerned with the taxation of real property.

(3) Appointments shall be made pursuant to this subsection without regard to political affiliation.

(d) The members of the Task Force—

(1) shall be appointed within ninety days after the date of enactment of this Act; and

(2) shall be appointed for the life of the Task Force.

(e) One of the individuals appointed to the Task Force by the President shall be designated by the President as Chairperson of the Task Force. Such individual shall serve as Chairperson for the life of the Task Force.

(f) A vacancy on the Task Force shall be filled in the manner in which the original appointment was made.

(g) Thirteen members of the Task Force shall constitute a quorum, but a lesser number may hold hearings.

(h) The Task Force shall meet at the call of the Chairperson or whenever thirteen members present a petition to the Chairperson asking for a meeting of the Task Force.

DUTIES OF THE TASK FORCE

SEC. 2. (a) The Task Force shall study and evaluate—

(1) the taxation of real property by State and local governments;

(2) the effects of such taxation on middle income and fixed income taxpayers; and

(3) the feasibility of Federal taxation and other policies designed to reduce the dependence of State and local governments on such taxation.

(b) The study and evaluation described in subsection (a) shall include, but not be limited to, the following:

(1) An examination of means which would allow State and local governments to reduce real property taxes—

(A) through the waiver by the United States of the immunity of Federal instrumentalities to such taxes;

(B) through Federal grants-in-aid and loans to State and local governments to assist such governments in providing services which otherwise would be supported by real property taxes;

(C) through the utilization of other forms of taxation in place of real property taxation;

(D) through an analysis by State and local governments of their overall taxation policies and of ways to redistribute tax burdens; and

(E) through the consolidation of local political subdivisions and other taxing districts so that tax burdens may be equitably distributed.

(2) An analysis of the tax burdens of persons and organizations with respect to income produced by the real property owned by any such person or organization.

(3) An examination of means to reduce the real property taxes of fixed and middle income taxpayers and other individuals subject to heavy real property tax burdens—

(A) through the granting of Federal tax relief to such taxpayers;

(B) through the granting of exemptions from real property taxes to such taxpayers; and

(C) through the taxation of real property owned by persons and organizations presently exempt from such taxation, including State and local governments and charitable, nonprofit, educational, religious, humanitarian, and philanthropic organizations.

POWERS OF THE TASK FORCE

SEC. 3. (a) The Task Force, or, on the authorization of the Task Force, any subcommittee or members thereof, may, for the purpose of carrying out the provisions of this Act, issue such subpenas requiring the attendance and testimony of witnesses, hold such hearings, take such testimony, receive such evidence, take such oaths, and sit and act at such times and places as the Task Force may deem appropriate and may administer oaths or affirmations to witnesses appearing before the Task Force or any subcommittee or members thereof.

(b) Subject to such rules and regulations as may be adopted by the Task Force, the Chairperson shall have the power to—

(1) appoint and fix the compensation of an executive director, and such additional personnel as he deems advisable, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, except that the executive director may not receive pay in excess of the maximum annual rate of basic pay in effect for grade GS–18 of the General Schedule under section 5332 of such title and any additional personnel may not receive pay in excess of the maximum annual rate of basic pay in effect for grade GS–15 of such General Schedule, and

(2) obtain temporary and intermittent services of experts and consultants in accordance with the provisions of section 3109 of title 5, United States Code.

(c) The Task Force is authorized to negotiate and enter into contracts with organizations, institutions, and individuals to carry out such studies, surveys, or research and prepare such reports as the Task Force determines are necessary in order to carry out its duties.

COOPERATION OF OTHER FEDERAL AGENCIES

SEC. 4. (a) Each department, agency, and instrumentality of the Federal Government is authorized and directed to furnish to the Task Force, upon request made by the Chairperson, and to the extent permitted by law, such data, reports, and other information as the Task Force deems necessary to carry out its functions under this Act. All such requests shall be made by the Chairperson of the Task Force.

(b) The head of each department or agency of the Federal Government is authorized to provide to the Task Force such services as the Task Force requests on such basis, reimbursable and otherwise, as may be agreed between the department or agency and the Chairperson of the Task Force.

(c) The Task Force may accept, use, and dispose of any gift or donation of services or property.

(d) The Task Force may use the United States mails in the same manner and upon the same conditions as any other Federal agency.

(e) The Administrator of General Services shall provide to the Task Force on a reimbursable basis such administrative support services as the Task Force may request.

PAY AND TRAVEL EXPENSES

SEC. 5. (a) Except as provided in subsection (b), members of the Task Force shall serve without pay.

(b) While away from their homes or regular places of business in the performance of services for the Task Force, members of the Task Force shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under subchapter I of chapter 57 of the United tates Code.

FINAL REPORT

SEC. 6. The Task Force shall transmit to the President and the Congress not later than the date one year after the first day on which all members of the Task Force have been appointed, a final report containing a detailed statement of the findings and conclusions of the Task Force, together with such recommendations as it deems advisable (including recommendations for legislation).

TERMINATION

SEC. 7. On the ninetieth day after the date of submission of its final report to the President, the Task Force shall cease to exist.

CIA SAYS REDS SEEK MILITARY SUPERIORITY

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. McDONALD. Mr. Speaker, the Central Intelligence Agency has finally discovered what has been apparent to many people for some time—namely, that the Soviet Union seeks superiority over the United States in military matters—not parity as Mr. McNamara used to wish us to believe. Of course, the usual pundits in the press are saying that this is just a gambit of the outgoing Ford administration and the Department of Defense to keep the defense budget high, but the facts have been there for anyone to see for years. All studies confirm that except in one or two categories, we are behind the Soviet Union in any type of calculation that can be made. The story reporting the CIA's findings as it appeared in the Washington Star for December 26, 1976, follows:

CIA SAYS REDS SEEK MILITARY SUPERIORITY: ANNUAL INTELLIGENCE ESTIMATE CALLED VERY GRIM

(By David Binder)

President-elect Jimmy Carter will receive an intelligence estimate of long-range Soviet strategic intentions next month that raises the question whether the Russians are shifting their objectives from rough parity with United States military forces to superiority.

In reporting this, high-ranking officials of the Central Intelligence Agency said their annual so-called national estimate of Soviet strategic objectives over the next 10 years, just completed, was more somber than any in more than a decade.

A top-level military intelligence officer who has seen the estimate commented: "It was more than somber—it was very grim. It flatly states the judgment that the Soviet Union is seeking superiority over United States forces. The flat judgment that that is the aim of the Soviet Union is a majority view in the estimate. The questions begin on when they will achieve it."

Previous national estimates of Soviet aims—the supreme products of the intelligence community since 1950—had concluded that the objective was rough parity with United States strategic capabilities.

"There are some worrisome signs," George

Bush, director of Central Intelligence, said in an interview in characterizing the latest estimate, "and the viewpoints, interpretations and comments on these will be adequately reflected in the estimate."

He said the shift in assessment developed from evidence gathered in the past year and from new interpretations of older evidence that had resulted from "a competitive analysis" in which, for the first time, a team of outsiders analyzed and challenged estimates prepared by the regular intelligence community. As a result some of the governmental analysts changed their asssesments.

While Bush declined to discuss the substance of the estimate, it can be authoritatively reported that the worrisome signs included newly developed guided missiles, a vast program of underground shelters and a continuing buildup of air defenses.

He acknowledged that the 1976 estimate had been prepared amid controversy in the intelligence community, partly induced by the deliberate introduction of the team of outsiders, who were supplied with the same raw material as the estimate team headed by Howard Stoertz, the CIA's national intelligence officer on the Soviet Union.

Bush, who said the final estimate contained "a full expostulation of the views of the principals," asserted that he had promised to uphold the right of dissent at the outset of his tenure 11 months ago. "I feel I have made good on that," he said.

There have always been officials in the intelligence community who took a grim view of Soviet strategic objectives, but until this year, according to insiders, they constituted a small minority. In the interview Bush spoke of changed perceptions. Another high-ranking CIA official who participated in the latest estimate asserted that pessimistic assessments were being heard even from analysts who have taken a rosier attitude toward Soviet goals.

"The consensus is breaking up," the source continued. "Maybe it will be a different consensus next year. A great many analysts are disturbed increasingly by what they see on the Soviet side—more and more Soviet weapons programs. The Soviets are developing across the board. That is bothering people. ICBMs everywhere you look, a continual steady program."

The long-range estimate provides guidance for the size and shape of the U.S. defense budget, the government's policy approach to East-West relations, including strategic arms negotiations, civil defense planning and, ultimately, the entire concept of strategic deterrence, based for two decades on nuclear-tipped intercontinental missiles and antimissile defenses.

The estimate also influences the annual "secret posture statement" sent to Congress by the secretary of defense as guidance for the protection of the United States.

Months of research, collation of photo-reconnaissance and monitoring of signals and of Soviet documents underlie the estimate. It is summarized, dissented against and reviewed at ever-higher levels and is finally argued out before the President's Foreign Intelligence Advisory Board, comprising the heads of the intelligence agencies and intelligence-oriented departments.

The more somber view represented—"more somber" being the phraseology of the CIA—developed in an unusual fashion, according to a number of participants. They said it came about primarily through continuing dissents by a long-term maverick in the intelligence community, Maj. Gen. George J. Keegan Jr., whose voice was strengthened this year by like-minded outsiders.

Keegan, who will retire Saturday as Air Force chief of intelligence, describes himself as "the eye of controversy" in the intelligence community and has been contesting the estimates of Soviet intentions for 22 years.

On the basis of photo-reconnaissance of construction of underground shelters for protection against nuclear attack and new missile systems, Keegan became convinced that the Soviet Union was preparing for offensive war against the United States. This prompted him to oppose a 1972 treaty with the Russians restricting antiballistic-missile programs and another 1972 treaty curbing offensive nuclear weapons.

In 1974 his dissents to the national estimate relating to the significance of the Soviet civil defense program and new guided missiles provoked such a storm that he was called to the White House to make his case before the advisory board. Out of those dissents and others a belief grew among members of the board that the annual estimates of Soviet capacities and aims might be too soft.

Normally the president is screened from debates on intelligence estimates, which often develop into impassioned and even furious exchanges.

The dissents of Keegan and like-minded officials raised doubts about such critical questions as the level of Soviet defense spending, so that the 16-member presidential board began suggesting several years ago that the estimate of Soviet intentions include the views of outsiders. This year President Ford accepted the proposal by the board, which is empowered to review and evaluate foreign intelligence.

Last June Bush and William G. Hyland, Ford's deputy assistant for national security, selected a panel of seven outsiders to join, experimentally, in drafting the next long-range estimate. The conditions were that the outsiders be mutually agreeable to the advisory board and to Bush and that they hold more pessimistic views of Soviet plans than those entertained by the advocates of the rough parity thesis.

There is a prospect that the Carter administration might look further into the somber side of the estimates because Zbigniew Brzezinski, the president-elect's designated national security adviser, recently received a briefing on Soviet military programs from Keegan.

The outsiders' team is expected to submit a separate proposal to the Foreign Intelligence Advisory Board late this month recommending that the estimates procedure be revised and that outsiders be brought into the process.

Bush was said to feel that the exercise had been useful, although he regretted publicity about it.

PROF. HAROLD NORRIS: LAWYER, CITIZEN ACTIVIST, POET

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. CONYERS. Mr. Speaker, wherever people's rights have been in danger Prof. Harold Norris of the Detroit College of Law has been present in his triple role of lawyer, citizen activist, and poet. The pages of his recently published volume of poems, "You Are This Nation", Harlo Press, Detroit, 1976, record his public involvements since his days at the University of Michigan and Columbia University Law School. Poems about labor organizing in the 1930's and World War II are mingled with ones concerning the civil rights movement and urban affairs.

Throughout his distinguished career Professor Norris has remained an apostle of the democratic credo, and nowhere in the book is his sentiment better echoed than in a passage from his poem, "Rosa Parks," dedicted to the great woman who inspired the Montgomery Bus Boycott:

I will walk.
My will
is Responsible.
I am this nation.
This nation is what I do.

Professor Norris has taught and written on constitutional and criminal law, and has been a leading citizen in our Detroit community. Past chairman of the Detroit chapter of the American Civil Liberties Union, an elected delegate to the Michigan Constitutional Convention, he helped draft its bill of rights and a provision barring racial discrimination. I wish to commend to my colleagues both Professor Norris' volume of poetry and his forthcoming book of essays, "Law, Lawyers and the Constitution."

FARRELL ON GOLDEN CALVES

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. COLLINS of Texas. Mr. Speaker, Congressmen would learn more and Congress would thereby legislate better if we spent more time in our home districts. And a good place to listen is in the church house.

One of America's greatest preachers is Dr. Leighton Farrell of the Highland Park Methodist Church of Dallas, Tex.

Recently, Dr. Farrell preached on the Old Testament's story of the golden calf, and his message reminded me of how this calf is in America today. And I think he is so right. Many folks think Washington, D.C., is the golden calf, and they can get everything for nothing.

Let me quote you some key sections from this inspiring sermon by Dr. Farrell:

To give you a brief background to the story, Moses has rescued the children of Israel from the land of Egypt, and he is now leading them to the Promised Land, and while he is on the way, he has stopped to go to the mountain to receive the Ten Commandments from the Lord. While he is gone, he has left his brother Aaron in charge of the children of Israel. And Aaron said unto them: Break off the golden earrings which are in the ears of your wives, of your sons, and of your daughters, and bring them unto me. And he received them at their hand, and fashioned it with a graving tool, after had made it a molten calf; and they said; These by thy gods, O Israel.

The story is really quite simple. Moses has gone to the mountain to receive the Commandments as to how his people shall live. The people become restless because their leader, in whom they had placed their trust, is now out of their sight. And so they said to Aaron, the second in command: "Let us make a god we can see; let us make a god that shall lead us on, because this man Moses, who has led us thus far, isn't here anymore." And so they made an idol, a Golden Calf, if you will. They built an altar

before it, and they bowed down and they worshipped that which they had made. Moses had led them thus far by God's promise out of the land of Egypt on toward the Promised Land, but once out of sight, out of mind—and now they made and worshipped the Golden Calf.

And so the question I would like to raise this morning in regard to this Old Testament story is a simple question without an answer. The question is: Why did the Israelites make and worship the Golden Calf? Perhaps, in seeing that question, and trying to answer it, we can better understand ourselves in our contemporary society, and our religious beliefs and understandings.

The first answer that I see in the Scriptures as to why the Israelites worshipped the Golden Calf is this: I believe they worshipped the Golden Calf because they wanted to worship a god they could see.

I had an acquaintance of many years who expressed verbally that which many of us express silently. On one occasion we were having a conversation and he said: "I really don't understand what you folk in religion are saying about God. I can't see God, I can't hear God, I can't touch God. Nobody can prove to me that there is a God." Yet, he said, the things I believe in I can see, and hear, and touch and taste: my house, and my car, and my money.

You know, we're an interesting people. We point our fingers at the heathens. We laugh at their superstitions as they worship the idols they have carved for themselves. But it seems to me that about the only difference in their idols and our graven images is that graven images are made out of chrome, and steel, and iron.

And instead of gold, our idols are made of paper and are called stocks, bonds, and money—but we worship them just the same and we feel that we cannot live without them. We have made our Golden Image, and we have made our Golden Calf, but we refuse to see this.

Why did the Israelites worship the Golden Calf? Secondly, I would say that they wanted a God whose standards were their standards. Now if I make my own God, reason tells me that the God that I make cannot possibly have any higher standards than my standards. I cannot conceive of higher standards than those which I myself have known.

The children of Israel didn't want the Ten Commandments any more than you and I want the Ten Commandments today. We don't want the Ten Commandments. We don't want somebody else telling us how to live. So therefore we have thrown out the Ten Commandments of God and we have decided that we are competent to set the standards of the generation in which we live.

We are a nation which has chosen to set its own standards; that Golden Calf doesn't make standards for you; you set the standards for the Golden Calf.

You see, we live by what is expedient. Much has been said about our age needing a new morality. Someone said that we need not live under the old laws of God and that we should build ourselves some new idols, some new morality, some new Golden Calves. Somehow, I'm a little suspicious about the claim that our needs have changed so dramatically in this generation that an entirely new ethic is needed every time a new group of folk comes along.

Do we feel that God demands more from us than we are willing to give? Do we not feel that God demands too much time and too much talent and too much money from us?

I would say that we are a people who would like a God who demands no repentance and who troubles no hearts.

Despite our higher standard of living, we have more suicides, more crime, and more unhappiness today than at any other time in the history of our nation. Now, if the Golden Calf could make us happy, if the Golden Calf could give life meaning, if the Golden Calf could lift us out of self-centeredness and give us a love for others, it looks like we already would have been well on the way to Utopia.

And the truth of the matter is, we don't yet have a brave new world and we don't yet have a heaven on earth. What we have is the same old selfish, person-centered world we've always had—with its problems multiplied geometrically.

These are just a few highlights of the inspiring sermon of Dr. Leighton Farrell. Read Exodus, 32d chapter. The gold images of Washington cannot provide the heart for America.

HOME HEALTH CARE STANDARDS

HON. WILLIAM S. COHEN

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. COHEN. Mr. Speaker, earlier this week I reintroduced legislation developed last session which will insure quality care in and effective utilization of the home health programs of the Federal Government.

Few would now dispute the necessity or the desirability of home health services. However, Congress and the administration have been reluctant to make these services available without assurance that the public dollars needed to support such care would be well spent. My bill, unlike other home health legislation, proposed last session, addresses this problem from a comprehensive and positive approach—one that sets standards for quality care before these services are liberalized and the Government is forced to intervene in the crisis situations characterized by recent instances of fraud and abuse within the nursing home industry and other Federal health care programs.

Home health care, as an alternative to institutional care, is necessary if we are to provide for the full range of the elderly's health care needs. With the dramatic rise in medical care prices over the last few years, alternative mechanisms of health care delivery have been investigated. GAO recently completed a review of 20 studies dealing with the cost of home care, and 19 of those studies presented data which supports the proposition that home health care is less expensive at lower levels of impairment than institutionalization. Yet, institutionalization continues to monopolize nearly 100 percent of the Federal long-term-care dollar.

The cost of this unnecessary care for our elderly citizens is not only enormous in dollars and cents, but it is even more devastating to the dignity and mental well-being of the patients themselves. As a member of the House Select Committee on Aging, I have participated in hearings where elderly citizens have made it quite clear that they would prefer to remain in their own homes.

The need for this legislation is best illustrated by reviewing the home health market as it now exists. Studies by experts indicate that between 15 and 40 percent of the Nation's 1 million nursing home patients remain institutionalized, because of the lack of alternative forms of care.

In addition, one out of six older Americans who are not in institutions need direct social and health services to manage their own affairs within their own homes and communities. In short, the provision of medical/social services designed to help elderly patients remain independent in their own homes fulfills the regent wishes of older people themselves and is less expensive than nursing home care.

In response to the growing demand for home health services, much has transpired in this area since I first introduced the Home Health Standards Act last summer. Certificate-of-need regulations, complete except for the signature of the Secretary of Health, Education, and Welfare, recommend that home health agencies be included with other health facilities. HEW's own hearings this fall revealed the need for a more coherent Federal policy on home health care, and less concern over the issue of agency sponsorship if quality standards and appropriate cost controls were in force. In the interim, regulations were implemented which, on the one hand, advanced the cause of home health care by removing some of the more restrictive criteria for patient participation, but on the other hand, hindered this progress, because the liberalization applied only to the medicaid home health program, and by not including all Federal home health programs, further fragments and confuses these benefits.

In my judgment, recent efforts by the administration do not go far enough toward changing current policies, which continue to restrict the availability of Federal home health care. For example, the number of home health visits allowed a patient is still arbitrarily limited with no effort to make that determination on the basis of individual need. Likewise, many providers of these services are arbitrarily prevented from even participating in Federal home health programs on the basis of provider sponsorship rather than the quality of service they offer. These barriers encourage the overuse of institutional care. Clearly, present controls are misdirected both in terms of patient need and suitable care.

In order to assure access to home health care, it is necessary to provide appropriate incentives to encourage its growth and development. As I have indicated, many bills were introduced last session, and I suspect will soon be reintroduced, which would remove the present restrictions on the availability of home health benefits. Nevertheless, greater stimulation of the home health industry will not necessarily provide better care if we fail to provide a standard to identify agencies with programs that warrant public and professional confidence and to encourage those agencies to seek higher levels of excellence.

My bill accomplishes this task by creating a special Commission on Quality Assurance and Utilization Control in

Home Health Care. The Commission would be composed of individuals familiar with home health programs, both as providers and consumers; individuals familiar with the processes of accreditation; and State and Federal representatives. It would also be free to call upon other experts in the home health field for advice and recommendations to assure that all interested parties are represented.

The committee would have 1 year to conduct a full study of the present issues relating to quality care, including training requirements of providers, methods of peer review, establishment of ombudsmen, proficiency testing of providers, the need for onsite review and certificates of need, eligibility requirements for recipients, Federal and State roles as a part of the broader home health care delivery system, the scope of benefits, and enforcement. The legislation further provides a procedure whereby the recommendations to the Commission will speedily come into force unless they are disapproved by either House of Congress.

This legislation, as a forerunner to the sorely needed legislation to expand these necessary services, is an essential step in the evolution of a more uniform coordinated, and rational approach to the Federal financing of home health care. If the Government uses tax funds to encourage a system of home health care, it clearly has the responsibility to provide adequate regulation of the delivery system according to a set of stated, enforceable standards.

At this point, I am inserting a section-by-section analysis of my bill prepared by the Congressional Research Service and a recent article on home health care appearing in the U.S. News & World Report citing the need for national standards for the benefit of my colleagues:

ANALYSIS

Section 1: This section would amend the Medicare program (Title 18 of the Social Security Act), the Medicaid program (Title 19 of the Social Security Act), and the program of Grants to States for Social Services (Title 20 of the Social Security Act) to make all home health agencies participating under these programs and all home health services provided under these programs subject to any new and additional regulations issued by the Secretary of Health, Education, and Welfare which result from the plan and recommendations of the Commission on Quality Assurance and Utilization Control in Home Health Care established by H.R. 15257.

Section 2(a). This section amends Part C of Title 18 of the Social Security Act by adding a new section 1880, entitled "Special Commission on Quality Assurance and Utilization Control in Home Health Care."

Section 2(a)—new subsection 1880(a). This subsection establishes a new commission which is to be known as the "Special Commission on Quality Assurance and Utilization Control in Home Health Care," under the Medicare program.

Section 2(a)—new subsection 1880(b). This subsection sets forth the membership of the Commission. The Commission is to consist of 17 members appointed by the Secretary of Health, Education, and Welfare. Five members are to be representatives of professional groups with expertise in accreditation; while three must be recipients of benefits under Title 18, 19, or 20 of the Social Security Act. The remaining nine must include a representative of the Federal Council on Aging, a physician with home health care experience, a third-part payor participating in the Medicare program, a nurse practitioner with home health care experience, a homemaker-home health aide, a physician therapist with home health care experience, a representative of a State survey agency, a nutritionist, and a social worker with experience in home health care. One member of the Commission will be designated as chairman by the Secretary of Health, Education, and Welfare with the advice and consent of the Senate.

This subsection also sets forth procedural rules for the Commission and provides for compensation and travel expenses for Commission members.

Section 2(a)—new subsection 1880(c). This subsection sets forth the functions and duties of the Commission. The Commission is required to study, investigate and review home health care and services provided in the United States by those home health agencies qualified to participate in the programs authorized under Titles 18, 19, or 20 of the Social Security Act, as well as those home health agencies not qualified to participate in these programs. The Commission's study, investigation, and review is to determine:

(A) the need for additional quality assurance and utilization control for home health care and services, and

(B) the manner in which current standards, conditions, and requirements of home health care programs under Titles 18, 19, and 20 of the Social Security Act should be modified in order to provide such additional quality assurance and control, including (but not limited to) those standards, conditions and requirements for (i) training home health providers, (ii) methods of peer review, (iii) methods of utilization control, (iv) methods for evaluation of care by recipients, (v) proficiency testing of home health providers, (vi) on-site review of home health agencies, (vii) certificates of need, (viii) Federal and State arrangements regarding certification, licensure, and enforcement, (ix) recipient eligibility requirements, and (x) scope of benefits.

This subsection also requires the Commission to develop a detailed plan for home health care quality assurance and utilization control based on the results of its study, investigation, and review.

Section 2(a)—new subsection 1880(d). This subsection requires the Commission to submit a report to the Secretary of Health, Education, and Welfare and the Congress within one year after the majority of the members of the Commission are appointed. The report is to contain the plan developed by the Commission under subsection 1880 (c), as well as any related recommendations the Commission might have. The plan must incorporate the modifications to be made with respect to current home health care standards, conditions, and requirements under Titles 18, 19, and 20 of the Social Security Act, and cannot include any limitation based on sponsorship.

This subsection also requires the Secretary of Health, Education, and Welfare, within 90 days after he has received the Commission's plan, to:

(A) issue regulations, as may be necessary, implementing the Commission's plan and carrying out the Commission's recommendations, as long as the plan and recommendations are not in conflict with existing law, and

(B) submit to the appropriate Congressional Committees any of the Commission's recommendations which would require changes in existing law.

Any such regulations issued must be submitted to Congress on the day they are issued. Such regulations will take effect 90 days from that day, unless the House of Representatives or the Senate states objection.

This subsection also specifies that any regulations issued by the Secretary under subsection 1880(d) will apply to Titles 18, 19, and 20 of the Social Security Act and will supersede any existing inconsistent regulations on home health care services and agencies. Once such regulations are in effect, all agencies, organizations, and persons qualifying under the regulations as home health agencies will be considered providers of services under Titles 18, 19, and 20 of the Social Security Act and will be eligible for reimbursement under the Medicare program, the Medicaid program, and the program of Grants to States for Social Services.

This subsection also specifies that any regulations issued under subsection 1880(d) will not take effect if either the House of Representatives or Senate passes a resolution objecting to such regulations within 90 days after they are issued. Revised regulations issued by the Secretary must take into account the objections of the House of Representatives or the Senate and may, therefore, disagree with the Commission's plan and recommendations previously submitted.

Section 2(a)—new subsection 1880(e): This subsection requires the Secretary of Health, Education, and Welfare to furnish the Commission with an executive secretary and with secretarial, clerical, and consultant services as necessary for the Commission to carry out its duties and functions.

This subsection also authorizes the detail of Federal personnel to the Commission to assist the Commission in carrying out its duties. The Secretary of Health, Education, and Welfare is required to approve any Commission request for such personnel.

Section 2(a)—new subsection 1880(f). This section authorizes the Commission and its individual members, to hold hearings, take testimony, and receive evidence.

This subsection also authorizes the Commission to secure information, in connection with its duties and functions, from departments and agencies of the United States and requires heads of such departments and agencies to furnish the Commission with such information.

This subsection also requires the Administrator of General Services to provide the Commission with support services on a reimbursable basis.

Section 2(a)—new subsection 1880(g). This subsection specifies that the Commission will cease to exist on the date that regulations issued under subsection 1880(d) go into effect.

Section 2(a)—new subsection 1880(h). This section authorizes to be appropriated such sums as may be necessary to carry out the purposes of new section 1880 of the Social Security Act.

TREATING PATIENTS IN THEIR HOMES—OFTEN CHEAPER, OFTEN BETTER

In an era of constantly rising medical costs, more and more physicians are turning to this money-saving idea—intensive care at home for many patients rather than long periods of expensive hospitalization.

It isn't a new idea, but in the past few years a growing number of patients and doctors are finding that there are benefits in home care beyond the mere savings in cost.

Take the case of Thomas DiFillippo, 56, a Pennsylvania farmer. Mr. DiFillippo had a heart-valve operation, then developed a severe inflammation of the heart muscle. He faced three months of intensive intravenous drug therapy.

At one time this treatment would have required hospitalization. Instead, Mr. DiFillippo was sent home. For two weeks, a visiting nurse administered the drugs. Then he learned to do it himself.

The total cost for a month was $1,664, compared with $5,000 in a hospital.

WIDESPREAD SERVICES

The National League for Nursing estimates that health workers made 2,640,000 home visits last year. Roughly 2,000 home-care agencies are accredited for Government programs, and more than 450 of the country's 6,000 hospitals now offer home cure to their patients.

Such care in the past five years has been expanded to include intravenous and intramuscular drug therapy, wound dressings, blood counts, chemotherapy, EKG's and kidney dialysis.

The major advantage is cost. Most home-care programs range from $15 to $25 a day. The average hospital rate for a semiprivate room is $152 a day. Studies by the Genesee Region Home Care Association in Rochester, N.Y., and the Blue Cross program in Philadelphia show an average saving of $1,000 per patient.

While most of the health-insurance plans give more complete coverage to hospitalization, home-care benefits are available under medicare, medicaid, workmen's compensation and most Blue Cross plans.

In general, home care includes the regular services of a visiting nurse as well as physical, speech and occupational therapists. Medical supplies, such as drugs, hospital beds, wheel chairs—even a breathing monitor for a baby suspected of having Sudden Infant Death Syndrome—are provided.

Home health aides are also available to walk and bathe the patient, prepare and serve meals, change bed linens and do some laundry and shopping.

PATIENTS WHO BENEFIT

Physicians point out that not all medical problems can be treated at home. However, patients who normally would face long periods of hospitalization, such as those with heart diseases, stroke victims, orthopedic cases and cancer patients, seem to respond well to home care.

In fact, several British studies suggest that heart-attack patients recover better at home than in a hospital.

Cancer patients, more and more, are also turning to home care—in part, a reflection of the growing "death with dignity" movement.

For the elderly, a program such as the Minneapolis Age and Opportunity Center, Inc.—which combines medical treatment with social services including meals, transportation and household help—can mean the difference between living at home or going to a nursing home.

In addition to cost savings, doctors say the psychological advantages are significant. As cardiologist Dr. Frank S. Harrison of the Bryn Mawr Hospital in Bryn Mawr, Pa., puts it: "The patient has a greater sense of well-being, and he learns to take responsibility for his care."

A survey of home-care patients in Milwaukee showed that 84 per cent preferred home care to hospitalization, and 73 per cent of the physicians thought the medical care was as good as that available in the hospital and that the psychological aspects were superior.

Doctors also found that wounds tended to heal faster at home. Food looked and tasted better so that patients got back to their normal eating habits quicker. Home-care patients also tended to move around more—important after surgery—and some physicians believe that fewer sleeping pills are needed at home than in hospitals.

ON THE OTHER HAND

Medical authorities point out, however, that home care is not a panacea and it should not be as substitute for hospitalization when that is needed. Several factors must be considered:

Will the patient's medical condition and personality respond to home care?

Is the home situation adequate for such care and safe for the patient? What about other members of the family?

In a particular community, what kind of home care is available? Is there medical supervision?

Does a person's health insurance adequately cover home care?

In spite of its recent growth, the home-care movement faces serious problems. According to the American Public Health Association, at least 10 to 25 per cent of persons in institutions could live at home if services were available. But a 1975 Government survey found that only half of the communities in the country have appropriate home health agencies. Recent changes in medicare benefits have even caused a decline in the number of home-care patients during the last year.

Another major problem is that there are no national standards for home care and no way to regulate the quality of care given at home, so that the potential for abuse is a serious concern. The Department of Health, Education, and Welfare has conducted hearings into this problem.

Nevertheless, many health officials see home care as one of the most promising ways to reduce soaring medical costs and return to a more humanistic approach to medicine.

DEDICATION OF ETZ JACOB TORAH CENTER AND BANQUET HALL

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. WAXMAN. Mr. Speaker, the Etz Jacob Congregation in Los Angeles, Calif., dedicated its Etz Jacob Torah Center and Banquet Hall on November 20, 1976, as the most recent facility of this oldest Jewish house of worship and center of community activity in the Beverly-Fairfax area.

Etz Jacob Congregation has served the Jewish community fully and well by providing a source for religious, social, and cultural activity, by maintaining a Hebrew school, and by sponsoring many youth groups. The first Boy Scout troop composed of Jewish youngsters in this area is located at the Etz Jacob center. Over a period of years, the congregation has added to its facilities in order to accommodate the rapidly growing Jewish population, providing a new sanctuary in 1958, and now the new Torah center and banquet facility. As a result, the congregation provides even more services, including a federally funded lunch program for the elderly, jointly with the Fairfax Adult School education program.

It is fitting for Members to join with me in memorializing the expansion of the facilities of the Etz Jacob Congregation, which have proved of great value to the community which it serves.

BALANCED ECONOMIC DEVELOPMENT BILL

HON. PHILIP E. RUPPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. RUPPE. Mr. Speaker, today I am introducing legislation designed to provide a system of tax credits to encourage private industry to locate or expand in high unemployment areas of the United States. In my view, this measure is a key ingredient to expanding the job force in northern Michigan as well as other above-average areas of unemployment throughout the Nation.

As I am sure many of my colleagues must realize, many rural and inner city areas of the country have fallen far behind more fortunate regions in terms of total economic development. Furthermore, many of the Federal programs designed to deal with unemployment, economic expansion, and business investment have been particularly targeted toward our large population centers regardless of their economic health.

The recently enacted local public works and capital development program is a case in point. It seems clear to the people of northern Michigan that the LPW program was geared primarily to meeting the immediate needs of large metropolitan areas. In northern Michigan, even though we have several counties with unemployment rates in excess of 12 percent, EDA awarded only 8 grants amounting to $6 million out of a total of more than $150 million allocated to the State of Michigan in the LPW program.

The result is that rural areas like northern Michigan tend to fall behind other regions in terms of reducing unemployment, increasing total business and commercial investment, increasing property values as a basis for local government revenue, and maintaining or increasing population growth.

The simple fact is that private business and industry must be given meaningful incentives to locate new industry and expand jobs in rural areas. This is as true in northern Michigan as I am sure it is in other economically deprived regions.

Mr. Speaker, my proposal would provide that incentive and thereby introduce a new measure of balance to economic development on a nationwide basis. First, my bill would designate various development areas throughout the Nation as eligible for assistance under the legislation. These deprived regions, called "development areas," are political subdivisions outside standard metropolitan statistical areas with total populations under 300,000. The areas in question are further defined by reference to past statutes, such as the Public Works and Economic Development Act of 1965.

The legislation gives private business and industry the needed incentive to locate and expand jobs in these regions by providing a 20-percent tax credit for such investments. Such a percentage, far above that accorded investments in

other areas is, in my view, absolutely essential to lure business and industrial investment into economically deprived regions.

Finally, the proposal defines the types of property and business enterprises which would normally qualify for the 20-percent tax credit envisioned in the plan. In this regard, particular attention is given to manufacturing, recreation and tourism, mineral processing, and pulp and paper processing because of their historic importance in providing lasting jobs to rural areas of the Nation.

There is also a provision in the bill which requires certification by the Secretary of Commerce, according to specifically prescribed guidelines, before a business or industrial investment can qualify for the 20-percent tax credit.

Mr. Speaker, this is legislation which is essential to rescue rural America from the economic doldrums. The fact that its time has come is evidenced by the recent support for a tax credit plan announced by the leadership of the House Ways and Means Committee and President Ford in separate statements dealing with the issue of economic recovery.

The people of northern Michigan and rural America have lived with economic deprivation for decades. The opportunity is now before us to move forward with legislation to correct this deplorable situation and I welcome the support of my colleagues in an effort to secure swift enactment of this important measure.

IN MEMORY OF WILLIAM L. BUTCHER, WESTCHESTER'S FIRST CITIZEN

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. OTTINGER. Mr. Speaker, William L. Butcher was, indeed, Westchester County, N.Y.'s first citizen, not only for his great contributions to the county, but to the State and Nation as well. We will miss him greatly. As the tributes which follow amply relate, he made unique contributions in the fields of banking and transportation on a national level, established the county trust organization—now a region of the Bank of New York, and guided the formation and direction of the Metropolitan Transportation Commission in New York. He was a "one-man chamber of commerce," who did more to attract and keep industry in Westchester than any other person or organization. He was active in virtually every good and charitable cause in his community.

For most people in Westchester, however, Bill Butcher will be remembered for much more than his outstanding achievements. Bill Butcher was a wonderful human being. He cared—about his country, about his State and community, about his family, and about people. Despite an enormous workload, he always had time for the other person's problems. He was genuinely interested and he cared; when you talked with him, it seemed as if he had nothing else to do that day but address himself to your concerns.

Bill was a leading Westchester Republican, but he was greatly above partisanship. When I was first elected to Congress as Westchester's Democratic Representative and went on the Banking and Currency Committee, Bill took me under his wing. He introduced me proudly to all his banking associates—national, State, and local—arranged speaking appearances for me, and helped me appraise banking legislation with totally unbiased view, even bending over backward to point out political pitfalls I might encounter in taking certain positions. His first concerns were always how legislation would affect people—particularly the people of Westchester.

Bill was also my banker of last resort. When a constituent who had a meritorious case needed a loan or a mortgage and had been turned down everywhere else, I would turn to Bill. He would see to it that the problem was resolved, either by himself or through his friends. This was so not just in the banking world, but with community problems as well. I was honored to have worked together with him on so many of these issues of local concern.

As I circulated among the many who gathered to pay their last respects to Bill, it was no surprise to hear them say the same of him—that he took them under his wing, too. It was Bill to whom they turned when they wanted to accomplish something for the community or help someone in trouble and need.

Bill was a friend to all. That, I think, was his most important achievement.

Bill leaves a wonderful family and a remarkable wife, Jane, who is as warm and concerned a friend to the community and myself as Bill was. We all were so greatly enriched by Bill's friendship, but she most of all. I am grateful to have shared his love with them and wish them the very best.

There follow the articles and editorials that appeared upon Bill's death which I share with my colleagues so that they, too, can benefit a bit from the life and wisdom of Westchester's first citizen:

[From the New York Times, Nov. 30, 1976]

WILLIAM L. BUTCHER, BANKER, DEAD; AIDED WESTCHESTER INDUSTRIAL ROLE

(By James Feron)

WHITE PLAINS, November 29.—William L. Butcher, retired chairman of the board of the County Trust Company and a major figure in the postwar industrial and corporate development of Westchester County, died today at White Plains Hospital after a short illness. He was 69 years old.

Mr. Butcher, who lived in White Plains after many years in Scarsdale, retired as board chairman in 1972. At that time Nelson A. Rockefeller, then Governor, and 700 others gathered to acknowledge the banker who had helped build County Trust into a state bank. It merged earlier this year with the bank of New York Company.

Mr. Rockefeller praised Mr. Butcher in 1972 as a "practical idealist" who linked his bank's achievements with those of the community.

"The genius of Bill Butcher," Mr. Rockefeller said, "is that he always understood this interdependence."

Dwight Townsend, vice president of County Trust, described Mr. Butcher as a "one-man chamber of commerce who, through contacts, watched for companies considering a move and approached them with his Westchester sales story."

Companies that relocated under Mr. Butcher's urging included the Nestle Company, the General Foods Corporation, Pepsico and Texaco, according to Herbert Grant, executive vice president of County Trust.

A BALANCE OF COMMUTERS

The movement of industry to Westchester transformed the county from a collection of suburban communities to an area of substantial economic development where commuters arriving in the county each morning roughly equal those leaving.

Mr. Butcher, who was the county's most prominent banker, also had major roles in civic, educational and business organizations in the postwar period. He was a trustee of Pace College, which has a campus in Westchester, and a member of the Council of the State University of New York campus at Purchase.

He was appointed in 1965 to the Metropolitan Transportation Authority, served for a short while as chairman of the state's Urban Development Corporation and was a director of the Westchester Medical Development Board, which helped establish the medical center now nearing completion under county control.

Born in Newark, Mr. Butcher spent part of his childhood in lower Manhattan, where his father, a social worker, was director of a newsboys' lodging house. There young Butcher became an enthusiastic checkers player, occasionally stopping in later years at a Times Square checkers place to play with experts.

BEGAN CAREER IN CINCINNATI

He attended Poly Prep in Brooklyn, graduated from Williams College in 1928, studied at the University of Cincinnati and began a banking career in that city by joining the Central Trust Company in 1935. He was named vice president of the bank after completing a three-year course at the Stonier Graduate School of Banking at Rutgers University.

One of Mr. Butcher's classmates at Rutgers was Dr. Joseph E. Hughes, later chairman of the board of the County Trust Company, a Westchester bank with eight branches in 1946. Dr. Hughes persuaded Mr. Butcher to join County Trust, where he became president in 1957 and chairman in 1960.

Mr. Butcher's role as a banker extended to the publication of booklets for businessmen considering relocation, most of whom came from New York City. The booklets focused on such factors as the supply of white-collar labor in the county and the availability of transportation, matters that Mr. Butcher had learned would be crucial in moving corporate facilities.

"He made it his business to know how county government worked and of the likelihood of achieving zoning changes, for example," Mr. Grant said.

EXPERT AT CHOOSING AIDES

Mr. Butcher, described by his colleagues as thoughtful and expert at selecting able assistants, was noted for his sense of humor. The night he was honored by Governor Rockefeller, the banker said, "The only gesture I prize more highly than his presence tonight is the privilege of having a joint banking account with him."

Mr. Butcher married Aimee Ruth Tweedy of Brooklyn in 1929. They had three daughters, Gayle (Mrs. Foster Nichols) of Glen Head, L.I.; Lynn (Mrs. Merrell Mays Clark) of Scarsdale and Tweedy (Mrs. Derek L. Tattersall) of North Carolina. Mr. Butcher's first wife died in 1967 and he later married Jane Cox, who, along with his daughters, survives.

In addition, he is survived by three stepchildren, Abigail Ives, Coletta Cox and Thomas H. Cox, as well as a sister, Ruth Reel, and eight grandchildren.

A funeral service will be held at 11 A.M. on Wednesday at St. Bartholomew's Church, at Sterling and Prospect Streets in White Plains.

[From the Reporter Dispatch, Nov. 30, 1976]

BUTCHER LEAVES VOID

One of the most fortunate events for Westchester County was the friendship between two students at Rutgers in the Twenties—Joseph E. Hughes and William L. Butcher. It was Hughes, as chairman of the County Trust Co., who brought about Butcher's transfer to Westchester from a strong banking and civic career in Cincinnati.

Since then, few notable areas of progress in Westchester have failed to benefit from William L. Butcher's presence, his interest and his involvement. As a protean force for achievement, he leaves a void for many to strive to fill.

In his central role as banker, his monument is the County Trust organization, now a region of the Bank of New York, which expanded under his direction into a strong countywide institution.

In his civic role he made contributions from his vast store of energy to the MTA, the UDC, the Red Cross, Burke Foundation, the New York School for the Deaf, the Scarsdale Town Club, the county Parks Board and the Missionary Society of the Protestant Episcopal Church.

But it was in his amorphous role as adviser, go-between and salesman for Westchester, dealing with large corporations which needed and searched out persons of stature and dependability for advice, that Butcher made his most lasting contribution for the future of Westchester. That role extended to the very end of his life.

From his paneled office at County Trust headquarters in White Plains, and later from his own quarters on Westchester Avenue, Butcher was ever going forth to insure that new corporations got the right information and advice, the proper introduction to Westchester, and the feeling that they were entering into a partnership with a group of unique, concerned communities.

In that sense, William L. Butcher truly helped hold Westchester together as he helped it gain the resources to grow and to prosper. In that capacity he will be hard to replace. And with his added empathy not only for his beloved Westchester but for so many of its people, there will be many people who will say we may never see his equal.

[From the Scarsdale Inquirer]

ENERGY, DEDICATION RECALLED

Two of the men in Scarsdale closest to William Butcher were former Mayors Malcolm MacIntyre and Theodore Sander Jr. MacIntyre, who preceded Butcher as president of the Town Club and who also worked with him in Republican Party endeavors, remembered his "tremendous energy" and his "great sense of humor." He added, "He was very dedicated to public service. (His death) is going to be a loss to the whole Westchester Community."

Sander and Butcher, who spoke at each other's Scarsdale Bowl presentation, worked together in both civic and political organizations. Sander, in a statement to The Inquirer, spoke of his predecessor as Town Club president:

"Bill Butcher's outstanding characteristic was boundless energy and a willingness to take on difficult tasks. In working closely with him while he was president of the Town Club I discovered that he liked hard work and expected it from his associates.

"A few years later as his district co-leader on the Republican Town Club, the same quality stood out sharply. But, Bill always took the early morning session on Election Day.

"His death is a real loss to the community in which he lived and served so well for many years."

[From the Reporter Dispatch, Dec. 6, 1976]

A MAN FOR ALL SEASONS HAS LEFT US ALL

(By Warren Jackson)

In one of life's real ironies last Thursday, the announcement of the death of Bill Butcher, architect for the economic greatness Westchester has achieved, broke across the headlines in these and other newspapers. On that same day, County Executive Alfred De Bello went before the county legislators to present the administration's 1977 legislative program, eliciting satisfaction of the basic needs of the county, if it is to assure a continuance of the quality of life.

Bill Butcher was the kind of man that if you knew him at all, he was "Bill" . . . no matter if you were just you, or the chairman of a bank, corporation, or even a governor.

I didn't know Bill Butcher as well as most; I guess I talked with him all of one half dozen times. But what he did in a lifetime, I believe, needs to be presented as a challenge and a legacy for those left behind in positions of equal peerage, to attempt to emulate, to be a little of what Bill Butcher was to the development and sustenance of this county.

Al De Bello clearly defined that we of Westchester have a problem in housing that could force our middle class families to seek housing and employment outside Westchester. The County Executive clearly indicated that if the housing issue isn't addressed, we will face the possibility of "a polarization between the extremes", or in current jargon, between the haves and have nots.

It is Al De Bello's hope to gain the cooperation of the county's State legislators, congressmen and the state's two Senators, in pushing bills to implement this proposal, and other needs.

The immediate social obligations which we face in our county, point up the urgent need for someone, or a consortium of corporate executives of Bill Butcher's stature, to show that the Bill Butcher type man was not just one of a kind, but that there are others who give the same damn about Westchester as he did.

The achievements of Bill Butcher was in the development of the County. He worked with Ed Michalien, and together they were partners in developing our growth and our greatness.

Michalien said it all in eulogizing his friend; ". . . he gave unsparingly of himself and his time. Through his tireless efforts and objective imagination, Westchester became the hallmark of suburbia."

So here we are in 1976, looking at the problems of housing, utilities, environment, health. The county has an alternative to deteriorate quickly . . . sickingly fast; or, if the former bank Chairman and civic leader really was admired for his achievements, if all the nice things that were printed, spoken and related to his lovely wife Jane and his family, really meant something . . . a lot of big, key people can really be effective in working with Al Del Bello and everyone concerned, in assuring the Butcher "monument to prosperity".

As one man, Butcher accomplished the relocation of major corporations such as: General Foods, Texaco, Pepsico, Nestle, to name a few. Hopefully, there is another man, or group of men, in this county who can, in his name or his spirit, now unite to assure our continuance as a solid community. An assurance, that if you live in Westchester, there are decent places to live, places to work and a real concern about health, day care, energy and environment.

Bill Butcher, during his lifetime, was a legend. It is up to us, now that he's gone, to make sure Westchester will be viewed in centuries to come, as a suburban legend.

When one thinks of his achievements, one likens it to the words that Martin Luther King wanted to be remembered for by his fellowmen; an attempt to make this a better world.

"Yes, Jesus, I want to be on your right or your left side, not for some selfish reason. I want to be on your right or left side not in times of some political kingdom or ambition. But, I just want to be there in love, and in justice, and in truth, and in commitment to others, so that we can make of this world . . . a new and better world."

[A WVOX Editorial of the Air, broadcast Nov. 29, 1976]

THE ESCAPE CLUB LOSES A MEMBER

(By William O'Shaughnessy, President)

I really want to be there on Wednesday morning at Saint Bartholomew's Church on Prospect Avenue in the City of White Plains to hear some clergyman get up in a pulpit and try to tell us what a great man Bill Butcher was.

No one among us, obviously, is equal to that task and I do not want to see anyone, regardless of his oratorical gifts, try to stand up there and tell the assembled sages and leaders and mandarins and elders of Westchester something about this William Butcher that they don't already know.

William Butcher was a banker as you have heard. He was an ambassador of good will for our county. He was also a great giving, generous man. He was my friend. And he was a patron of this radio station and we shall miss him.

It was bad enough yesterday, being a Monday and all after a long holiday weekend. And then Edwin Gilbert Michaelian, the former county executive called from Pace University to say that Bill Butcher had died.

It is not a pleasant task, ladies and gentlemen, to get on your local radio station like this and have to tell you about the death of any man. And its even tougher when he happened to be a truly great man like Mr. Butcher.

This county is changing. Bill Butcher and men like him saw to that. Change, as they say, is all for the better. Or most of it is, I guess.

And you can read all about it in today's paper, all those wonderful and extraordinary things William Butcher did for Westchester.

He persuaded great companies to invest in our region. He talked the language of the banker and the investor and the builder and his credentials among the Establishment were impeccable.

But he was also a pushover for young Irishmen trying to start up radio stations. And as long as you pledged the enterprise to the service of Westchester, it was good enough for him.

I probably shouldn't be so personal about this because Bill Butcher helped lots of young men with lots of crazy, way-out ideas. But of all WVOX's patrons and champions, he was among the very first to help us when we were getting started.

I liked everything about him. He was a man's man and a windmill tilter and a story teller and a deal maker. And he handled lots

of what the gangsters and politicians call contracts. Only a "contract" to Bill Butcher was to get on his telephone as he did so often and try to help somebody. It came naturally to this natural man.

He was suffering from cancer in recent months and he could hardly talk. And last week he slipped out of the hospital—literally—to attend a meeting at the Dictaphone Company. And the nurses and doctors still don't know where he was during that "unexplained absence".

It is one more story which will be told about this marvelous man. Our newscasters and the papers told you about all the organizations to which he belonged. But they all forgot to mention The Escape Club. It is a group of about 15 so-called Establishment types that meets at the Scarsdale Golf Club for lunch and drinks and for some stories and good natured fun. You have to be the president of General Foods or National Bank of Westchester or Nestles to get an invitation to the Escape Club. Bill Butcher loved these meetings and he loved to kid these high rollers and knock them around. They will miss him. And so will thousands of ordinary people who live a better life here in Westchester because of his efforts on their behalf.

Forget the Escape Club, we've all lost a member in good standing.

And in this day of fast food places and phoniness and conglomerates and tinsel and bigness we can ill afford to lose a Bill Butcher who conducted himself and his business in very personal ways.

First Eddie Hughes and then Fred Powers. And now Bill Butcher.

This is a WVOX Editorial of the Air.

This is William O'Shaughnessy.

CALIFORNIA NAZIS EXPAND CONTACTS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. McDONALD. Mr. Speaker, at a time when local and Federal intelligence-gathering programs have been ended or severely cut, we are witnessing a resurgence of activities by a wide range of totalitarian groups. These range from the supporters of Marxism-Leninism in its Maoist, Trotskyist, Castroite and Soviet varieties to the fascist national socialists who emphasize racial and religious hatred in addition to class warfare.

One such group is the National Socialist Liberation Front—NSLF—which operates from Post Office Box 4168, Panorama City, Calif. 91402. Since the shooting death of NSLF founder Joseph Tommasi in June 1975 during a dispute with members of a rival extremist group, the NSLF has been led by "Captain" David Rust. Its closely associated prisoner group, the American National Socialist Brotherhood—ANS, is said to be led by "Captain" John Butler, Post Office Box 53, San Dimas, Calif.

The National Socialist Liberation Front describes itself in the following terms:

The NSLF is the legitimate successor to George Lincoln Rockwell's American Nazi Party and as such will continue his struggle through ALL avenues of politics or prisons until VICTORY OR DEATH! The NSLF maintains friendly ties with any and all organizations that support our struggle for the liberation of America from Zionism and the liberation of THE WORLD from Marxism. ALL our prison business is handled by The American National Socialist Brotherhood.

The ANS membership is concentrated in the California State correctional system as a splinter from the Aryan Brotherhood—AB, which was one of the militant prisoner organizations which worked with the Maoist Communist Venceremos Organization—VO in 1972. The VO, the parent group of the Symbionese Liberation Army—SLA, broke with the AB when it could not persuade the Brotherhood to abandon its racism for more traditional Marxist-Leninist class hatred. However, NSLF literature retains a strong Marxist-Leninist and Maoist coloration.

The NSLF now claims chapters, support groups or organizing contacts in Newport, Delaware; Chicago; Omaha; Louisville; Cincinnati; Los Angeles and San Francisco. NSLF lists among its organizers the following:

Allen Vincent and John Stewart, P.O. Box 1345, Inglewood, CA 90308.

Dyle Bitner, San Quentin, CA.

John Duffy, P.O. Box 3129, Newport, DE 19804.

Frank Collin, National Socialist Party of America, Chicago, IL.

Ray Chaney and John Younger, P.O. Box 58342, Louisville, KY 40258.

James N. Mason, P.O. Box 41503, Cincinatti, OH 45241.

In some areas there are indications that the NSLF may be working with the relatively new Klan Beret paramilitary groups which have been set up among young activist members of some Klan-type organizations during the past 2 years.

NSLF members and supporters have been involved in considerable violence and public disorder. The NSLF first attracted attention with founder Tommasi's claims of having harassed rival Trotskyist and Maoist organizations with smoke, stink and firebombs. His own death resulted from an armed confrontation with members of a rival extremist group. And it will be recalled that Frank Collin was involved in some of the racial disturbances in Chicago's Marquette Park this past summer: disturbances which are being exploited by both Nazi-type groups and by Marxist revolutionaries.

In addition to the potential for public disorder posed by the NSLF and its allied groups, there is another point to consider. Over the past 2 years several U.S. anti-Semitic extremist groups have sharply increased their activities, exhibiting in their literature apparent ample funding, an increase in writing skill and organizational ability, and a new interest in foreign affairs and in the activities of European fascist organizations. Leaders of the National States Rights Party, for example, have undertaken European travels during which meetings were held with neo-fascist English, Belgian and Italian organizations, some of which have been involved in violence in their own countries.

It is also noted that a number of these organizations, including the NSLF, have aligned themselves strongly with Palestinian and some Arab interests in denouncing U.S. policies in the Middle East including U.S. support for Israel. For example, a recent NSLF publication stated:

Congress * * * votes BILLIONS yearly so that Israel can make war on her Arab neighbors * * * We must demand an OPEN PUBLIC hearing * * * concerning, 1. The Israeli attempt to bomb the American embassy in Cairo in 1954, * * * 2. The unprovoked act of war committed by Israel against the U.S.S. Liberty, 3. The existence of Israeli intelligence agents within the very highest American security agencies, 4. The exposure of the rich Zionist lobby and its successful efforts in preventing the formation of friendly ties within pro-Western, anti-Communist Arab states such as Egypt, Jordan, Saudi Arabia, etc.

Aside from its inaccuracies and propagandistic bias, the NSLF statement is traditional U.S. Nazi literature.

Clearly this body needs to reconstitute a House Committee on Internal Security to investigate this new totalitarian threat and to investigate its funding and any ties it may have to foreign entities.

OSHA'S INSPECTIONS SHOULD NOW CEASE

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. HANSEN. Mr. Speaker, the Occupational Safety and Health Administration has run into a legal buzzsaw. Inspection procedures of the 1970 act have been declared unconstitutional and void. I have been very much involved in bringing this long overdue relief for the rights of American citizens and am today introducing a resolution for consideration by this body:

Expressing the sense of the Congress that inspections pursuant to section 8(a) of the Occupational Safety and Health Act of 1970 shall cease pending a determination by the Supreme Court of the United States of the constitutionality of such inspections.

Mr. Speaker, I submit the following news releases for the RECORD and for the interest of my colleagues in this vital matter:

STOP ALL OSHA INSPECTIONS

(News release of Congressman GEORGE HANSEN)

WASHINGTON.—OSHA has stopped inspections in Idaho. Now they should be stopped in the other areas under OSHA jurisdiction. I have written the Secretary of Labor, OSHA Administrator Morton Corn, and the U.S. Attorney General asking that this should be done.

Not only is this a matter of equal justice but it is a matter of legal reality since necessary precedent exists for individual rejection of warrantless searches or inspections by any citizen in the nation.

Certainly government activities of this nature should not be enforced only against the acquiescing citizen who is either not informed of his basic rights or who is without the means or determination to protect such rights.

If such OSHA inspections are not discontinued, I will deem it my responsibility to advise my colleagues and their constituents that further inspections violate the equal

protection of the laws guaranteed by the Constitution.

OSHA INSPECTIONS UNCONSTITUTIONAL

(News Release of Congressman GEORGE HANSEN)

BOISE, IDAHO.—Provisions of OSHA, authorizing warrantless inspections of business establishments, were ruled unconstitutional and a violation of the Fourth Amendment of the U.S. Constitution in a three judge court summary judgement filed here late Friday.

The decision, growing out of a case filed by Barlow's Inc., a small Pocatello business, against W. J. Usery, Secretary of Labor of the United States in his official capacity, is termed a landmark case. In the decision, filed in U.S. District Court, District of Idaho, the judges ruled that "The Secretary of Labor . . . and all other defendants, and their successors in office, and all other persons acting by, through or under them, are hereby forever and permanently restrained and enjoined from acting or attempting to act . . . or attempting to conduct any general searches or inspections of the non-public portions of the premises . . . pursuant to Section 8(a) of the Occupational Safety and Health Act of 1970.

"We therefore hold that the inspection provisions of OSHA which have attempted to authorize warrantless inspections of those business establishments covered by the Act, are unconstitutional as being violative of the Fourth Amendment," the ruling said.

In Washington, U.S. Rep. George Hansen, long a foe of OSHA regulations, welcomed the decision as a great New Year's present to the businessmen and farmers of the United States.

"I have nothing but praise for the courage of F. G. (Bill) Barlow, the president and manager of Barlow's Inc., which caused him to take on the Federal government in this case," Hansen said. "He is just a small businessman with limited means, but his strong feelings about our rights as American citizens and his willingness to spearhead such an effort marks him as a patriot in the tradition of our founding fathers whom we hail in this bicentennial era. Barlow's victory shows that the Constitution is still a bulwark for human rights in this nation and we do not have to bow down to oppressive rulings and acts of government no matter how well intended they may be."

Hansen was instrumental in urging Barlow to take his case to court after he (Barlow) had refused an OSHA inspection of his business location without a warrant. The Idaho Congressman has also provided a legislative and legal clearing house for information to assist those willing to stand up against OSHA and is heading fund-raising drives to give Barlow and others a "war chest" to press their cases. Hansen is Chairman of a Congressional task force working to limit regulatory agencies and reduce the size of government. He also heads a national "STOP OSHA" campaign for the American Conservative Union.

Barlow's case was handled by the Runft and Longeteig law firm of Boise. It was argued in the U.S. District Court before the three judge panel. The decision that the law was unconstitutional was signed by M. Oliver Koelsch, Senior Circuit Judge; J. Blaine Anderson, Circuit Judge, and Ray McNichols, Chief District Judge.

Hansen commended the court for its clear support of basic constitutional rights and the Barlow attorneys for their outstanding and successful presentation.

The effect of the decision, the Boise law firm said, is to declare the OSHA section involving inspections as "void and unconstitutionally repugnant to the Fourth Amendment."

With this latest decision, the Hansen-backed fight against OSHA has been successful in Texas, New Mexico, Ohio and other states but the broad and sweeping decision handed down in Idaho "is a real landmark case," Hansen said. "It not only gives immediate relief from an oppressive law, but it deals the Department of Labor and the Congress a big set-back in their incredible support of the big government steamroller running roughshod over individual rights."

OSHA DECLARED UNCONSTITUTIONAL

(News release of Congressman GEORGE HANSEN)

"OSHA is out of business!" delared Congressman George Hansen today.

A December 30th decision for Idaho businessman Bill Barlow by a Federal Three Judge Constitutional Court declared the inspection provisions of the Occupational Safety and Health Act unconstitutional and void.

"For all intents and purposes," Hansen stated, "This unpopular, oppressive and unproductive Act has been repealed unless an appeal to the United States Supreme Court should alter the situation."

"This means that businessmen and farmers no longer need to allow an OSHA inspection," Hansen pointed out.

Hansen, whose office has served as a coordinator and clearing house for legal and legislative efforts to stop OSHA emphasized that, "This latest decision is the most significant of a series of Fourth Amendment victories over OSHA." Gibson's Products of Texas scored the first big Court win over OSHA less than a year ago when a Three Judge Panel barred OSHA inspections without a search warrant properly secured from a magistrate based on probable cause. Other Court victories over OSHA's warrantless inspections followed.

"Based on the precedent of these cases," Hansen said, "The Barlow decision recognized that the inspection provisions of OSHA violate the Fourth Amendment but, unlike prior cases, it refused to judicially rewrite the law in order to salvage it. Instead the Barlow Court declared the inspection provisions unconstitutional and void thus depriving the Department of Labor of any authority to conduct OSHA inspections of private business premises with or without a warrant."

"The Court observed that Congress could have properly provided acceptable inspection guidelines but it failed to do so," Hansen continued. "In fact, the Court seems to recognize an intentional end-run around the Constitution by the Congress to authorize warrantless searches and met it head-on in a landmark decision in support of our basic rights as American citizens."

"A reckless Congress caught trying to steal a Constitutional base in the game of bureaucracy-building has thankfully been called 'out' resoundingly by the umpires in the Court," Hansen concluded.

H. CON. RES. —

Resolved by the House of Representatives (the Senate concurring), That in view of the fact that a recent decision of a Federal three-judge court has declared that the inspection authority contained in section 8(a) of the Occupational Safety and Health Act of 1970 is unconstitutional and that inspections under such section within the jurisdiction of that court have been caused to cease pending appeal of such decision, and in view of the principle of equal justice and the dictates of legal reality, it is the sense of the Congress that all inspections under such section in all areas of the Nation should immediately cease until the Supreme Court of the United States has determined the question of whether or not any inspections under such section are constitutional.

RESULTS OF COLUMBUS COLLEGE STRAW POLL

HON. JACK BRINKLEY

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. BRINKLEY. Mr. Speaker, the perspective of youth is important, as we all are aware of the growing involvement of this segment of the Nation's population. Thus, it is important that we recognize their views on political and social questions.

In order to share with my colleagues an idea of how young people feel about certain key issues, I am inserting into the RECORD the results of a poll conducted in late 1976 at Columbus College, in Columbus, Ga., one of the institutions of the university system of Georgia, which has approximately 5,500 students.

I commend Mr. James W. Dean of the college's department of political science, who supervised the poll, and the students for emphasis on current events, and for sound judgment in determining attitudes on important questions. I urge you to analyze the results as an excellent reflection of the soundness and awareness of today's youth:

COLUMBUS COLLEGE,
Columbus, Ga., October 26, 1976.

Hon. JACK BRINKLEY,
Rayburn House Office Building,
Washington, D.C.

DEAR MR. BRINKLEY: Attached you will find the results of a straw vote conducted at Columbus College on October 20, 1976. The college has approximately 5,500 students of which the majority live and work full time in Muscogee County as the college does not have dormitories. Thus, the sample is reasonably representative of the citizens of this community.

I thought the results might be of interest to you.

Respectfully,

JAMES W. DEAN,
Department of Political Science.

NOVEMBER 3, 1976.

Mr. JAMES W. DEAN,
Department of Political Science, Columbus College, Columbus, Ga.

DEAR JAMES: I genuinely appreciate your passing along to me the results of the straw vote conducted at Columbus College on October 20th. The input and views of constituents are always very helpful and I am especially pleased to have the feeling of the Political Science students on the four timely questions covered by your poll.

With thanks, and best wishes,

Sincerely,

JACK BRINKLEY,
Member of Congress.

RESULTS OF COLUMBUS COLLEGE STRAW POLL, OCT. 20, 1976

THE NEED TO REDUCE REAL PROPERTY TAX EXEMPTIONS IN NEW YORK CITY

HON. EDWARD I. KOCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. KOCH. Mr. Speaker, yesterday in New York City, the question of whether Reverend Moon's Unification Church qualifies for a real property tax exemption was reviewed by the city tax commission. The hearing before the New York City Tax Commission also lent itself to considering more broadly the city and State's regulations affecting property tax exemptions. These are significant policies, because 40 percent of the assessed value of real estate in the city of New York is now exempt from real estate taxes.

One large category of untaxed property is that owned by the Federal Government: Its assessed valuation is some $576 million. Just as the Congress now considers Federal tax exemptions and deductions as "tax expenditures" in our Federal budget process, we must make the same acknowledgment with respect to the tax-free status of State and Federal property in our Nation's municipalities. In looking at New York City, one finds that the city of New York is effectively subsidizing the Federal Government by some $52 million annually. The city can ill afford to do this. I am proposing that the Federal Government make voluntary payments to municipalities in the amount that they would otherwise pay in local real estate taxes on its properties. Likewise, the Federal Government should reimburse the municipalities for property taxes not paid by foreign missions and consulates which, in the case of New York City, amounts to $8 million annually.

Beyond this, I believe that the city of New York must be empowered, through a change in State law, to review with greater scrutiny and selectivity applications of tax-exempt status, so that the categories of institutions exempt from paying real property taxes can be reduced and the present erosion of our city tax base can be stopped. For the benefit of my colleagues, I am appending a copy of my statement before the New York City Tax Commission:

STATEMENT OF REPRESENTATIVE EDWARD I. KOCH BEFORE NEW YORK CITY TAX COMMISSION, JANUARY 5, 1977

This hearing on whether the Unification Church meets the requirements for real property tax exemption is just a small example of a much larger problem of—

1. Whether once given, any effort is made to determine whether an organization continues to qualify for exemption. In the case of a religious organization, for example, the mere fact that an organization is formed under the Religious Corporation Law is not and should not be determinative of exempt status.

2. Whether the City is too liberal in the exemptions it gives from real estate taxes and whether changes are needed to reduce the number of organizations qualifying for tax exemptions.

With respect to the first point, the City Charter and Administrative Code clearly place the responsibility on the Department of Finance to determine that organizations claiming exemptions are (1) organized and conducted exclusively for religious purposes and (2) that their property is used exclusively for religious purposes. (Sec. 421 Real Property Tax Law.)

An outrageous example of the failure to enforce the law with respect to the granting and continuance of tax exemptions was reported in The New York Times on December 29, 1976, in the case of a massage parlor located at 155 East 55th Street, which being formed under the Religious Corporation Law enjoys exempt status.

The standards to be employed in granting tax exemption to the Rev. Moon's sect or any other body seeking tax exemption or continued tax exemption are clearly set out in the cases. For example:

Crusade for Christ Inc. v. *Town of New Lebanon* (1971) 36 A.D. 2d 247, 290 N.E.S. 2d 440 confirmed the proposition that an organization seeking exemption must "sustain its burden of proof that it was so organized and conducted as to justify the granting of an exemption."

Lower East Side Action Project Inc. v. *Town of Liberty* (1972) 70 Misc. 2d 562, 334 N.Y.S. 2d 333 held that an organization must have more than a thread of religion, charity or education within its activities in order to be entitled to exemption.

In *New York Cardiac Center, Inc.* v. *Kondzialaski* (1974) 46 A.D. 2d 810, 361 N.Y.S. 2d 701 the Court held that in addition to the two tests mentioned above, an organization must meet a third test which is that no pecuniary profits may inure to any of the owner's officers, members or employees nor may the property be used as a guise for profit making operations.

Organization under the Religious Corporations Law is not determinative of exempt status. *Religious Soc. of Families* v. *Assessor of Town of Carroll* (1973) 73 Misc. 2d 923, 343 N.Y.S. 2d 159.

On the basis of the foregoing, the Unification Church should be required to open its books and submit to a thorough examination to prove that it is operated exclusively for religious purposes and indeed that it has more than a thread of religious activity.

Any organization seeking tax exemption should be scrutinized along with its activities to determine whether it meets the statutory tests for tax exemption. In the case of organizations once granted tax exemption, they should be the subject of ongoing monitoring to determine that they continue to qualify. In addition, all organizations enjoying exempt status should be required anually to certify under the penalties of perjury the nature of their activities and their continued entitlement to exempt status. The assessed valuation of tax free property in the City of New York is about $24.8 billion, using 1975 data. This is about 40% of the assessed value of New York City real estate. When this is compared to the total taxable real estate in the city of about $38.8 billion, it is clearly seen that we exist on a razor thin tax base. It is a tax base that without strict scrutiny can continue to decrease.

The cost to the city of exempt property in tax losses is approximately $2.2 billion. Of the $24.8 billion in exempt property, $3.8 billion is non-governmentally held property.

The following is a breakdown of the assessed valuation of some tax exempt properties in the City of New York:

City properties, $9.9 billion.

State Properties, (excluding public authorities), $572 million.

Federal properties, $575 million.

Foreign government, $112 million.

Public Authorities, $3.6 billion.

Port Authorities, $1.016 billion.

TBTA, $752 million.

TA, $1.6 billion.

Commuter RR, $272 million.

Public Housing Authority, $2.15 billion.

Religious Institutions (churches & synagogues), $963 million.

Hospitals, $786 million.

Charitable Institutions (incl. foundations) $303 million.

Railroads, $225 million.

Bar and Medical Associations, $17 million.

Historical sites, $13 million.

My own view is that types of property given a tax exemption should be reduced. What the City must do is view every tax exemption as an expenditure. Traditionally, we have found it onerous to tax the property on which churches and synagogues stand and I subscribe to this position. And, it makes no sense for the City to tax itself and just increase its bookkeeping expenditures in transferring funds from one account to another. Beyond this, however, we should look at each tax exemption as a tax expenditure—as a type of subsidy. The City should determine whether the costs/benefits of an exemption weigh in the interests of the general public. In the case of educational institutions, the tax exemption is a legitimate way of subsidizing education. In the instance of the Museum of Modern Art of the City Center, this is a way for the City to subsidize the operations of important resources to the City—a way of helping a sector that is getting only minimal support from the City and provides much in return.

A few token payments are made by institutions in the above categories. The Port Authority, whose property is tax exempt, pays approximately $6 million in rentals and payments in lieu of taxes. The World Trade Center alone pays $6 million to the City of New York in lieu of taxes. But, this is based on a pre-development, idle property, rate for the land the World Trade Center now occupies. Likewise, the TBTA contributes only $780,000 annually on properties whose assessed valuation exceeds $752 million.

The Ford Foundation, which owns one of the most beautiful buildings in the City pays no real estate taxes, but because it has a guilty conscience the Ford Foundation contributes approximately a million dollars annually to the Fund for the City of New York, another foundation. This Foundation's funds and expenditures are controlled by a private board, who among other things hired Former Deputy Mayor James Cavanagh last year at $35,000 after he was forced out of the City Administration. If the Ford Foundation paid taxes on its property, the City would receive approximately $800,000 annually.

The question has also been raised recently whether the Iranian Foundation, now constructing an office building on Fifth Avenue, will apply and technically be able to qualify for tax exempt status, even though its building will be used for commercial purposes.

While it may be impossible under the Constitution for the City of New York to tax the federal government for its property, I believe that the federal government should on its own authority pay taxes on all its property to the local municipality involved. In New York City this would mean a federal payment of approximately $50 million annually. I am introducing legislation in Congress to effect this. The State should do the same. In addition, the federal government should reimburse municipalities for taxes not paid by foreign governments on their properties—approximately $8 million in New York City annually.

I would also urge that hospitals be required to pay real estate taxes. Some might say this is a bizarre idea. It isn't, because this is an expenditure that can be included in the computation of reimbursable medicaid, medicare and private insurance costs. In short, a good percentage of the hospital sector's taxes would be reimbursed by the federal government and thereby increase the flow of federal funds to the City of New York under existing programs.

Similarly, voluntary nursing homes and mental institutions, greatly subsidized by medicaid and medicare, should pay taxes. Foundations like the Ford Foundation should pay taxes. Their "tax money" should go to the City of New York, not charity.

Railroad property—much of which is leased for commercial purposes—should be taxed.

To achieve a reduction in the list of tax exempt properties, changes will have to be made at all levels of government. Basically, tax exempt principles and procedures should become exclusively a matter of local home rule. Today, most tax exemptions are mandated by the State law, more specifically, the New York Real Property Tax Law. The City should be empowered to make a sector by sector analysis and accounting so that the relative costs of every sector's exemption can be accounted and weighed. Exemptions should be made as an instrument of public policy in which the City has decided that it wants to effectively subsidize a particular sector through the real property tax exemption.

The City should also be empowered to tighten the definition of what qualifies for tax exemption in a particular sector. For instance, while we want to exempt properties used for religious worship, we don't necessarily want to exempt a church owned catering hall.

I would urge that the Tax Commission formulate a legislative program to give the City home rule authority in this area and for expanding the tax base.

THE HOMEOWNER'S ENERGY CONSERVATION ACT OF 1977

HON. WILLIAM S. COHEN

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. COHEN. Mr. Speaker, perhaps the most alarming and shameful fact to emerge from our national energy dialog is that as a society, we waste at least one-third of the total energy we consume. Some experts have put this figure even higher. Given the fundamental relationship between adequate energy supplies at reasonable prices and the economic, political and social well-being of the Nation, it is imperative that the central focus of any national energy policy be on paring the fat from our bloated and unbalanced energy budget. In doing so, we can achieve economic, environmental and foreign policy goals which might otherwise prove unattainable, should we fail to institute meaningful conservation measures.

The possibilities for achieving a measurable reduction in energy consumption in this country are almost endless, with the greatest opportunities lying in increasing the efficiency of the automobile and the heating and cooling of buildings. Americans have been overheating, overcooling, and overlighting their residences for years, and we are now reaping the legacy of our habit of extravagance. Inefficient residential heating and cooling systems and inadequate insulation practices have played a prominent role in perpetuating these excesses.

As one expert has put it, "most of our homes are heat sieves." Today, a vast amount of heat generated by a home heating plant promptly disappears through the walls, windows, doors and roofs. Although the Federal Housing Administration has stiffened the requirements for insulating new houses, it is nonetheless true that 90 percent of existing homes in this country are seriously deficient with regard to insulation. The average uninsulated house with 1,600 square feet of space wastes about 700 gallons of fuel oil each year; a partially insulated house wastes approximately 200 gallons. In addition, home furnaces today are generally designed so that only 70 to 75 percent of the heat of combustion is actually used in heating the home. In operation, however, many home heating systems drop far below that efficiency level. Along with better maintenance, the installation of equipment such as heat exchangers and improved ducting can do a great deal to restore or even increase the efficiency of the heating plant.

According to a Federal Energy Administration report, residential buildings used about 70 percent of the 18.1 quads of the energy consumed by the household and commercial sector in 1972. About 72 percent of the energy consumed in residential buildings—9 quads—was used for heating, cooling and ventilation. Assuming the number of residential units continues to grow by about 2 percent per year, energy conservation measures aimed solely at improving the thermal efficiency of new housing would not be effective in reducing overall demand for several years. To reduce current demand, existing housing must conserve more energy through the installation of energy saving devices which improve the thermal efficiency of the residences. This installation, or retrofitting, can be effective in saving about 10 to 20 percent of the energy used in residences.

Other studies have estimated that increased home insulation may result in saved fuel costs of 20 to 40 percent. Moreover, investments in home insulation clearly contribute to higher property values.

Given the economic inability of many poor and middle income homeowners to purchase and install insulation devices or improve existing heating systems, it is obvious that the job will only be accomplished if the Federal Government develops incentives to assist these groups. In an attempt to meet this pressing need and, at the same time, implement the recommendation of many energy experts, including FEA Administrator Zarb, I am today introducing legislation to provide the individual homeowner with the incentive and ability to make energy-saving improvements to his or her home.

Specifically, my bill amends the Internal Revenue Code to permit the individual a tax credit for 25 percent of amounts paid or incurred for the installation of more effective insulation and heating equipment in existing residential structures up to $375—$750 in the case of a joint return. The bill would be especially pertinent for relatively minor improvements, such as installing storm windows and doors, which nevertheless can substantially reduce fuel consumption. While the major reward for the homeowner would be a savings in fuel costs, the tax credit would be a limited additional incentive which would also recognize the Nation's interest in and

support for his actions. The importance of establishing some positive efforts to encourage energy conservation in the home cannot be overstated, and the cost of this legislation in the long term would be more than offset by the benefits which would accrue to the Nation as a result of decreased energy demand.

Accordingly, I hope that my colleagues will join with me in helping the low and moderate income homeowner help himself and the country, by lending their strong support to this legislation. As EPA Administrator Train observed in a speech last year:

The abundant resources of this land are not only ours to consume, but ours to conserve—and they will remain ours to consume only as long as we have the good sense to conserve them.

FREE ENTERPRISE IN OUR THIRD CENTURY

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. RUDD. Mr. Speaker, citizens in my State of Arizona and throughout the country are most concerned about the power and sometimes unreasonable requirements of Federal regulatory agencies. I have promised voters in my district that I will work to eliminate regulatory abuses and unnecessary Government rules and interference.

I also sincerely hope that the majority in Congress will help fulfill the campaign promise of the incoming administration to reduce the size and power of the Federal bureaucracy.

An excellent analysis of the threat of regulatory abuses to our productive free enterprise system is a recent speech of Gerald H. Trautman, chairman and chief executive officer of the Greyhound Corp., which is headquartered in Phoenix.

I believe this speech will help all Members of Congress and the incoming new Cabinet officers to understand the problems we face and the corrections we must make to protect the success and vitality of our job-producing economic system.

We must especially get Government off the back of small businesses throughout America, and Jerry Trautman's speech eloquently spells out this important need.

I am pleased that this good speech was brought to my attention, and that I now have the opportunity to give it wider attention through the RECORD:

FREE ENTERPRISE IN OUR THIRD CENTURY

(By Gerald H. Trautman)

I welcome the opportunity to share with you my concern over the anti-business attitude of our federal regulators in Washington, and to tell you what we must do to preserve what's left of our free enterprise system as we head into our third century.

I would like to begin by pointing out that in just a few days we will be celebrating . . . if that is the word . . . the 47th anniversary of a calamitous day in financial history. It was on October 29, 1929, that the stock market collapsed on Wall Street, triggering the Great Depression of the 30s.

I realize that is not a very cheerful preamble to my remarks today. But it is, perhaps, fitting to acknowledge that 47 years later, we are teetering on the brink of another kind of financial collapse . . . the demise of our free enterprise system. It will require the most stringent kind of courage, determination, hard work and forthright drum-beating, as we begin this third century of our national existence, to preserve the economic system that so successfully bankrolled our country through its first 200 years.

It was once observed by an important statesman that, "War is much too serious a matter to be entrusted to the military." More and more Americans today feel the same way about the economy . . . that it is entirely too serious a matter to be left to the economists, the bureaucrats and the politicians.

One of the saddest discoveries that Americans are making is that economics is not like influenza. You can't catch it just by hanging around. You have to learn it. And for too many years our economic policies have been dictated by a procession of individuals who are little better than economic illiterates.

The result is that we are paying dearly today for the damage inflicted on our economic system by more than 40 years of increasing government intrusion into the affairs of business. And the most alarming part is that the intrusion is accelerating. When I first took this Greyhound job, I could spend virtually 100 percent of my time managing the business. Today, some ten years later, over a third of my time is devoted to dealing with intrusions, actual and proposed, of the federal government.

The price we are paying for having stood mute while more and more decision-making gravitated to Washington is that today we not only have economic mismanagement, but a federal government that is all pervasive . . . reaching into every corner of human endeavor and slowly, inexorably replacing the sovereignty of the individual with the sovereignty of the government.

Every time in those years when we allowed the federal government to intervene and put controls into effect, we gave up another bit of our freedom. And we are only now beginning to recognize that what we had perceived as the warm, embracing arms of government are more accurately suffocating tentacles . . . regulating and mandating, decreeing and ordering.

No less an authority than Caspar Weinberger, former Secretary of H.E.W., last year ruefully concluded that, "After 5½ years in Washington, my single over-riding observatioi is that an all-pervasive federal government, unless checked, may take away our most precious personal freedoms while shattering the very foundations of our economic system . . . We are creating an edifice of law and regulation that has intruded into the lives of all of us . . ."

By way of perspective, it was inflation that pulled the rug out from under us nearly three years ago and made us wake up to what was happening in this country.

Up until then, modest inflation had come to be regarded as a more or less inevitable consequence of "The American Way of Life" with its built-in tendency to over-consume and under-invest.

What shook us out of our complacency, however, was when inflation suddenly escalated out of the 2 percent and 3 percent range and into double digits. Suddenly we all realized we were not as well off as we had felt. As wage earners, we were "making more now and enjoying it less." And that applied as well to business.

Today, inflation has happily dropped out of the double digits, but as a nation we have unhappily dropped back into our complacent, comfortable mentality with regard to inflation. Recently I read that economists and politicians are "pleased to report" that inflation will probably hold at around 5½ percent or 6 percent through 1976. When a 6 percent inflation rate is cause for jubilation, it becomes painfully obvious that too many Americans, notably our political corps, still do not comprehend the underlying causes of inflation and, worse again, are not yet willing to apply the admittedly painful but necessary correctives.

The fact is that inflation is not an economic problem, but a political one. It is the offspring—the monster child—of government encroachment and government debt

Encroachment because we have a federal government that has phenomenally escalated its role, insinuating itself across the business and financial landscape and then going on to regulate every facet of private life as well.

Government at all levels has expanded in the past 50 years from constituting 10 percent of the economy to going on 50 percent. What we have is a government sector growing faster than the economy that supports it.

Secondly, we have a massive and chronic debt . . . government spending that won't quit, long after tax money has been exhausted. Today the national debt stands at over $500 billion and it is estimated that it will reach $713 billion in fiscal 1977.

Our legislators are so used to spending grandiose sums that they have lost sight of the concept of "a billion."

I recently read a thought-provoking paragraph that puts "a billion" into perspective. Many of you may have read it also, but it is worth repeating:

"One billion seconds ago, the first atomic bomb had not been exploded: one billion minutes ago, Christ was still on earth: one billion hours ago, men were still living in caves: yet one billion dollars ago . . . in terms of government spending . . . was yesterday!"

How? Because we added to our national debt in the 94th Congress at the mind-boggling rate of $1 billion a week by the device of spending at the rate of $1 billion a day.

What has projected . . . and will continue to project . . . this nation into inflationary spirals then is not, as its critics would have us believe, "a failure of the free enterprise system to cope," but the burdening of that system with an explosion of government entities and an explosion of social expectations which outrun its resources.

No one questions the worth and the value of certain social programs, or our responsibility to protect and assist the vulnerable in our society. But that is quite a different thing from dedicating our monetary policy to their solution regardless of the economic consequences. Sweet reason alone dictates that we cannot solve all problems at the same time. If government programs continue to escalate as they have in recent years, more than 50 percent of our gross national product will be required to support social programs by the year 2000.

A meeting of the nation's top economists held last year to investigate the causes of inflation concluded that "the failure of our political system (note . . . our political system, not our economic system) to contain the growth of social demands within limits tolerable to the free society, is the essential first cause of inflation in this society."

In short, we have transformed social aspirations into entitlement. We have created a "spoils system" . . . a nation of special-interest groups, all screaming we-want-what-we-want-when-we-want-it, heedless of the cost, the ability of taxpayers to shoulder the burden, or the fact that the price we pay for more and more public programs is less and less private freedom.

We are, in fact, fast becoming a welfare state, and it is a propensity of welfare states to live beyond their means, to substitute by edict and mandate their will for the will of the individual and to grow, legislate and regulate with a frenzy.

And this latter we are doing with a ven-

geance. Under the guise of "protective law" Congress has created a fourth branch of government . . . a maze of regulatory agencies which are variously estimated to cost the American consumer some $130 billion a year.

More seriously, these agencies are accountable to no one and since they both interpret and administer their own pronouncements, they wield the power to wound or kill whole industries. More often than not, their behavior is irresponsible and erratic, the result of over-regulation, mis-regulation, over-lapping regulation, contradictory regulation.

Federal bureaucracy, like some weird science-fiction monster, has taken on a life of its own and is out of control of Congress.

Let me give you a few examples of what these regulatory agencies have done to Greyhound recently:

Greyhound buses have an excellent safety record . . . in fact, the best in the transportation business. This didn't just happen, it is the result of well considered safety rules and strict training, but this made no difference. The U.S. Labor Department summoned us into federal court claiming that our age qualifications for drivers were discriminatory, that we should hire people to drive no matter how old. We had to go through a full trial with expert witnesses and an appeal before our qualifications were sustained. It took a great deal of our executives' time and cost us a considerable sum of money to repel this intrusion by the federal government. In fact, it sometimes costs so much to be right that it is hardly worth it.

Next we had an attack by the Federal Equal Employment Opportunity Commission on our height requirement for drivers. Obviously you have to be of some height to drive a bus, and our safety people, out of years of experience, had set the height at 5'7", but the EEOC claimed this was discrimination—that we should hire drivers regardless of their height. And while we thought we could successfully defend it in court we decided it was not worth the time and effort.

You might be interested in another facet of this case. Along with the demand from the EEOC that we give up our height requirement was a demand that we pay some $19 million in back pay to unspecified and unknown individuals who might have been employed in the past if we had not had the 5'7" rule. This in itself was ridiculous, but more so—the demand on behalf of the EEOC was signed simply, "Betsy." It seems to me when someone asks you for $19 million you are entitled to have her full name.

Let me give you another example of federal harassment. We are now embroiled in a costly investigation by the Interstate Commerce Commission in which the staff of that commission is advocating among other things that bus carriers be required to provide a terminal in every town of 15,000 population in the U.S. and keep those terminals open night and day whenever a bus schedule goes through town. All this is to be done with the carriers' private funds, since they have no subsidy such as the $1 million a day of our competitor Amtrak. We estimate that if the ICC were to be successful in its efforts, it would increase annual operating expenses by $187 million, and would require at least a 50 percent increase in intercity passenger fares.

Another federal agency that gives our people a considerable amount of "employment" is the Securities and Exchange Commission. Every year our annual report gets longer because, to satisfy the SEC, we have to put in more financial information for our shareholders, most of which is not understood or even read by them. Next year, we are faced with another SEC requriement which will be a real headache for a company such as Greyhound. I am talking about the necessity of including in our reports a section on the replacement cost of our extensive facilities—sometimes called current value accounting. We have a task force working on this now. This section of our reports is going to be a veritable "accounting-in-wonderland" bearing no resemblance to financial facts. In issuing this requirement the SEC said that business had to get used to "imprecision" in accounting. I have always had the old-fashioned idea that any imprecision in figures reported to the SEC or to our shareholders might land me in jail.

One of our subsidiaries, Armour and Company, has the Federal Meat Inspection Service in its packing plants. I don't find any fault with this, but we do have problems from time to time when the meat inspection service disagrees with another federal regulatory agency as to steps to be taken in the plants. Recently the meat inspection service insisted on an opening in a sausage conveyor line so that it could take out samples to test. Another federal agency, OSHA, wanted the opening closed because it claimed it was a safety hazard. Each agency threatened to shut down the plant if we did not comply with its request. Unfortunately this is not an isolated instance of regulatory conflict. In our food plants we have been told by various federal agencies to provide smooth and rough floors in the same area, salt and not salt in the same area, paint and not paint in the same area, and so on.

One of the agencies in Washington that we can count on to take up a considerable amount of management's time is the Food and Drug Administration. It took Armour Pharmaceutical well over a year to get FDA approval for Calcimar, a drug developed by Armour Pharmaceutical, which is effective in controlling Paget's disease and other bone afflictions. And it is effective. I picked out an unsolicited letter—we have had many—from a lady in Wyoming who was bed-ridden and to quote her, "so sick and in so much pain I didn't want to live." She had Paget's disease in both legs, hips, pelvis and up the spine. She says that "thanks to Calcimar I am able to walk again. I can travel and I have no pain. It's like being reborn." The letter itself is much more impressive than my hurried description, but the pathetic point is that this lady was deprived of Calcimar for months and months while the FDA pursued its weary regulatory process. In contrast, the drug was promptly approved in Europe, was written up most favorably in prestigious European medical journals, and was available there to sufferers of Paget's disease a very long time before it was available in the U.S. Unfortunately again, the delay or the denial of the availability of an effective drug is not an uncommon occurrence here.

You are probably thinking by now, "too bad about Greyhound" but what you should be thinking is "too bad about me" because every such intrusion into the free enterprise system is costing you money in taxes, and sooner or later, in the price of goods or services.

In the bicentennial issue of Forbes Magazine, Malcolm Forbes made a simple but telling comparison. Under the heading "1776" he quoted from the Declaration of Independence that liberty is an inalienable right, and that to secure this right governments are instituted among men. He also quoted from the U.S. Constitution the purpose of that document to secure the blessings of liberty to ourselves and our posterity. And then under the heading "1976" he simply listed 136 U.S. regulatory agencies which have made inroads on our liberties.

I find it wryly amusing that 200 years ago, one of the principal complaints our American Colonists voiced against King George was that, "He has erected a multitude of new offices, and sent hither swarms of officers to harass our people and eat out their substance." By present day standards King George was a piker.

What is ironic, of course, about government regulation is that the people who are telling the private sector how to run its business are the same fine folks who brought you deficit spending, rampant unemployment, runaway inflation and the recessionary doldrums.

I would perhaps be less critical of government's regulation of business if government could run its own house in an orderly, efficient manner.

We are all familiar with the federal government's inefficient and deficit-ridden operations of the postal service and the passenger rail service, but a federal fiasco which is not fully appreciated relates to pensions.

Two years ago, Congress voted overwhelmingly to impose costly government regulation on the private pension system (Employees' Retirement Income Security Act of 1974, ERISA). Its own pension system, however, has become a fiscal nightmare which no one wishes to delve into. Federal payments to government retirees (exclusive of social security payments) now exceed $20 billion a year and with one exception, not a single government pension plan is funded by ERISA standards. The unfunded liabilities of the federal government now total more than $350 billion.

The big difference, of course, between a corporation and a government entity is that while we in the private sector may, upon the short-term sufferance of our shareholders, ride out the storm of a bad profit year, we still operate on the basis of accountability. Government, on the other hand, operates willy-nilly . . . spending cash it doesn't have, promising a free lunch to the many to be paid for by the few, and deluding itself that taxes are the cure-all.

In the past, it has been like talking into a void to warn against government expansion and intervention. Legislators, those most in a position to know the acuteness of the problem, have gingerly tiptoed around the issue. It was not considered politically astute to stand up in front of one's constituents and ask them what they were willing to give up or delete from the free lunch menu. Few legislators have been fearless enough to step out and test the climate for rebellion.

Today, however, that climate appears to be improving. We are actually witnessing an encouraging surge of righteous indignation from all quarters as angry people from the political right to the political left are simultaneously concluding that enough is enough. We are witnessing healthy disenchantment with excessive regulation, with the cost and size of government and . . . most pointedly . . . with elected officials who seem unable to grasp the causal relationship between profit and jobs, between jobs and taxes, between investment and growth.

It is refreshing to experience the groundswell of indignation. But we cannot stop now. We must continue to hammer home the point to Congress that it does not "have" anything apart from what we, as taxpayers, give it. And that we demand that their stewardship include fiscal accountability.

The only answer to both inflation and unemployment over the long haul is to recognize that the only real source of jobs and income for the individual, and tax dollars for government, is a healthy *private* sector.

Government can enact programs that stimulate demand. It can tax the employer and the employee. It can transfer funds to help the poor and allocate funds to assist the disadvantaged. But what it *cannot* do is "give" a subsidy to an un-profitable entity unless it is first taken from a profitable one. Profit has to precede allocation and it is useless to argue how profit will be spent in

this country if there isn't any. And that is precisely the prospect we face today . . . the imminent threat of national insolvency brought on by chronic debt, burgeoning bureaucracy and crippling regulation of business and industry . . . the only sector, ironically, with the ability to bail us out.

Let me apply what I have been saying to Greyhound and, as I do this, consider who suffers when companies are regulated out of existence.

Greyhound provides jobs for some 53,000 employees. It is these employees who make the corporate system work and for this they were paid $775 million in 1975.

Greyhound also furnished the livelihood for many of its suppliers, including American farmers to whom it paid $1.4 billion in 1975. There is no way that the farmers could get this vast amount of produce to consumers except with the help of the corporate system . . . and entities like our Armour and Company.

A percentage of our profit goes to our 200,000 shareholders, none of whom owns as much as one percent of our stock. Greyhound is a means by which these shareholders can have an ownership stake in the largest bus company in the world, the very substantial food operations of Armour and our other associated operations. Finally, and perhaps most important because it is essential to the maintenance of our democratic form of government, Greyhound pays a substantial amount annually to local, state and federal governments as taxes. In 1975, the Greyhound Corporation paid approximately $100 million in taxes in the U.S.

If we continue to sand-bag this wealth-generating, job-generating sector long enough and hard enough, it will eventually succumb. And if it does, we will all learn first-hand how democratic adversity can be. To those who think it will strike business . . . but pass over labor; smite the rich . . . but leave the poor unscathed; topple the tax payer . . . but spare the tax spender, be assured you err!

What can we do?

Our first task is to dismantle the huge and unwieldy apparatus of government that we have built over the years. We can do it by supporting legislation that requires every federal program to prove its necessity every three years and then either be re-authorized or terminated.

After that, we can stop slinking around wearing sackcloth and ashes and being intimidated into being ashamed of profit. We have written the most remarkable chapter in the history of mankind with a pen called profit, and the rest of the world stands in awe of that accomplishment.

And finally, we would be wise to turn our hand to the task of taking back the reins of our own personal destiny, for surely freedom is too serious a matter to be entrusted to the whim of government, no matter how benevolent that government may profess to be.

Our present predicament cannot be blamed on any political party. We—you and I—are to blame for our present predicament, and you and I must bring about the change. It won't be easy but it must be done.

STOPPING THE NITPICKING CAREER OF OSHA

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. HANSEN. Mr. Speaker, since the Occupational Safety and Health Administration has become such a controversy in the past few days I would like to submit an article from the Richmond Times-Dispatch on December 17, 1976, by syndicated columnist John Chamberlain which offers some insight to OSHA and its problems for the benefit of my colleagues:

STOPPING THE NITPICKING CAREER OF OSHA

(By John Chamberlain)

Rep. George Hansen of Idaho is putting his neck on the block. He has accepted the founding chairmanship of something called STOP OSHA, a project of the American Conservative Union.

OSHA, of course, is the Occupational Safety and Health Act, and Representative Hansen risks being tabbed as being in favor of seeing people maimed or killed by accidents or poisoning in the course of their daily work.

OSHA, however, has been an extremely wasteful and ineffective guardian of the safety and health of the American workingman. The law that brought the OSHA administrative bureaucracy into being runs to 31 pages. But the regulations written by OSHA itself total 3,400 and run to 800 pages. It's like the Internal Revenue Code for impenetrability, and what factory boss has time to decipher it?

Hansen figures that compliance with OSHA—or attempted compliance—cost businessmen and consumers $2.5 billion in 1972 and $3.2 billion in 1973. The figures for the past three years are probably more horrendous.

Taxpayers have spent $409.3 million in four years just to maintain the OSHA bureaucrats. And what is there to show for the money? The number of job-related injuries increased by 270,000, or some 5 percent, between 1972 and 1973. Nearly 600,000 people have been killed by their jobs since OSHA started.

The truth is that OSHA attempts to do the impossible in trying to emulate the eyes of Jehovah. Lacking the resources to inspect everything, it stoops to the most petty sort of nitpicking in the breaking and entry that it does undertake. I say breaking and entry advisedly, for OSHA is addicted to working without search warrants; and it acts as prosecutor, judge and jury when it comes to slapping on the fines.

A few employers—in New Mexico, Texas and Ohio—have stood on the Fourth Amendment in refusing to let OSHA inspectors enter without showing "probable cause" for search. And a Maine employer has resisted paying a fine by standing on the Fifth Amendment, the one that supposedly guarantees a man his day in court. But usually employers go docilely. District courts in New Mexico, Texas and Ohio have upheld the Fourth Amendment in OSHA cases; in Montana and Georgia, however, the rulings have gone the other way.

OSHA can't operate with justice and impartiality without a billion-dollar budget, which wouldn't be worth putting up. So it stumbles along by picking its targets arbitrarily. A Cornell economist, Robert Stewart Smith, figures that OSHA has only enough inspectors to check a typical workers' plant once every 10 years. As for inspecting general business establishments, according to Smith, it might be able to look in on each one as often as Halley's comet visits the solar system.

Ironically, more than 300 hazardous conditions were uncovered in OSHA's own building in Washington, D.C. The General Accounting Office says that a quarter of the violations reported in four federal agencies were "of such a severe nature that, had they been found in private business, the employer would have been assessed substantial monetary penalties."

What most employers object to in OSHA is its "traffic cop mentality." Says Charles J. Pilliod Jr., chairman of the Goodyear Tire and Rubber Co., OSHA inspectors "feel they have to make out a certain number of tickets or they won't be doing their jobs."

Since nobody in his right mind wants to maintain a health hazard, employers think OSHA should offer consultative services so that problems can be eliminated without penalty prior to inspection. When equipment has been installed for years without causing any trouble, hard-and-fast rules should be relaxed.

For employers who can't afford legal fees for a Fourth Amendment case, the magazine *Factory* suggests a gimmick. If an OSHA inspector comes unannounced to your door, offer him an Official Public Servants Questionnaire. Designed to head off impostors, it asks such questions as "Has public servant ever read the Constitution of the U.S.?" Or: "What are your qualifications for conducting this investigation?"

A district court in South Dakota has upheld the right of an employer to deny entry to OSHA if it refuses to answer an 18-point list of questions, including proof of identity.

UNIVERSITY TUITION REMISSION PROGRAM

HON. ABNER J. MIKVA

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. MIKVA. Mr. Speaker, I am opposed on several grounds to the proposed regulations under section 117 of the Internal Revenue Code—published in the Federal Register on November 2, 1976—which would require employees of educational institutions to treat as taxable income scholarships given to any members of their families under a tuition remission program. This action is in clear violation of the statute, the intent of Congress, and the longstanding practice of the IRS. Equally important, the regulation seizes on one small piece of the "benefits in kind" problem, and thus aims the ax exclusively at the private liberal arts colleges. With these institutions already on the ropes, the IRS ends up in the role of the "bully."

The legislative history of section 117 of the Code clearly demonstrates the intent of Congress that tuition remission payments be treated as scholarships. The House committee report in 1954 specifically stated that a tuition remission payment constitutes a scholarship under section 117:

. . . If an educational institution (as defined in sec. 151(e)(4)) maintains or participates in a plan whereby the tuition of a child of a faculty member of any such institution is remitted at any other participating educational institution (as defined in sec. 151(e)(4)) attended by such child, the amount of tuition so remitted shall be considered to be an amount received as a scholarship under this section. . . ." H.R. Rep. No. 1337, 83d Cong., 2d Sess. A37 (1954).

In September 1955, when regulations were first proposed under section 117, and in June 1956 when the regulations were finalized, they incorporated the tax exemption of tuition remission payments contained in that House committee report. Since 1954 Congress has considered

section 117 on four different occasions and has never indicated that it has changed its view as enunciated in the 1954 House committee report and in the present regulations section 1.117–3(a).

In its report on the 1976 Tax Reform Act concerning areas for further study, the House Ways and Means Committee, of which I am a member, stated:

> With the assistance of the Internal Revenue Service, the committee also will study the tax treatment of scholarships and fellowships, including student loans that are forgiven, H.R. Rep. No. 94–658, 94th Cong., 1st Sess. 427 (1976).

The unilateral action of IRS in issuing the proposed regulations flies in the face of this congressional statement.

For over 20 years the Treasury Department has consistently interpreted tuition remission payments as nontaxable scholarships. Until November 2, 1976, when it issued its proposed regulations, the IRS apparently was satisfied that legislative intent dictated such a policy.

In addition to the clear inconsistency of the proposed regulations with the congressional committee reports accompanying section 117, a serious legal and equitable question exists as to the Commissioner's authority to reverse his long standing position through rulemaking. Such a change cannot be made by administrative fiat but may be accomplished properly only through legislative action. Indeed, this argument must be given even greater weight where, as here, the exemption of tuition remission payments was left unchanged despite repeated congressional considerations of section 117. As stated in *Helvering* v. *Winmill*, 305 U.S. 79, 83 (1938):

> Treasury regulations and interpretations, long continued without substantial change, applying to unamended or substantially reenacted statutes, are deemed to have received Congressional approval and have the effect of law.

The proposed regulations represent a clear cut attempt by Treasury to reverse unambiguous legislative intent and long accepted administrative interpretation, a reversal that requires congressional action.

The proposed regulations would reverse the present tax treatment of both the direct tuition remission and the exchange tuition remission programs. Direct tuition remission programs were adopted as a way of assuring that dependents of faculty and other employees could be educated at the institution where his or her parent taught. The tuition remission exchange programs were adopted to accommodate the many institutions existing at the time that educated only those of one sex. Since the enactment of the Federal income tax in 1913, grants made under these circumstances have been treated by colleges, universities, and the IRS as scholarships, first under the tax-exempt gift provisions prior to 1954, and subsequently under section 117.

The proposed regulations are ambiguous in their treatment of these two programs. The preamble to the proposed regulations states that the new rules will be applied prospectively to amounts "remitted, paid, or reimbursed by that institution or by any other participating institution" after November 2, 1976. Yet the proposed regulation itself, narrowly construed, would reserve prospective treatment only for exchange tuition remission programs. Equity demands that any change in the tax treatment of these programs be prospective not retroactive. It is clear, however, that much more consideration must be given to the subject of tuition remission. This is a task that Congress should undertake in the first instance.

Second, I believe that it is inappropriate for IRS to focus on private universities as the object of its first attempt to tax certain fringe benefits as compensation. The implications for public policy of the proposed regulations on these institutions are very serious. These regulations have a debilitating effect on the capacity of private universities to compete with public institutions. Many of the private schools are in financially precarious positions. The tuition benefit is an economic asset to financially pressed universities and colleges. Without it, current faculty and staff may be forced to drift away to the better salaried positions in private industry or in tax-supported public institutions, and the ability of these institutions to attract competent and highly qualified individuals to a relatively underpaid profession will be greatly diminished. Many university employees apparently took positions in these private institutions, sometimes at great financial sacrifice, because they knew that their children would be assured of a college education. The retroactive or immediately prospective implementation of these regulations frustrates some very reasonable expectations.

Further, it appears that no careful estimate of the amount of revenue to be derived from taxing tuition remission payments has been determined, even to compare with the great social, educational, and financial costs to individuals, institutions, and the Nation which would result. One estimate indicates that the return to the Treasury would be less than $5 million. Thus, while the return to the Treasury would be minimal, it is likely that the effect of the proposed regulations would be to destroy tuition remission programs, resulting in an increase in enrollment and cost of tax-supported institutions. According to the American Association of University Professors, there are approximately 27,000 students—out of a total enrollment of 11 million—currently enrolled in accredited institutions under tuition remission programs. The regulations, if adopted, would have the effect of making it more difficult for these children to obtain a college education. Since the advantages of tuition remission to the recipients and to society are substantial and since the increase in tax revenues would be insignificant, it seems unwise to enact the proposed regulations.

Finally, I believe that equity demands that tuition remission payments be excluded from gross income. Other substantial fringe benefits enjoyed in industry and business, such as payment of club fees, discounts on merchandise, and provision for company cars, are not considered taxable income to the employee who receives them. The most recent tax bill allowed for legal costs of employees to be funded as a tax-free benefit to such employees. Recently, the Treasury Department abandoned plans to tax certain employee benefits such as free airline passes to airline employees. These actions underline the inconsistency and unfairness of the proposed regulations to tax tuition remission programs, a decision which will impact on a profession which is inappropriate as a first target of the IRS desire to tax fringe benefits and a decision which could severely handicap the private educational institutions in this country.

In conclusion, I believe that IRS's position in this matter is short-sighted and not in the best interests of this country.

STRICT CONTROLS OVER FOREIGN TANKERS NEEDED

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. ANDERSON of California. Mr. Speaker, on Friday evening, December 17 of last year, the 32d Congressional District of California was rocked by a tremendous blast in the Port of Los Angeles. The *Sansinena*, a Liberian registered tanker, was ripped apart by a massive explosion that resulted in 8 known deaths, more than 50 reported injuries, and millions in property damage, mainly in the harbor community of San Pedro.

About a week before the *Sansinena* explosion, another Liberian tanker, the *Argo Merchant* ran aground off Massachusetts near the rich Georges Bank fishing grounds; 7.6 million gallons of crude oil has been spilled into the Atlantic.

Shortly after the *Sansinena* blew, two more incidents involving Liberian tankers occurred. The *Daphne* ran aground off Puerto Rico, and closer to home the *Olympic Games* suffered a hull puncture in the Delaware River near Philadelphia, spilling oil into ecologically sensitive and valuable marshes.

Mr. Speaker, these incidents have one thing in common. All of the vessels involved were registered under the Liberian flag—a course followed by many shipowners today to avoid U.S. taxes and safety requirements. The impact any one of these incidents would have had has been multiplied by the short timespan in which they occurred—and it should serve as a warning of more possible incidents to come.

American-flag vessels are considered safe, and their crews highly trained and second to none. Because of the cost involved, however, they are being beaten on the international market by ships sailing under "flags of convenience"—such as Liberia.

Approximately 300 million gallons of oil and petroleum products a day is brought through American ports. That

figure is expected to increase in the future. With that type of volume, we simply cannot afford to allow ships that do not comply with strict safety standards into our harbors. Should we continue to do so, we run the risk of an ecological disaster the size of the *Argo Merchant* occurring closer to shore. Or worse, an even greater explosion than the *Sansinena*, with a disastrous loss of human life.

I strongly feel that the United States should move to tighten safety standards on foreign flag vessels operating in our ports—if necessary on a unilateral basis.

The *Sansinena* and the *Argo Merchant* should show us what can happen on an even greater scale in the future. Should new legislation be necessary to enforce stricter standards on all tankers, it should be a priority item before the 95th Congress.

AMNESTY: PRO-CON DEBATE

HON. EDWARD I. KOCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. KOCH. Mr. Speaker, I introduced on January 4, 1977, the first day of the a concurrent resolution calling for President-elect Carter to extend his proposed amnesty to Vietnam-era Selective Service offenders and Vietnam veterans who received general and undesirable discharges or who deserted or were absent without leave during that era. I urge those of our colleagues who are interested in cosponsoring that resolution to contact my office.

The dialog on amnesty continues, and with that in mind, I am setting forth an article which appeared in U.S. News & World Report this week entitled "Pro-Con Debate: Pardon All Draft Dodgers?" in which my colleague, SONNY MONTGOMERY, and I summed up our respective views on this subject. The article follows:

[From the U.S. News & World Report, Jan. 10, 1977]

PRO-CON DEBATE: PARDON ALL DRAFT DODGERS?

INTERVIEW WITH REPRESENTATIVE EDWARD I. KOCH, DEMOCRAT, OF NEW YORK

Yes—"End a very divisive period in the life of this country"

Q. Representative Koch, why do you favor a presidential pardon for all draft dodgers—people who admittedly violated the Selective Service law during wartime?

A. Whether one was for the war or opposed to the war—and I fall into the latter category—I believe it's time that we ended a period in the life of this country which is very divisive. And the only way that we can end that divisiveness is to pardon or amnesty these people.

Q. Might not a blanket pardon set a dangerous precedent if the U.S. is again in a war and we need to draft a new Army?

A. It didn't set any great precedent when we provided amnesty and pardoned the Confederate soldiers in our great American Civil War. Somehow or other we survived that humanitarian compassionate response. And I think that we would similarly have a better life for our country coming out of such a response today.

Q. How do you justify pardoning a young man who ducked out of his military obligation when so many others responded and paid the price with their lives?

A. It is not in any way an attack upon those who responded to our country call. And I must say candidly—and I served in World War II—that if I had been called to serve during Vietnam, my makeup is such that I would have gone in and fought, because that's the way I would respond even though I was opposed to the war.

But that doesn't mean that those who refused to serve should not receive a compassionate response from this country. We are now four years past the point where the war was ended, and most people looking back would say: "We never should have been in that war in the first place."

Many people happen to believe in selective CO [conscientious objector] status which would permit alternative civilian service—and we ought to have had that. But, regrettably, we didn't have it at the time.

Q. Would you go further than President-elect Carter, and also pardon all military deserters of the Vietnam conflict?

A. Yes, I would. I know that's tougher for people to accept. Desertion is a very difficult situation for people to ever approve in any way. But those who have looked at the matter will say that in many cases—not all, obviously—there were people who deserted, not out of conscience, but simply to save their own skins, which may be understandable, but not acceptable.

But there are a number of people who deserted as a result of conscience, even though they went into the Army willingly. I've met some of those people who went into the Army, willingly went to Vietnam, and then were conscience-stricken there for a number of reasons. My Lai might be one, but there were other reasons. And rather than having the situation of the middle class, the more educated, who were able to avoid being drafted in the first place, it was often those who were in the lesser socioeconomic classes who didn't have that option, who went in, got conscience-stricken there, and found that their only recourse was to go AWOL—and ultimately that resulted in a charge of desertion.

Q. What about your resolution, now being presented to the House, in support of President-elect Carter's position on a pardon—just what is the purpose of that?

A. My purpose in introducing the resolution is to show that there is support for what he's doing. I don't expect that we're going to get an overwhelming number of members to sign it. I suspect that an overwhelming number of members agree with it, but would prefer not to have to go on record because it raises great emotional controversy.

There are people who simply will not accept any pardoning or amnesty on the grounds that, in some way or other, that sullies the records of those who served and those who died in Vietnam, fighting because they were good Americans following the orders of their country. I don't think that it does sully those records. I think that, of the men who served our country, many agree that it's time we brought this matter to a conclusion.

I have no expectation that it, in fact, would be passed. But what I'm trying to do is to indicate to the President-elect that he has support.

Q. If the draft dodgers ultimately are pardoned, do you expect that this will bring home everybody who is living now in voluntary exile in Canada, Sweden and elsewhere?

A. Everybody, no, but almost everybody.

"When the war is just"

Q. Looking ahead, do you favor some basic change in the laws to be made now in order to provide a legal alternative for youths who might object to fighting in future wars?

A. Yes. I submitted to the Congress, maybe four years ago, a bill which would have created the classification of selective conscientious-objector status. That means that if you can establish that you have the same moral opposition to a particular war required of those opposing all wars, you would be given conscientious-objector status on a selective basis and serve in a civilian role.

You might say, "Oh, isn't that opening doors to fraud?" Well, we have had judges in this country—they were ultimately overruled—who said, "No, that wouldn't open the doors to fraud."

But in Great Britain, for example, even during World War II, the British had—and still have—selective CO status, so that if there were people who were opposed to a particular war, they could serve in a noncombatant way. Few people will avail themselves of that opportunity when the war is just.

Q. How many people do you think should be pardoned?

A. All of those whose lives were in some way blemished as a result of the Vietnam War—including 250,000 who now have a "tarnished military record" and another 250,000 who failed to register, and thus are in violation of the draft law.

INTERVIEW WITH REPRESENTATIVE G. V. ("SONNY") MONTGOMERY, DEMOCRAT OF MISSISSIPPI

No—"It will open up more wounds than it would heal"

Q. Representative Montgomery, why do you oppose pardoning young men who objected to this country's role in Vietnam, years after that war has ended?

A. The years really don't have anything to do with it. These persons broke a federal law. Unless the law is changed retroactively, I think they should have to come back and face the music like everyone else who breaks a federal law.

We would be setting a bad precedent by giving a pardon to draft evaders. I think President-elect Carter is really opening up a can of worms that goes further than the precedent that he will set. The hard feelings that he will cause among the families whose sons have lost their lives, or husbands whose lives have been lost in Vietnam, or the millions of other Americans who went to Vietnam—I think he's going to have to face all that if he goes ahead and gives his pardon.

He's going to have to go back and look at all the discharges, which is a point that has not been brought out—all the discharges that are less than honorable of those who participated in the Vietnam War. And we're talking about over 300,000 such discharges.

Q. Wouldn't a blanket pardon be the best way to heal the wounds left by the war?

A. I believe it will open up more wounds than it would heal. I think Mr. Carter will open up other areas that probably he or others didn't realize might be involved.

Take a man who fought well in Vietnam. He was given commendations and bravery ribbons, he came back to the U.S., he got drunk, he stole the company commander's Jeep and took $20 that was in the Jeep, and he wrecked it and he ended up with a dishonorable discharge. Well, you have to go back and consider this fellow's discharge. In my opinion, he's done far less than the man who fled to Canada and was an evader.

Q. Would you favor lumping together the draft dodgers and the military deserters and making them all pay a price for wiping the slate clean?

A. I have problems trying to follow Governor Carter on what's the difference between an evader and a deserter. In my opinion, they're both in the wrong, but I don't think evading is any less of a violation than deserting.

If he lumps them together, maybe that will slow it down and there would be further opposition to what's he's trying to do.

Q. Draft violators offer a wide spectrum of reasons for their actions. Do you believe all of them should go to prison now?

A. I don't have any set formula that a young man should go and stay 10 years in jail. I'm not advocating that. All I'm saying is that he broke the law, and under the law he should come back and face the judge. I have no problems as to whether he's given a suspended sentence or what happens to him. I'm not for putting them in jail for a long period of time. I think, though, that they do have to come back and stand trial.

Q. If they don't do this, will there be a large number of young Americans who will be in hiding or overseas in exile indefinitely?

A. I don't think so. Eventually these Americans—large numbers of them—will come back to the United States and will go and stand trial.

In the past wars, this has happened. Most of the Americans who deserted or even stayed in parts of Korea and China have come back to the United States. I have no objections to their coming back. But I do think that they have to come back and stand trial.

Mass Amnesty: Dangerous Precedent

Q. A lot of the people who have opposed this pardon say that it would set a dangerous precedent for future wars. Do you hold with that, too?

A. Yes. I do. I think that's definitely true. You can go back—and I've done some research on the situation of past pardons and amnesties—I do think this would be a precedent by President-elect Carter.

No pardon or amnesty, as I understand it, was given for the Korean War. No pardon was given for World War I. Now, if you read closely about President Truman's amnesty for World War II, it was, in effect, handled case by case, and they still had to pay the penalty, and it didn't give them a clean bill of health.

Q. You've mentioned the case-by-case trial of individuals who have violated the law. Is that your solution?

A. I think that this is the way to do it—case by case. And I'm not saying what sentence that these young people should have when they come back. That's up to the judge. I accept his decision on it; I accept the jury's decision on it. But until we change the law, I have no better solution.

Q. President Ford's clemency program seemed to work fairly well for the military deserters, but not at all for the draft dodgers. Do you think something like "earned forgiveness" would be the solution?

A. It would be better than what President-elect Carter has offered.

Q. You circulated a letter to your colleagues seeking to drum up opposition to President-elect Carter's proposal. What has been the reaction?

A. I've been very pleased with the reaction that I have received from members of the House of Representatives—the only ones that I polled. We secured 106 signatures, about evenly divided on a bipartisan basis—I believe 66 Republicans, 40 Democrats of the 106 that I have received in support—asking President-elect Carter to reconsider his position on the draft dodgers.

We are not trying to embarrass President-elect Carter in any way. This is American. This is bipartisan.

PRIME MINISTER CALLAGHAN OF ENGLAND

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. COLLINS of Texas. Mr. Speaker, recently I read in the New York Times of an interesting speech by Prime Minister Callaghan. As the head of the Labor Party he spoke to a labor conference in Blackpool, England on September 28.

His sincerity and frankness merit attention of our Congress. We are all aware of the crisis created by the overspending of the liberal socialists in England.

I was keenly interested in some hard factual statements by Callaghan. It is time that the U.S. Congress started working towards a balanced budget and we need practical legislation in January.

Note his specific comments. Here are some sections from Prime Minister Callaghan's speech.

REMARKS BY PRIME MINISTER CALLAGHAN

For too long this country has trodden the primrose path and borrowed money from abroad to maintain standards of living, instead of grappling with the fundamental problems of British industry.

We are, as you know, still borrowing money. But this time we are not borrowing to pay for yet another short-lived consumer boom of the kind which was once supposed to buy success at the polls—or so we are told—but which never bought success in the world's marketplace or in the work place.

When we reject unemployment as an economic instrument, as we do, and when we reject also superficial remedies, as all socialists must, then we ask ourselves unflinchingly: what is the cause of unemployment? Quite simply and unequivocally, it is caused by paying ourselves more than the value of what we produce.

There are no scapegoats. This is as true in a mixed economy under Democratic Socialism as it is under capitalism or Communism. It is an absolute fact of life which no government, be it left or right, can alter.

We used to think that you could just spend your way out of a recession and increase employment by cutting taxes and raising government spending.

I tell you, in all candor, that that option no longer exists and that it only worked on each occasion since the war by injecting bigger doses of inflation into the economy, followed by higher levels of unemployment as the next step.

Each time we did this, the twin devils of unemployment and inflation have hit hardest those least able to stand them—the poor, the old and the sick—not those with the strongest bargaining power.

We have to get back to fundamentals. First, overcoming unemployment now unambiguously depends on our labor costs being at least comparable with those of our major competitors. Second, we can only become competitive by having the right kind of investment at the right kind of level and by significantly improving the productivity of both labor and capital. Third, we will fail if we think we can buy our way out by printing what the Chancellor has called confetti money to pay ourselves more than we produce.

Let me add one more thing that we are a little shy of saying in conference about industrial regeneration. The willingness of industry to invest in new plant and machinery requires not only that we overcome inflation but that industry is left with sufficient funds and sufficient confidence to make the new investment. When I say they must have sufficient funds I mean that they must be able to earn a surplus, which is a euphemism for saying that they must make a profit.

And whether you call it surplus or profit, it is necessary whether we live in a Socialist economy, a mixed economy or a capitalist economy. If industry cannot generate sufficient funds to buy its new plant and machinery, then you will not get the investment and we shall continue to go downhill. These are elementary facts of life, well-known to every trade unionist.

You know that we have not been creating sufficient new wealth as fast as we have been distributing it. Over the last three years, whilst our domestic product has risen by 2 percent, the increase in our public expenditures, including central and local government, has been 18 percent. We have bridged the gap by higher taxation, by borrowing from abroad and, worst of all, by printing money.

Like everyone in the Labor movement, I myself believe in a high level of public expenditure, but we cannot indefinitely rely on foreign borrowing to provide for greater social expenditure, a better welfare service, better hospitals, better education, the renewal of our inner cities. In the end these things will only be provided by our own efforts.

OSHA COURT CASES

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. HANSEN. Mr. Speaker, OSHA court cases have been in the Nation's headlines for the past few days and the status of the Occupational Safety and Health Administration has become very controversial. I would therefore like to offer the following information for the benefit of my colleagues in order to better help them understand the numerous legal cases presently pending in our court system:

OSHA COURT CASES

To date Occupational Safety and Health Administration (OSHA) court cases can be divided into three categories. They consist of Fourth Amendment challenges, Seventh Amendment challenges, and a case challenging the constitutionality of the entire OSHA enabling legislation. Constitutional challenges presently involve the 4th, 5th, 6th, and 7th Amendments to the Constitution.

FOURTH AMENDMENT CASES

Presently there are four prominent Fourth Amendment cases. They are Gibson's Products, Inc. of Dallas, Texas; Hertzler (Sandia Die & Cartridge Company) of Albuquerque, New Mexico; Rupp Forge Company of Cleveland, Ohio; and Barlow's, Inc. of Pocatello, Idaho. The primary Fourth Amendment case was Gibson's Products, which has been cited as precedent in the other three cases.

Gibson Case

The Dallas case established a court opinion early in 1976 that the OSHA act had attempted "a broad partial repeal of the Fourth Amendment" which is "beyond the powers of Congress." At issue is the government's right to search without a warrant or to have search authority without establishing probable cause as determined by a magistrate. Congressional authorization of such searches would be a violation of fundamental Constitutional principles.

In OSHA, as with many other government agencies, Congress has compounded its follies by allowing them to continually usurp the powers of Congress as well as the Judiciary—a serious violation of the separation of powers doctrine as well as a person's right to due process.

This landmark decision came January 26 before a three-judge federal court in the Eastern District of Texas. The case involved

Gibson's Products, Inc., a discount store in Plano.

The 1970 act creating OSHA says that inspectors are authorized "to enter without delay at reasonable times any factory, plant, establishment, construction site, or other area, workplace, or environment where work is performed by an employee or an employer."

Gibson's took the view that the granted provision violates the Fourth Amendment's prohibition against unwarranted searches. The three Federal judges agreed. In an opinion by Circuit Judge Thomas Gibbs Gee, the court found that the act attempted "a broad partial repeal of the Fourth Amendment," and this is "beyond the powers of Congress."

"In certain limited circumstances," said the court, "federal agents may enter private property without a warrant. By way of example, agents may reasonably inspect such regulated and licensed activities as distilleries and gun dealerships. Agents may enter coal mines; they may inspect a pharmacist's records on drugs. But the Constitution does not permit broad and indiscriminate inroads on Fourth Amendment safeguards, brought in the name of administrative experience." In brief: If an employer chooses not to admit OSHA inspectors voluntarily, the agents will have to get a judicial warrant under the familiar rules of probable cause.

H. R. Gibson, Gibson Products Company, 519 Gibson Street, Seagoville, Tex. 44562.

Robert E. Rader, Jr., Attorney at Law, 1266 East Ledbetter, Dallas, Tex. 75216.

Hertzler Case

Hertzler Enterprises, Inc., a corporation doing business as Sandia Die and Cartridge Company is the defendant in this case against the Secretary of Labor.

This case is especially significant because of its holding on the "probable cause" requirement. The Secretary of Labor has taken the position that if they do have to get a warrant, the only probable cause required is a showing that the employer is covered by the Act and refuses admittance. Hertzler holds otherwise—which is a real blow to the Secretary.

The three-judge panel held that "in this case, the Fourth Amendment protects Hertzler from being required to submit to the inspection proposed by the Administration unless a search warrant is first obtained on a showing of "probable cause."

They further outlined the principles whereby a business could be inspected. "First, the enterprise sought to be inspected must be engaged in a pervasively regulated business. The presence of this factor insures that warrantless inspection will pose only a minimal threat to justifiable expectations of privacy. Second, warrantless inspection must be a crucial part of a regulatory scheme designed to further an urgent federal interest. And third, the inspection must be conducted in accord with a statutory authorized procedure, itself carefully limited as to time, place, and scope."

The court also found that "there is no evidence that 'the thing being sought to be controlled—hazardous working conditions—exists in the area to be searched' in this case. It is presumed that Congress intended to empower the Administration to conduct nonconsensual inspections only pursuant to the authority of a warrant issued upon the satisfaction of standards of probable cause which have been articulated in the area of administrative searches."

R. Thomas Dawe, Houston, Housman, Freeman & Dawe, 2917 Carlisle, N.E., Alburquerque, N. Mex. 87123.

Rupp Forge Case

The judge has held in the case of the Rupp Forge Company of Cleveland, Ohio, the "Court is constrained to conclude that Congress did not intend to enact, nor did it in fact enact, proceedings encouraging or authorizing broad, arbitrary administrative searches, such as that herein suggested by petitioner. Clearly such unbridled authority is not cognizable under the Fourth Amendment to the United States Constitution."

The court did adopt "in toto" the opinions of the three-judge panel of the Gibson case.

Keith A. Ashmus, 1100 National City Bank Building, Cleveland, Ohio 44114.

Barlow Case

Barlow refused admittance to an OSHA inspector to "non-public" areas on the premises because he lacked either a search warrant or probable cause. The District Court ruled that OSHA could conduct the search, but two days later, when the inspection was to occur, Barlow again refused to admit the inspector. A three-judge panel was requested and granted to hear the case. Their decision declared the inspection provisions, Section 8(a), of the OSHA Act unconstitutional and void. This is a landmark decision in the fight for Fourth Amendment freedoms.

A temporary injunction was granted to Barlow at the time his new trial was granted. The terms of the injunction ruled that there was a danger of irreparable damage or harm to Barlow's interest, a greater risk to the corporation than to the defendant in complying with the order, society's interests would not be defeated by granting it, and the plaintiff was likely to succeed in his challenge.

This legal challenge has been taken on by Mr. Barlow without any outside financial help and with the deep conviction that OSHA is illegal in that it violates the personal freedoms guaranteed by the Constitution. The cost of compliance and fine were far less than what the estimated $50–60,000 legal battle will cost him.

Ferrol B. "Bill" Barlow, Barlow's, Inc., 225 West Pine Street, Pocatello, Idaho 83201.

John L. Punft, Attorney at Law, P.O. Box 953, Boise, Idaho 83701.

OTHER FOURTH AMENDMENT CASES

Jamco International is another Fourth Amendment case which is presently pending in Oklahoma City. In Jamco the Secretary has taken the same approach as in Joe Summers & Co., and stayed the entire proceeding pending resolution of Gibson by the appellate courts.

SEVENTH AMENDMENT CASES

Two other significant cases against OSHA under the Bill of Rights—Atlas Roofing Company, Inc., and Frank Irey, Jr., Inc.—involve attorney McNeill Stokes of Atlanta, Georgia. These have been received by the Supreme Court (to be heard in late October or November, 1976) and contend OSHA violates the right to trial by jury as guaranteed by the Seventh Amendment to the Constitution.

The issues in these cases are very grave and far reaching, involving a head-on collision with the power of the Executive Branch of government to impose impartial, self-executing fines on citizens without affording the fundamental requirements of procedural due process of law, the right to confront his accusers, and the right to be tried by a jury in the courts, not by administrative officials of the Executive Branch of government.

Atlas Roofing was inspected after an employee had died after falling through a hole in the roof. The inspector found a "serious" violation for failing to "provide and maintain a cover or standard railing on all exposed sides for the opening on the roof through which the employee fell." Atlas moved for a jury trial, claiming their rights under the Constitution and the Bill of Rights. The Court ruled that it lacked jurisdiction to hear the case.

Atlas was ordered to comply by the Occupational Safety and Health Review Commission. He then applied for a review by the Court of Appeals. The Court ruled that OSHA did not contravene Article III, or the Fifth, Sixth or Seventh Amendments to the Constitution, because "the Seventh Amendment requires that Congress provide a system of enforcement that gives employers the opportunity to put their case before a jury in a de novo proceeding in the District Court."

In the Irey case, the side of a trench where a man was working gave in and killed him. This case is very similar to the Atlas case, with one distinction, and that is that the Court of Appeals questioned OSHA's ability to "provide any more than limited judicial review" as violation of the Seventh Amendment. It was on this note that Irey appealed to the Supreme Court, and along with the Atlas case, was granted hearing to possibly test OSHA's constitutionality.

McNeill Stokes, Stokes and Shapiro, 3920 First National Bank Tower, Atlanta, Ga. 30303.

OTHER OSHA CASES

Godfrey Case

Another case against OSHA of note was won by Rapid City, South Dakota businessman Ray Godfrey, in a U.S. District Court which made it possible to give the Federal Government a taste of its own medicine—red-tape. The judge ruled that a business does have a right to protect itself against phony inspectors and a written record of answers to questions "reasonably related" to the identification is permissible.

Godfrey won his skirmish on February 19, 1976 before U.S. District Judge Andrew Bogue. "It is the feeling of this court," said Judge Bogue, "that it might be possible, but not easy, to compress into the total lines contained in the OSHA law more fertile opportunities for doubt, error, and abuse of individual liberties. The execution of this law, as opposed to the intent of it, leaves much to be desired."

Godfrey Brake and Supply Service, Inc., Ray Godfrey, P.O. Box 799, Rapid City, S. Dak. 57701.

Fitzwater Furniture Company

An extremely interesting case is the Fitzwater Furniture Company case coming out of the state court in Maryland. Fitzwater holds that the Maryland boiler inspector must get a warrant before he can enforce an inspection—and questions the validity of the entire administrative inspection scheme in the state of Maryland.

Mr. Edward Fitzwater, Fitzwater Furniture Company, Route #135, Mountain Lake Park, Md.

Blockson and Company Case

This case is relatively new; however, it may prove extremely interesting in that it is challenging the constitutionality of the entire OSHA Act.

James F. VanNamee, 1600 South Eads Street, No. 808 South, Arlington, Va. 22202.

John Paikos, 120 East Market Street, Indianapolis, Ind. 46204.

Mr. Dean Sassaman, Blockson and Company, 406 Center Street, Michigan City, Ind.

SUMMARY

There are a dozen or so cases against OSHA, with the number steadily rising. The very basis of the 1970 OSHA act is under attack—and might not survive. In all likelihood, OSHA will not continue to exist in its present state.

A change in the laws so adversely affecting so many American businessmen is in the air. The final blow to the illegality of OSHA rests with Congress, the forum that created the law. With an effective challenge on both fronts—in the Courts and in Congress—we may finally be able to remove that thorn that has so long been nagging at the sides of the free enterprise system.

OSCEOLAN CLOSES THE BOOKS ON LONG BANKING CAREER

HON. BILL ALEXANDER

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. ALEXANDER. Mr. Speaker, a stalwart citizen of my home town, Osceola, Ark., recently closed the books on a long banking career. The Osceola Times tribute to this fine woman was most deserved and I would like to share it with my colleagues and add that I am fortunate and proud to call Marjorie Doyle my friend:

[From the Osceola (Ark.) Times, Dec. 9, 1976]

MARJORIE DOYLE CLOSING THE BOOKS ON LONG BANKING CAREER; RECEPTION

(By Richard Milton)

Marjorie Doyle will close-out the ledger sheet on a long career in banking on December 15.

For her it will mark only the second change in a professional career that has spanned almost half of a century.

But, this time she is not changing her line of work, she is retiring.

Actually, the official date for retirement is December 31. But, she said "I am going to take a vacation starting December 15 and then just forget to come back to work."

Marjorie is a vice-president and manager of The Planters Bank branch office located in Gateway Shopping Center.

The directors, officers and fellow employees are planning a reception to be held in her honor at that banking office on December 15, during the hours of 1 to 4 p.m. Friends and patrons are being invited to make a special call at the bank on that day to visit with Marjorie.

She has been with The Planters Bank for as many years as there has been The Planters Bank. That would be since 1944.

But, her entry into the field of banking started on August 15, 1937. She remembers the exact date because of the circumstances surrounding her move from the teaching profession to banking.

She began with the Mississippi County Bank, now known as The First National Bank, and at that time located on the corner where the main office of The Planters Bank now stands.

As she explained "when The Planters Bank opened I left the Mississippi County Bank to go back to the old corner."

She went to work as an assistant cashier.

And, by her definition the title encompassed working as a teller, bookkeeper and oftentimes "stoking the furnace."

She will be the last of the original members of the staff to leave The Planters Bank.

She worked "on the old corner" for 23 years.

Then, in 1967 when an expansion took place with the opening of the Gateway branch Marjorie moved "west" to assume the position of manager. She has been the only manager the bank has known in its 9 years of operations at Osceola.

MANY CHANGES

Marjorie could fill a large book covering her experiences and observations of the banking business in this community. She knows just about everybody in the area, and has made friends with many, many folks.

There have been changes in the community, in the business of banking.

A few dramatic examples, that tell a lot in a few words:

In those days a dollar was difficult to come by but it was worth 100 cents;

The parking lots were filled with mules and wagons;

No one knew what a computer was, maybe the word hadn't been invented; and

The only industry was farming with the main industry being cotton chopping, picking and ginning.

NOT ALWAYS A BANKER

While the business of banking has occupied much of the 39 years of her adult life, a shorter six years career as a school teacher has proven the source of many happy, some sad, memories.

She began teaching in this area in a one room school at Sans Souci. At that time rural schools held classes for six grades all in the same room.

She held fort at the school for one year then moved into the Osceola System as a teacher at Osceola's only school. The building, now Middle School, housed all twelve grades, with two classes to each room.

She can recite an endless list of names of former pupils. And, many of them are still Osceolans.

She didn't make mention of specific individuals because she said she was afraid she couldn't remember them all.

But, we do know some of those names such as Ralph Wilson, Billy Beall, Henry James Swift, Harry Jones, Pearl Fergus, Frank Edrington, Billy Joe Edrington, and R. E. "Dick" Prewitt as a few who came under her tutelage.

She has kept up a close association with these former students over the years and they were the ones primarily responsible for "The Depression Days Reunion" which took place here in 1973.

At that time they adopted the motto: "stay alive until '75", and that because of the City's 100th birthday celebration of that year and when they had planned to get together for more reminiscing.

Marjorie has kept tabs on many of "my students" over the years.

She has a big scrap book with pictures and articles of the adventures of the Osceola men who marched off to World War II.

She kept busy during the war years writing letters to those servicemen.

Anyway, in 1935 she moved to Piggott for a one year stint as a school teacher; then to Armorel for one more year before coming back home to Osceola in 1937, and "I have been here ever since."

The reason she remembers the specific date she went into the banking world was because it was also the date she gave her notice she was resigning as a teacher and "they wanted to skin me alive." By "they" she means certain school officials.

HER FAMILY

Marjorie is not "legally" a native Osceolan. But, her heart and roots go deep into this delta soil.

She moved here as a little girl in the third grade.

Her parents are Mrs. Blanche Doyle and the late George Doyle. She and her mother, "91 years young," live in the homeplace on Johnson Avenue.

Mr. Doyle was superintendent of schools here for many years, and took in the years when Marjorie was a student and then later a teacher.

She said her brother, George, Jr., had a tough time with a sister as a teacher and a father as superintendent of schools. He now lives in Sikeston, Mo.

She has two sisters, Lib (Mrs. Raymond Cotner), who died an untimely death just a few days ago; and Ella Margaret (Mrs. Frank McDonald) now residing in West Helena.

Marjorie graduated from Osceola High School with the Class of 1928.

She received her further education at William Wood College in Fulton, Mo., where she received a teaching certificate to "teach in all the subjects."

And, that is the way it was in the schoolrooms of rural towns America.

INVOLVED

Over the years Marjorie has donated time and talent to most of the worthwhile and charitable fund raising drives within the City of Osceola.

She worked with the Tuberculosis, Red Cross, Easter Seals, Heart Fund, or name it and chances are she has helped out with the work involved.

She said she was going to limit her activities in this area now, but will continue to serve as chairman of the Memorial Fund Drive of the Heart Fund.

She is a member of the First Presbyterian Church and for something like 30 years was a youth advisor.

What are her plans for the future now that the call of regular hours will no longer be sounded?

She said she just "don't know."

First, she is going to rest up a bit, get the figures out of her mind, then worry about "having something to do."

UNUSUAL PRAYER

Marjorie holds membership in the National Association of Banking Women, she will become an associate member following retirement.

We happened upon a copy of a prayer she recited at the closing of a meeting of the banking group at Blytheville not so long ago.

Kind of unusual wording, making liberal use of banking terminology, but full of good thoughts for exemplifying Christianity through the art of banking.

And, a good way to bring an end to this article:

Holy Father . . . As Bankers, we are to serve the public every day in a way unchartered as we enter the door each morning. There will be many ways for us to witness for You in the statements we make to customers as they come before us in the course of the day. Make us worthy of their trust because their business is of great value, be the account great or small. May we be an asset instead of a liability as we check our tempers with our fellow employees and reconcile our complaints and show a common interest and dedication to our Banks. We do thank You for the unlimited credit of Your love and all the good things of life You have loaned us without interest or collateral, renewing this loan to us each morning and covering overdrafts of sin and pride. We ask that when the Book of Life is called for a final balance and audit, that it will be an asset for Thy glory. May God bless all of you—in Christ's name, Amen.

BICENTENNIAL

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 6, 1977

Mr. DERWINSKI. Mr. Speaker, the Bicentennial has been a tremendous national success. From time to time, I will be inserting into the RECORD a few reminders of this eventful year in our Nation's history.

A constituent directed my attention to an article, which appeared in the Monroe County News of Albia, Iowa, on July 5, 1976. A number of suburban Chicago-

ans shared this Iowa Bicentennial weekend with the newspaper's publisher.

However, the story the article tells is typical of the spirit and the appreciation of our history that developed in our Bicentennial Year:

BICENTENNIAL

(By Robert W. Larson)

Recipe for a Bicentennial weekend:

Take a heaping portion of history, season well with a pinch of nostalgia, toss in a strong dish of patriotism, add a cup of possessiveness, stir with religious fervor and put out to bake in a sun-filled three-day Iowa holiday weekend.

That's really what it was.

I've had a strong feeling that celebrating a nation's Bicentennial should be an emotional experience, a welling up of a sense of patriotism, a bit of pride, an appreciation of those things which have faded into history.

Perhaps because the Bicentennial weekend was just that for Dorothy and me, it will be one long remembered.

Much maligned Herbert Hoover belongs to the ages and as the years fade and the historical perspective becomes more real and our evaluations a bit more perceptive, Herbert Hoover becomes one of the great humanitarians of the past century. So a visit to West Branch and dinner at Hoover House, the restored hotel in the city, seemed a fitting way to begin a Bicentennial weekend.

Saturday there was only one place to be—in Iowa City drinking in the beauty of the Iowa's Old Capitol, painstakingly and lovingly restored in a six-year project.

The ceremony itself was rich in symbolism with an invocation by Sister Irene Munoz of the Muscatine Migrant Committee who gently reminded us that if we are to be a free nation the principles of "life, liberty, and justice" must be cherished by all of us.

Native Americans were represented by Donald Wanatee, a Mesquakie Indian and a University of Iowa graduate, while his father, Frank Wanatee of Tama, delivered the benediction in his native tongue.

In another touch of symbolism, descendants of Robert Lucas, the first Governor of the Territory of Iowa and the holder of that office when the cornerstone of Old Capitol was laid in 1840, led in a pledge of allegiance to the flag.

It was Simon Estes, a native of Centerville and a University of Iowa graduate, who provided the most thrilling moment of the afternoon as the powerful and deeply resonant voice of the Metropolitan Opera star, gave new meaning to the national anthem.

Had he been on his usual concert stage, the black opera star would have been called back for an encore and one sensed in the crowd almost an insistence that he sing the national anthem again.

And as Governor Ray took the old brass key and opened the door the crowds suregd up the steps, eager to make, or for some to renew, their acquaintance wtih this phase of their state's history.

Such were the crowds that we waited until 9 a.m. Monday morning for a leisurely examination of a masterful restoration of our state's beginnings.

And a Bicentennial weekend would have been incomplete without expressing in worship a "Thanks be to God". But no ordinary worship service could have given us much meaning to the day as that which we attended as invited guests of a good friend and member of the Amana Church Society.

Remembering the religious-communal way of life in the seven villages of Amana and the history of the Community of True Inspiration under Christian Metz and Barbara Heinemann Landmann, a worship service in that setting took on a new dimension on the 200th anniversary of the signing of the Declaration of Independence.

A deep appreciation of the history of Amana had added to the uniqueness of the service for us as the seven colonies combined in Bicentennial services in English and in German. In such a setting it seemed only natural that our hostess and the ladies in the group went in their entranceway and the host and the men entered the unadorned sanctuary from another entrance.

Nor was it at all strange to have the blackbonnets, shawls and aprons of the women in row-on-row benches on the right while the men in their suits (and some occasional colorful sports jackets) in their seats on the left.

With the elders in their place facing the congregation and the non-accompanied singing of a hymn in English and later a hymn in German, one felt a strong thread of history woven into the service. It seemed to connect the guarantee of religious freedom in the constitution with the inspiration of Christian Metz and the members of the Society whom we had joined in worship. Even the singing of "America the Beautiful" by the song leaders added a new dimension to the day.

But the tie with the past was not yet broken. Because we had been invited to share with same good Amana friends a Fourth of July picnic dinner in their home. From the quarries close to the colonies had come the stone for the house and the date on the front tells us the building was built just 16 years after the arrival of the first settlers in West Amana.

The house itself was mute testimony to the work-ethic of these early settlers who had moved westward from the six villages in the vicinity of Buffalo, N.Y. The craftsmanship of the 104-year-old home was everywhere evident.

It was truly a Bicentennial weekend—a blend of history, an appreciation of the past, an imperative for the present, and a prayer of thanksgiving. More one could not ask.

HOUSE OF REPRESENTATIVES—*Monday, January 10, 1977*

The House met at 12 o'clock noon.

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. WRIGHT) laid before the House the following communication from the Speaker:

THE SPEAKER'S ROOMS,
Washington, D.C., January 10, 1977.

I hereby designate the Honorable JIM WRIGHT to act as Speaker pro tempore for today.

THOMAS P. O'NEILL, JR.,
Speaker of the House of Representatives.

PRAYER

The Chaplain, the Reverend Edward G. Latch, D.D., offered the following prayer:

The hour cometh and now is when the true worshippers shall worship the Father in spirit and in truth.—John 4:23.

We thank Thee, our Father, for the renewing worship of yesterday and for the coming of a new day in which we pray that we may follow Thee more fully and serve our Nation more faithfully. Direct us, O Lord, in all our doings, with Thy most gracious favor and further us with Thy continual help, that in all our works, begun, continued, and ended in Thee, we may glorify Thy holy name and make Thy kingdom more real in our time; through Jesus Christ our Lord. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Heiting, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment concurrent resolutions of the House of the following titles:

H. Con. Res. 1. Concurrent resolution to provide for the joint session to hear the President; and

H. Con. Res. 2. Concurrent resolution to provide for a Committee on Inaugural Arrangements.

KORRY CHARGES

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, I hope some of my distinquished colleagues managed to stay awake after watching the Super Bowl, or "Super Bore." If they switched channels, as I did, they heard and saw sensational charges made against the Kennedy administration by former U.S. Ambassador to Chile, Edward Korry, on CBS's "Sixty Minutes."

Korry charged that the late Robert F. Kennedy, while Attorney General of the United States, "integrated" members of an American group of multinational corporations into "the covert operations of the United States." Thus, said Korry, Kennedy "legitimized the multinationals' passing money to foreign politicians, to bribing foreigners. * * * This is long before the Lockheed scandal."

Korry also charged that the Kennedy administration improperly used money from the Agency for International Development to stop the election of Salvador Allende and that the Vice-President-elect WALTER MONDALE has been "less than honest" about his knowledge of events in Chile.

Mr. Speaker, these are serious charges. Korry will seek to testify at Senate hear-

ings on the nomination of Theodore C. Sorensen to be head of the Central Intelligence Agency, to tell what be knows.

I sincerely hope Mr. Korry gets his chance. His charges are most serious and deserve the closest scrutiny, for the reputation of a former President and Attorney General of the United States are at stake.

One thing puzzles me, however: I have yet to hear any of my distinguished Democratic colleagues discuss Korry's charges. Perhaps they are still drowsy from the after-effects of the Super Bowl. When they recover they will, I hope, join with me, in calling for full open investigation of Korry's charges.

SETTING THE RECORD STRAIGHT

(Mr. RONCALIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RONCALIO. Is it the implication of our good friend in the well that such activity did not take place under the Eisenhower administration, prior to Attorney General Kennedy?

Mr. MICHEL. I am not saying that at all.

Mr. RONCALIO. I just want to make sure what the gentleman said.

Mr. MICHEL. This ought not to be confined to the present.

Mr. RONCALIO. We just want to make sure what the gentleman said, Mr. Speaker.

COMMUNICATION FROM THE CLERK OF THE HOUSE

Mr. SPEAKER pro tempore laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
January 7, 1977.

Hon. THOMAS P. O'NEILL, JR.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: I have the honor to transmit herewith a sealed envelope from the White House, received in the Clerk's Office at 12:00 P.M. on Friday, January 7, 1977, and said to contain a message from the President wherein he transmits the sixth special message under the Impoundment Control Act of 1974 for fiscal year 1977.

With kind regards, I am,

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.

REPORT OF FOUR ROUTINE DEFERRALS UNDER IMPOUNDMENT CONTROL ACT OF 1974—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–32)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection referred to the Committee on Appropriations and ordered to be printed:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report four new routine deferrals of funds totalling $685.0 million. The deferred funds were provided for the U.S. Railway Association and the U.S. Information Agency.

In addition, I am reporting routine revisions to five deferrals previously transmitted. They relate to programs of the Departments of Commerce and Health, Education, and Welfare, the General Services Administration, and the American Revolution Bicentennial Administration. The combined effect of the revisions is to increase the amount deferred by $130,000.

The details of each deferral are contained in the attached reports.

GERALD R. FORD.

THE WHITE HOUSE, *January 7, 1977.*

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
January 7, 1977.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: I have the honor to transmit herewith a sealed envelope from the White House, received in the Clerk's Office at 12:00 P.M. on Friday, January 7, 1977, and said to contain a message from the President on energy.

With kind regards, I am,

Sincerely.

EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.

REPORT ON ENERGY—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–33)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, without objection, referred to the Committee of the Whole House on the State of the Union and ordered to be printed:

To the Congress of the United States:

Three years have now passed since the Arab oil embargo demonstrated that the Nation had become overly dependent on other countries for our energy supplies. We have made progress in dealing with our energy problems but much more must be done if we are to achieve our objective of assuring an adequate and secure supply of energy at reasonable prices.

Action by the Congress is vitally important in the coming year on a number of matters affecting energy supply and demand. The outcome of that action will affect the Nation's security, economic strength and role in world affairs. Decisions made during this critical period will affect the health, welfare, quality of life and freedom of choice of our people for years to come.

A new Congress and change in Administration provide an appropriate occasion to review our energy situation, to summarize and share the knowledge that has been gained from analysis and debate over the past two years, and to outline the remaining need for action.

I am pleased that we have made a good start towards a comprehensive national energy policy; that we have taken major steps forward on programs to conserve energy, increase domestic energy production, develop strategic petroleum reserves, and develop new technology; and that our imports are less today than they would have been had we not begun taking the steps I outlined in my State of the Union address two years ago.

But our imports are higher today than they were three years ago, and we have not yet as a Nation faced up to many of the hard decisions and choices that are necessary before we can achieve our energy objectives.

The lack of better progress is regrettable but I believe the reasons for it are quite clear:

—First, the real nature of the Nation's energy problem and the implications of leaving it unresolved are not fully understood or appreciated by many people.

—Second, many of those who recognize the problem and the implications of not solving it have looked for easy solutions. This has led often to proposals which:

—promise far more than can be delivered; or

—expand significantly the role of the Federal Government.

We are now beginning to recognize more clearly the dangers of a greatly expanded Federal role in energy. We also now realize that other "easy" answers are turning out to be impractical, ineffective, or oversold.

FUNDAMENTAL ISSUES AND CHOICES

The decisions which must be made are difficult and the implications of the choices are far reaching. Thus, the Congress and the public should have the best possible understanding of the fundamental issues and choices that are involved in my proposals and in the proposals that will be forthcoming from the new Administration and Congress. There are five matters that deserve special attention:

—The high cost to the Nation of delay in solving our energy problem.

—The illusions and false hopes that are involved in some of the "easy" answers that have been proposed.

—The dangers of expanding the Federal role in energy.

—The need to recognize the interdependence of the U.S. and other consumer nations in energy matters.

—The necessity of facing up to the hard choices that must be made in order to achieve a balance among our Nation's security, energy, economic, consumer price, and environmental objectives.

HIGH COST OF DELAY IN SOLVING OUR ENERGY PROBLEM

A better understanding of our energy problem and the high cost of delay in solving it should help restore the sense of urgency that was lost when the em-

bargo ended, the gasoline lines disappeared, and an adequate supply of most forms of energy became available—though at higher prices.

OUR ENERGY PROBLEM

The principal energy problem now facing the United States is our excessive and growing dependence on imported oil from a relatively few foreign nations that own the majority of world oil reserves and have the ability to control world oil prices and production. We are also faced with a problem of shortages of natural gas in some areas. This problem will become more serious this winter if unusually cold weather continues and will grow each year as production and interstate sales decline—resulting in job losses and economic dislocation.

Our situation is the result of several factors. For example, our economy and style of life—neither of which can be altered quickly—have been built upon cheap and abundant energy. Low prices, resulting from government regulations and policies, and heightened environmental concerns encouraged excessive reliance on oil and natural gas, rather than coal which we have in plentiful supply. This led to wasteful and inefficient uses of oil and gas.

Our domestic production of oil and natural gas peaked in the early 1970's and has been declining steadily as cheap, easily developed reserves have dwindled. In the early 1980's, oil and natural gas from Alaska and the Outer Continental Shelf—our last frontiers—will help offset the decline in production from onshore areas. But, overall, domestic oil and gas production will again decline precipitously unless higher prices are available to cover the costs of developing resources which are not now economically feasible to produce.

Meanwhile, our energy demands are increasing to meet the needs of a growing economy. We are not expanding the use of coal and nuclear energy fast enough as substitutes for oil and gas, where this is possible, or to meet growing energy requirements. Instead we have turned to imports, and imports will continue to grow as we face declining production and depletion of oil and gas reserves.

THE COSTS OF DEPENDENCE

The real price paid for our growing dependence on imported oil is our vulnerability to significant economic and social disruption from the interruption of oil imports. Apart from the inconvenience experienced by millions of people, the 1973–74 embargo and the resulting higher prices caused a loss of about 500,000 jobs and approximately $20 billion in our Gross National Product. The sudden four-fold increase in OPEC oil prices contributed significantly to inflation. Since 1974 our dependence on imports, particularly from Arab nations, has grown by a million barrels per day, so that an interruption of supply today would be even more disruptive of our economy than the 1973–74 embargo.

Another cost of energy dependence is the outflow of U.S. dollars to pay for imported oil, totalling about $34 billion in 1976 or $160 for each American, eleven times that in 1972.

Still another cost is the limitation on our freedom of action in international affairs due to our vulnerability to the threat of another interruption.

REALISTIC ENERGY GOALS

In my first State of the Union Message two years ago, I outlined a comprehensive energy program for the Nation with goals of:

—Halting our growing dependence on imported oil.

—Attaining energy independence by 1985 by achieving invulnerability to disruptions caused by oil embargoes, by reducing oil imports to between 3 and 5 million barrels per day with an accompanying ability to offset any supply interruption with stored petroleum reserves and emergency standby measures.

—Mobilizing our technological capability and resources to supply a significant share of the free world's energy needs beyond 1985.

These goals do *not* mean that we should seek to eliminate all energy imports, because generally it will be in the Nation's best interest to continue importing energy when it can be obtained at lower cost—as long as we have the ability to withstand interruptions of supply from insecure sources.

The goals *do* mean that we should reduce and then eliminate our vulnerability. In the longer term, we should better use our resources and technological capability to regain our ability to assure the reasonableness of energy prices.

Whether the date I set for achieving energy independence and the level of imports I proposed are realistic has been the subject of considerable debate. I believe the goals could be attained if the Congress approved the critical legislation I proposed, but that is not the major point. The essential point now is that we recognize that our excessive dependence and vulnerability are costly and that it is in the Nation's best interest to solve the problem as soon as possible.

AVOIDING ILLUSIONS

A number of well-intentioned proposals have been advanced for dealing with our energy problems which, when evaluated, are found to have far less potential or merit than is claimed by their proponents. Four such proposals warrant special attention: advanced energy technologies, energy conservation in lieu of increased production, abandoning nuclear fission energy or coal, and oil company divestiture. All four are likely to receive congressional consideration this year.

CONTRIBUTION OF ADVANCED TECHNOLOGIES

There are repeated claims that fusion, solar or geothermal energy, or some other advanced technology, will soon provide a virtually risk-free answer to our energy needs. Such claims warrant and have been given very careful consideration because new technological developments have helped us solve many problems in the past.

There are three common myths about fusion, solar and geothermal energy:

—That major contributions to our energy supplies can be expected soon from these sources.

—That there are no serious economic, safety, technological or environmental problems to be overcome before these technologies are available for widespread use.

—That the remaining problems can be quickly resolved by greatly increasing Federal funding for R&D.

The facts are that major economic, safety and environmental problems must be solved and major technological breakthroughs are needed before these emerging technologies will be available for widespread commercial use.

Practical and economic applications are already available in the case of energy from geothermal steam. However, geothermal steam resources are geographically limited, and major technical, environmental and economic hurdles must be overcome before other sources of geothermal energy will be available for practical application.

Heating with solar energy is expected to become economically competitive soon in some areas with electrical heating by electricity—but not by oil and gas. Costs will have to be reduced substantially before solar heating and cooling systems will be competitive for widespread use. Major breakthroughs are needed before fusion and solar energy will produce economical electric power. Costs must be reduced and problems of safety and environmental impact must be solved.

Advanced technologies cannot contribute significantly to our energy supply in the near or mid-term. Even with intensive efforts to achieve necessary breakthroughs, solar, geothermal and fusion energy are expected to provide no more than one percent of our total energy supplies by 1985 and no more than five-seven percent by the year 2000. Until these advanced technologies are available and are acceptable from the standpoint of cost, safety and environmental impact, we must rely on resources and technologies which are available.

Federal funding for the development of advanced technologies has been increased substantially over the past two years in my budgets—to the point where Congressional add-ons above my requests generally cannot be used productively. When major breakthroughs are required, the necessary ingredients are ideas and time. Large funding increases are likely to be wasteful and often merely contribute to overly optimistic expectations.

ENERGY CONSERVATION IN LIEU OF PRODUCTION

There are some who believe that our energy needs for a growing population and expanding economy and workforce can be satisfied by eliminating wasteful and inefficient uses of energy. They point out correctly that the ready availability of cheap energy in the past tended to encourage uses of energy which now are wasteful.

There is no question but that energy conservation can and must contribute to the solution of our energy problems. In many cases it will be cheaper, more efficient, and involve less environmental impact, to reduce energy waste than it will be to produce a comparable amount of new energy. We have begun major efforts in energy conservation, and progress is being made in reducing growth

in energy consumption. However, it takes time to achieve results from energy conservation because energy-intensive plants and equipment and consumer products (such as automobiles and appliances) will only be replaced gradually as they wear out.

Growth in our energy demands simply cannot be eliminated without severe economic impact. We must have *both* energy conservation and sharply increased energy production if we are to meet the needs for energy in a growing economy. To rely solely on energy conservation would soon mean a lower standard of living for all, and insufficient energy to keep people employed in productive and meaningful work.

ABANDONING COAL ENERGY OR NUCLEAR FISSION

Some believe that we should not continue or expand the use of coal and others have the same view about nuclear energy. But a careful look indicates that we do not have a *choice* between increasing the use of coal or nuclear energy. Instead, we must increase the use of *both* coal and nuclear energy until more acceptable alternate energy sources are available. Even with strong efforts to conserve energy, and increased efforts to produce domestic oil and natural gas, we must increase the use of both coal and nuclear energy if we are to meet the demands for energy for a growing economy. The only alternative is to increase our growing dependence on imported oil.

One example will illustrate the point: Nuclear energy now provides about nine percent of our electrical requirements. If this nuclear energy were not available and we substituted imported oil, our imports would increase by about one million barrels of oil per day. If we were to substitute coal for existing nuclear energy, additional annual production of 100 million tons would be required.

DIVESTITURE

Some suggest that our energy problem would be relieved by divestiture of the major oil companies—either by barring investments in other energy sources (horizontal divestiture) or by barring integrated operations whereby one company engages in production, refining, and marketing activities (vertical divestiture). They claim that divestiture would increase competition and thereby reduce petroleum prices and lead to a more intensive pursuit of alternative domestic energy resources and alternative energy technologies.

Experience has demonstrated important advantages from vertical integration in commercial and industrial activities in terms of efficiency and operation. Vertical divestiture may merely mean that petroleum products pass through the hands of more middle men—resulting in higher consumer costs. Horizontal integration has helped make private capital and managerial talent available to develop other alternative energy resources which will be used to supplement our declining oil and natural gas resources.

Proponents of divestiture have yet to present concerete evidence that divestiture would either increase domestic energy production or provide cheaper and more secure energy supplies. Such evidence should be required and weighed carefully along with the evidence against divestiture before the Congress acts.

DANGERS OF EXPANDING THE FEDERAL ROLE IN ENERGY

Much of the dispuite over energy legislation has resulted from differing views as to the appropriate role of the Federal Government.

The primary responsibility for providing the Nation's energy needs has been and should continue to rest with the private sector. The amount and forms of energy that are produced and used depend upon literally millions of decisions reached daily by individuals and organizations throughout the country. Since energy is such a pervasive component of our economy and our daily lives, special care must be taken to assure that Federal actions affecting energy—including changes in the Federal role—will help solve the problem rather than make it worse or cause new problems.

The Congress should give particular attention to the growing concern throughout the country about the size and cost of Government, the extent of Government intrusion in individuals' activities, and the burden of regulations which restrict freedom of choice. Unfortunately, the people who develop Government rules and regulations often do not understand adequately the conditions they are regulating nor appreciate fully the impact of their decisions on the millions of people who are affected.

The question of the proper role of the Federal Government in energy has become important in the case of:

—Controls over decisions that would normally be made in the marketplace.
—Mandatory conservation measures.
—Resource exploration and energy production.
—Energy research, development and demonstration.

GOVERNMENT CONTROLS OR MARKETPLACE DECISIONS

Many legislative proposals will involve the question of whether there should be greater reliance on decisions made in the marketplace or upon regulations, standards and controls developed by the Federal Government.

Recent experience has again demonstrated that Federal price and allocation controls on energy ultimately work against the best interests of consumers because they reduce incentives to produce new supplies, they reduce competition and they reduce freedom of choice. For example, Federal price controls on natural gas have been a major factor leading to declining production and to wasteful and inefficient use of this resource. Also, controls on crude oil have contributed to a decline in production.

Federal price and allocation controls inevitably mean that the Government must employ people to develop, issue and revise regulations; to sit in judgment on requests for exceptions when the regulations do not fit real world circumstances; and to enforce the regulations. Federal controls mean that millions of decisions by producers, distributors, wholesalers, retailers *and* consumers must conform with Government-developed regulations—even when the people directly involved know that another course of action makes more sense and would still be in the national interest.

The principal alternative to Federal regulation and controls is to allow prices and allocation of energy supplies to be determined in the marketplace—with decisions made by individuals most directly affected. In some cases, avoiding or eliminating price controls can mean somewhat higher consumer prices in the short run. But the higher prices help stimulate new production and cut down on wastefulness. Market decisions are also made faster and more efficiently, and often result in cheaper prices than if the Government made the decision. For example, the higher prices that will result from removing price controls from new natural gas would be less costly for consumers than the expense of switching to higher priced alternative fuels.

MANDATORY CONSERVATION MEASURES

Most of the problems resulting from Federal price controls also result from Federal attempts to dictate specific actions by individuals to conserve energy. The prospect of higher energy prices already is stimulating major efforts by individuals and organizations throughout the country to use existing products and develop new means to reduce wasteful and inefficient uses of energy. Such voluntary action by consumers is far preferable to mandatory measures selected and enforced by a larger and more obtrusive Government.

RESOURCE EXPLORATION AND ENERGY PRODUCTION

The Congress will again be faced with the question of whether the Federal Government should be directly involved in energy resources exploration, development, production and refining activities.

Some argue that such activities can be performed better by the Federal Government, that it is necessary to have a Government "standard" to evaluate private industry performance and prices, or that subsidized Government performance is necessary to hold down consumer prices. Others argue that the Government should itself explore Federal lands to better ascertain the value of lands that it leases for the production of energy resources.

In fact, the Federal Government can seldom perform these functions faster, more efficiently or at lower cost than private industry. There is no convincing evidence that the competitive leasing system now used does not provide a fair return and adequately protect the public interest.

Despite this, proposals undoubtedly will continue to surface which would expand the size and role of the Federal Government to include exploration, production and related activities. Accordingly, the best course of action will be to insist upon hard facts to support the proposal and close scrutiny of each measure to see whether the advantages outweigh the disadvantages.

ENERGY RESEARCH, DEVELOPMENT AND DEMONSTRATION

Still other questions before the Congress involve the Federal role and funding for developing, demonstrating and promoting the use of new technologies for energy production and conservation.

I believe that Federal funding is necessary and appropriate for the development of new energy technologies which show promise of providing a significant and economical way of producing or conserving energy—but only when such technologies would not be developed by the private sector. During the past two years, I have requested major increases in funding for energy R. & D. to carry out this policy.

However, continued vigilance is needed to prevent the use of Federal funds to duplicate or displace funds which industry would otherwise spend, and to insure that the Federal Government does not fund efforts which industry has rejected for lack of merit.

In addition, new energy technologies must find acceptance and application in the private sector—unlike the situation in military and space exploration programs where the Federal Government is the only customer. This presents a special challenge because those responsible for managing Federal funds for energy R&D often are not in a good position to determine which technologies are likely to meet success in the private sector.

The Federal Government is not well equipped to carry out commercialization, marketing, promotional and technical assistance for particular energy technologies, products and services. Such activities should be left to private industry.

At present, the Federal activities that would contribute most to the resolution of our energy problem are:

—Adopting changes in laws, policies and programs that will lead to a framework within which individuals and organizations outside the Federal Government can make efficient, effective and equitable decisions about energy. Laws and policies which discourage energy production or energy conservation should be modified.

—Providing carefully targeted support for energy R&D.

—Providing incentives and assistance where necessary—such as tax relief—in order to encourage energy conservation and aid low-income people in adjusting to higher energy prices which are necessary to generate new, adequate supplies.

INDEPENDENCE OF THE U.S. AND OTHER CONSUMER NATIONS

The 1973–74 embargo, and the impact of sharply increased prices for OPEC oil, demonstrated clearly that the interests of the United States are tied closely to those of other nations which are net importers of energy. Events in the last three years have demonstrated further that the economies of all nations are interrelated and that no nation can be truly economically independent in the world today. Many of our allies, and particularly the developing countries, do not have major undeveloped energy resources and therefore are even more dependent upon imported energy than is the United States.

Much progress has been made in strengthening energy cooperation among the industrialized nations through the International Energy Agency. Together we have coordinated efforts to reduce our collective vulnerability by establishing a long-term program for conservation and development of new energy sources, and an energy-sharing program to safeguard against supply interruptions. It is in the best interests of the United States to continue to work with and assist other energy-consuming countries in meeting their energy needs—by reinforcing their conservation efforts, accelerating development of conventional and new energy sources, and encouraging the application of practical new energy technologies.

Such efforts will help to achieve our objective over the long term of a better equilibrium between energy supply and demand in the world, so that no one group of nations will be able to impose its will on others. Unless we are willing to cooperate with others, and provide adequate assistance in this area, continued dependence by many nations on a few countries for energy supplies will remain a major source of world political instability, uncertainty, and economic hardship.

At the same time, of course, we must continue our efforts to strengthen relations between oil-importing and exporting nations, recognizing that cooperation is important to the future well-being of both.

ACHIEVING BALANCE AMONG CONFLICTING OBJECTIVES

In recent years, we have been faced more and more with the dilemma that actions taken to achieve one important objective conflict with efforts to achieve other objectives. For example, we learned that tough standards and deadlines applied in the early 1970's to reduce pollution from automobiles and improve air quality resulted in lower gasoline mileage and higher gasoline consumption, poorer vehicle performance and higher consumer costs.

Conflicting objectives are becoming more and more apparent as we recognize that the easy solutions are illusions and that there are major dangers in expanding the Federal role. The Nation must, therefore, face up to the task of achieving a balance among conflicting objectives involving energy.

LOW CONSUMER PRICES VERSUS ADEQUATE AND SECURE ENERGY SUPPLIES

The reality that must be faced which appears to cause the most difficulty for elected officials is the inevitability of higher energy prices. Energy prices, particularly for consumers, will increase in the future principally because prices in the past have been held artificially low through Government controls, because cheaper domestic energy resources are being depleted, because past energy prices have not reflected the costs of environmental protection, and because foreign nations are charging more for the energy that they export. There simply are no cheap energy alternatives. Higher prices will continue to be a major factor in obtaining adequate and secure energy supplies.

This difficulty is compounded for elected officials because it takes a long time in energy matters for our actions to show results—a condition that is not readily accepted in a Nation that prefers quick results. The prospect of higher prices will provide the incentive for increased energy production but it then takes up to 5 years, for example, to bring a new off-shore oil well into production and up to 10 years to bring a new nuclear electric generating plant on line.

ENVIRONMENT VS. ENERGY

An equally difficult problem is that of finding the best possible balance between our energy and environmental objectives. Our environmental objectives are also important in protecting health and welfare, improving our quality of life, and preserving natural resources for future generations. On the other hand, an adequate energy supply is essential to our objectives for a strong economy, national defense and role in world affairs, and in achieving a better life for all.

The conflict between energy and environmental objectives will require attention when the Congress considers amendments to the Clean Air Act, changes in laws governing the development of Federally-owned energy resources, improvements in the processes for siting and approving energy facilities, and controls on domestic energy production activities such as the surface mining of coal.

More specifically, air quality requirements forced shifts away from the use of domestic coal to the use of oil and natural gas which are now in short supply. Some air quality requirements—particularly emission standards set by States—are far tighter than necessary to meet standards which have been set to protect human health.

Efforts are now underway to reverse this trend but it is clear that increased production and utilization of domestic coal in the short term requires either billion dollar investments in controversial control equipment or some relaxation of existing air quality requirements. Most such requirements were set before we were aware of our energy problems, and often without sufficient regard to energy or consumer price impact. They often prevent substitution of coal resources for oil and gas and prevent construction of new coal producing and burning facilities.

As another example, concerns about environmental protection and reclamation requirements for surface mining activities led to legislation—twice vetoed—which would have imposed unnecessarily rigid requirements, cut domestic coal production and employment and led to even great reliance on imported oil. Under these bills, Federal regulations and enforcement activities—which would contribute to a larger more cumbersome Federal Government—would have supplanted State laws and enforcement activities which are now in place and which require reclamation as a condition of mining.

LIMITING GROWTH

The concept of limiting growth and development is an important ingredient in some efforts to halt increased domestic energy production or to develop and use newer energy technologies. Limits on growth and development may be necessary in particular areas, but I oppose strongly the concept of limiting growth as an objective in itself. For the Nation, I continue to believe that our best hope for increasing the standard of living and quality of life for all our people is to expand and strengthen our economy and, in this way, create meaningful and productive jobs for all who are willing and able to work. The energy policies and goals that I have advocated do not require limiting our economic growth below historic rates.

ELIMINATING RISK

In some cases, attempts to increase domestic energy production—particularly from nuclear energy and coal and oil and gas resources from Outer Continental Shelf—are met with demands that virtually all safety and environmental risks be eliminated.

There should be no disagreement that major efforts are necessary to protect human health and the environment. For example, strong efforts have already been made in the case of nuclear energy and an excellent record of safety and minimum environmental impact has been achieved. However, it must be recognized that there is no practical way of completely eliminating all risks. Further, each additional precaution adds cost in terms of reduced supplies or higher prices. Risk levels that have already been achieved in many energy producing activities are often far lower than those readily accepted in other human activities.

Because different Committees of Congress have responsibility for competing objective, it is especially difficult to achieve a satisfactory balance among our national objectives in new legislation. This will be a continuing problem in the new Congress and I can only urge that each measure affecting energy supply and demand, which also involves other objectives, be evaluated carefully to assure that the resulting costs, risks and benefits are truly in the national interest.

THE NEED FOR SUBSTANTIVE LEGISLATION AFFECTING ENERGY

We have made significant progress over the past two years toward establishing the framework of law and policies that are needed to permit decisions and actions that will help solve our energy problem.

Nine of the proposals that I submitted have been enacted into law. However, there remains a long list of requirements for early Congressional action.

HIGHEST PRIORITY

Because of the large number of legislative proposals that need action, I want to make clear that I believe highest priority should be given to measures which:

—Remove Federal price regulation from new natural gas supplies. This action is crucial to increasing domestic production and reducing wasteful and inefficient uses.

—Revise domestic crude oil price controls to allow greater flexibility in establishing a pricing formula that will encourage increased domestic production and assist in phasing out controls. This action is needed to overcome problems in the current law and to reduce market distortions that have resulted.

—Make clear our determination to expand capacity in the United States, principally through the efforts of private industry, to enrich uranium needed to provide fuel for nuclear power plants. This action is necessary to permit increased use of nuclear power in the U.S. and to assure other nations that we will be a reliable supplier of uranium enrichment services—a step that is critical to our nuclear non-proliferation objectives.

—Amend the Clean Air Act to:

—Change the statutory requirements for meeting auto emission standards so that there can be a better balance among our environmental quality, energy, economic and consumer price objectives.

—Provide flexibility in meeting national air quality standards applicable to power plants and major industrial facilities so that the use of coal can be continued and expanded, and so that new energy-producing facilities can be constructed in selected areas that have not yet attained national air quality standards.

—Remove the requirement imposed by the courts for preventing significant deterioration of air quality in areas already meeting air quality standards—until information is available on the impact of such actions and informed decisions can be made.

OTHER IMPORTANT PROPOSALS

In addition to the above select list, favorable action is needed from the Congress on legislation in all the following areas:

NATURAL GAS

—Temporary emergency legislation to allow pipelines and high priority users to obtain intrastate gas at unregulated prices for limited periods—to help cope with shortages and curtailments.

OIL

—Authorization for the President to impose fees and taxes as standby emergency measures to reduce energy consumption in the event of another embargo—to avoid the inefficiencies and burdens of mandatory conservation measures in such emergencies.

—An Oil Spill Liability Act—to establish a comprehensive system of liability and compensation for oil spill damage and removal costs.

—Authorization for private competitive exploration and development of the National Petroleum Reserve in Alaska.

COAL

—Extension of the authority to require utilities and other major fuel-burning installations to convert from oil and gas to coal.

—Changes in provisions of the Coal Leasing Amendments Act of 1976 which unnecessarily delay or restrict leasing and development of coal on Federal lands.

—Authority for the use of eminent domain in the construction of coal slurry pipelines and authority for the Secretary of the Interior to issue certificates of public convenience and necessary to expedite slurry pipeline construction.

NUCLEAR ENERGY

—Authority for the Energy Research and Development Administration to enter into cooperative agreements with firms wishing to finance, build, own and operate uranium enrichment plants—to assure the availability of required capacity and avoid the need for billions of dollars in Federal outlays when the private sector can provide the financing.

—Authority to increase the price for uranium enrichment services performed in Government-owned plants—to assure a fair return to the taxpayers for their investment, to price services more nearly comparable to their private sector value, and to end the unjustified subsidy by taxpayers to both foreign and domestic customers.

—Criteria for the control of nuclear exports which is necessary to round out the comprehensive nonproliferation, export control, reprocessing evaluation and waste management program I outlined in my October 28, 1976, statement on nuclear policy.

—Reform the nuclear facilities licensing process by providing for early site review and approval and encouraging standardization of nuclear facility design.

BUILDING ENERGY FACILITIES

—Establishment of an Energy Independence Authority (EIA), a new government corporation, to assist private sector financing of new energy facilities.

—Legislation to encourage states to develop comprehensive and coordinated processes to expedite review and approval of energy facilities siting applications, and to assure the availability of sites.

ENERGY CONSERVATION

—Tax credit for homeowners to provide up to $150 for purchasing and installing insulation in existing residences.

—Reform of rate setting practices applicable to public utilities—to expedite consideration of proposed rate changes and assure that rates reflect full costs of generating and transmitting power.

1978 BUDGET REQUESTS

My 1978 Budget which will soon be forwarded to the Congress will include major new funding to:

—Continue and expand our extensive program of energy research and development in cooperation with private industry which is directed toward new technologies for conserving energy and for producing energy from fossil, nuclear, solar and geothermal sources.

—Implement the Early Storage Program as part of the Strategic Petroleum reserves which will provide up to 500 million barrels of oil for use in emergency situations such as an embargo.

—Implement my conprehensive nuclear policy statement issued on October 28, 1976.

—Continue ERDA's development program on the liquid metal fast breeder reactor—to resolve any remaining environmental, safety and safeguards questions—so that this technology will be available to bridge the gap until advanced technologies can make their contribution to our energy needs.

—Provide increased operating funds for other Federal energy activities.

I urge the Congress to approve these funding requests.

REORGANIZATION OF FEDERAL ENERGY ACTIVITIES

Under the provisions of the Energy Conservation and Production Act of August 1976, I am called upon to make recommendations to the Congress with respect to the reorganization of Federal energy and natural resource activities. At my direction, a major study of alternatives had already been undertaken in May 1976 under the leadership of the Energy Resources Council and the Office of Management and Budget.

I have reviewed the findings and recommendations from the study. Within the next few days, I will forward my recommendations to the Congress.

TIME TO ACT

The Nation has waited far too long for completion of a sound and effective national energy policy. In many cases, the issues are complex and controversial, the decisions are tough to make—particularly because the right decisions will be unpopular in the short run. The costs of continued energy dependence are far too great for further delay.

The Congress *can* act. It is a matter of organizing itself to make the tough decisions and choices and moving ahead with the task. I urge the Congress to weigh the alternatives carefully and proceed promptly.

THE WHITE HOUSE, *January 7, 1977.*

INTERNATIONAL FISHERY AGREEMENT BETWEEN THE UNITED STATES AND THE SOCIALIST REPUBLIC OF ROMANIA—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–34)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Merchant Marine and Fisheries and ordered to be printed:

To the Congress of the United States:

In accordance with the Fishery Conservation and Management Act of 1976 (P.L. 94–265; 16 U.S.C. 1801), I transmit herewith a governing international fishery agreement between the United States and the Socialist Republic of Romania, signed at Bucharest on November 23, 1976.

This Agreement is significant because it is one of a series to be negotiated in accordance with that legislation. I urge that the Congress give favorable consideration to this Agreement at an early date. Since 60 calendar days of continuous session as required by the legislation are not available before March 1, 1977, I strongly recommend that the Senate consider issuance of a joint resolution with the House of Representatives in order to bring this Agreement into force by that date.

INTERNATIONAL FISHERY AGREEMENT BETWEEN THE UNITED STATES AND THE GERMAN DEMOCRATIC REPUBLIC — MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–35)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Merchant Marine and Fisheries and ordered to be printed:

To the Congress of the United States:

In accordance with the Fishery Conservation and Management Act of 1976 (P.L. 94–265; 16 USC 1801), I transmit herewith a governing international fishery agreement between the United States and the German Democratic Republic, signed at Washington on October 5, 1976.

This Agreement is significant because it is one of the first to be negotiated in accordance with that legislation. I urge that the Congress give favorable consideration to this Agreement at an early date. Since 60 calendar days of continuous session as required by the legislation are not available before March 1, 1977, I strongly recommend that the Congress consider issuance of a joint resolution to bring this Agreement into force by that date.

ADMINISTRATION'S EFFORTS TO ENCOURAGE PROGRESS TOWARD RESOLUTION OF PROBLEMS OF CYPRUS—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–38)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on In-

ternational Relations and ordered to be printed:

To the Congress of the United States:

This report is the seventh in a series of messages pursuant to Public Law 94–104 through which I have informed the Congress of my Administration's efforts to encourage progress toward a resolution of the problems of Cyprus. In addition to reviewing those efforts, this report will offer several conclusions with regard to the role the United States can and should play in settlement of the Cyprus dispute.

I know the Congress shares my views that a just and early settlement of the Cyprus issue is essential both for humanitarian reasons and to preserve peace in an area of great importance to the United States. For more than two years my Administration has actively sought to help the Cypriot communities find the basis for substantive and sustained negotions. We have given the UN Secretary General our full and active support in the negotiations conducted under his auspices, negotiations which I believe continue to offer the best possible forum for progress.

I also know the Congress shares my deep regret that progress in the negotiations has been extremely slow. Inconclusive procedural disputes have diverted the parties from pressing issues of substance. Domestic pressures and international rivalries have detracted from the will and commitment that are essential to progress.

In an effort to break this impasse, my Administration has sought over the past several months to develop a set of basic principles that might provide a framework for continued and fruitful intercommunal negotiation. These principles are based on the concepts which I set forth in my sixth report to the Congress and which Secretary of State Kissinger expressed in his September 1976 UN General Assembly address. These concepts rest on a fundamental premise which I believe all concerned parties continue to share—that any settlement must preserve the independence, sovereignty, and the territorial integrity of Cyprus. These concepts emphasize the importance of territorial adjustments to reduce the area controlled by the Turkish side, while taking into account the economic requirements and humanitarian concerns of the two Cypriot communities, including the plight of those who remain refugees. Constitutional arrangements are of equal importance in providing conditions under which the two communities can live in freedom and have a large voice in their own affairs. Finally, security arrangements which would permit the withdrawal of foreign military forces other than those present under international agreement are essential for a lasting settlement.

Based upon these concepts, the United States has engaged over the past several months in extensive consultations on the Cyprus issue with the nine-member states of the European Community, seeking their support for a new and accelerated approach. Through these consultations we are jointly developing the basic principles which we hope will stimulate the negotiations. We have been greatly impressed and encouraged by the extent to which there is a consensus in these consultations on both the principles and the urgent need to reopen substantive intercommunal negotiations.

I remain convinced, however, that neither the United States nor any other outside country or group of countries should seek to impose a settlement on Cyprus. The principles we are developing should serve only as a basis for negotiation. It is the Cypriot communities themselves who must ultimately decide their relationship and final territorial arrangements.

In addition it is clear that a final solution must also have the support of the Greek and Turkish governments. It is my firm conviction that we must seek to maintain the trust and friendship of both these NATO allies. Thus my Administration has sought to strengthen through negotiation our security ties with both Greece and Turkey. We have consistently sought to follow a balanced course in strengthening our relations throughout the area. We therefore welcomed the steps taken by the Congress to relax the arms embargo on Turkey so that Turkey can better meet its NATO obligations. We have demonstrated through tangible assistance our support for Greece. We have worked actively, both directly and through the United Nations Security Council, to defuse recent tensions between Greece and Turkey over the Aegean. These two countries have now agreed to a negotiating process called for in the U.S. sponsored Security Council Resolution which I hope will lead to a settlement of their dispute.

It is essential to the success of an equitable and lasting Cyprus settlement that the United States maintain a balanced relationship among all concerned parties. It would be a mistake to place undue pressure on any one party for the sake of what appears to be a quick settlement. I believe the Congress would agree that such a path would neither promote lasting progress on Cyprus nor serve the cause of stability in the Mediterranean.

I am not pessimistic about the future of the Cyprus negotiations. I continue to believe that a way can and will be found to achieve a just and equitable settlement which will enable all of the people of Cyprus to shape a harmonious and prosperous future.

GERALD R. FORD.

THE WHITE HOUSE, *January 10, 1977.*

REPORT OF SECRETARY OF AGRICULTURE IN ACCORDANCE WITH OREGON DUNES NATIONAL RECREATION ACT OF 1972—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Interior and Insular Affairs:

To the Congress of the United States:

I transmit herewith the report of the Secretary of Agriculture which was prepared in accordance with the Oregon Dunes National Recreation Act of 1972, P.L. 92–260.

The Secretary of Agriculture has concluded that the Oregon Dunes National Recreation Area is not suitable for inclusion in the Wilderness System and I concur with his recommendation.

GERALD R. FORD.

THE WHITE HOUSE, *January 10, 1977.*

READ BEFORE YOU VOTE

The SPEAKER pro tempore (Mr. WRIGHT). Under a previous order of the House, the gentleman from Maryland (Mr. BAUMAN) is recognized for 15 minutes.

Mr. BAUMAN. Mr. Speaker, tomorrow the House will vote on House Resolution 9 which would extend the life and powers of the Select Committee on Assassinations for another 2 years. While the resolution does not provide funds for the committee, it does, if passed, commit the House to an investigation far greater in scope or jurisdiction than was ever contemplated last September when this group was originally created.

Last Thursday I placed in the RECORD materials pertaining to the conduct of the general counsel of this select committee, Mr. Sprague, which every Member should read before casting their vote. But I also want to call to the attention of the House that the resolution on which we will be asked to vote tomorrow is very different than that which the House approved last September. For those who will take the time to read the actual language of the resolution you will find that it greatly expands the jurisdiction of this select committee far beyond an investigation of the assassinations of John F. Kennedy and Martin Luther King. In my judgment it calls for an open-ended inquiry into the operations of the CIA and the FBI, as well as possibly usurping the jurisdiction of the Committee on the Judiciary over civil rights legislation.

Mr. Speaker, the reason that I have come to this conclusion lies in the language of the resolution itself. Here is what House Resolution 1540, which was passed on September 17, 1976, said as to committee jurisdiction:

> The select committee is authorized and directed to conduct a full and complete investigation and study of the circumstances surrounding the death of John F. Kennedy and the death of Martin Luther King, Junior, and of any others the select committee shall determine.

Compare this with the new and much broader jurisdiction being granted in House Resolution 9:

> The select committee or a subcommittee thereof is authorized and directed to conduct a full and complete investigation and study of the circumstances surrounding the assassination, murder, homicide, and death of President John F. Kennedy and the assassination, murder, homicide, and death of Martin Luther King, Junior, and of any other persons the select committee shall determine in order to ascertain whether the existing laws of the United States, including but not limited to laws relating to the safety

and protection of the President of the United States, assassinations of the President of the United States, deprivation of civil rights, and conspiracies related thereto, as well as the investigatory jurisdiction and capability of agencies and departments of the United States Government, are adequate, either in their provisions or in the manner of their enforcement; and shall make recommendations to the House, if the select committee deems it appropriate, for the amendment of existing legislation or the enactment of new legislation.

Mr. Speaker, it is easy to see that this is no simple extension of existing powers of a select committee of the House. Taken together with the grandiose plans for a massive staff of more than 170 people and spending of more than $13 million over 2 years, this jurisdiction could easily be turned into the biggest circus Capitol Hill has seen in years. It is little wonder that Walter Pincus, writing in Sunday's Washington Post pointed to this select committee in the following highly critical manner:

Perhaps the worst example of congressional inquiry run amuck is the present House investigation into the Kennedy and King assassinations. Pushed by publicity and pressure from a narrow but vocal contituency, what amounts to a multi-million-dollar criminal investigation is going to be conducted in the name of the House.

Mr. Speaker, I urge all Members to vote against House Resolution 9 under suspension tomorrow. At the very least we should be able to consider this matter with full and free debate and an opportunity to amend and place restrictions on this costly operation. By rejecting this resolution under suspension we will be able to consider this matter fully and thoughtfully instead of squandering the taxpayers' money on what may well turn into a witch hunt which creates more questions than it solves.

MILLER OFFERS ARC HIGHWAY FUNDING FORMULA CHANGE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. MILLER) is recognized for 5 minutes.

Mr. MILLER of Ohio. Mr. Speaker, with the convening of the 95th Congress, I am again introducing my legislation to permit financing the construction of the important Appalachian Highway System with 90 percent Federal, and 10 percent State, matching funds.

We first introduced this bill last year and we were later joined by several House colleagues as cosponsors of the legislation. Equally important to congressional support for this formula alteration is support from the States in the impacted Appalachian region.

The current Federal share is limited to 70 percent and covers only ARC funds allocated to Appalachian States. Our bill represents a major step toward making funds for completion of the 3,289-mile Appalachian Highway System competitive with Interstate Highway projects.

The bill would allow the total Federal share of funds for Appalachian Highway projects to rise to a maximum of 90 percent when an appropriate amount of regular—non-Interstate—Federal aid highway funds are combined by Appalachian States with ARC highway funds.

Under the proposed amendment to the Appalachian Regional Development Act, Federal-aid highway funds to take advantage of the higher Federal ceiling would be optional with the Governors of each of the region's 13 States. Under the option, a State's share of a highway project's cost could range from the current 30-percent level to as low as 10 percent.

The maximum amount of Federal-aid—title 23—highway trust—funds that could be used would be 45 percent of the project's total cost while the maximum amount of ARC funds would be 60 percent. Any combination of these two Federal funds would be permitted as long as they don't exceed each's percent of the project's total cost. Federal-aid funds are allocated to each State to be invested at the discretion of the States. The Highway Trust Fund includes revenues from user taxes on gasoline and automotive parts and accessories.

This bill provides—at a time when State matching funds are scarce—a way to stretch State funds by lowering the State matching burden to 10 percent. This increases the ability to continue highway construction.

The new 90–10 percent funding option is offered to stimulate construction of Appalachian Highway projects by providing each State more flexibility in its funding options and by lessening the States' matching burden.

Mr. Speaker, completion of the Appalachian Highway network is essential to the continued growth of the entire region. If this Congress is committed to the broadening of job opportunities, the expansion of industry and business and the expeditious movement of goods and services to and from the marketplace, then this bill should, indeed, be welcomed with enthusiasm. This legislation offers us a constructive, realistic opportunity to move forth with completion of the ARC Highway system and, consequently, open up areas of economic expansion and growth which have been dormant as a result of poor Appalachian access roads.

I encourage my colleagues in the Congress to give this legislation the priority attention it needs and deserves.

CONSUMERS GET NEW PROTECTION AGAINST SELLER/LENDER KICKBACKS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, consumers who find is necessary to finance more expensive household items or cars in 1977 will be protected from high dealer/lender kickbacks if a new Federal Reserve Board proposal becomes effective.

Financial lenders often give sellers back a percentage of the financing costs for steering business their way. In the past, that sweetheart relationship was rarely disclosed to the customer and, therefore, he or she never knew if a better deal could have been found by going directly to the bank or by checking with other dealers first. Although car dealers have been criticized most for this practice, most all areas of consumer financing are potential areas of abuse.

Last August, the Federal Reserve Board issued a proposed interpretation of the Truth in Lending Act—regulation Z—which would have allowed these kickback arrangements without any notification to the consumer. When I saw this proposal I immediately expressed my concern to the Federal Reserve Board. Its new stand on the disclosure of kickbacks—just published—is a total departure from the earlier position and I am delighted to see that the Board now agrees with me that consumers would benefit from knowing about these arrangements between bank and dealer, or between seller and finance company.

The Fed is in charge of enacting and enforcing the Truth in Lending Act which was passed by Congress so that consumers would have all of the information necessary to comparatively shop among different financing options. As I said in September, the Board's earlier position was actually permitting a cover-up to the consumer of a potentially abusive situation. Sometimes in these kickback schemes the dealer receives only a portion of the interest rate charged the consumer. But in far too many cases, the bank sets an interest rate and tells the dealer that he can keep anything over that amount.

The enactment of the new Fed interpretation will also make it easier to enforce the Federal Trade Commission's new rule of preservation of consumers' claims and defenses—the so-called, Holder in Due Course Rule. This ruling makes financial institutions responsible for goods they are financing should those goods prove inferior. Unless it can be proven that the dealer and the lender had a business arrangement it would be virtually impossible to provide consumers with the protection against shoddy products bought on time that the FTC felt was necessary when it enacted this rule.

In my opinion, under-the-table kickbacks have cost consumers millions in the past few years without their ever knowing about it and should be totally outlawed. But if consumers continue to pay the dealers for their service to loan institutions for bringing new customers in, then at least those customers ought to know about it. Should the new Federal Reserve Board interpretation of the Truth in Lending Act become effective, as I have every reason to believe it will, consumers will have a chance to know.

CONDUCT OF INVESTIGATION BY SELECT COMMITTEE ON ASSASSINATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 15 minutes.

Mr. GONZALEZ. Mr. Speaker, there appeared in the CONGRESSIONAL RECORD for January 6, 1977, a copy of a letter from my distinguished colleague Chairman DON EDWARDS to former Chairman Tom Downing of the Select Committee

on Assassinations. I had responded to Chairman EDWARDS' letter on December 28, 1976. Unfortunately only Chairman EDWARDS' letter was presented, but my response which was also available, was not.

Fundamental fairness to the Members of this House dictates that all correspondence between Chairman EDWARDS and myself be presented so each Member may properly evaluate the issues raised in the complete context. The letters follow:

HOUSE OF REPRESENTATIVES,
Washington, D.C., December 28, 1976.

Hon. DON EDWARDS,
Chairman, Subcommittee on Civil and Constitutional Rights, Committee on the Judiciary, Rayburn House Office Building, Washington, D.C.

DEAR DON: Thank you for sending me a copy of your letter to Chairman Downing dated December 16, 1976, with respect to the conduct of the investigation by the Select Committee on Assassinations.

I don't know if Chairman Downing has replied. I hope he has. I certainly agree with you that the Select Committee in its investigation must proceed under the highest ethical and professional standards. Indeed, we have never set lower standards, nor do we intend to. One of the major characteristics of this project is the preservation of the integrity of the Congress. If we should do anything in an unprofessional manner, our credibility as well as that of this House would be diminished.

I have not had an opportunity to see the December 15, 1976, Los Angeles Times article to which you referred. However, you are, of course, aware that matters stated in the press sometimes are taken out of context, and sometimes are inaccurately phrased. Rather than indulge in fruitless discussion over the content of what may have been reported in the media, it is preferable just to discuss the matters raised by you in your letter.

The transmitters to which you refer are not for the purpose of secretly recording interviews of witnesses. Rather they are to be used by investigators during surveillance activity when safety considerations dictate that investigators transmit their own comments. I am sure you are aware that in some situations it is imperative to have this type of equipment for the protection of investigators. In fact, we are seeking only two (2) such devices.

Mr. Sprague clearly stated that no person would be taped unless he both knew and consented to having the conversation or interview taped. Indeed, the transcripts and tapes of interviews of witnesses who already have been interviewed show conclusively that in each case the individual knew the conversation was being taped and consented to the taping. The record of one of our subcommittee executive sessions will further show that the witness knew that the interview was being taped, that he consented to the taping and that he further knew that the tape might be played before the Select Committee. I will be happy to make that or any transcript or tape available for your review should you so desire.

Second, as to the polygraph, it has been stated at our public hearing as well as in our press conferences, and in executive session, that our use of the polygraph would, of course, only be with the consent of the witness. Our position has remained the same from the beginning.

We do not intend to use the polygraph or stress evaluators in any way as evidence to be produced at any hearings. The use of these devices is identical to that employed by other investigative agencies, i.e., to aid the investigation but not to establish conclusions. It also should be pointed out that from the commencement of this investigation we have rejected the concept of using the polygraph or stress evaluators for employment purposes in any fashion.

It should be noted that we have never attempted to hide the fact of our use of the polygraph and stress evaluators. As with most of our decisions they are made openly and are always subject to review by the House. Thus you will find both items, and all other hardware requests, clearly specified in our proposal budget.

Third, with respect to your concern for the protection of the civil and constitutional rights of witnesses, the Committee is most aware of the problem. This consideration was an important factor which contributed to our decision to hold executive sessions. We have determined to utilize public hearings only where the evidence to be elicited has been clearly established and verified.

As a matter of fact, the decision to hold public hearings was in accord with the rules of the House and on the occasions when we didn't, it was only after a rollcall. One such resulted in a 6–6 tie. In this manner, we can avoid the potential danger of exposing an individual or governmental agency to unwarranted ridicule or the airing of unproved allegations. We feel strongly that the vehicle of public hearings to prove or disprove allegations when the appropriate evidence has been accumulated and corroborated is very important to this process. Developing our findings with full knowledge at each stage of our proceedings will, we believe, foster the support of the American public for our ultimate conclusions. We feel that holding public hearings distinguishes our process from that of the Warren Commission which as you know, held their proceedings in closed sessions until the final report was filed. In our judgment, that secrecy reduced the effectiveness of the Commission work and subjected its conclusions to skepticism and speculation which would have been avoided by public disclosure.

Incidentally, the situations where Mr. Sprague has spoken publicly have been at the public sessions and at various press conferences, sometimes under the express instruction of Chairman Downing; unfortunately, the Committee, under Mr. Downing did not establish guidelines. But, Don, I cannot say that Mr. Sprague has been anything but prudent and restrained, even in the absence of this needed Committee guidance. Let me assure you of the fact that if I should become Chairman, this will be provided in a manner similar to the handling of your Committee during impeachment hearings.

Again, I appreciate your concern and assure you that the Select Committee will conduct this investigation in accordance with the highest ethical and professional standards. I hope you will always share your concern with me and the members of the Committee.

With kindest personal regards, I am

Sincerely,

HENRY B. GONZALEZ,
Member of Congress.

COMMITTEE ON THE JUDICIARY,
HOUSE OF REPRESENTATIVE,
Washington, D.C. 95th Congress,
January 6, 1977.

Hon. HENRY B. GONZALES,
U.S. House of Representatives, Rayburn House Office Building, Washington, D.C.

DEAR HENRY: Thank you for your letter of December 28, 1976. I appreciate your timely comments on my letter to Chairman Downing regarding the investigative methods of the Select Committee on Assassinations. Your letter certainly showed that, should you become Chairman, you intend to approach your responsibility in a serious and professional manner.

But while I found your letter partly reassuring, it raised some additional questions in my mind that I believe need to be answered. It is important to all of us to have a clear understanding of the Select Committee's policies and procedures before any informed decisions can be made on the wisdom of its continued existence or on the amount of its budget requests.

As a preliminary matter, I am enclosing a copy of the Los Angeles Times article I referred to in my letter to Chairman Downing. It will enable you to understand the specific context in which I wrote that initial letter. I am certainly aware that media accounts of various events are not always entirely accurate, or are often taken out of context. But in this case I am disturbed by the fact that the remarks that prompted my letter to Chairman Downing were direct quotations from Mr. Sprague.

In your letter you discuss the use of the small transmitters referred to in the article. I am very relieved to hear that the transmitters will not be used to secretly record interviews of witnesses. However, your statement that they will be used during "surveillance activity," leaves me no less concerned than Mr. Sprague's earlier statements as reported in the Times. I am absolutely unable to comprehend a situation which would require "surveillance activity" of any kind. Who and under what authority will the Select Committee's investigators be surveilling? If you could describe more fully what you have in mind and indicate whether American citizens would be the subject of such surveillance and if so, under what circumstances, I would appreciate that information.

You also state that the transmitters are "imperative . . . for the protection of investigators" in some situations, and that I must certainly be aware of this necessity. I assure you I am not aware of any such need. What kind of activity is contemplated that would require such protection? From whom? And more importantly, by whom? The scenes that come to mind when I ask myself such questions are, as you can imagine, extremely disturbing. A Congressional investigation is not, and should never be, a game of cops and robbers.

I am relieved to know that polygraphs will be used only with the consent of the witness. Does the Committee also intend to obtain such consent for the use of the stress evaluator as well? Moreover, you state that the Select Committee's use of the polygraph and the stress evaluator would be identical to that of other investigative agencies. It is my understanding, however, that the FBI does not use stress evaluators at all, because the Bureau is not yet persuaded of its reliability even as an investigative device.

House Resolution 9, introduced on January 4, 1977, differs from the Resolution last year creating the Select Committee on Assassinations. The new resolution now contains a stated Legislative purpose. I cannot express too vigorously my hope that public hearings will be directed strictly at the Legislative purpose. Periodic hearings while you are gathering information and evidence flies in the face of every constitutional safeguard attendant to criminal investigations. Spilling out bits and pieces of information before the investigation is complete will obviously present a distorted picture and cannot avoid, in my view, causing serious harm to potential witnesses.

I do not believe that the American people or the Congress wish to indulge in a temporary suspension of the Bill of Rights, however laudable the ultimate purpose may be. I believe the House of Representatives commissioned a thorough, serious study of the problem. The argument that one of the purposes of this investigation will or should cause the public to hold Congress in higher esteem is only valid if the task is completed

in a dedicated manner which respects all traditional safeguards.

Frankly, I am not persuaded at this point that either the Committee or the staff has given adequate thought to its basic role, its own procedures, and the myriad problems which confront it in the proper discharge of the authorizing resolution. I would like to be able to fully support the activities of the Select Committee. I cannot, however, approve any tactics or techniques which I have personally fought against when employed by the Executive Branch or by other Congressional committees.

Since we all will be called upon to support your work I believe these questions must be dealt with in a most precise manner as soon as possible.

My staff and I will be happy to meet with you, your members and your staff at any time to discuss this matter of common concern.

With kind personal regards.

Sincerely,

DON EDWARDS,
Chairman, Subcommittee on Civil and Constitutional Rights.

HOUSE OF REPRESENTATIVES,
Washington, D.C., January 7, 1977.

Hon. DON EDWARDS,
Chairman, Subcommittee on Civil and Constitutional Rights, Committee on the Judiciary, Rayburn House Office Building, Washington, D.C.

DEAR DON: Thank you for your letter of January 6, 1977, in response to my letter of December 28, 1976, with respect to the conduct of the investigations into the assassinations of President John F. Kennedy and Dr. Martin Luther King, Jr.

At the very beginning of that letter I stated: "I certainly agree with you that the Select Committee in its investigation must proceed under the highest ethical and professional standards. Indeed, we have never set lower standards, nor do we intend to. One of the major characteristics of this project is the preservation of the integrity of the Congress. If we should do anything in an unprofessional manner, our credibility as well as that of this House would be diminished."

The statement relating to the use of transmitters and polygraphs must be read in the context of the foregoing assurance. Similarly, it must also be read in the context of my statement on page 2, paragraph 4 that all such requests are subject to review by the House.

Somehow, Don, in my haste to respond to the letter you wrote to Former Chairman Downing, I apparently did not make clear that each investigative technique must be approved by the full committee after careful consideration, debate and deliberation.

Each of us has taken an oath to uphold and preserve the Constitution. We intend to do no less in the course of this investigation and most emphatically not to, "indulge in a temporary suspension of the Bill of Rights."

I welcome the opportunity to discuss this with you and your staff at the earliest possible time to avoid further misunderstandings as to our intent and purpose.

With kindest personal regards, I am

Sincerely,

HENRY B. GONZALEZ,
Member of Congress.

P.S.—I am so grateful to you to have had an opportunity to speak to you on the telephone today. I had dictated the above before I spoke to you and am most grateful to have a chance to meet with you Monday as you consented to and will see you then.

Second, Mr. Speaker, the gentleman from Maryland [Mr. BAUMAN] introduced into the record of this House a personal attack on the committee's chief counsel, Richard Sprague. He suggests, among other things, that Mr. Sprague has "virtually assumed the role of chairman of the committee." It is implicit in that unfounded accusation that the members of the committee have abrogated their constitutional duties. The conclusion has no basis in fact. Indeed, I can state quite unequivocally that my colleagues on the committee from both sides of the aisle have worked diligently to insure a credible, professional, ethical, independent investigation. There is no reason to believe that we will continue to do less. One must bear in mind that when the House created the select committee last year, it had nothing, not even a place to meet, much less a staff. It had a total life span of 2½ months.

Next, Mr. Speaker, the gentleman introduced an article which appeared in the New York Times on January 1, 1977, written by David Burnham. I do not often dignify unfounded accusations in the press by responding to them, but where, as here, a journalistic vendetta dredged from the turgid and murky waters of big city politics more than a decade ago has been introduced into the record of this House, I am constrained to conclude that justice and fair play require a response. Failure to respond to accusations of this nature would work a fraud upon the House.

Mr. Burnham in his article suggests that the committee did not do a background investigation of Mr. Sprague prior to his selection as chief counsel. What Mr. Burnham did not write was that Mr. Sprague was appointed Special Assistant to the Attorney General of the United States in charge of the Boyle prosecution. A fact which was known and considered by members of the committee when they unanimously confirmed Sprague as chief counsel. I think it only fair to conclude that if the U.S. Department of Justice found Mr. Sprague to be of questional integrity or ability the appointment would never have been made.

Finally, Mr. Speaker, I think it is clear that any person who has spent as many years in public service and who has prosecuted as many cases as has Richard Sprague will be the target for criticisms. Where those criticisms are politically motivated they command no credence.

GILLIS LONG SPEAKS OUT ON LATIN-AMERICAN RELATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. REUSS) is recognized for 30 minutes.

Mr. REUSS. Mr. Speaker, Representative GILLIS LONG, chairman of the Joint Economic Committee's Subcommittee on Inter-American Economic Relationships, has been called by the press "an emerging voice on Latin American policy in the Congress." From my association with him on the Joint Economic Committee, I know his long interest in promoting greater understanding between the United States and our South American neighbors.

In a speech to the International Trade Mart in New Orleans, Louisiana on November 5, 1976, and printed in the December 15 issue of "Vital Speeches," Mr. LONG has produced a thoughtful analysis of concerns about development assistance and United States-Latin American Relations. The text of the article follows:

UNITED STATES/LATIN AMERICAN RELATIONS
TOWARD A POLICY OF MUTUAL RESPECT AND MUTUAL ADVANTAGE

(By GILLIS W. LONG, U.S. Representative from Louisiana)

It seems to me there couldn't be a better time to discuss the road ahead in inter-American relations than right after a Presidential election. I hope you'll excuse my partisanship, but Governor Carter's Victory will provide, I feel, a much-needed change in many of our policies both domestic and foreign. Certainly in no area is there a more urgent need for reassessment than in our policies toward the Third World, and particularly those that affect Latin America. That need is recognized in the title of this Seminar.

When I took over the Inter-American Economic Relationships Subcommittee of the Joint Economic Committee last spring, the first thing I discovered was that many people perceived the United States lacking clearly-enunciated policy—economic or otherwise—toward Latin America and the Caribbean. Over the past decade, I was told, relations between the United States and Latin America had suffered because of the more pressing problems we had in other parts of the world. We had resorted to using slogans to describe our Latin American policy. The Democratic "Alliance for Progress," the Republican "Mature Partnership," and the "New Dialog" all came and went. But, an effective policy cannot be based upon catchy words and a passing pat on the head. More recently, a policy appears to be formulating that, I believe, offers real promise. I give a great deal of this credit to our friend Assistant Secretary Shlaudeman. Also, with the cessation of hostilities in Vietnam and lessening of tensions in the Middle East Secretary Kissinger has had more time to give his attention to a number of complaints of Latin American and other Third World countries.

The long list of initiatives that the Administration has offered in response to these complaints does not yet add up to a policy. However, they can serve as a starting place from which the United States can move in a decisive and positive manner.

Congress has often been accused of being the stumbling block for enhanced relations with those countries by not coming forward with appropriations or approving various Administration proposals. I am not trying to absolve Congress—certainly there is much my colleagues and I can do—and some things done were wrong—but to blame Congress alone is a cop-out. It seems to me that for a long time we have been lacking clearly-defined goals.

I am very hopeful that the Carter Administration will develop these clearly-defined goals. I have been impressed by the quality of people who have counseled President-Elect Carter on foreign policy. Within the next few days, I will recommend to him that he look for in his appointee as Secretary of State a person with a broad general knowledge of economics and that the other people that he places in key foreign policy-making positions have a background in international economics.

I am dong this because I am convinced that the entire spectrum of our foreign policy has at its roots fundamental questions of economics. These questions permeate all other facets of international affairs.

Last summer, my Subcommittee reviewed a number of issues relating to U.S.-Latin American economic relationships. In fact,

two of the hearings were held in this very building, generously hosted by the International Trade Mart. In the course of these hearings we heard expert testimony from representatives of both the public and private sectors. These hearings were only the beginning of the Subcommittee's work in reexamining the whole range of economic relationships between the U.S. and Latin America.

Although we have just begun our in-depth exploration of these vital economic issues, one very important message has come across loud and clear; It's time to shed the myths we have about the relationship between the U.S. and Latin America, and deal with economic—and political—realities. For example, we do not have a preferential economic relationship with Latin America. In fact, we rejected it specifically when we presented a generalized system of preferences. As another illustration, the United States' share of trade with Latin America has actually decreased proportionately for both—Latin countries and for the United States. This is not all bad because it demonstrates our mutual willingness to seek out many trade partners. Latin America, certainly is still an important trading partner as a purchaser of high-technology exports and as a supplier of raw materials. It is also important because of the leadership it has provided in negotiations between rich and poor countries.

As the economies of the Latin American countries have become more open and diversified, the interrelationships between their economies and ours have become more complex. A new and mature assessment of these interrelationships is necessary with a foundation of mutual respect and mutual advantage as our guide.

We know that the Latin countries have many important ties among themselves, with us, and increasingly with other areas of the world. We share common difficulties in reconciling independence with interdependence. But all the countries—or nearly all—share with us a belief that an expanding international economy is essential to domestic prosperity and growth. And this is the optimistic thrust of the report on "The Future of the World Economy" recently issued by the United Nations, under the direction of the Nobel Laureate Economist Wassily Leontief.

What is our role in ensuring this prosperity? Beyond question, a healthy domestic economy in the United States is the most important contribution we can make to the economic prosperity of our neighbors. I believe that President Carter will provide a plan for our national economic recovery. I believe that for the first time in eight years Congress and the President can begin to work together to build the kind of effective domestic economic policy that will revitalize our economy. I believe that a growing economy at home will expand trade and ease the inevitable strains of adjustment needed to accommodate it both within the United States and abroad. This is the reason that I am gratified by Governor Carter's victory. Our economy should once again be showing the kind of growth that will generate capital and technology for export. We all know that it is the poorest countries that are hardest hit by erosion of economic growth.

I cannot overstress the importance of a strong U.S. economy. In our hearings, I have frequently been told that a key problem now affecting many Latin American countries is in servicing their foreign debts. Well, debt service is fundamentally tied to the foreign exchange earnings these countries receive and in turn will reflect most importantly the degree to which our economy—and certainly the economies of other developed countries—is healthy and vital. In fact, one of the very few things on which economists agree is that a prosperous international economy will make the debt burden manageable. Clearly, I feel that the first priority—in fact the basis—of our international policy must be a revitalized U.S. economy.

It is obvious that there are many pathways to development, and we respect the right of our neighbors to steer their own course. I hope that the days are gone when the United States takes a role in secretly "destabilizing" any foreign government by covert means. But the United States can take a lead in trying to facilitate trade expansion.

The outstanding economic success stories of the Post-War World—for example Taiwan and South Korea, among the LDC's—have relied upon a strategy of export-led expansion. Latin America, certainly, has not ignored these examples.

At the beginning of 1976, the United States introduced its generalized trade preferences to aid the exports of developing countries. As a region, Latin America stands to benefit most from these preferences, as the economies there have the capability of producing many of the exports which receive benefits under GSP. During the coming year we need to undertake an assessment of how this program is working. For example, many of the smaller Latin countries recognize the need for economic integration with their neighbors and our policy should favor this. However, the way our GSP program works, with its arbitrary and uniform country limits, there may be disincentives, however inadvertent, to integration among developing countries. At the very minimum we need to know.

Another aspect of GSP that needs our immediate attention—and here is one of the areas where Congress made a mistake and must act—is the exclusion of all OPEC countries from the GSP's benefits. This was a move that came on the heels of the Arab oil embargo and wrongly excluded Venezuela and Ecuador from GSP status. To add insult to injury, these two countries actually increased their shipments of crude oil to the United States during the embargo.

Late in the 94th Congress, I introduced legislation which will extend to Venezuela and Ecuador the GSP status they deserve. There is no doubt of the importance these two countries place on this issue. Venezuelan President Perez, in a recent interview with the "New York Times," said one of the two major objectives of his administration is getting the GSP status. Ambassador Cardenas of Ecuador and I have discussed the issue, as well. Their exclusion is a thorn in their sides, make no mistake. Work is underway right now to coordinate our legislative strategy to have my bill passed in the next session of Congress. I am confident that we can be successful.

Another initiative I feel we must take to foster this second priority of trade expansion, is to get on with the GATT trade negotiations which are taking place in Geneva. These negotiations, among more than 100 countries, seem to have been at a standstill during the last year for want of effective leadership. I would make this a high priority and set a timetable with deadlines for concluding them in 1977. Latin American interest in widening export markets and reducing adverse trade discrimination, particularly in Europe, should be important topics in the negotiations.

Let's talk about commodities trade for a moment. The developing countries have made the commodities issue central to their demands for restructuring the world economy. This was done at the recent UNCTAD meeting in Nairobi and in other forums like the CIEC in Paris which Venezuela co-chairs. I feel that in the long run a return to full employment growth in the industrialized economics—and further liberalization of trade—will benefit the Third World as a whole more than commodity price stabilization agreements.

Nevertheless, we cannot ignore the problems which countries highly dependent on export receipts from primary products face. Their development hopes can be devastated by sharp drops in the price for just one commodity.

But let me divert and go from the theoretical to the coldly practical. I want to give you an idea of some of the considerations a member of Congress involved in foreign relations faces. While I just mentioned how a developing country can have its hopes dashed by sharp drops in the price for a given commodity, let me tell you about what happens when that given commodity happens to be one that's produced in a Congressman's district or a Senator's state. And I'll be very, very candid.

What happens is that an elected official, generally disposed toward a world economy based on free-flowing trade, is suddenly hit squarely between the eyes with the needs of his individual constituents. This is the case in the ongoing sugar debacle.

In the last few months many of us in Congress have seen petitions signed by thousands of citizens who are asking us, as their elected representatives in Washington, to get the President to take protectionist actions against the influx of less expensive foreign sugar. At the same time, that Member of Congress knows that the lower sugar prices should and just might reduce the prices the housewife pays for sugar and the schoolchild pays for a candy bar.

And from hearings that I held as Chairman of the Subcommittee, I know the extent to which sugar plays a major role in the economies of some of the Latin American countries, particularly the Dominican Republic and Honduras.

And do you know what a Member of Congress does if his district happens to have many sugar cane or sugar beet farmers? He urges the President to take the protectionist actions!

At stake is a devil of a lot more than votes, my friends, although many think that is a Congressman's sole motivation. At stake is the well-being of people—the well-being of their large investments, the well-being of their families, their entire future, and often an entire industry.

But, I believe we may be successful in dampening some of the booms and busts in commodity prices, if we keep with our policy of supporting individual commodity agreements that stabilize the price around a long-term trend. Recently we have moved forward in this direction by signing the tin agreement and a new coffee agreement. Commodities differ widely in the characteristics of the market, the kinds of production arrangements—small individual producers as opposed to large integrated foreign firms—and in the long-term prospects of the export price. Different solutions are necessary for each commodity.

When several of these agreements have been signed, we should consider the possibility of joint financing of several buffer stocks. I do not think, however, that a common fund appropriated in advance for the undesignated buffer stocks makes sense for us or the rest of the world. I do not think, either, that the Congress views such a proposal with much favor. Sometimes members of Congress say that Secretary Kissinger has not been following through on our commitments to aid. But in the commodity area I do not think that a rapid leap into the arena of fixed prices is in the interest of the world.

Inappropriate agreements that fix prices at artificially high levels, or that seek to transfer resources, would not be successful over the long run in providing the develop-

ment benefits sought by the poor countries. Instead, such agreements would lead to substitution of alternative products, uneconomic investments, and threats of politically-motivated disruption of trade. In effect, they could do more harm than good.

We should, however, make it clear that we do wish to help those countries with commodity problems, particularly as they affect their development, but that we are unwilling to approve massive agreements just to gain their approval.

Countries like Brazil, Mexico, Venezuela, Peru, and Chile will benefit most by their expanding trade as they are well on their way toward industrialization. But what of the poorest countries of Latin America,

In addition to the two priorities of restoring the strength of our national economy and facilitating trade, we must continue our commitment to provide economic assistance to those countries that need it most—particularly some of those in the Caribbean and Central America. Such aid is essential to build the basic infrastructure in these countries that will enable economic development to take hold.

Our direct bilateral assistance to Latin America has been declining for a number of years and I think this trend should continue. Bilateral aid inevitably involves us in a donor-client relationship which is incompatible with the more mature policy of mutual respect and partnership. The economic progress which Latin America has made in recent years makes our bilateral assistance less necessary and probably less welcome. I would aim for reducing our bilateral assistance. Humanitarian and disaster relief programs would obviously continue. Other worthy objectives such as increasing food production and dealing with the population explosion are better handled through the multilateral agencies—those like the Intramerican Development Bank and the World Bank through which the great majority of public money already flows. It is not surprising that advice and assistance on sensitive internal issues are better received when they come from a multilateral agency in which the developing countries themselves participate.

In recent years there has been some lag in our commitments to the IDB and some of the other multilateral lending institutions. The Carter Administration should provide renewed leadership for these programs in contrast to some of the indifference to them that we've seen in the last eight years.

While the new administration will provide strong support for an integrated and balanced economic assistance effort, President Carter and Congress, I feel, will be less willing to ignore the issue of human rights. I do not think, though, that we should use our aid or the voice of the multilateral lending institutions to put leverage on countries to support a particular economic or political philosophy. Instead, we must use the moral force of our leadership to insure the respect for individual rights and freedom.

Another basic priority under a policy of mutual respect and mutual advantage should deal with promoting that kind of investment that serves the interest of both the capital-importing Latin American countries and ourselves. Mobilizing private and public savings for investment is a key element in the developing process. While the overwhelming share of this must come from domestic sources in each country, foreign capital can play an important supplemental role.

Not surprisingly, in light of recent revelations, the Latin countries are increasingly sensitive to the role of foreign private investments and the operations of large U.S. corporations. Taking as a cue a policy of mutual respect and a more equal partnership, I believe we can accept these concerns and work out better arrangements for this still very necessary part of the development process.

To my mind, even more valuable than the direct capital they bring, U.S. corporations can offer technology and access to established marketing channels for new exports from the developing countries.

But, we need to encourage our direct investors to consider new forms of participation. For example, in many countries a joint venture or a management contract is more acceptable than a wholly-owned subsidiary. It may be that our tax laws discourage joint ventures and if this is so we should consider some changes. Investment pay-back in the form of exports of products or materials is a useful technique that has been tried a few times. This may be one way to ease the foreign exchange availability problems that have bedeviled so many LDC's.

I am not overly concerned that investment expansion would add to the debt burden of Latin countries. We must recall that a significant portion of American development was financed this way and we must assume that our neighbors will invest wisely in productive enterprises that can pay their own way and eventually pay back the lenders. Once again, this harks back to our first priority—the need to keep the U.S. economy strong so that there will be an expanding base on which to finance needed transfers.

To sum up, our economic policy toward Latin America must contribute to the kind of hemispheric relations we desire as well as be consistent with our policy toward other developing areas and our general economic outlook.

A satisfactory basis for relations with Latin America, I suggest, is one based on mutual respect and the pursuit of mutual advantage.

The first priority must be to bring our economy to new heights of productivity and to encourage other developed countries in the same direction. If our markets are healthy, the international prospects of Latin America will be bright. Since the beginning of the 1960's, and particularly in the present decade, the growth of Latin American economies has been satisfactory—at up to 6 percent a year. That is, it was satisfactory until our recent recession. Our policy must be to sustain, widen, and deepen this growth trend.

Thus, the second priority recognizes that we can best smooth the path of development through an outward-looking trade policy that recognizes the special problems developing countries face. We need to perfect the program of trade preferences we offer, and do our best to steer the international trade system toward one which will encourage and reward full participation.

We must realize, as a third priority, that aid should be structured so as to destroy any donor-client relationship whenever possible, while recognizing the pressing humanitarian needs of some of the poorest countries. And this may best be accomplished by multilateral lending agencies, in which developing countries are involved in policymaking.

Acknowledging that the greatest share of foreign capital transfer to Latin America comes from private hands, our fourth priority must be to encourage and facilitate these transfers in a manner consistent with the dignity and sovereign rights of each country.

I am optimistic about the future of United States-Latin American relations. With a new administration. I am confident that the 95th Congress will be ready to sit down and work with President Carter and the new Secretary of State toward a coordinated program based on mutual respect and mutual advantage.

TRADING WITH THE ENEMY ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. BINGHAM) is recognized for 15 minutes.

Mr. BINGHAM. Mr. Speaker, I am today introducing a bill to repeal section 5(b) of the Trading With the Enemy Act.

The Trading With the Enemy Act was passed in 1917 "to define, regulate, and punish trading with the enemy." However, in 1933 section 5(b) of the act was amended to give the President vast powers to regulate international transactions during periods of declared national emergency. This was done on the first day of the 73d Congress, without hearings with virtually no debate, and before the bill was even in print. In order that my colleagues may better grasp the astounding latitude granted to the President by section 5(b), I have appended the current language of that section to my statement.

Since the Nation has been in a declared state of emergency since 1933, the "emergency" authorities provided in section 5(b) have in effect become routine authorities used to conduct the day-to-day business of Government. For years 5(b) has provided a major statutory basis for U.S. trade embargos currently in effect against North Korea, Vietnam, Cambodia, and Cuba. On three occasions since 1972 the President has by Executive order used section 5(b) to extend routine export controls when the Export Administration Act has temporarily lapsed. The most recent such Executive order was issued last September 30 and is still in effect. Section 5(b) has also been construed over the years as providing authority for actions as diverse as the "bank holiday" of 1933, and alien property freeze and consumer credit controls during World War II, and foreign direct investment controls in 1968.

Pursuant to the National Emergencies Act—Public Law 94-412, September 14, 1976—it is the responsibility of the Committee on International Relations to conduct a thorough review of section 5(b) and to report and make recommendations to the House by June 12 of this year. In preparation for that investigation the Subcommittee on International Trade and Commerce, which I chair, has already taken the following actions.

First, the subcommittee has published a complete legislative and administrative history of section 5(b) going back to 1917. The volume is entitled "Trading With the Enemy: Legislative and Executive Documents Concerning Regulation of International Transactions in Time of Declared National Emergency," and is available from the Committee on International Relations and the Government Printing Office.

Second, the subcommittee has sent out announcements of the impending investigation to over a dozen professional societies, trade associations, think tanks, and other interested groups, soliciting views on emergency trade controls. An-

nouncements have gone to such diverse groups as the National Association of Manufacturers, the American Bankers Association, the Emergency Committee for American Trade, the Council on Foreign Relations, the American Society for International Law, the Institute for Policy Studies, and the Coalition for a New Foreign and Military Policy.

Against this background, the subcommittee plans early and extensive hearings on my bill repealing section 5(b). My bill is designed to place the burden of proof on those who would retain emergency trade controls. We cannot permit these broad, open-ended grants of power, with no provision for congressional review, to remain on the books. If we need emergency trade controls, then we have to go back to square one and reconstruct them from the ground up, carefully defining, justifying, and limiting each grant of power to the President. I hope to be able soon to announce to my colleagues a schedule of hearings which will allow for the indepth exploration of these issues, and I look forward to an extensive input from the Government and the public.

I include the following:

TEXT OF SECTION 5(b) OF THE TRADING WITH THE ENEMY ACT

(b)(1) During the time of war or during any other period of national emergency declared by the President, the President may, through any agency that he may designate, or otherwise, and under such rules and regulations as he may prescribe, by means of instructions, licenses or otherwise—

(A) investigate, regulate, or prohibit, any transactions in foreign exchange, transfers of credit or payments between, by, through, or to any banking institution, and the importing, exporting, hoarding, melting, or earmarking of gold or silver coin or bullion, currency or securities, and

(B) investigate, regulate, direct and compel, nullify, void, prevent or prohibit, any acquisition holding, withholding, use, transfer, withdrawal, transportation, importation or exportation of, or dealing in, or exercising any right, power, or privilege with respect to, or transactions involving, any property in which any foreign country or a national thereof has any interest.

by any person, or with respect to any property, subject to the jurisdiction of the United States; and any property or interest of any foreign country or national thereof shall vest, when, as, and upon the terms, directed by the President, in such agency or person as may be designated from time to time by the President, and upon such terms and conditions as the President may prescribe such interest or property shall be held, used, administered, liquidated, sold, or otherwise dealt with in the interest of and for the benefit of the United States, and such designated agency or person may perform any and all acts incident to the accomplishment of furtherance of these purposes; and the President shall, in the manner hereinabove provided, require any person to keep a full record of, and to furnish under oath, in the form of reports or otherwise, complete information relative to any act or transaction referred to in this subdivision either before, during, or after the completion thereof, or relative to any interest in foreign property, or relative to any property in which any foreign country or any national thereof has or has had any interest, or as may be otherwise necessary to enforce the provisions of this subdivision, and in any case in which a report could be required, the President may, in the manner hereinabove provided, require the production, or if necessary to the national security or defense, the seizure, of any books of account, records, contracts, letters, memoranda, or other papers, in the custody or control of such person; and the President may, in the manner hereinabove provided, take other and further measures not inconsistent herewith for the enforcement of this subdivision.

(2) Any payment, conveyance, transfer, assignment, or delivery of property or interest therein, made to or for the account of the United States, or as otherwise directed, pursuant to this subdivision or any rule, regulation, instruction, or direction issued hereunder shall to the extent thereof be a full acquittance and discharge for all purposes of the obligation of the person making the same; and no person shall be held liable in any court for or in respect to anything done or omitted in good faith in connection with the administration of, or in pursuance of and in reliance on, this subdivision, or any rule, regulation, instruction, or direction issued hereunder.

(3) As used in this subdivision the term "United States" means the United States and any place subject to the jurisdiction thereof: *Provided, however,* That the foregoing shall not be construed as a limitation upon the power of the President, which is hereby conferred, to prescribe from time to time, definitions, not inconsistent with the purposes of this subdivision, for any or all of the terms used in this subdivision. Whoever willfully violates any of the provisions of this subdivision or of any license, order, rule or regulation issued thereunder, shall, upon conviction, be fined not more than $10,000, or, if a natural person, may be imprisoned for not more than ten years, or both; and any officer, director, or agent of any corporation who knowingly participates in such violation may be punished by a like fine, imprisonment, or both. As used in this subdivision the term "person" means an individual, partnership, association, or corporation.

U.S. CANAL ZONE: WILL CARTER LET PANAMA CANAL GO?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. FLOOD) is recognized for 5 minutes.

Mr. FLOOD. Mr. Speaker, in addition to public opinion polls, petitions, and an extensive correspondence from all parts of the Nation and abroad, all are in strong opposition to any surrender of U.S. sovereign rights, power or authority over the U.S. canal territory, it has been gratifying to see an increasing number of thoughtful articles in the mass media.

A recent one by John J. O'Malley of the Copley News Service, published in the Times-Leader, Evening News, and Record of Wilkes-Barre, Pa., deals with the canal question in realistic manner, exposing major fallacies in current prosurrender propaganda and calling upon President-elect Carter to inspire confidence among the American people by leveling with them on this critical issue.

As the article reflects accurate knowledge, keen perception as well as strategic insight, it is recommended for reading by all Members of the Congress and their staffs working on the canal question.

The indicated article follows as part of my remarks:

[From the Wilkes-Barre (Pa.) Times-Leader, Evening News, Record, Dec. 1976]

WILL CARTER LET PANAMA CANAL GO?

(By John J. O'Malley)

On Jan. 20 President-elect Jimmy Carter will face the unhappy fact that our diplomatic representatives have committed the United States—and in pretty formal terms—to a progressive program of major concessions of both authority and responsibility over the Panama Canal.

The new administration will inherit a position, expressed by our negotiators, that a gradual relinquishment of our posture in the Canal Zone is inevitable for three reasons:

First, that if we do not back off from our position in Panama our relations with other Latin American countries will suffer. Second, that our case is weak, in any event, because we really do not own the Canal Zone.

And third, that not much is at stake because the strategic position of the canal in the world scheme of things is less important than it used to be.

Pursuing his determination to inspire confidence among the American people Mr. Carter will do well to level with them on this critical issue. If he will address the above topics squarely, he will burnish his own image and do the country a service as well, because there is not one shred of validity in any one of the three points made to justify a Panama Canal give-away.

First off, Latin America knows that our position in Panama is not in any sense oppressive. They know that the Panamanians have benefited massively from the $7 billion investment that the United States has made in the canal. They know that the canal accounts for about a quarter of Panama's gross national product.

They know that the unrest in Panama over the past 15 years has had its origin primarily with Soviet and Cuban agents operating with a very small number of Panamanian extremists. The Panamanian people at large have no part in the agitation, and are well aware of the benefits they derive from the canal.

The attitude of 13 Western Hemisphere nations on the subject of canal control was clearly expressed in the Inter-American Conference on Freedom and Security in September of 1975 where it was affirmed unquestionably that the conference opposed any conveyance of American authority in the Canal Zone to Panama.

The trade, and thus the economic health, of many Latin American countries pivots on safe and certain use of the canal. Those countries have no illusions as to the unsubstantial nature of Panama dictator Torrijos and those around him.

In short, a strong stand on our part will be seen by every reasonable Latin American government as a move toward stability.

As to the second point respecting our ownership, it would be hard to find a less equivocal legal position than we enjoy in the Canal Zone. It has been tested all the way to the U.S. Supreme Court, not once but twice, and the invariable posture of the court is that the zone is U.S. territory in every sense of the word. In its most recent declaration the Canal Zone is described as "unincorporated territory of the United States" over which Congress has complete and plenary authority."

Despite this fact, in February of 1974, the U.S. secretary of state and a representative of Panama signed "Principles of Agreement" which signify our readiness progressively to turn over the Canal Zone to Panama and, subsequently, to convey title to the canal itself to the Panamanians.

Just how a secretary of state could take such action in the face of the Supreme Court's assertion that "Congress has complete and plenary authority over the Canal Zone" is not clear. Nevertheless, it happened, and the American people should know about it.

Finally on the matter of the strategic significance of the Canal Zone, a good way to appraise the issue is through the eyes of the Soviet Union.

The Russians have declared—as far back as the days of Lenin—that their long-range

aim was to possess themselves of the critical sea bottlenecks on the globe—the Suez Canal, the Strait of Gibraltar, the Malacca Strait and the Panama Canal.

Where Panama is concerned the Soviet main strategic purpose is to make it impossible for the United States to shuttle naval units and naval logistic support freely from the Pacific to Atlantic and vice versa, through Panama. To advance this program they have established a substantial naval presence in Cuba. They have exercised their Cuban satellite at offensive operations overseas—in Angola—and there is no doubt now that they are quite capable of attempting the same thing in Panama.

Viewed from the American side, there is the fact that most of the 15,000 ships which transit the canal every year are involved in commerce that affects the United States. Our economic welfare is massively dependent on sure and secure use of the canal, not just by our men-of-war but by merchant shipping of all flags.

A lot of Americans have sensed all these things instinctively. Large segments of our society have expressed themselves vigorously—38 senators, the American Legion and the Veterans of Foreign Wars all have made clear their determination that there shall be no reduction in our authority or control of the Canal Zone and the canal. The people at large, as reflected in a public opinion poll by Opinion Research, held in favor of no change in sovereignty over the canal by a margin of 76–16 per cent.

The truth of it all is that the United States at the grass roots wants no concessions whatever in this matter.

It would be nice if Mr. Carter were spared major strategic and geopolitical decisions for a time.

DANGEROUS CUTS IN PROSPECT FOR MILITARY CONSTRUCTION

(Mr. SIKES asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SIKES. Mr. Speaker, there are reports that a huge cut in the military construction program—a cut of possibly $1 billion below the budget level requested by the Department of Defense—has been ordered by the Office of Management and Budget. This would be a very unfortunate and ill-conceived action. It is difficult to understand in view of the high rate of unemployment experienced by the construction industries in many parts of the Nation, and it conflicts directly with the oft-stated goal by the administration to reduce unemployment.

There is more involved. Military construction is one of the best ways to quickly increase employment. It provides jobs for projects which are needed by the military services and are not make work programs. They involve modernization or repairs, or new requirements which must be built sooner or later. The program can be put into operation quicker than any of the make work programs which are under consideration in the Congress.

It has been estimated that for each expenditure of $1 million in military construction in the United States, as many as 2,000 workers are affected either directly or indirectly for the time of actual construction. If reports of a $1 billion cut in the program for 1978 are accurate, this means a loss of all or some work to about 2 million workers in this country while the program is in progress.

We know that unemployment is one of the greatest problems our economy faces. Elaborate programs are being discussed to provide Federal funds for programs, some of which result in nothing more useful than keeping people busy. A military construction project, on the other hand, provides projects which are national assets available for long term use.

I respectfully urge that administration officials take a new look at the proposed cuts. It would be much more meaningful if the military construction program were substantially increased. The military services actually are still using many World War II facilities. They were built only for the duration of that conflict. While they may have been modernized they still are costly to maintain and use. There is a very substantial backlog of maintenance which has been deferred from year to year. Every building must be maintained and repaired or it falls down. A step up of maintenance could be made immediately to employ many persons in nearly every part of the Nation. Deferment of needed construction and needed maintenance contribute to less than an adequate military posture for our Nation.

We cannot maintain an adequate defense without adequate facilities. We should not encourage men and women to join the military without providing them and their families with decent living and working conditions, and we cannot cure the ills of the economy by putting people out of work.

The military construction bill touches almost every State in the Union. It means jobs in construction and construction and supports businesses nationwide. A cut of the magnitude discussed, one-third to one-half of the total construction immediately needed, is not only dangerous, but is economically unsound as well. Congress should question closely any such decision. Hopefully, it will be reversed and an adequate military construction program forwarded to the Congress.

CUT REDTAPE AND PAPERWORK

(Mr. STEED asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. STEED. Mr. Speaker, the latest Harris survey is out; 63 percent to 28 percent of Americans feel that "the people in Washington are out of touch with the rest of the country. A 55 to 38 percent majority of the public feels that "people running the country really don't care what happens to you."

These expressions of public alienation from Government are a sign that we must do much more to make Government again the servant of the people. But they are also a sign that the Congress is on the right track in having established the Commission on Federal Paperwork.

Survey after survey indicate the American people are being drowned in a flood of paperwork and redtape. Over $40 billions of our gross national product goes into making, printing, sending, receiving, processing and storing paperwork and information. That is the equivalent of the total 1974 net profits of the Fortune 500. And what value do you place on the rage, frustration and despair resulting when citizens try to cope with this flood of paperwork from Washington? Some of the comments I have heard personally are right on the mark but, unfortunately, they are also unprintable. Every Member of this body, I am sure, has heard horror stories from constituents.

Establishing the Commission on Federal Paperwork by special statute—Public Law 93–556—is a sure sign that Congress is determined to get the Government off the backs of the American people. We recognize our responsible to act.

But that responsibility is a dual one—we in Congress are duty-bound to exercise oversight in keeping paperwork requirements to a minimum in programs we authorize and fund. We also bear the responsibility to cut paperwork and red tape at the source—namely, in writing the laws which causes excessive paperwork in the first place.

These excessive paperwork burdens result from Government program and timing efficiencies, lack of care in drafting both legislation and regulation, failure to balance the benefits of certain information with the costs of gathering it. In short, these burdens and costs result from Government not being sufficiently aware of its role of serving the people—not hassling them.

Mr. Speaker, over the next several months, I shall take the floor frequently to discuss the issue of cutting redtape and paperwork. I shall endeavor to raise the awareness of the Congress on this issue—to make each of us realize that what we do here in Congress in requiring reports, questionnaires, forms, surveys, is not merely an exercise. If we legislate without being acutely aware of what magnitude of paperwork burden we may be creating, we indulge in an act of legislative irresponsibility.

The Commission on Federal Paperwork has already produced numerous victories in the paperwork war. Our dealings with the executive branch in reducing paperwork burdens have been amiable, determined and largely successful. I shall discuss these paperwork reduction efforts and how the Commission and Federal agencies cooperate in cutting redtape and paperwork. Short term victories already achieved represent savings in excess of $100 million. Long-term regulatory and statutory reforms should result in savings in excess of $6 billions.

Mr. Speaker, I serve on the Commission. One of the reasons I am continuing to serve in this body is my determination to see the work of the Commission well and fully completed—to see regulatory and legislative changes implemented which will significantly ease the paperwork burdens now being borne by the American people.

When I do leave these halls, I want to see the percentage of Americans who feel their Government is uncaring significantly reduced. I want to see this disaffection with Government reduced as we reduce the unreasonable paperwork and redtape burdens we have placed on those we exist solely to serve.

THE COAL PIPELINE ACT OF 1977

(Mr. ECKHARDT asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. ECKHARDT. Mr. Speaker, the development and utilization of this Nation's abundant coal resources are essential to decrease our dependence on diminishing domestic supplies of oil and natural gas. In recognition of this fact, utility companies throughout the country have made commitments to purchase increasing amounts of coal to reduce their reliance on traditional energy sources. However, the availability of coal is heavily dependent upon the U.S. transportation infrastructure which is presently inadequate to support projected coal shipments.

Therefore, I have introduced the Coal Pipeline Act. This act will facilitate the development of coal slurry pipelines which represent an important additional mode of transportation for large quantities of coal.

The Coal Pipeline Act authorizes the Secretary of the Interior to issue certificates of public convenience and necessity with respect to coal pipeline projects. A company which has received such a certificate may acquire a coal pipeline right-of-way by the power of eminent domain. Such authority is necessary to overcome major obstacles in assembling continuous rights-of-way for the construction and operation of coal pipelines and ancillary facilities. The Coal Pipeline Act merely extends the power of eminent domain already enjoyed by natural gas pipelines to coal slurry pipelines.

The Coal Pipeline Act also provides several essential protective provisions. Environmental impacts, alternative transportation modes, and regional water and energy needs must all be considered before a certificate of public convenience and necessity can be issued. A certificate may only be issued after public hearings, and the pipeline must be operated as a common carrier. Moreover, the act does not alter any existing laws governing water rights nor does it permit the acquisition of water rights through the power of eminent domain.

A copy of the Coal Pipeline Act follows:

H.R. —

A bill to amend the Mineral Leasing Act of 1920, and for other purposes

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Coal Pipeline Act of 1977".

DEFINITIONS

SEC. 2. As used in this Act—

(a) "carrier" means any carrier of coal by coal pipeline that is subject to any of the provisions of this Act;

(b) "Department" means the Department of the Interior;

(c) "Secretary" means the Secretary of the Department of the Interior;

(d) "right-of-way" includes necessary land or other property for the location of pipelines, pumping stations, pressure apparatus, tanks, or other stations, equipment, or appurtenances required for the proper operation of a coal pipeline or pipelines; and

(e) "control" means the power to exercise control by whatever means: any person who (1) is a director of a carrier or of any other person, or (2) owns in excess of 5 per centum of the voting stock (or any like evidence of participation) of a carrier of any other person shall be deemed to have the power to exercise control of such carrier or other person, as the case may be.

RIGHTS-OF-WAY ON FEDERAL LANDS

SEC. 3. Subsection 28(a) of the Mineral Leasing Act of February 25, 1920, as amended by the Act of November 16, 1973 (87 Stat. 576), is further amended by inserting the word "coal" between "natural gas", and "synthetic".

EMINENT DOMAIN

SEC. 4. (a) Except as provided in subsection (b), when any carrier cannot acquire by negotiation the right-of-way required to construct, operate, and maintain any proposed coal pipeline or pipelines, such carrier may acquire the same by the exercise of the power of eminent domain in the district court of the United States for the district in which such property is located or in the courts of the State in which such property is located.

(b) The power of eminent domain shall not be exercised to acquire (1) lands owned by the United States or by any State, or (2) lands held in trust by the United States for an Indian or Indian tribe.

(c) Nothing in this section shall be construed to permit acquisition of any right to use or develop water through the exercise of the right of eminent domain.

CERTIFICATION OF PUBLIC CONVENIENCE AND NECESSITY

SEC. 5. (a) The power of eminent domain granted pursuant to this Act may be exercised only by a carrier holding a certificate of public convenience and necessity issued by the Department of the Interior. The Secretary is authorized to issue such a certificate if the Secretary finds with respect to the particular project of the carrier as to which said power is sought, that the project is in the national interest and provides the capacity necessary to fulfill the requirement of a common carrier of coal, as determined by the Secretary. In addition to other factors customarily considered in determining common carrier status in the case of pipeline common carriers, the Secretary shall consider contracts for the carriage of coal which are in existence or proposed as of the date of the application for certification and may also consider such contracts for such carriage as may reasonably be anticipated, at the time of issuance of the certificate, to be entered into after such date. In determining the size of the pipeline to be certificated, the Secretary shall take into account the resultant cost to ultimate consumers of services or products affected by such transportation.

(b) In making the findings required in (a) of this section the Secretary shall consider and make independent findings on the extent to which the project—

(1) would help meet national needs for coal utilization, considering, among other matters, alternate routes or means of transportation of coal and the relative cost of such alternative routes or means;

(2) may be impeded or delayed unless granted the power of eminent domain;

(3) involves disruption to the environment, as compared with disruption from other routes or modes of transportation or other methods of utilization of the coal resources involved; and

(4) considers the balance between the energy needs of the area to be benefited by the project and the water requirements and other impacts on the area from which the coal is to be transported.

The Secretary's findings as to whether a project is in the national interest shall be based on the record as a whole taking into consideration each of the criteria set forth in this subsection.

(c) The Secretary shall require as a condition of issuance of a certificate of convenience and necessity under this Act that any pipeline for which such certificate is issued be constructed, operated, and maintained as a common carrier as provided in the Interstate Commerce Act. Any violation of such condition shall be enforced as provided in such Act, and nothing in this paragraph shall be construed to limit, impair, or otherwise affect any provision of such Act.

(d)(1) No carrier granted the power of eminent domain under this Act shall transport any coal mined by it or under its authority or which it may own in whole or in part, or over which it may have any control, direct or indirect.

(2) The prohibition contained in subsection (d)(1) shall not apply to the construction, ownership, and operation of a feeder line for the purpose of gaining access to a coal pipeline by any person who would otherwise be ineligible if—

(A) the carrier has declined a formal request to construct, own, and operate the feeder line;

(B) the owner of the feeder line will operate the line as a common carrier for any excess capacity in the feeder line; and

(C) the Secretary has determined that an exemption from subsection (d)(1) is in the public interest

(3)(A) No certificate of public convenience and necessity may be issued to any carrier which controls, is controlled by, or is under common control with any person which uses or will use coal transported by the carrier or which supplies coal to the pipeline and (B) no carrier granted the power of eminent domain under this Act may control, be controlled by, or be under common control with any such person.

(4) The penalties and enforcement provisions of section 8 shall not apply to this subsection, but whenever, on the basis of any information available to it, the Interstate Commerce Commission finds that any carrier or other person is in violation of paragraph (1) or (3)(B), it shall notify such carrier or other person. If such violation extends beyond the thirtieth day after the date of such notice, the Commission shall, after notice and opportunity for hearing, issue an order requiring such carrier or other person to comply. Failure to obey any such order shall be subject to the same penalty as provided for in section 16(8) of the Interstate Commerce Act (49 U.S.C. 16(8)).

(e) No certificate of public convenience and necessity may be issued to any person engaged as a common carrier in interstate transportation of coal by any mode unless such person enters into a compact with the Secretary within two years from the date of enactment of this Act providing means whereby right-of-way across the lines of such person may be acquired by a carrier on terms customarily employed with reference to other types of pipeline. Any federal court of competent jurisdiction may entertain a suit by an interested party to enforce the provisions of such compact.

(f) If the Secretary determines, in the course of the consultations and findings required by subsection (b) or the hearings required by section 6 that the project right-of-way may be utilized for additional uses compatible with operations of the project line, the Secretary may, in his discretion, re-

quire as a condition to the grant of a certificate of public convenience and necessity that the particular project right-of-way be subject to such compatible uses.

(g) The Secretary shall require the additional use described in subsection (e) only if he by rule (1) finds—

(A) the additional use is a compatible use, and

(B) conditioning the issuance of the certificate upon the availability of the right-of-way for the additional use is in the public interest, and

(2) establishes reasonable provisions for the payment of compensation for the additional use to the person otherwise entitled to the exclusive use.

PROCEDURE

SEC. 6. (a) Applications for a certificate of public convenience and necessity under this Act shall be filed with the Department pursuant to such regulations as it may prescribe. Each carrier applying for a certificate shall reimburse the Department for administrative and other costs incurred in processing the application as the Secretary shall prescribe.

(b) A certificate authorized by section 5 may be issued only after public notice and public hearings in accordance with this section.

(c) The carrier shall publish, in accordance with regulations promulgated by the Secretary, a notice that it has filed an application for a certificate of public convenience and necessity under this Act in a newspaper of general circulation in each county in which the project will be located. The notice shall, among other things, specify to the greatest extent practicable the land which would be subject to the power of eminent domain.

(d) The Secretary shall publish in the Federal Register a notice of the receipt of each application under this Act.

(e) The Secretary shall hold at least one public hearing in each State in which the project involved will be located. Any interested person may present relevant material at any hearing. After all hearings in each State are concluded, the Secretary shall hold at least one public, formal adjudicatory hearing in accordance with the provisions of section 554 of title 5, United States Code, in the District of Columbia at which the Federal Energy Administration and the Environmental Protection Agency shall, and other Federal, State and local agencies may, participate.

ANTITRUST REVIEW

SEC. 7. (a) The Department shall not issue any certificate pursuant to section 5 of this Act unless it has received the advice of the Attorney General of the United States and the Federal Trade Commission that such action would not restrain trade, further monopolization, substantially adversely affect competition, or otherwise create or maintain a situation in contravention of the antitrust laws. The issuance of a license under this Act shall not be admissible in any way as a defense to any civil or criminal action for violation of the antitrust laws of the United States, nor shall it in any way modify or abridge any private right of action under such laws.

(b)(1) Nothing in this section shall be construed to bar the Attorney General or the Federal Trade Commission from challenging any anticompetitive situation involved in the operation of a coal slurry pipeline.

(2) Nothing contained in this section shall, impair, amend, broaden, or modify any of the antitrust laws.

(3) As used in this section, the term "antitrust laws" includes, but is not limited to, the Act of July 2, 1890, as amended; the Act of October 15, 1914, as amended; the Federal Trade Commission Act (15 U.S.C. 41, et seq.); and sections 73 and 74 of the Act of August 27, 1894, as amended.

ENFORCEMENT AND PENALTIES AND JUDICIAL REVIEW

SEC. 8. (a) At the request of the Secretary the Attorney General may institute a civil action in the district court of the United States for the district in which the affected operation is located for a restraining order or injunction or other appropriate remedy to enforce any provision of this Act or any regulation or order issued under the authority of this Act.

(b) If any carrier shall fail to comply with any provision of this Act, or any regulation or order issued under the authority of this Act, after notice of such failure and expiration of any period allowed for corrective action, such person shall be liable for a civil penalty of not more than $5,000 for each and every day of the continuance of such failure. The Secretary may assess and collect any such penalty.

(c) Any person who knowingly and willfully violates any provision of this Act, or any regulation or order issued under the authority of this Act, or makes any false statement, representation, or certification in any application, record, report, plan, or other document filed or required to be maintained under this Act shall, upon conviction, be punished by a fine of not more than $10,000, or by imprisonment for not more than six months, or both.

(d) Whenever a carrier violates any provision of this Act, or any regulation or order issued under the authority of this Act, any director, officer, or agent of such corporation or entity who authorized, ordered, or carried out such violation shall be subject to the same fines or imprisonment as provided for under subsection (c) of this section.

(e) Petitions for judicial review shall be filed in the court of appeals of the United States for the circuit in which the pipeline's originating point of coal transportation is located.

CONSTRUCTION OF LAW

SEC. 9. Nothing in this Act shall be construed—

(1) as affecting in any way any existing law governing appropriation use, or diversion of water, or any Federal, State, or private right to water;

(2) as expanding or diminishing Federal or State jurisdiction, responsibility, or interests in water resources development or control;

(3) as displacing, superseding, limiting, or modifying any interstate compact or the jurisdiction or responsibility of any legally established joint or common agency of two or more States or of two or more States and the Federal Government; or

(4) as superseding, modifying, or repealing, except as specifically set forth in this Act, existing laws applicable to the various Federal agencies which are authorized to develop or participate in the development of water resources or to exercise licensing or regulatory functions in relation thereto.

REGULATIONS

SEC. 10. The Secretary is authorized to promulgate such rules and regulations as he deems necessary to carry out the purposes of this Act.

UNDERGROUND CONSTRUCTION

SEC. 11. All coal pipelines subject to this Act shall, to the maximum extent practicable, consistent with environmental protection, safety, and good engineering and technological practices, be buried underground.

RELATIONSHIP TO INTERSTATE COMMERCE ACT

SEC. 12. Except where otherwise provided by this Act, the provisions of part I of the Interstate Commerce Act (24 Stat. 379) as amended (49 U.S.C. 1–40) shall be applicable to coal pipelines subject to this Act.

SEC. 13. Subsequent to the passage of this Act, no person shall engage in the transportation of coal by slurry pipeline without first obtaining a certificate of public convenience and necessity under Sections 5 and 6 of this Act unless such person enters into a compact with the Secretary within two years from the date of enactment of this Act providing means whereby rights-of-way across the lines of such person may be acquired by a carrier on terms customarily employed with reference to other types of pipeline. Any Federal court of competent jurisdiction may entertain a suit by an interested party to enforce the provisions of such compact.

THE TAX EQUITY ACT OF 1977

(Mr. CORMAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. CORMAN. Mr. Speaker, on January 4, I introduced H.R. 1040, the Tax Equity Act of 1977. Twenty-nine Members of the House expressed their wish to cosponsor the bill with me. They are: Mr. STARK, Mr. ANDERSON of California, Mr. BOLLING, Mr. CARNEY, Mr. CLAY, Mr. CONYERS, Mr. DANIELSON, Mr. DELLUMS, Mr. DIGGS, Mr. DRINAN, Mr. ECKHARDT, Mr. EDWARDS of California, Mr. EILBERG, Mr. HARRINGTON, Mr. HAWKINS, Mr. JOHNSON of California, Mr. KOCH, Mr. MAGUIRE, Mr. MEEDS, Mr. MITCHELL of Maryland, Mr. MOSS, Mr. NIX, Mr. PRICE, Mr. RODINO, Mr. ROSENTHAL, Mr. ROYBAL, Mr. STUDDS, Mr. CHARLES H. WILSON of California, and Mr. WON PAT.

The 94th Congress made real strides in the quest for tax reform with the enactment of the Tax Reform Act of 1976. The massive piece of legislation was drafted totally by Congress without the cooperation of the Republican administration. Its intricately worded provisions begin the job of bringing equity to the Internal Revenue Code, but much remains to be done.

We must not let the momentum die. With the cooperation of a new administration already pledged to tax reform, the 95th Congress can continue the task of stripping the tax code of its bewildering complexity and distributing the costs of Government fairly among taxpayers.

H.R. 1040, the Tax Equity Act of 1977, in the pattern of its predecessors of the past three Congresses, provides a workable model for reform. I am pleased that ten provisions of the 1975 Tax Equity Act were enacted by the 94th Congress. Four more provisions were enacted in a somewhat modified form and an additional 13 were considered and, in some cases, approved by congressional committees.

The bill I am offering today has been changed to reflect the actions taken in the preceding Congress and several important new provisions have been added in the race to keep up with aggressive tax lawyers in their search for previously undiscovered loopholes in the law.

H.R. 1040 encompasses all of the objectives sought by tax reformers: Equity for all taxpayers through the elimination of loopholes, simplification of the law, and a means of raising new revenue without increased rates.

One of the most compelling arguments

for a more equitable tax code is the list of estimated Federal tax expenditures for 1977 which will amount to $106 billion, over 25 percent of the amount of direct Federal expenditures estimated for that year.

A tax expenditure results from an exclusion, a deduction or a credit, preferential tax rates or a deferral of tax liability written into the law to encourage certain kinds of economic behavior. Tax expenditures represent taxes not collected—revenues lost that must be made up by other taxpayers. They were created with good intentions, but unfortunately many have outlived their usefulness and unlike a direct Government appropriation are not subject to periodic review. In addition, since they are granted across the board, they tend to be heavyhanded and almost impossible to fine-tune as the needs of the economy shift.

H.R. 1040 would repeal some of the most costly and misused of these indirect Government expenditures. The most notorious loophole of all, percentage depletion for oil and gas, was partially curtailed by the 94th Congress, but the Tax Equity Act would completely eliminate it. By continuing to allow a 22-percent depletion allowance to producers of less than 2,000 barrels of oil or gas a day, we are losing $2 million in revenue for the dubious purposes of encouraging the extraction of oil and gas by independent producers.

The enactment of H.R. 1040 would complete another job begun in the 1976 act. The much criticized domestic international sales corporation—DISC—provision that allows exporters to defer the taxes on half of their export income was limited. An incremental approach was adopted in which exporters will be able to qualify for DISC treatment only on profits that exceed 67 percent of their average for past years, rather than on all of their export income as in the past. This modest reform was all that was achieved although attempts were made to repeal DISC entirely.

Since that congressional action, DISC has been declared an export subsidy in violation of the General Agreement of Tariffs and Trade. This declaration by a panel of experts commissioned by GATT should provide the impetus for Congress to end this $1.4 billion tax preference that even the Office of Management and Budget under a Republican administration found to be of questionable value. H.R. 1040 calls for its repeal.

The 1976 act does take steps to increase the effectiveness of the minimum tax. The purpose of this tax is to insure that every taxpayer, even those with access to a wealth of loopholes, manages to pay some tax. However, the most glaring loophole in the computation of this tax on loophole income was only limited. This is the so-called executive suite loophole that allows a taxpayer to deduct regular income taxes paid from his items of tax preference before computing his minimum tax. The 1976 legislation will limit this deduction to one-half of taxes paid, but H.R. 1040 would eliminate the deduction entirely to insure that the taxpayer would at least pay a minimum tax on his preference income.

Other loopholes left untouched by the 1976 legislation that would be repealed by H.R. 1040 are the capital gains exclusion, the investment tax credit, the asset depreciation range system—ADR—and tax-exempt State and municipal bonds. These four preference items alone amount to an annual revenue loss of $23.4 billion. Their elimination would broaden the tax base and could allow for lower tax rates for all. In fact, H.R. 1040 would extend the 50-percent maximum tax to unearned income as a balancing factor to those provisions that would eliminate tax preferences.

A major goal of all tax reformers is the elusive one of simplification. While the Tax Reform Act of 1976 will increase Federal revenues by $1.6 billion annually, no one would argue that its 1,000 pages will simplify the Tax Code. One important way the enactment of H.R. 1040 would achieve simplification is through the elimination of all those pages of the code devoted to the taxation of capital gains, since preferential treatment of capital gains income would be ended.

A simplification move even more important to the average taxpayer is the provision of H.R. 1040 calling for a 24-percent tax credit for personal deductions and exemptions including the standard deduction.

The drafters of the 1976 act took a first step toward substituting credits for deductions with the new 20-percent child care credit. The Tax Equity Act would complete the process by allowing a credit to be taken on the aggregate amount of other personal deductions and exemptions. The personal deductions involved include interest and taxes on nonbusiness indebtedness—such as home mortgages—charitable contributions, and medical expenses.

The substitution of one credit for itemized deductions and personal exemptions would eliminate a number of lines from our ever-growing tax return. A recent Treasury study has revealed that 70 percent of itemized returns contain errors. There is something drastically wrong with a form that confounds 70 percent of the taxpayers.

In addition to providing simplification, the use of the credit also represents a step toward equity. The benefit of a deduction is tilted toward those in the higher tax brackets, while a credit is taken directly from tax liability in equal amounts for all taxpayers.

Under present law, the personal exemption of $750 is worth $525 to the taxpayer in the highest bracket, but only $105 to a taxpayer in the lowest bracket. If each taxpayer took a 24-percent credit on the same $750 exemption, each would deduct a uniform $180 directly from his tax liability. This would reverse the existing bias in our tax system that rewards high-income taxpayers, and return us to one of its original tenets of taxing each according to his ability to pay.

As tax reformers, our task is clear. We must work to lighten the burden of the average taxpayer by lowering the amount of taxes he pays and by simplifying the process of paying them. This can be accomplished only through the comprehensive kind of reform contained in the Tax Equity Act of 1977. I urge my colleagues to give it their serious consideration. A summary of the bill follows:

SUMMARY OF CONTENTS OF H.R. 1040

Section 1—Short title, etc.

This section provides that the Act may be cited as the Tax Equity Act of 1977, and the sections contains a table of contents of the bill.

Section 2—Technical and conforming changes

This section provides that the Secretary of the Treasury shall, within 90 days after the date of the enactment of the Act, submit to the Committee on Ways and Means a draft of any technical and conforming changes in the Internal Revenue Code which should be made to reflect the substantive amendments made by the bill.

Section 3—Treaties

This section provides that every amendment made by the Act shall apply notwithstanding that its application may be contrary to the provisions of some treaty in effect on the date of the enactment of the Act.

TITLE I—CAPITAL GAINS AND LOSSES

Section 101—Repeal of alternative tax on capital gains

This section repeals the alternative tax on capital gains for both individuals and corporations. As a result of this section and other amendments made by title I of the bill, capital gain income (for taxable years beginning after 1977) will not receive preferential treatment and will be taxed as ordinary income. (Section 301 of the bill reduces the maximum rate of tax on individuals from 70% to 50%.)

Section 102—Tax treatment of capital gains

While capital gain income will be taxed as ordinary income under the amendments made by the bill, this section provides for a limited exemption from tax depending on the length of time the property has been held before it is sold. The exemption is granted in deference to the fact that if an asset has been held a long time, the gain measured by dollars is attributable to some extent to the declining value of the dollar and does not represent increased purchasing power for the taxpayer.

This section allows an adjustment for inflation by providing, in effect, that in computing the gain on a sale of property, the taxpayer can add to the tax basis of the property 6 percent of the tax basis of the property (at the time of the sale) for each year the property was held after it was held for one year. More precisely, it is provided that the addition to the tax basis shall be one-half of 1 percent of the tax basis for each full month the property was held after it had been held for one year. Thus, if the property is held for less than 13 full months, nothing is added to the tax basis in computing gain. If the property is sold after being held 64 full months (5 years and 4 months) 26% of the tax cost (51 months at one-half of 1 percent) would be added to the basis in computing gain. Since there is no compounding of the 6 percent annual adjustment for inflation, if an asset has been held for 11 years prior to its sale, the 6 percent adjustment merely offsets a compounded inflation rate of 4½ percent.

Under present law, an individual is taxed on only one-half of his capital gain if he holds the property for one day over 6 months. Under the bill, no one day can make a difference of more than one-half of 1 percent, and that percent is of the cost of the property—not the gain on its sale.

This provision for not taxing the gain to the extent attributable to inflation applies not only to capital assets but also to prop-

erty used in a trade or business, such as a plant, machinery, or other depreciable equipment. It does not apply, of course, to property held for sale to customers in the ordinary course of business.

This section of the bill repeals a number of provisions in the Internal Revenue Code which become deadwood when capital gains are treated as ordinary income. Complicated provisions, such as those dealing with collapsible corporations and the recapture of depreciation deductions on sale of property at a gain, are not needed when preferential treatment of capital gains is eliminated. No greater blow can be struck for the cause of simplification of the income tax laws than to repeal, as the bill does, the preferential income tax treatment of capital gains.

Section 103—Limitation on deduction of capital losses

Under existing law, capital losses are deductible only against capital gains plus, in the case of an individual, $3,000 of other income. This section of the bill provides that capital losses of a corporation are deductible only against gains from the sale of capital assets and property used in a trade or business. In the case of an individual, capital losses will be deductible only against such gains plus $3,000 of other income. Under present law, a long-term capital loss of $2 will offset only $1 of an individual's ordinary income. Under the bill, a capital loss of $1 will offset $1 of ordinary income (subject to the $3,000 limitation). Gains from the sale of property used in a trade or business do not include gains from the sale of property held primarily for sale to customers or gain from the sale of animals.

Section 104—Capital loss carrybacks and carryovers

This provision grants relief to an individual who has an unused capital loss of at least $10,000 by allowing him to carry it back to the 3 preceding taxable years. Cases have arisen where a large capital gain in 1 taxable year is followed by a large capital loss in the following year which may never be deducted even with the unlimited carryforward.

Under present law, if a corporation has an unused capital loss of only a few hundred dollars, this unused loss must be carried back to the 3 preceding taxable years, with resulting refunds if there are net capital gains in any of the 3 years. It cannot be carried forward if it can be used up on a carryback. This section of the bill changes existing law by providing that a corporation (like an individual) cannot carry back an unused capital loss unless it exceeds $10,000.

The bill provides that the carryback is elective with the taxpayer, whether an individual or a corporation. This will make the carryback provision less of an administrative burden on the Internal Revenue Service for in many cases the taxpayer would rather not file a claim for refund of taxes paid in a prior year if the loss can be used on a carryover.

In the case of an individual, the carryover can be used to offset ordinary income up to $3,000 a year, but on a carryback the capital loss can be used only to offset capital gains. In the case of the death of an individual the bill provides that the net capital loss for the year of his death can be carried back even though the loss is less than $10,000.

Under present law, a capital loss of a corporation can be carried over only to 5 taxable years following the year of the loss. Under the bill, a corporation (like an individual) will have an unlimited carryover of a capital loss.

Section 105—Capital gain and capital loss defined

This section amends the Code by striking out the definitions of short-term and long-term capital gains and losses since under the bill no distinction is made between short-term and long-term gains and losses. However, the bill defines the terms "capital gain" and "capital loss" since the deduction of capital losses is limited as explained above. The bill retains the definition in existing law of the term "capital asset".

Section 106—Election to include certain unrealized gains in gross income

Under present law if a decedent dies with unused capital losses, the losses cannot be carried over and used by his estate or heirs. However, in the case of unrealized gains from appreciated property, the Tax Reform Act of 1976 provides for a carryover of the decedent's tax basis so that the unrealized gain may subsequently be taxed when the estate or heirs sell the appreciated property.

This section of the bill provides that if a decedent has unused capital losses at his death (including capital losses carried over to his last taxable year), and the decendent also had unrealized capital gains, the executor or administrator of his estate can elect to include in gross income in the decendent's last taxable year the gain the decedent would have realized if he had sold the appreciated property on the date of his death for its fair market value. The gain so included, however, cannot exceed the amount of the unused capital losses. Thus, if unrealized gain on a capital asset is included in income for the decedent's last taxable year, no income tax will be incurred because the gain will be offset by the unused losses. But the decedent's estate or heirs will benefit because the bill provides that the decedent's tax basis in the capital asset—in determining the tax basis to be carried over to his estate or heirs—will be increased by the amount of the unrealized gain included in the decedent's last taxable year.

Section 107—Tax treatment of gain on certain sales of patents

Since capital losses will continue to be deductible only against capital gains (plus an additional $3,000 in the case of an individual), it is important that ordinary income is not classified as capital gain income. Under existing law, gain on the sale by an individual of a patent is treated as capital gain even though the taxpayer is a professional inventor. This section of the bill repeals this provision, so that the sale of a patent by the person whose personal efforts created the patent will be treated as ordinary income and not capital gain income, just as the sale of a copyright produces ordinary income under existing law.

In addition, this section provides that capital gain treatment will not be granted in any case where the owner (whether a corporation or an individual) of a patent enters into an agreement (whether or not it constitutes a sale, license, or assignment) under which the seller or assignor of the patent receives payment measured by a percentage of the selling price of articles produced by the buyer or transferee of the patent or where the amounts received by the seller or transferor are measured by production, sale, or use by the assignee of licensee. Periodic receipts of this kind with respect to the sale or transfer of a patent are properly treated as royalty income rather than capital gain income.

TITLE II—INCOME DERIVED FROM EXTRACTION OF MINERALS

Section 201—Repeal of percentage depletion

This section of the bill repeals percentage depletion for all minerals, including the limited allowance under existing law for oil and gas, effective with taxable years beginning after December 31, 1977.

Section 202—Deduction of intangible drilling costs and other exploration and development expenditures

This section of the bill liberalizes the deduction of exploration expenditures for oil and gas. Under present law, intangible drilling and development costs are deductibles as incurred, but geological and geophysical costs are capital expenditures to be recovered through the depletion allowance (or as a loss upon abandonment). This section provides that all expenses incurred for the exploration and development of all minerals, including oil and gas, are deductible at the election of the taxpayer, so long as the expenditures do not have the effect of sheltering from tax income from nonmineral sources.

To deal with the problem of the tax shelter, this section provides that the aggregate deduction for exploration and development of mineral properties during the taxable year cannot exceed the taxpayer's aggregate taxable income for the year from mineral properties (computed without regard to the deduction for exploration and development). Losses on drilling a dry hole, however, will continue to be deductible without regard to the limitation. Any amount disallowed as a deduction under this limitation will be treated as an amount expended in the following year for the exploration and development of mineral properties. In the normal situation, this limitation will not limit the deduction in the case of the taxpayer who is in the business of operating mineral properties, but it will put a stop to the current practice of peddling drilling funds as tax shelters to taxpayers who are not in the business of operating mineral properties.

Section 203—Income from mineral properties located outside the United States

Under existing law, if a taxpayer goes into a foreign country to explore for and develop oil and gas wells or a mine, the deductible costs of exploration and development can be applied against income from sources within the United States. If the venture is successful and the mineral properties produce profits, the credit for foreign income taxes imposed upon those profits will, on the basis of past experience, completely offset the U.S. tax on those profits. The net result is that the United States Treasury loses revenue on account of the exploration and development in foreign countries of mineral properties and receives no revenue (because of the foreign tax credit), when the mineral properties produce profits. Moreover, if there is a loss on account of the expropriation of mineral properties by a foreign government, the deductible loss in the usual case has the effect of reducing the income taxes otherwise payable on income from sources within the United States.

To eliminate the losses to the Treasury on account of the exploration, development, and expropriation of foreign mineral properties, this section of the bill provides—

(1) a taxpayer will not include in his tax return amounts derived from the operation of a mineral property located outside the United States.

(2) no deduction shall be allowed for amounts chargeable to income so excluded from the tax return, or for any amount expended for the exploration or development of any mineral property located outside the United States, and

(a) losses on the sale, abandonment of expropriation of mineral properties located outside the United States shall be allowed only to the extent of gains from the sale of mineral properties located outside the United States.

The exclusion from gross income will not apply to profits derived from processing minerals after reaching the so-called cutoff point used in the past for percentage depletion purposes. Thus, profits from transporting minerals or in producing gasoline or refined metals will not be exempt. In addition, the exclusion from gross income will not apply to royalties received on mineral properties located outside the United States or to divi-

dends on stock of any corporation operating mineral properties outside the United States.

TITLE III—REFORM MEASURE AFFECTING PRIMARILY INDIVIDUALS

Section 301—50-percent maximum rate for individuals

Under present law, the maximum rate of tax on individuals is 70 percent. This section of the bill reduces the maximum rate to 50 percent. This reduction is justified in the light of the other provisions of the bill which broaden the income tax base, particularly the taxation of capital gains as ordinary income, and the elmination of the tax shelters allowed under present law.

Section 302—Credit against tax for personal exemptions and nonbusiness deductions

This section of the bill provides a credit against tax for the personal exemptions and other personal deductions of an individual, including the standard deduction, in lieu of the existing deductions from gross income for such items. Under present law, a deduction of $750 against gross income for a personal exemption is worth $525 to the taxpayer in the highest bracket, but only $105 to a taxpayer in the lowest bracket. This section of the bill provides that each taxpayer will receive the same tax benefit for his personal exemption, and that the Treasury will "contribute" the same amount to all taxpayers with respect to deductible expenditures not connected with a trade or business or for the production of income.

A credit of 24 percent of the aggregate amount of the personal deductions is allowed by this section of the bill. The personal deductions include the deductions for personal exemptions, interest and taxes on nonbusiness indebtedness (such as taxes and interest on the taxpayer's home), deductions for charitable contributions, and deductions for medical expenses. If the taxpayer would have used the standard deduction instead of itemizing his deductions, then the 24-percent credit will be applied to the amount of the standard deduction the taxpayer would have received plus the amount of his personal exemptions. The credit will not be allowable with respect to alimony payments which would continue to be deductible from gross income as under existing law.

A credit of 24 percent of the personal deductions, instead of deducting such amounts from gross income, will reduce the income taxes of taxpayers in the lower brackets. For example, a married couple with two children having an adjusted gross income below $15,300 (and assuming nonbusiness deductions of 10 percent of income) will have a reduction in their income taxes.

A limit is provided on the amount of credit which may be taken on account of interest and taxes paid on an individual's personal residence (or residences). Not more than $10,000 of such interest and taxes will qualify for the 24 percent credit. In the ordinary case this limitation will not come into play unless the residence has a value of more than $100,000 and is heavily mortgaged.

This section provides that the President may increase or decrease the 24-percent rate if he decides that it is in the public interest to do so. If he decides that taxes on individuals should be reduced for a temporary period, he could proclaim an increase in the 24-percent rate, and if he believes that the taxes should be increased for a temporary period, he could proclaim that the 24-percent rate be decreased. The increase or decrease, however, cannot exceed 2 percentage points.

Any increase or decrease in the 24-percent rate by the President would not take effect if either House of the Congress, within a 60-day period after announcement of the proposed change in rate, passes a resolution stating in substance that a change in the 24-percent rate is not favored.

This section of the bill also provides that if the taxpayer is claiming a child as a dependent (and thereby receiving a credit of $180 against tax—24 percent of $750), the parent shall include in his gross income any income received by the child during the year from a trust created by the parent, and also any dividends, interest, or royalties received by the child from any property given to him by the parent. Income which is so taxed to the parent would not be taxed to the child. This provision would not apply if the parent does not choose to claim the child as a dependent.

This section also increases the credit against tax for child care from 20 percent to 24 percent.

Section 303—Denial of certain tax preferences to shareholder-employees of closely held corporations

This section of the bill eliminates three kinds of abuses which have arisen when an employee owns the corporation which "employs" him.

A self-employed farmer cannot deduct the cost of maintaining his residence on the farm. Such items as depreciation, repairs, heat, and insurance premiums on his house are not deductible; and he cannot deduct the cost of groceries consumed on the farm by his family. But, apparently all these personal and family expenses can be deducted if he incorporates—even though he elects subchapter S so that the corporation is not subject to tax. The Tax Court recently held that an individual owning all of the stock of a corporation which owned a 35,000-acre ranch in Montana was not taxable on the value of meals and lodging furnished to his family on the ranch by the corporation (and deducted by the corporation) because it was for the convenience of his corporation that he and his wife lived on the ranch and occupied the ranch house. This section of the bill provides that a shareholder-employee of a corporation cannot exclude (under sec. 119 of the Internal Revenue Code) from gross income the value of lodging and meals furnished to him by the corporation. A shareholder-employee is defined as an employee or officer of a corporation who owns 5 percent or more of the stock of the corporation.

If a doctor, lawyer, or other self-employed individual incorporates his business and then adopts a plan for the corporation to pay all medical, dental and hospital bills of any shareholder-employee (including members of his family), under existing law the payments are deductible by the corporation and are excluded from the gross income of the shareholder-employee, even though the plan does not cover employees who own no stock in the corporation. This section of the bill provides that such family expenses paid by the corporation for the benefit of the shareholder-employee will be included in his gross income unless employees who are not shareholder-employees received 75 percent or more of all such payments made by the corporation during the year.

In the case of any self-employed person, his deduction for pension contributions for his own benefit under an H.R. 10 plan is limited to 15 percent of his earned income, with a maximum deduction of $7,500 a year. But, if the doctor, lawyer, dentist, or other self-employed person incorporates his business, the H.R. 10 limitations do not apply unless the corporation elects to be taxed under subchapter S. This section of the bill extends the rule applicable to a shareholder of a subchapter S corporation, and provides that the shareholder-employee of any corporation must include in his gross income any amount contributed by his corporation for his benefit in excess of the H.R. 10 limits. This rule will not apply, however, if more than 75 percent of the contributions made during the year by the corporation under the pension plan are for the benefit of employees who are not shareholder-employees.

Section 334—Repeal of $100 dividend exclusion

This section repeals the provision in present law that allows an individual to exclude from gross income $100 of dividends received on corporate stocks.

Section 305—Deductions for attending foreign conventions

This section disallows expenses of travel (including meals and lodging) of an individual in connection with attending a convention held outside the United States. As a general rule, such expenses are incurred primarily for pleasure rather than business. Thus, expenses of lawyers attending the American Bar Convention in London in 1971 would have been disallowed if the amendment had been in effect.

Section 306—Vacation homes

The Tax Reform Act of 1976 substantially reduced the tax abuse which arose when vacation homes acquired for personal pleasure were rented out for part of the year in order to generate tax deductions to shelter income other than the rents received. The Act, however, still permits a vacation home to be used in some cases as a tax shelter. For example, if the taxpayer uses the vacation home for only 10 days during the year and rents it out for only 20 days, he can deduct without limitation against outside income, two-thirds of the depreciation and other annual expenses for the entire year. This section of the bill in further tightening up on the use of a vacation home as a tax shelter, provides in the case of the above example, that the deduction for depreciation, repairs, and insurance premiums for the year will be reduced from two-thirds to 40/365ths of such expenses (two times the number of days of rental divided by the number of days in the taxable year.)

Section 307—Farm losses

In order to deal more effectively with the problem of farm losses as a tax shelter, this section of the bill provides that farm losses can be deducted against nonfarm income only to the extent of $10,000 a year. Any amount of a farm loss which is disallowed under this provision will be treated as an expense of farming in the following taxable year.

This limitation on the deduction of a farm loss will not apply to a taxpayer whose nonfarm income is less than $20,000.

Section 308—Computation of earnings and profits on a consolidated basis

Some conglomerate companies have been paying dividends which are not fully taxable because the parent company does not have sufficient earnings and profits to cover the distribution although the consolidated group had earnings and profits during the year greater than the amount distributed. This section of the bill provides that the earnings and profits of a parent corporation for a year shall not be less for dividend purposes than the earnings and profits of the consolidated group for the year.

Section 309—Dividend on certain sales of stock

The Tax Court held that if a transaction is described in section 304 of the Code (which can produce dividend income if stock of one controlled corporation is sold to another controlled corporation) and is also described in section 351 (dealing with tax-free exchanges), then section 351 applies and not section 304. This section of the bill changes the rule of the Tax Court case and provides that the tax-free provisions of section 351 do not apply to

the extent the application of section 304 produces an amount taxable as a dividend.

Section 310—Tax treatment of stock options granted by employer

The Tax Reform Act of 1976 achieved a major reform by repealing the special tax treatment previously allowed for stock options granted by corporations to officers and other highly compensated employees. However, the managers of the House and Senate conference on the Tax Reform Act made a disturbing statement in reporting the conference agreement. The conferees requested the I.R.S. to make every reasonable effort to determine a fair market value for a stock option at the time it is granted when an employee elects to report such value in his tax return, "particularly in the case of an option granted for a new business venture." Any adoption of this suggestion would create a major loophole. The repeal of the stock option provision was a reform because it requires an executive to include in gross income, when he exercises the option, the differences between the value of the stock acquired and the option price. The suggestion of the conferees, if adopted, would eliminate any tax at the time of exercise. This section of the bill will insure that an executive will have taxable income when he exercises a stock option by providing that a stock option will not have an ascertainable fair market value at the time it is granted unless the option is traded on a stock exchange or over the counter.

Section 311—Treatment of trust income payable to children of grantor

Under present law, a father can, in effect deduct on his income tax return gifts to his children if he makes a gift out of income from stocks and agrees to do so for at least 10 years. To get that result, the parent need merely transfer stock to himself as trustee and agree to pay out to his children the income from that stock for 10 years, at which time the stock will be returned to him free of the trust. Use of short-term trusts in this manner is commonplace with affluent taxpayers who can afford to give some of their dividend income to their children.

This section of the bill provides that the income of such a trust will be taxed to the grantor (if he has a reversionary interest) so long as the income is payable to a child who is under the age of 21 years or who is attending college and is a dependent of the taxpayer for purposes of the credit for personal exemptions.

Section 312—At risk rule for real estate partnerships

To curb the rise of partnerships as tax shelters, the Tax Reform Act of 1976 provided that a partner cannot deduct partnership losses in excess of the amount he has at risk. The Act, however stated that the at risk rule would not apply in the case of a partnership the principal activity of which is investing in real property. This section of the bill provides that the at risk rule will also apply in the case of real estate partnerships.

Section 313—Repeal of exemption for earned income from foreign sources

Under present law, citizens of the United States can exclude from gross income certain amounts of income they earn in foreign countries if they are present in the foreign country for 17 out of 18 months or if they become a bona fide resident of the foreign country. This section of the bill denies such exclusion from gross income in the case of taxable years beginning after the date of enactment. The foreign tax credit will prevent double taxation of the income if the foreign country also taxes the earned income.

Section 314—Underpayments of estimated tax

This section provides that an individual cannot base his estimated tax payments on the prior year's tax (or at the current year's rates applied to the prior year's facts) if in any one of the 3 preceding taxable years the tax shown on his return was in excess of $100,000.

Section 315—Partnership to be treated as corporation upon filing registration statement with Security and Exchange Commission

A key element in the syndication of tax shelters is that the business venture is treated for tax purposes as a limited partnership, so the tax losses can be passed through and be deducted by the limited partners. In a recent year registered filings with the Securities and Exchange Commission of partnership tax shelter offerings in oil drilling funds, real estate programs, cattle feeding, and the like, were in excess of $3.2 billion. Perhaps any partnership which depends primarily on limited partners for the capital of the venture should be treated as a corporation—the limited partner is like the preferred shareholder of a corporation. But at a minimum, any partnership which is required under the securities laws to register its offerings with the Securities and Exchange Commission should be treated as a corporation, and this section of the bill provides that if a registration statement is filed with the SEC or any comparable State agency, after July 1, 1977, and offers units of participation or other interests in a partnership, the partnership shall be treated as a corporation for taxable years ending after the date of the filing of the registration statement. The enactment of this provision would put an end to the interstate sale of large syndicated tax shelters.

TITLE IV—REFORM MEASURES AFFECTING PRIMARILY CORPORATIONS

Section 401—Repeal of investment credit

The investment credit is a massive subsidy to corporations for their purchase of machinery and equipment, nearly all of which would be purchased in the absence of the subsidy. This section of the bill terminates the investment credit, effective with respect to property placed in service on or after January 1, 1978.

Section 402—Repeal of asset depreciation range system

In 1962, the Treasury issued guidelines specifying the number of years over which different kinds of assets could be depreciated. Through the "reserve ratio test", a direct link was maintained between the depreciation claimed by taxpayers and the actual "wearing out" of equipment. Taxpayers were not allowed to depreciate for tax purposes more rapidly than they were actually replacing the equipment.

In January, 1971, the Treasury announced some major changes. Businessmen were allowed to take guideline lives 20 percent shorter than previously. Thus, an asset which previously had a guideline life of 10 years could now be depreciated over 8 years. In addition, the reserve ratio test was repealed. These changes were given legislative approval in the Revenue Act of 1971.

This section repeals the ADR system and reinstates the reserve ratio test.

Section 403—Depreciation deduction not to exceed book depreciation

Under present law, a corporation cannot use the LIFO method of valuing inventories for income tax purposes unless it uses the same method in reporting its earnings to shareholders. The obvious rationale of this rule is that if LIFO is not considered by a corporation as a correct method for reporting earnings to shareholders, then that corporation is not entitled to use the LIFO method in reporting its earnings on the tax return.

For a similar reason, this section of the bill provides that a corporation cannot take depreciation deductions for a taxable year in an aggregate amount in excess of the depreciation taken into account in reporting earnings for the year to shareholders. Thus, if a corporation on its books computes depreciation for equipment on a straight-line basis with a 30-year life, it cannot have a larger deduction on the tax return by using the double declining balance method or a shorter life. Moreover, in the case of a publicly held company whose annual report to shareholders is certified to by independent certified public accountants, it can generally be presumed that the charge for depreciation recorded on the books is a fair and honest estimate of the actual cost of depreciation for the year. If a larger deduction for depreciation is allowed on the tax return, then the depreciation allowance becomes a subsidy and not a reasonable allowance for the exhaustion of machinery and equipment.

In the case of an affiliated group of corporations, regulations will prescribe whether the report by the common parent corporation to its shareholders, rather than the report of subsidiaries to the parent, will be taken into account for purposes of this amendment.

Section 404—Deduction for repairs limited to amount recorded on books

This section of the bill, for the reasons set forth in the preceding section dealing with depreciation, prohibits the deduction by a corporation of an expenditure for repairs if the corporation capitalizes the expenditure on its books for the purpose of reporting to shareholders its earnings and profits for the year.

Section 405—Limitations on dividends received deductions

Subsection (a) of this section of the bill provides that the dividends received deduction cannot exceed 85 percent of taxable income (computed without regard to the net operating loss carryback). The chief effect of this is to change present law which allows a full deduction for 85 percent of dividends received if this deduction will produce or increase a net operating loss for the taxable year. The amendment also provides that any amount disallowed for the taxable year because of the net income limitation shall be allowed as a deduction for the following taxable year if there is sufficient taxable income in that year. This gives the taxpayer a carryover which he does not have under present law.

Subsection (b) provides that dividends received from an unaffiliated corporation shall be reduced (for purposes of the dividends received deduction) by the amount of any interest on indebtedness incurred or continued to purchase or carry the stock of the unaffiliated corporation. An unaffiliated corporation is any corporation except one that is a component member of a controlled group of corporations which includes the taxpayer.

This section of the bill also provides that if the aggregate amount of dividends received during the year from unaffiliated corporations (after first being reduced by any interest paid as provided in the preceding paragraph) exceeds the amount of dividends paid by the corporation during the taxable year, no dividends received deduction shall be allowed with respect to the excess. Thus, if no dividends are paid by the taxpayer, no dividends received deduction can be claimed for dividends received from unaffiliated corporations. However, the amount which is so disallowed shall be treated as a dividend received in the following year for purposes of the dividends received deduction. Moreover, if dividends paid during a taxable year exceed the dividends received during the year from unaffiliated corporations, the amount of the excess will be treated as a dividend paid in the following year for purposes of the dividends received deduction.

Section 406—Use of appreciated property to redeem stock

Under present law, if a corporation redeems stock with appreciated property, gain is recognized except in certain cases. One of the exceptions is where stock or securities are distributed pursuant to a court proceeding under the antitrust laws. This section provides that the stock or securities must have been acquired before January 1, 1970, in order for the exception to apply. It is not believed corporations which have violated the antitrust laws should have a tax benefit not available to other corporations who distribute appreciated securities.

Section 407—Recognition of gain on sales in connection with certain liquidations

If a corporation adopts a plan of complete liquidation and the liquidation is completed within 12 months, under existing law (section 337 of the Internal Revenue Code) the corporation is not taxed on gains realized on the sale of property during the period of liquidation. Gains on sale of inventory, however, are exempt from tax only if the inventory is sold in bulk to one purchaser.

This section makes three amendments to section 337. First, it is provided that section 337 shall apply only if at the time of the adoption of the plan of liquidation the corporation has less than 11 shareholders.

Second, it is provided that gain on the sale of inventory shall be taxable even though section 337 otherwise applies.

The third change deals with the problem which has been presented in some cases where shareholders of the liquidating corporation transferred, after adoption of the plan to liquidate and before the corporation distributes its tax-free gains, some or all of their stock to tax-exempt charities (usually their private foundations). This amendment of section 337 insures that one tax will be imposed in such cases by providing that if tax-exempt organizations receive X percent of the amounts distributed in liquidation, then the same percent of the gains realized by the corporation during the course of the liquidation will be subject to tax at the corporate level.

Section 408—Certain transactions disqualified as reorganizations

This section of the bill provides that there cannot be a tax-free reorganization if the shareholders of the smaller company involved in the transaction end up with less than 20 percent of the voting stock of the surviving corporation in a merger or of the acquiring corporation in the case of a so-called B reorganization (stock-for-stock) or a so-called C reorganization (stock-for-assets). If a conglomerate company whose stock is listed on the New York Stock Exchange issues less 20 percent of its voting stock to acquire the stock or assets of a company whose stock is not listed, it is more realistic to treat the shareholders of the unlisted company as having sold out for a marketable security rather than having taken part in a reorganization of their company. (A similar provision was contained in the House version of the Internal Revenue Code of 1954.)

Section 409—Repeal of special treatment of bad debt reserve of financial institutions

This section of the bill provides that banks and other financial institutions that now are allowed to take special deductions for reserves for bad debts will, in the case of taxable years beginning after 1977, compute any addition to a reserve for bad debts on the basis of the actual experience of the taxpayer, the rule which is applied to all other corporations.

Section 410—Taxation of undistributed profits of foreign corporations

At the present time, American corporations do not have to pay income taxes to the Federal Government on the earnings of their controlled foreign subsidiaries so long as the earnings are undistributed. These earnings, however, are generally taken into account by the parent company in reporting earnings to its shareholders. This tax deferral constitutes an important incentive for U.S. corporations to set up plants in foreign countries. This section of the bill provides for the taxation on a current basis of the undistributed earnings of controlled foreign corporations.

Section 411—Repeal of the tax exemption for a DISC

A U.S. corporation can now set up a paper corporation (known as a DISC) and escape the corporate income tax on one-half of its profits from exports by channeling the sales through the DISC. This section of the bill would repeal the tax exemption for DISC corporations and thereby increase revenues by approximately $1 billion a year.

Section 412—Involuntary conversions

This section provides that if gain on an involuntary conversion of property is not recognized because the taxpayer purchases stock of a corporation owning property of the kind which was converted, the basis of that property in the hands of the corporation shall be reduced by the amount of gain not recognized on account of the purchase of the stock.

Section 413—Computation of underpayments of estimated tax

This section of the bill provides that a corporation cannot compute its estimated income tax payments on the basis of the prior year's tax (or on the basis of the prior year's facts and the current year's rates) if in any one of the 3 preceding taxable years the tax shown on its return was in excess of $300,000.

TITLE V—REFORMS AFFECTING INDIVIDUALS AND CORPORATIONS

Section 501—Minimum tax

This section makes a number of changes in the minimum tax. First, it repeals the provision of existing law that allows regular income taxes to be deducted from the items of tax preference.

Second, the following items are added to the list of items which constitute tax preferences:

(1) Tax-exempt interest on State and local bonds (issued before January 1, 1978.)

(2) The credit against the United States tax allowed for foreign income taxes.

Finally, this section of the bill strikes from existing law the provisions which treat tax preferences attributable to foreign sources more favorably than preferences attributable to sources within the United States.

Section 502—Shareholder use of corporate property

Considerable uncertainty exists over the tax treatment of interest-free loans from a corporation to its controlling shareholders and the rent-free use by shareholders of corporate property. The Tax Court has held that an interest-free loan produces no taxable income to the shareholder or the corporation, even though the funds loaned by the corporation were producing taxable income prior to the loan. This section of the bill provides that an interest-free loan or a rent-free use of corporate property by a controlling shareholder shall be treated in the same manner as if the shareholder paid to the corporation a reasonable rate of interest on the loan, or a reasonable rent for use of the property, and as if the corporation then made a cash distribution of a like amount to the shareholder.

Section 503—Deduction for depreciation based on equity in rental real estate

This section provides that in the case of a building which the taxpayer rents to others, the deduction for depreciation cannot exceed the taxpayer's equity in the building and the land. That is, no additional deductions for depreciation will be allowed (including existing buildings) to the extent it would reduce the adjusted basis of the building below the unpaid balance of the mortgage on the land and building (minus the tax cost of the land). However, until the depreciation deductions equal the equity, the depreciation would be computed on the entire cost of the building and not on the amount of the equity. This amendment would not apply to a building if the primary use is by the taxpayer and not the tenants. This amendment would reduce the attractiveness of real estate ventures as tax shelters for investors.

Section 504—Charitable gifts of appreciated property

Under existing law, if capital assets which have appreciated in value are given to a private foundation, the charitable deduction is reduced by one-half of the long-term capital gain the individual would have had if he had sold the property at fair market value. However, in the case of gifts of noncapital assets to any charitable organization, the amount of the charitable deduction is reduced by the amount of the ordinary gain the taxpayer would have received if he had sold the property at fair market value. Since Title I of the bill eliminates the preferential treatment of capital gain income, this section of the bill provides that if appreciated property (whether or not a capital asset) is contributed to any charitable organization, the amount of the charitable contribution shall be reduced by the amount of gain which would have been realized if the property contributed had been sold by the taxpayer at its fair market value (determined at the time of such contribution). In computing the amount of such gain, there will be excluded the amount of any gain which is exempt from tax under the provisions of section 1202 of the Code, as amended by section 102 of this bill.

Section 505—Capital expenditures in developing fruit or nut groves or vineyards

Present law requires the capitalization of expenditures incurred during the development stage in planning citrus or almond groves. This section of the bill extends the rule of capitalization of expenses incurred before the time when the productive stage is reached in tne case of any other fruit or nut grove or any vineyard planted after December 31, 1975.

Section 506—Repeal of tax exemption for ships under foreign flag

This section of the bill repeals the provisions of existing law which state that a nonresident alien or a foreign corporation (even though 100 percent owned by a U.S. corporation or an American citizen) is not taxable on income derived within the United States from the operation of ships documented under the laws of a foreign country which grants an equivalent exemption to United States citizens or corporations.

Section 507—Tax litigation to be handled by Internal Revenue Service

Under existing law, the Internal Revenue Service conducts tax litigation in the Tax Court of the United States, but the Justice Department handles all tax litigation in the District Courts, the Court of Claims, Circuit Courts of Appeal, and in the Supreme Court. The Justice Department, rather than the I.R.S., decides whether a refund suit should be defended, whether an appeal from an adverse decision should be taken, and whether a petition for certiorari in a tax case should be filed in the Supreme Court. The charge has been made that Justice Department lawyers often consider their win/loss record rather than the importance of the tax issue involved in deciding whether or not to argue a case. Moreover, the role of the Justice Department over tax litigation deprives the Internal Revenue Service in many cases of

the right to decide when and how a certain tax issue should be presented to the Courts. Since it is believed that a smoother implementation of I.R.S. tax policy will be achieved if attorneys in the Internal Revenue Service are in charge of tax litigation, this section of the bill provides that the Commissioner of Internal Revenue will be in charge of all civil proceedings in any court (including the Supreme Court) involving internal revenue taxes.

TITLE VI—REFORMS AFFECTING PRIVATE FOUNDATIONS AND ESTATE AND GIFT TAXES

Section 601—Private foundations

Under present law the distinction between "public charities" and private foundations is significant because public charities are not subject to the same restrictions on their activities as are private foundations and contributions to public charities receive more favorable treatment in certain circumstances than contributions to private foundations. In addition, a private foundation pays a tax of 4% on its investment income. The term "public charity" includes not only certain types of organizations described by function—such as churches, schools, and hospitals—but also organizations which normally receive as substantial part of their support from governmental units or the general public.

Current regulations of the I.R.S. have been criticized on the ground they allow some charities, which Congress intended to be treated as private foundations, to be classified as public charities. As an example, the I.R.S. recently ruled that under its regulations interpreting 509(a)(3), a certain trust was not a private foundation even though 75 percent of its income could be distributed as the trustees saw fit between six different organizations named in the trust instrument as permissible beneficiaries of the trust.

This section of the bill provides that in no case shall a trust be treated under section 509(a)(3) as a public charity if the trustees have discretion to distribute as they see fit more than 50 percent of the trust income between two or more organizations named in the trust instrument as permissible beneficiaries.

This section of the bill also makes the requirements for being considered "publicly supported" more stringent than present regulations by providing that a person's contributions will be considered as public support only to the extent that they do not exceed one-half of one percent of the organization's support. It also strengthens the rules concerning treatment of contributions by related parties. This change, for example, will require that contributions of brothers and sisters of a contributor be treated as made by the contributor for purposes of the public support tests. Also this section of the bill prevents loosely affiliated trusts or funds from being treated as one organization for purposes of meeting the public support tests by requiring that the trusts of funds be under substantial common control in order to be treated as one organization.

Section 602—Transfers taking effect at death

Before the enactment of the 1954 Code, if a taxpayer transferred property to a trust which provided that the income should be accumulated during the grantor's life and upon his death the trustee should pay the corpus and accumulated income to his children, such a transfer was included in the decedent's gross estate as a transfer taking effect at death. The 1954 Code provided that such a transfer will be included in the gross estate only if the decedent retained a reversionary interest equal to 5 percent of the value of the property. This section of the bill strikes out the 5-percent reversionary interest test since it is completely a nonsequitur in a statute which imposes an estate tax on a lifetime transfer of an interest which can be possessed or enjoyed only by surviving the transferor. This amendment would apply to transfers made after December 31, 1976.

Section 603—Compensation payable after decedent's death

Under existing law, a highly compensated corporate executive can arrange his compensation so that part of what he earns will pass to his family without being included in his gross estate. For example, in order to obtain or retain the services of the corporate executive, the corporation agrees that upon his death it will pay an annuity to his widow for a period of years or so long as she lives. Upon his death the value of the annuity payable to his widow will not be subject to the estate tax if the decedent never had a prospective interest in the annuity payments if he had continued to live. Clearly, in such a case, the annuity payments to the widow were earned by the decedent's services rendered to the corporation, and the exclusion of such payments from the gross estate constitutes a serious loophole available to highly compensated corporate executives. This section of the bill closes that loophole. Under the amendment, there will be included in the gross estate the value of an annuity or other payment (including proceeds of life insurance) receivable by any beneficiary, by reason of surviving the decedent, under an agreement or plan of the decedent's employer which arose out of services rendered by the decedent, whether or not the beneficiary has an enforceable right to receive the annuity or other payment.

In the case of annuities paid out of tax-exempt pension funds, which are now excluded from the gross estate under section 2039(c) to the extent attributable to the employer's contributions, this section of the bill provides that the section 2039(c) exclusion shall apply only if the annuity payments go to the decedent's surviving spouse.

Section 604—Life insurance included in gross estate

No loophole in the estate tax can compare with that offered by life insurance. Under existing law, unlimited amounts of insurance can be passed on at death to the family of the decedent free of estate tax. If the decedent takes out insurance on his own life and gives the insurance policies to members of his own family, he can continue to pay during his lifetime all the premiums on the insurance and no estate tax will be paid at his death. And no gift tax will be paid on the premium so long as the annual premium per donee is not more than $3000 ($6000 in case of married insured.) Thus, a father age 40, for an annual premium of $6000 can acquire and give to his child a 5-year renewable term life insurance policy which will provide more than $1.3 million of insurance. If he dies while the insurance is in force, $1.3 million will go to the child free of any estate or gift tax, even though all the premiums were paid by the insured.

This section of the bill provides that life insurance on the decedent's life will be included in his gross estate in the proportion that the premiums paid by the decedent or his spouse bears to all premiums paid for the insurance. However, premiums paid before 1977 by the insured or his spouse will not be included in the numerator of the fraction, but will be included in the denominator.

This section of the bill also provides that insurance on the decedent's life will be included in his gross estate—without regard to the premium payment test—if his surviving spouse possessed at his death incidents of ownership in the policy. However, if the insurance proceeds pass to the surviving spouse and the insurance would qualify for the marital deduction if the insurance were included in the gross estate, the insurance will not be included in the gross estate by reason of incidents of ownership in, or premiums paid by the surviving spouse.

Section 605—Charitable deductions in the case of estate tax

The first amendment made by this section of the bill places a limitation on the charitable deduction for estate tax purposes, similar to what we have for the income tax. Under present law, a decedent can give his entire estate to a private foundation created by his will, and no Federal estate tax will be imposed. This amendment provides that the aggregate charitable deduction shall not exceed the greater of $1,000,000 or 50 percent of the gross estate reduced by the debts of the decedent and the expenses of administration.

The second amendment deals with the inter-play of the charitable deduction and the marital deduction for estate tax purposes. The marital deduction cannot exceed 50 percent of the adjusted gross estate (gross estate less debts, losses, and expenses of administration). Cases have arisen where executors have claimed, in order to raise the amount of the adjusted gross estate for purposes of the marital deduction, that transfers made to charities during the decedent's lifetime were includable in the gross estate. Increasing the gross estate for such lifetime transfers produced no estate tax for the charitable deduction was increased by the same amount, but a larger maximum deduction was allowed for bequests to the surviving spouse. This amendment provides that in computing the adjusted gross estate there shall be excluded any transfer made by the decedent during his lifetime if an estate tax charitable deduction is allowed for that transfer.

Section 606—Charitable deduction for gift tax purposes

Since the enactment of the Tax Reform Act of 1969, a gift tax is imposed in certain cases if the donor gives an interest in property to charity but retains for himself an interest in the same property. Thus, if a valuable painting is given to the National Gallery of Art subject to the right of the donor to retain possession of the painting for his lifetime, a charitable deduction is not allowed for either the income tax or the gift tax. While a deduction for income tax purposes in such a case is properly disallowed, it is not believed a gift tax should be imposed on the gift to charity, so long as no third party is given an interest in the painting. This section of the bill amends section 2522 (c) of the Internal Revenue Code of 1954 to allow a charitable deduction for gift tax purposes in such a case. The amendment provides, however, that if the donor, after making such a gift to charity, thereafter transfers the interest he retained to a third party (not a charity), the donor shall then be considered as having made the transfer to charity and the third party at the same time, so that a gift tax would be imposed on the interest transferred to charity.

TITLE VII—STATE AND LOCAL OBLIGATIONS

Section 701—Repeal of exemption for interest on new issues of State and local bonds

This section of the bill provides that interest on State and local bonds issued after December 31, 1977, will not be exempt from Federal income taxation. In the case of interest on State and local obligations issued before January 1, 1978, such interest will continue to be exempt from taxation, but section 501 of the bill provides that such in-

terest will be treated as an item of tax preference for purposes of the minimum tax.

Section 702—United States to pay 35 percent of interest yield on State and local obligations

This section provides that the Federal Government will pay 35 percent of the interest yield on State and local obligations issued after December 31, 1977. The payment of interest by the Federal Government will not apply in the case of any industrial development bond (as defined in section 103(c)(2) of the Internal Revenue Code). This section provides that upon the request of the State or local government, the liability of the United States to pay interest to the holders of the bond shall be handled through the assumption by the United States to pay a separate set of interest coupons issued with the bond. Otherwise, the obligation of the United States to pay 35% of the interest yield will be made directly to the issuer of the obligation.

TITLE VIII—WITHHOLDING OF INCOME TAX ON DIVIDENDS AND INTEREST

Section 801—Withholding of income tax at source on dividends and interest

Income taxes are now deducted and withheld on payments of wages and salaries but not on dividends or interest. In 1962, the Ways and Means Committee decided, as a matter of fairness, that recipients of dividends and interest should pay their taxes no less than those who receive wage and salary income and the tax should be paid just as promptly. The Revenue Bill of 1962, as passed by the House, provided for the withholding of tax on dividends and interest, and this section of H.R. 1040 contains provisions substantially identical to the withholding provisions in the 1962 bill. In 1962, the committee estimated that such withholding of tax would increase annual tax collections by about $650 million. With the great increase since then in the amount of dividend and interest payments, it is believed that the withholding of tax on such income would now increase revenues more than $1 billion annually.

STATEMENT OF HON. JOHN M. MURPHY ON INTRODUCTION OF NATIONAL STANDARDS FOR NO-FAULT BENEFITS ACT AND OTHER LEGISLATION

(Mr. MURPHY of New York asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MURPHY of New York. Mr. Speaker, today I am introducing legislation to provide comprehensive, equitable and rapid compensation for the victims of automobile accidents. The bill, which is essentially the same as the bill which was reported by the Consumer Protection and Finance Subcommittee in the 94th Congress, would achieve these goals by providing uniform standards for State no-fault benefit plans.

Rarely has a subject been as thoroughly studied and tested as the matter of how best to compensate automobile accident victims. Pursuant to a joint resolution of the Congress, the Department of Transportation studied the fault and liability—or tort—insurance system of compensation which existed in all 50 States in the late 1960's. The result was a devastating 26-volume indictment of that system, which concluded as follows:

In summary, the existing system ill serves the accident victim, the insuring public and society. It is inefficient, overly costly, incomplete and slow. It allocates benefits poorly, discourages rehabilitation and overburdens the courts and the legal system.

The DOT study, which was published in 1971, recommended that the fault and liability insurance system be replaced with a nonfault system. It described what the ultimate configuration of such a system might look like following a suitable period of experimentation and testing:

This system . . . should be based on universal, compulsory first-party insurance for all motor vehicle owners covering all economic losses above voluntarily accepted deductibles. . . . Victims should retain their present right to sue in tort for specific intangible losses, but the right should be restricted to the truly serious cases.

In recommending State experimentation, the study suggested that—

State experience with diverse plans will provide us with that opportunity for pilot project testing which must precede massive reform.

In 1970, Massachusetts adopted the first State no-fault law and in 1972, the National Conference of Commissioners on Uniform State Laws fleshed out the DOT recommendation by drafting a comprehensive model State law. Today, 24 States have revised their motor vehicle reparations laws in one form or another—usually in the other. American trial lawyers—who earn more than $1.5 billion a year from automobile personal injury litigation—have been so successful in resisting State efforts to adopt good no-fault laws that only one law—that of the State of Michigan—even remotely resembles the model law drafted by the commissioners on uniform State laws. That law is working extremely well to achieve the humanitarian objectives of no-fault and to retain fiscal integrity, while all the other compromised laws are failing—or on the brink of failing—to achieve one or the other of those basic objectives. There is little or no prospect that these laws will be improved in the foreseeable future.

The matter of fiscal integrity was addressed in a cost study sponsored by the National Association of Insurance Commissioners and the Department of Transportation in 1973. The study concluded that legislation similar to that which I am introducing today would be fiscally sound and would save the average insured driver about 10 percent on his or her premium.

In the meantime, beginning in 1971, House and Senate committees have held hearings that run to some 7,703 printed pages. These hearings—combined with the State experience—clearly reveal that the only way that the people will become the beneficiaries of the good no-fault law recommended by the commissioners on uniform State laws is for the Congress to pass legislation which provides for uniform standards for State no-fault benefit plans.

In introducing this legislation, as chairman of the Consumer Protection and Finance Subcommittee which has jurisdiction over this subject matter, I think it is important to share with my colleagues a more detailed examination of the failures of the fault and liability insurance system, of the predictable failure of the bad State laws, and of the benefits that can be gained through enactment of this legislation, which very closely parallels the model State law and the highly sucessful Michigan no-fault law.

DEFICIENCIES IN THE AUTOMOBILE TORT LIABILITY INSURANCE SYSTEM

When a person buys automobile liability insurance, he is not buying protection against losses he might sustain in an accident. Rather, he is buying protection of his assets against the claims that someone else injured in an accident might bring against him on the grounds that the accident was his "fault" under the law of torts.

The process of recovering for an injury through this system is time consuming and costly, involving four basic prerequisites.

First, the victim must identify and show that the other driver was at fault. Identification is important because a victim cannot recover if the other driver should leave the scene of the accident without being identified. In single car crashes, obviously, there is no other driver and, therefore, no recovery.

Second, the victim must show that he was without fault or less at fault than the other driver. Twenty-one States and the District of Columbia still maintain the doctrine of contributory negligence, which denies a victim any recovery if he was the least bit at fault. The other 29 States have comparative negligence doctrines which permit recovery on the basis of a weighing of the relative negligence of the parties involved.

Third, the victim frequently must bring and win a lawsuit. In 1967, according to the Department of Transportation study, seriously injured victims or their survivors had to wait an average of 19 months for final payment. In the interim, of course, they had to pay for all of their losses unless they had other insurance coverage; for example, automobile medical payments or health insurance, which pay without regard to fault.

Fourth, the party at fault must have sufficient insurance or other financial resources to pay for the victim's loss. The underinsured person who lacks other financial resources may not have enough money to cover the victim's losses. The uninsured driver who lacks other financial resources can provide no relief, so the victim can recover only through his uninsured motorist coverage, which in many cases is inadequate to pay for serious economic losses.

In addition to being slow and costly—approximately $1.5 billion out of some $8.6 billion of annual premiums for private passenger bodily injury liability insurance goes to attorneys, representing either the plaintiff or the defendant—the tort/insurance system has major compensation gaps where innocent people do not recover a penny. An innocent victim cannot recover if the other driver is also innocent. Such would be the case where two cars, properly driven, collide on a slippery road, resulting in the loss of eyesight by one driver and the loss of a leg by the other. Since both parties op-

erated their vehicles in a nonnegligent fashion, the tort/insurance system would deny them any recovery under their insurance.

Similarly, if a driver swerves to avoid a child who has run out into the road and hits a tree, the driver cannot recover for his injuries in tort because there is no "negligent" driver. If the victim is injured while a passenger in a car, as a consequence of the host-driver's negligence, he would be barred from recovery by the "guest" statute if the accident occurred in one of the 12 States which still have such statutes. The effect of all of these gaps is that 52 percent of seriously or fatally injured persons benefit in no way whatsoever from the tort/insurance system.

At this point, I would like to expand on the DOT's study's conclusion that the tort/insurance system "ill serves the accident victim, the insuring public and society; that it is inefficient, overly costly, incomplete and slow; and that it allocates benefits poorly, discourages rehabilitation and overburdens the courts and the legal system."

The conclusions that the existing system is "inefficient" and "overly costly" were based upon a DOT analysis which indicated that only 44 cents out of every premium dollar collected is used to compensate accident victims. Of this amount, 8 cents is duplicative of payments from other sources and 21½ cents is used to pay for general damages; that is, "pain and suffering" or intangible losses. Only 14½ cents out of the premium dollar goes to compensate victims for economic losses not otherwise compensated—the single most important objective of any insurance system. On the other hand, the DOT study found that attorneys were well compensated from the system. Attorneys' fees amounted to 27.3 percent of total payments to claimants, or about 20 cents out of every premium dollar. The 44-cent return ranks as the lowest return of any major insurance system.

The conclusion that the system "allocates benefits poorly" is supported by the following DOT table, which reveals that many eligible claimants with the smallest economic losses are grossly overcompensated while those with the largest losses are grossly undercompensated:

COMPARISON OF REPARATIONS RECEIVED BY FATALLY OR SERIOUSLY INJURED PERSONS WITH AND WITHOUT TORT RECOVERY BY SIZE OF LOSS

Total economic loss	Percent with tort recovery	Ratio of net recovery to loss	
		With tort	Without tort
$1 to $499	54	4.5	0.8
$500 to $999	63	2.6	.5
$1,000 to $1,499	49	2.4	.7
$1,500 to $2,499	47	2.0	1.0
$2,500 to $4,999	44	1.6	.6
$5,000 to $9,999	44	1.1	.6
$10,000 to $24,999	52	.7	.4
$25,000 and over	42	.3	.3
Total	48	.6	.4

The main reason that people with economic losses of less than $500 recover 450% of their economic loss is the "nuisance value" of their claims to insurance companies. It is cheaper for a company to pay $2,000 on even a questionable claim than it is to go to court to contest that claim. On the other hand, the leverage switches to the company's side as the economic losses mount up. Only the affluent can afford to pay the medical bills and to cover for wages lost because of the accident during the 19 months seriously injured victims must wait until final payment is made on a valid claim.

It is thus not surprising that people with the most severe injuries recover only about 30 percent of their economic losses and that people with limited education and low income recover a lower percentage of their losses than do people with more education and income.

Dr. John Nemiah described very graphically how the system "discourages rehabilitation" in an article which appeared in the March/April 1971 issue of Trial magazine, the official magazine of the trial lawyers:

> It should be appreciated by all concerned that the adversary nature of a tort or compensation action subsequent to injury heightens the patient's sense of grievance, entitlement to redress and revenge—which tends to foster his aggressive drives and to shift his attention from goals of rehabilitation and eventual regained independence.
>
> Finally, it should be recognized that the delays so frequently encountered in settling personal injury litigation tend to keep the patient trapped for months, even years, in a limbo of indecision and idleness in which dependency needs are fostered. During this time, it frequently becomes so pointless to try to work toward rehabilitation that, practically, the patient remains an invalid until legal elements emanating from his injury are resolved.

Further, studies show that the later people begin rehabilitation, the longer it takes to rehabilitate them and that when an individual postpones going for rehabilitation, the level of rehabilitation which is reached is lower than if he had gone for treatment immediately after sustaining an injury.

The final conclusion, that the system "overburdens the court," is supported by the fact that in 1968, 220,000 lawsuits were filed as a result of motor vehicle accidents and motor vehicle litigation accounted for 17 percent of the use of the judicial system's resources, ranging from 3 percent to 46 percent in different States. Of the 220,000 suits filed, more than half required over 2 years to reach determination. On the other hand, a recent study by the Council on Law-Related Studies found that the Massachusetts no-fault law resulted in a significant reduction in litigated claims. Generally, 90 percent of the court filings for small claims disappeared and 50 percent of the court filings on larger claims disappeared.

The DOT study also concluded that the present system has no substantial deterrent effect on driver behavior. It disputes the thesis that the present system deters people from driving recklessly. It indicates that most accidents are caused by environmental or personal factors which are external to the individual's conscious control and that punishment or its threat is ineffective as a deterrent to deviant driving behavior. Existing deterrent measures fail to distinguish between drivers who are unwilling to conform to "normal" driving behavior and those who are willing but unable to conform. For the former group, the threat of punishment will not do the job, and deterrence is obviously ineffective in dealing with the second group—for example the inexperienced driver makes errors and all drivers' minds wander at times, particularly when they are experiencing personal problems. In any event, DOT concluded that even if the tort system acted as a deterrent, liability insurance would surely dilute any deterrent pressures.

In short, the insurance/tort system provides neither good compensation for victims nor good deterrence of bad drivers.

TORT REFORMS

There are several ways the present tort system could be reformed. One such way would be to try to close some of the compensation gaps. For example, all contributory negligence rules could be changed to comparative negligence; the remaining guest statutes could be repealed; State statutory limits on recovery in wrongful death actions could be removed; universal compulsory liability insurance could be mandated; and minimum liability limits could be increased to $50,000/$100,000. These changes approximate the American Bar Association's reform proposals. However, State Farm Insurance Group and Aetna Life & Casualty Group have estimated that such a plan would increase the average driver's bodily injury premium by 58 percent. Moreover, such a reform would still leave major compensation gaps—for example, for the victims of single car and hit-and-run accidents—and do nothing to eliminate court congestion or to assure prompt payment of benefits.

Another possible approach would be to permit an insured to retain all of his rights to sue in tort but also require him to carry "first party" coverage—whereby a victim's own insurance company pays him in the event of an injury, without seeking to determine who "caused" the accident. While some people under such a system might walk away satisfied with their recovery, others clearly would use the payments to "finance" a lawsuit, that is, to enable them to afford to wait for a settlement without suffering severe economic loss.

Victims under such a system would have the same leverage as they do under the tort/insurance system to secure payments from insurance companies for the nuisance value of their claim. This approach, entitled an "add-on" law, merely adds-on a no-fault system to the existing tort system and clearly it is more costly to support two systems than one. It should surprise no one that the trial lawyers are the greatest advocates of add-on laws.

ADVANTAGES OF A NO-FAULT SYSTEM

The Department of Transportation study concluded that the only way to remedy the problems of the tort system is to replace it with a no-fault system which, first, requires direct payment to a victim by his own insurance company

of all of his medical loss and part of his work loss, replacement services loss and death loss; and, second, restricts the right to sue to the most serious cases.

Since the insurer's obligation to pay benefits would not depend upon the uncertain outcome of a lawsuit or settlement agreement, this insurer under no-fault is able to provide for prompt and certain payment of benefits to people when they need them most. The bill I am introducing requires the payment of no-fault benefits within 30 days. In turn, prompt and certain payment would assure the creation of better emergency medical care systems and encourage good hospital and rehabilitation care. Thus, no-fault can reduce the tragic loss of lives and human capacities caused by highway accidents and the tort/insurance system.

No-fault would close the compensation gaps in the tort system. People injured in single car accidents; people injured as passengers in cars driven by a "negligent" driver; people who are only slightly at fault; and people who are injured by hit-and-run drivers or uninsured or underinsured drivers would all recover no-fault benefits—only car thieves and people who seek to injure themselves or others intentionally would be ineligible to receive benefits.

No-fault is an efficient and low-cost system. The limitation on the right to sue for noneconomic damages to the most serious cases would eliminate the need to determine fault in more than 90 percent of the cases, thus drastically reducing claims adjustment expenses—including, obviously, the need to pay for both the plaintiff's and the defendant's attorneys' fees. By compensating victims for their real economic losses, as opposed to their undefinable and often questionable noneconomic losses, no-fault can provide about three times as many dollars for economic losses.

State Farm and Allstate, the two largest auto insurers in the country, prepared cost estimates of the impact of the benefit and tort restriction provisions of this legislation in the 94th Congress. Overall, State Farm estimated an 11 percent decline in the average premium nationwide, while Allstate estimated a 15.8 percent decline. The State-by-State averages appear on the following chart:

EFFECT OF NO-FAULT AUTO INSURANCE AS PROPOSED IN H.R. 9650, 94TH CONG.

State	Absolute dollar figures[1]	Percent of average savings in personal injury premium[2]
Alabama	$44	−20.0
Alaska	74	−8.0
Arizona	69	−19.0
Arkansas	47	−11.0
California	79	−15.0
Colorado	58	−5.0
Connecticut	58	−17.0
Delaware	39	−15.0
District of Columbia	106	−22.0
Florida	64	+6.0
Georgia	54	0
Hawaii	82	−15.0
Idaho	36	−11.0
Illinois	75	−12.0
Indiana	44	−14.0
Iowa	32	−9.0
Kansas	39	−5.0
Kentucky	45	−2.0
Louisiana	81	−20.0
Maine	43	−25.5
Maryland	83	−18.0
Massachusetts	68	−24.0
Michigan	67	−9.0
Minnesota	65	−5.0
Mississippi	47	−9.0
Missouri	53	−8.0
Montana	30	−13.0
Nebraska	30	−13.0
Nevada	73	−3.0
New Hampshire	75	−31.4
New Jersey	77	−15.5
New Mexico	42	−12.0
New York	90	−26.1
North Carolina	49	−2.0
North Dakota	29	−4.0
Ohio	53	−15.0
Oklahoma	46	−15.0
Oregon	56	−16.0
Pennsylvania	63	−6.0
Rhode Island	55	−29.5
South Carolina	51	−8.0
South Dakota	29	−3.0
Tennessee	59	−5.0
Texas	58	−28.0
Utah	51	−4.0
Vermont	40	+2.9
Virginia	63	−5.0
Washington	58	−17.0
West Virginia	39	−10.0
Wisconsin	61	−7.0
Wyoming	28	−11.0

[1] These were the cost figures for State Farm's average rates as of Dec. 31, 1974, in each State for a typical policyholder for bodily injury liability, uninsured motorist, and medical payments coverages (and basic personal injury protection coverage in those States already under a no-fault plan).

[2] The figures in this column are derived from the figures submitted to the Subcommittee on Consumer Protection and Finance by State Farm and Allstate insurance companies for the following benefit and tort restriction features of H.R. 9650: (1) Benefits paid without regard to fault for all medical and rehabilitation loss; up to $15,000 for work loss; up to about $5,500 for replacement services loss; and up to $1,000 for death benefits; and (2) lawsuits are limited to those for economic loss which exceeds no-fault benefit levels and those for noneconomic detriment if the injury results in death, serious and permanent disfigurement, or 90 continuous days of total disability. The figure shown for any particular State represents the projection of the company, State Farm or Allstate, which has the larger share of the market in that State. The only exceptions to this rule are for the States of Georgia, Kentucky, Minnesota, North Dakota, and Pennsylvania, where new statutes went into effect on or after Jan. 1, 1975. The projections for these States were revised as of Dec. 15, 1975, by State Farm, whereas the projections for the other States are as of Dec. 31, 1974.

Not only is a no-fault a more efficient and lower cost system than the tort/insurance system, it allocates benefits more equitably. The limitation on the right to sue to the most serious cases would eliminate the distortions in the prevailing system whereby people with the smallest economic losses often recover five or six times their actual economic loss, while people with the largest economic losses recover only a tiny portion of their loss, whether they can successfully maintain a lawsuit or not.

Since the no-fault bill I am introducing would require the payment of all reasonably needed and priced medical care and $15,000 for work loss, obviously a victim who is disabled would recover 100 percent of his actual economic loss for amounts well over $15,000. Just how much, of course, would depend upon what proportion of his loss is medical and what part is work loss. The DOT study found that on the average more than 40 percent of economic losses of $25,000 are medical; therefore, most people with economic losses of $25,000 would receive 100 percent of their actual loss—$10,000 in medical benefits and $15,000 in work loss benefits.

People with economic losses of more than $25,000 would be guaranteed at least the right to get back on their feet, since the bill would pay for all medical losses. Moreover, the chances of additional recovery for uncompensated economic loss and for noneconomic loss for serious injuries through a lawsuit are better than under the tort/insurance system for the following reasons: One, since all of a victim's medical losses and $15,000 of his work loss would be provided under the bill, he could afford to wait out the lengthy process of suing without suffering catastrophic economic loss; second, since the bill requires $15,000/$30,000 third party liability coverage, a higher mimimum than exists in most States, there would be more funds available to pay the judgment when a victim wins a suit; and third, since the bill mandates a comparative negligence standard for residual tort actions, people injured in States which today maintain contributory negligence rules would have a better chance for recovery.

Finally, it is obvious that the elimination of the right to sue in more than 90 percent of motor vehicle accident cases will have a significant impact on reducing the burden on the courts.

THE NATIONAL STANDARDS FOR NO-FAULT BENEFITS ACT

This bill is designed to extend the benefits of no-fault nationwide. It would accomplish this by incorporating many of the specific no-fault recommendations of both the Department of Transportation and the National Conference of Commissioners on Uniform State Laws.

States would have 3 years to enact no-fault plans that provide for the payment of all reasonably needed and priced medical care; at least $15,000 in wage loss benefits; a reasonable amount for replacement of household services; and a reasonable amount, not less than $1,000, for death benefits. In addition, the bill would restrict the right to sue to the most serious injury cases. If a State failed to adopt a conforming plan, a Federal plan providing more benefits and eliminating almost all tort suits would go into effect.

The comprehensive medical benefits are provided to meet the most important objective of the bill—the restoration of accident victims to health and a productive life as rapidly as possible. Victims would be entitled to payment for all "reasonable charges incurred for * * * reasonably needed and used products, services and accommodations" for professional medical care, emergency medical services, and medical and vocational rehabilitation services.

The insurer would pay the provider of medical benefits directly and the provider could not receive any additional amount from the victim. This arrangement will not only get the victim out of the middle of any controversy over the "reasonableness" of the charges or their necessity but will give the insurer more leverage over health care costs and over-utilization of medical benefits.

The bill contains a mechanism to avoid any problems small insurance companies might have with reinsurance costs—what insurers pay to insure themselves against large losses—if they incur more than their anticipated number of large medical losses from serious accidents. The bill requires a State, if it is necessary to

preserve the competitive position of small insurance companies in the State, to establish a procedure for apportioning catastrophic losses for medical expense in excess of $100,000 among all insurers. This procedure will avoid any possible anticompetitive effects for small companies while permitting the entire population to have unlimited medical expense coverage for approximately $1 a year more than it would cost to have medical coverage for $50,000 of such losses.

The bill requires an approved State plan to provide for a minimum of $15,000 of basic no-fault benefits for work loss, with a monthly internal limit of $1,000—multiplied by a formula which reflects State-by-State differences in wages; or, if a person's income were less than the adjusted $1,000, he could disclose his actual income and reduce both the monthly amount he would recover in the event of an accident and the cost of his insurance—unless a person chose voluntarily to carry more coverage. The monthly limit would prevent the rich victim from being able to sue sooner than the poor victim—for economic loss above $15,000—thus avoiding any possible equal protection problems under the Constitution.

The bill requires an approved State plan to provide for a reasonable amount of basic no-fault benefits for replacement services loss. "Reasonable" is not defined at any specific level, but cost projections on the bill have assumed a benefit level of about $5,500.

The bill requires an approved State plan to provide for a reasonable amount of basic no-fault benefits for loss due to death, but in no event less than $1,000. There are two reasons that the bill would permit States to choose a lower figure for death benefits than for work loss. First, the vast majority of people plan for the contingency of death through life insurance. Some 145 million people in the United States are covered by life insurance, with the average family coverage being $26,500. Second, 90 percent of the workers in the Nation are covered by social security, which provides for better coverage for death than for disability. The survivors of a deceased victim would be eligible for more than $10,000 in social security benefits annually until the children reach 18. While the family of a disabled victim could recover a similar maximum amount, the social security system does not permit any payments to disabled workers unless the disability is so severe that it prevents the worker from doing any substantial gainful work; and the disability must last, or be expected to last, for at least 12 months, or result in death. In addition, disabled workers cannot recover anything for the first 5 months of disability. Since the legislation is designed to fit into the existing structure of all insurance and benefit programs—there is a specific section which provides for the avoidance of unintended duplication of benefits—the bill would permit a State to offer a lower level of benefits for death than for disability. Of course, the legislation does not prohibit a State from exceeding the $1,000 minimum.

In turn, the bill restricts the right to sue for damages for bodily injury sustained in a motor vehicle accident to the most serious injury and death cases. A victim could sue for any economic loss that is not covered by basic no-fault benefits for work loss and replacement service loss; and for noneconomic detriment if the injury results in serious and permanent disfigurement, serious and permanent injury, or 90 or more continuous days of total disability. Any survivors of a victim could sue for both any uncompensated economic loss and for noneconomic loss.

Moreover, to make residual tort rights meaningful, the bill requires application of the doctrine of comparative negligence in residual tort actions thereby improving a victim's right to recover in the States that still have contributory negligence rules. A victim's right to recover in a suit also would be improved by the fact that the bill requires people to carry $15,000/$30,000 of third party liability coverage as well as first party protection.

Finally, the bill provides for a system of civil and administrative tort penalties wherever a State deems such penalties to be appropriate. Thus, individual responsibility would be retained, but outside of the insurance system, where it belongs and where it might be more effective at removing dangerous drivers from the road.

The effect of the legislation would be to restore the insurance system to the function of compensating victims, while providing for a separate tort system to remove dangerous drivers from the road.

THE NEED FOR NATIONAL STANDARDS FOR STATE NO-FAULT BENEFIT PLANS

Since 1946, the Federal Government has expended more than $80 billion to build and improve highways and, since 1946, more than 1,246,596 persons have died as a result of motor vehicle accidents in the United States and at least 10 million more have been seriously injured. It is not surprising that more than 70 percent of accident fatalities and more than 50 percent of motor vehicle injuries occur on highways built with 50 to 90 percent Federal funds.

The Congress has passed legislation several times in this century to compensate the victims of transportation accidents. In 1908, the Congress passed the Federal Employer's Liability Act, which was designed to give the average railroad worker better protection against the unusual dangers to life and limb inherent in railroad work.

In 1927, the Congress passed the Longshoremen and Harbor Workers Compensation Act, again choosing to replace an inadequate State tort remedy for injuries occurring incident to a national transportation system with a better Federal system of compensation. This time the Congress chose to provide a Federal schedule of benefits for injured workers—first party benefits that are paid without regard to fault. A schedule similar to the one in this act appears in the alternative Federal plan of the legislation.

Thus, the bill would not be unique in replacing inadequate State tort laws with a system of greater and surer benefits for injuries arising out of an inherently dangerous mode of transportation.

In fact, the measure would not go as far as its predecessors because it would preserve most of the States' role in regulating these matters. Not only would the States be permitted to set higher benefit standards or more narrowly restrict the right to sue, they would be permitted to devise their own program to make compulsory no-fault coverage available; to devise provisions to assure that there is no unintended consumer duplication of benefits and that the cost savings of no-fault are passed through to insureds; to set rates; to determine whether some form of pooling arrangement is needed to protect small insurance companies from any anticompetitive effects of higher reinsurance rates for unlimited medical expense coverage; and to devise, if they so choose, civil and administrative tort systems to get bad drivers off the road.

Since the rehabilitation and compensation of transportation accident victims is a national problem in which the Federal Government has historically been involved, the only question to examine beyond the efficacy of no-fault is whether the States have been acting so rapidly and wisely as to indicate that there is no need for Federal action.

Unfortunately, the performance of States is a sad record of inaction and ineffective action. All 50 States and the District of Columbia have considered no-fault measures in the 11 years since now-Massachusetts Gov. Michael Dukakis introduced the first no-fault bill in 1966. In 1967, seven State legislatures were already considering no-fault bills. To date, however, only 16 States have adopted no-fault laws that combine first party benefits with a restriction on the right to sue and no others are likely to do so in the foreseeable future (another 8 States have adopted add-on laws that provide first party benefits but do not restrict the right to sue in any way).

Of the 16, only Michigan's law approaches the recommendations of the model State law drafted by the National Conference of Commissioners on Uniform State Laws. Specifically, the model law recognizes the importance of restoring the seriously injured to productive lives and, accordingly, provides for the payment for all reasonably needed and priced medical expenses. Only three States—Michigan, New Jersey, and Pennsylvania—provide unlimited medical benefits while only three others—Colorado, Minnesota, and New York—offer $20,000 or more in such benefits.

It is also essential for a good no-fault law to have fiscal integrity. It must provide greater benefits at a reasonable cost. The key to the integrity of any no-fault law lies in its threshold, the level at which a victim is permitted to sue for so-called pain and suffering. The model State law sets its threshold at "serious and permanent injury," a level which permits only the seriously injured to maintain suits. An attendant benefit to a high threshold is that it relieves the courts of the tremendous burden of auto accident litigation. Of the State no-fault laws, only Michigan and Florida set their

threshold at a similar level. Most States have low dollar thresholds which permit suits after a person's medical expenses exceed some low level, typically $500.

My own State of New York, for example, has a $500 threshold, which is far too low to keep premium costs under control since the law also provides for $50,000 of first party benefits. It would not work even if all people were honest. Unfortunately, the experience in New York and many of the other States with low dollar thresholds is that some doctors, lawyers, and hospitals are colluding to increase medical costs above the threshold so that suits can be maintained. It was just such practices that undercut the Florida dollar threshold and forced the legislature to adopt a serious and permanent injury threshold. Unfortunately, other State legislatures have not learned from Florida's experience.

A no-fault law with a good threshold also can provide far greater benefits to accident victims. The State of Michigan, whose law most closely resembles the model State law and the one in my proposed bill, recently issued a glowing report on its no-fault law. The insurance commissioner reports that—

> No-fault auto insurance has provided Michigan's drivers and passengers with more benefits per premium dollar than the insurance system of any other state and has assured that those benefits are distributed more promptly and equitably.

The report goes on to categorize the benefits of this good no-fault law in greater detail:

> First, and most importantly, no-fault has resulted in more accident victims receiving compensation for their injuries and in the most seriously injured receiving more adequate compensation.
>
> Second, no-fault has eliminated delays in the payment of legitimate claims. Before no-fault, 34% of the families suffering a serious injury or fatality were forced to use their own assets or to borrow funds to pay the costs associated with their accident. Now, that is not necessary.
>
> Third, no-fault has enabled Michigan's citizens to coordinate their auto insurance benefits with other insurance benefits and thereby has created the potential for overall cost-savings in insurance premiums.
>
> Fourth, and finally, no-fault has reduced the administrative and legal costs associated with auto accident insurance claims. Court cases have been significantly reduced, resulting in more premium dollars being available to pay benefits to people.

The balance between benefits and the threshold in the Michigan system has enabled the law to be implemented without increasing premiums, except to compensate for the rampant inflation. The Michigan insurance commissioner reports that rate increases under the no-fault law "are substantially less than States with other no-fault systems and than States which still have the fault system."

In short, State experience with no-fault has shown that the legislatures are more sympathetic to trial lawyers than to consumers. The one State that has adopted the model State law—which was devised by disinterested State individuals—is Michigan and its law has been a tremendous success. The legislation I am introducing today would extend the benefits of that proven system nationwide by providing uniform standards for State no-fault benefit plans to insure that the victims of motor vehicle accidents will be guaranteed the right to recover, rather than merely the right to sue, for their losses.

STATEMENT OF HON. JOHN M. MURPHY ON THE INTRODUCTION OF A BILL TO PROHIBIT THE BRIBERY OF FOREIGN OFFICIALS

Mr. Speaker, today I am introducing a bill to prohibit bribes to foreign officials. While investigating certain contributions to the 1972 reelection campaign, the Watergate Special Prosecutor uncovered a number of corporate political slush funds. These funds had been concealed from normal corporate accounting controls. Since such activities involved matters of possible significance to public investors, the Securities and Exchange Commission initiated its own investigation. Their investigation revealed that a number of U.S. corporations, in connection with their overseas operations, had used such secret slush funds for questionable and illegal foreign payments. As a result, a number of domestic corporations have come forward voluntarily to publicly disclose the amount and nature of these payments. However, in a number of other cases, the Commission has had to resort to injunctive actions to assure public disclosure and cessation of these activities.

Initially, the Securities and Exchange Commission was subject to substantial criticism from many quarters, on the grounds that this was the normal way of doing business abroad and that shareholders had no right to such information. The Commission has steadfastly maintained that such activities reflect on the integrity of management and that shareholders should be aware that their company's profits have been derived from and, in the future, are dependent upon, magnanimity to foreign officials and not upon competitive excellence.

At times it must have appeared to the Commission that it was waging a very lonely battle. However, largely through their efforts and hearings by the Senate Committee on Banking, Housing, and Urban Affairs, the Senate Foreign Relations Subcommittee on Multinational Corporations, and my Subcommittee on Consumer Protection and Finance, we have become acutely aware of the dimensions of the foreign bribery problem and its deleterious effects on U.S. foreign policy, on the business climate abroad for U.S. corporations, and on our own moral expectations.

The revelations concerning Lockheed have been the most conspicuous, but as more and more corporations have come forward we recognize that such foreign payments are not isolated transactions. Over 175 American firms have made disclosures concerning questionable foreign payments or are currently conducting company investigations into such payments. The aggregate amount revealed to date is a startling $300,000,000—much of it paid out since 1970.

In the Lockheed scandal, the company has admitted making $25 million in payments not reflected on the company's books and records to assist the company in obtaining and retaining contracts with foreign governments. However, the SEC has indicated that as much as $200,000,000 in Lockheed fees and commissions need to be investigated. The foreign policy implications for the United States are staggering and, in some cases, perhaps irreversible. Payments by Lockheed alone may well have advanced the Communist cause in Italy. In Japan, a mainstay of our foreign policy in the Far East, the government is reeling as a consequence of such payments. On August 16, 1976, former Prime Minister Tanaka was indicted on charges of accepting $1.7 million from Lockheed. More recently, the monarchy in the Netherlands has been rocked by the Lockheed scandal.

All of this lends substantial credence to the suspicions of extremists that U.S. businesses operating in their country have a corrupting influence on their political systems. Contrary to what some of the oppents of any remedial legislation would have us believe, bribery is not just a way of doing business abroad. No country in the world publicly supports bribery of public officials, and under the laws of most countries, such payments are illegal. As Senator CHURCH stated in introducing his own bill to curb such activities:

> While corporations frequently argued that these are practices common and accepted in other countries, those same corporations have engaged in intricate machinations to conceal the existence of these payments. Double bookkeeping, "off-the-books accounts," Swiss bank accounts, dummy or shell corporations set up in Switzerland or Liechtenstein, numerous agents or intermediaries, whose existence is often kept secret, code names and code books dispute the credibility of the "common and accepted practice" argument.

Many U.S. corporations have never engaged in such practices and most welcome remedial legislation because it would make it easier to resist pressures from foreign officials.

Finally, foreign bribery involves outright unfair business practices. A substantial number of the payments revealed thus far have involved American companies competing with American companies for the same business.

I would emphasize that this bill is not concerned with so-called grease or facilitating payments, such as may be necessary to a low-level nonelected foreign government official to persuade him to perform his required function.

The bill I am introducing today would apply the existing criminal penalties of the Securities Exchange Act of 1934 to persons who bribe foreign officials. There is persuasive evidence that any proposal which does not exact substantial penalties for engaging in these corporate activities is valueless as a deterrent. It may well be because of the foreign nature of the transaction that certain cases will be difficult to enforce. However, the kind of evidence which already has been obtained by the Commission in the form of documentation and witnesses available domestically demonstrates that many of these cases can be successfully prosecuted. Most importantly, however, few

corporate executives, given the real possibility of criminal prosecution, would sanction the kinds of activities which this bill seeks to prevent.

The Commission's experience has shown that these "offbook" transactions have existed largely because appropriate accounting controls were not in place. Accordingly, this bill would mandate the establishment of such controls. In addition, it has become apparent that many of those companies who have engaged in questionable foreign payments only endeavored to do so because they were able to deceive their independent auditors, with the result that the audited financial statements did not accurately reflect these transactions. When an accountant is deceived in connection with his examination of a corporation, the investing public is defrauded. Accordingly, this bill would impose the same kinds of sanctions on persons who deceive accountants as have been traditionally applied to persons who make false and misleading statements to an investor in connection with the offer or sale of a security.

The bill is divided into three sections, which are summarized as follows:

Section 1 requires reporting companies to create and to maintain accurate books and records. Second, it requires internal accounting controls sufficient to assure that transactions will be executed in accordance with management's instructions, that transactions will be accurately recorded, that access to corporate assets is carefully controlled, and that the representations on company books will be compared at reasonable intervals with actual assets, and any discrepancies resolved. This section also makes it a crime for a reporting company to falsify books, records, accounts, or documents, or to deceive an accountant in connection with an examination or audit.

Section 2 applies to corporations subject to the jurisdiction of the SEC by virtue of the reporting requirements of the Securities Exchange Act of 1934. It applies the existing criminal penalties of the securities laws—up to 2 years imprisonment and a fine of up to $10,000—for payments, promises of payment, or authorization of payment of anything of value to any foreign official, political party, candidate for office, or intermediary, where there is a corrupt purpose. The corrupt purpose must be to induce the recipient to use his influence to direct business to any person, to influence legislation or regulations, or to fail to perform an official function in order to influence business decisions, legislation, or regulations of a government.

Section 3 applies the identical prohibitions and penalties provided by section 2 to any domestic business concern other than one subject to the jurisdiction of the SEC pursuant to section 2. Violations of the criminal prohibition under section 3 by persons not subject to SEC jurisdiction would be investigated and prosecuted by the Justice Department. Violations under section 2 would normally be investigated initially by the SEC, but referred for criminal prosecution to the Justice Department.

STATEMENT OF HON. JOHN M. MURPHY ON THE INTRODUCTION OF A BILL TO EXTEND THE TIME PERIOD IN WHICH VETERANS OF THE VIETNAM ERA CAN UTILIZE THE EDUCATIONAL BENEFITS

Mr. Speaker, today I am introducing legislation to extend the time period in which veterans of the Vietnam era can utilize the educational benefits earned by their service. My proposal will extend the deadline which became effective last May by 2 years thereby allowing veterans affected by this cutoff to finish school or prepare suitable alternatives.

The 94th Congress generated many new veterans benefit laws, however, the Veterans' Affairs Committee did not act on this important issue of education. For a number of reasons action should be taken on this issue which was left outstanding.

It must be recognized that each armed conflict of our history represents a unique phase of our political, social, and economic cycles. The Vietnam veteran, unlike the veteran of past decades, was discharged into a society of unemployment, recession, spiraling inflation, and an ever-increasing demand for advanced educational degrees. The Vietnam veteran, like past veterans, was also discharged into a society of obligations and these obligations had to be met under increasingly severe economic conditions. For most young heads of households the task of "breaking even" required all energy leaving little time for the consideration of higher education.

Under normal circumstances, 10 years would be an adequate amount of time in which to finish a college education; however, a veteran's readjustment from years of military service does not always denote normal circumstance. Problems, both economic and social, can make homecoming a difficult experience.

It has become almost a fashion to lament the plight of the Vietnam era veteran, but that merely recognizes the problem without solving it. The Vietnam war had no fixed beginning, nor did it have an established end. The annual rotation of servicemen on 13 month tours of duty took hundreds of thousands through the Southeast Asian war zone between 1960 and 1973 on an individual basis. That policy denied those men and women the opportunity to rejoin society as a group—on an equal footing. The individual soldier, sailor, marine, or airman was left to his own devices in a society which hardly noticed his or her return.

Who can forget the impact of the returning POW's in 1973 as that courageous group of men disembarked from military aircraft after years of imprisonment? They were virtually the only returnees from our longest war to be received and honored as a group. Certainly they would be the first to acknowledge that they would have been devastated had they been overlooked, as so many others were.

Much has been written and televised of late about the new President's program for those who resisted wartime service in Vietnam. The public statements of many have emphasized the compassion and decency of the American people. We are reminded that America uplifted Europe with the Marshall plan; that America resurrected war-ravaged Japan and made it economically whole; that it is America whose moral fiber must imbue her foreign policy with righteousness. In that Tradition, we are told, America must now absolve her expatriate sons of the sixties.

When those young men cross our borders they will be exercising one right denied to thousands of their contempararies: The right to return to their homeland physically whole. And if we are going to treat them with compassion and understanding then let us send a signal to those young soldiers and marines who came home in ones and twos, unnoted and unsung, bent but not broken. Let us tell them that while America will not celebrate their acts of valor and conscience on the televised evening news, she is ready to give them the added recognition they deserve—because they earned it. The hard way.

Being a veteran myself and knowing the sacrifices which are made in any war, I am reintroducing this legislation to allow the veterans of Vietnam 2 additional years to secure a future for themselves and their families.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. TEAGUE (at the request of Mr. ECKHARDT), for January 10 to 17, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. GUYER) and to revise and extend their remarks and include extraneous matter:)

Mr. CONABLE, for 1 hour, on January 12.

Mr. BAUMAN, for 15 minutes, today.

Mr. MILLER of Ohio, for 5 minutes, today.

(The following Members (at the request of Mr. LE FANTE) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. REUSS, for 30 minutes, today.

Mr. YOUNG of Georgia, for 5 minutes, today.

Mr. BINGHAM, for 15 minutes, today.

Mr. FLOOD, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. CORMAN, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,787.

Mr. MURPHY of New York, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of

the RECORD and is estimated by the Public Printer to cost $1,072.50.

Mr. MICHEL, in two instances and to revise and extend his remarks and include extraneous matter.

(The following Members (at the request of Mr. GUYER) and to include extraneous matter:)

Mr. CONABLE.
Mr. MCCLORY.
Mr. DON H. CLAUSEN.
Mr. EMERY.
Mr. MICHEL.

(The following Members (at the request of Mr. LE FANTE), and to include extraneous matter:)

Mr. FLIPPO in two instances.
Mr. ANNUNZIO in six instances.
Mr. ANDERSON of California in three instances.
Mr. GONZALEZ in three instances.
Mr. BROWN of California in 10 instances.
Mr. MOORHEAD of Pennsylvania.
Mr. MCDONALD.
Mr. RONCALIO.
Mr. MILFORD.
Mr. SKELTON.
Mr. RODINO.

ADJOURNMENT

Mr. LE FANTE. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 19 minutes p.m.) the House adjourned until tomorrow, Tuesday, January 11, 1977, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

[*Transmitted November 11, 1976*]

4129. A letter from the Comptroller General of the United States, transmitting a report on the examination of the financial statements pertaining to the insurance operations of the Federal Housing Administration, Department of Housing and Urban Development, for fiscal year 1975, pursuant to the Government Corporation Control Act (H. Doc. No. 94–659); jointly, to the Committees on Government Operations, and Banking, Currency and Housing (Banking, Finance and Urban Affairs) and ordered to be printed.

[*Transmitted January 10, 1977*]

367. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 1–151, "To amend the District of Columbia Code and Regulations to enact a statute providing for the creation and governance of condominiums and regulating the offering of condominium units," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

368. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 1–158, "To amend the District of Columbia Teachers' Salary Act of 1955 to increase salaries and for other purposes," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

369. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 1–159, "To permit commercial advertising on the rear exterior of Metrobuses under certain circumstances," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

370. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 1–160, "To provide for implementation in the District of Columbia of the paternity and child support programs under part D of title IV of the Social Security Act," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

371. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 1–162, "To reorganize the youth services programs of the District of Columbia government, and for other purposes," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

372. A letter from the Chairman, Council of the District of Columbia, transmitting, a copy of Council Act No. 1–170, "To amend the provisions of D.C. Law 1–13, relating to the operation of Solid Waste Reduction Center No. 1," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

373. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 1–174, "To ensure fair and equitable business opportunities for minority-owned firms when contracting with the government of the District of Columbia," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

374. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 1–178, "To create a Freedom of Information Act; to create rights; and for other purposes," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

375. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 1–179, "To establish an Office of Business and Economic Development and for other purposes," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

376. A letter from the Deputy Assistant Secretary of the Interior, transmitting a copy of a proposed contract with the University of Minnesota, Minneapolis, Minn., for a research project entitled "Geotechnical Assessment of Potential Methods of Underground Mining of the Copper-Nickel Deposits in Northern Minnesota," pursuant to section 1(d) of Public Law 89–672; to the Committee on Interior and Insular Affairs.

377. A letter from the Acting Assistant Secretary of State for Congressional Relations, transmitting notice of a proposed license for the export of defense articles and services sold commercially (Transmittal No. MC–21–77), pursuant to section 36(c) of the Arms Export Control Act; to the Committee on International Relations.

378. A letter from the president, Gorgas Memorial Institute of Tropical and Preventive Medicine, Inc., transmitting the annual report of the institute and the financial statement for fiscal year 1976, pursuant to section 3 of the act of May 7, 1928, as amended (H. Doc. No. 95–39); to the Committee on International Relations and ordered to be printed.

379. A letter from the Chairman, Federal Power Commission, transmitting a list of the names and compensation of the persons employed by the Commission during fiscal year 1976; to the Committee on Post Office and Civil Service.

380. A letter from the Administrator of General Services, transmitting a prospectus proposing alterations at the Mary E. Switzer Memorial Building, Washington, D.C., pursuant to section 7(a) of the Public Buildings Act of 1959, as amended; to the Committee on Public Works and Transportation.

381. A letter from the Administrator, U.S. Small Business Administration, transmitting a draft of proposed legislation to amend the Small Business Act to increase the authorization for certain small business loan programs; to the Committee on Small Business.

382. A letter from the Administrator, U.S. Small Business Administration, transmitting a draft of proposed legislation to amend the Small Business Investment Act of 1958 to increase the authorization for the surety bond guarantee fund; to the Committee on Small Business.

383. A letter from the Fiscal Assistant Secretary of the Treasury, transmitting the statement of liabilities and other financial commitments of the U.S. Government as of September 30, 1976, pursuant to section 402 of Public Law 89–809; to the Committee on Ways and Means.

RECEIVED FROM THE COMPTROLLER GENERAL

384. A letter from the Comptroller General of the United States, transmitting a report on the administration of the President's clemency program; jointly, to the Committees on Government Operations, the Judiciary, and Armed Services.

385. A letter from the Comptroller General of the United States, transmitting a report on commercialization of the liquid metal fast breeder reactor; jointly, to the Committees on Government Operations, Science and Technology, Interior and Insular Affairs, and Interstate and Foreign Commerce.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

[*Introduced January 6, 1977*]

By Mr. ALEXANDER:

H.R. 1452. A bill to provide for improvements in the annual report on rural development submitted to the Congress by the Secretary of Agriculture, and to require the prompt appointment of a new Assistant Secretary of Agriculture for Rural Development in the case of a vacancy in that position; to the Committee on Agriculture.

H.R. 1453. A bill to amend the Communications Act of 1934 with respect to the renewal of licenses for the operation of broadcasting stations; to the Committee on Interstate and Foreign Commerce.

H.R. 1454. A bill to establish the Lake Clark National Park in the State of Alaska, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. ANDERSON of California:

H.R. 1455. A bill to amend chapter 44 of title 18 of the United States Code (respecting firearms) to penalize the use of firearms in the commission of any felony and to increase the penalties in certain related existing provisions; to the Committee on the Judiciary.

H.R. 1456. A bill to amend the Merchant Marine Act of 1936 in order to establish a national marine firefighting program; to the Committee on Merchant Marine and Fisheries.

H.R. 1457. A bill to reduce the hazards of earthquakes, and for other purposes; to the Committee on Science and Technology.

H.R. 1458. A bill to amend title II of the Social Security Act to increase to $7,500 the amount of outside earnings which (subject to further increases under the automatic adjustment provisions) is permitted each year without any deductions from benefits thereunder; to the Committee on Ways and Means.

By Mr. ANDERSON of California (for himself, Mr. ANDREWS of North Dakota, Mr. BAFALIS, Mr. BIAGGI, Mr. BLOUIN, Mr. BURGENER, Mr. GILMAN, Mr. HANNAFORD, Mr. HARSHA, Mr. JONES of North Carolina, Mr. LONG of Louisiana, Mr. LOTT, Mr. LUKEN, Mr. MATHIS, Mr. MCCLOSKEY, Mr. MILLER of Ohio, Mr. MOORHEAD of California, Mr. MURPHY of Pennsylvania, Mr. NEAL, Mr. OTTINGER, Mr. QUILLEN, Mr. SPENCE, Mr. STAGGERS, Mr. WAXMAN, and Mr. ZEFERETTI):

H.R. 1459. A bill to amend title 38, United States Code, to provide for the payment of service pensions to veterans of World War I and the surviving spouses and children of such veterans; to the Committee on Veterans' Affairs.

By Mr. ARCHER:

H.R. 1460. A bill to provide that certain provisions of the Natural Gas Act relating to rates and charges shall not apply to persons engaged in the production or gathering and sale but not in the transmission of natural gas; to the Committee on Interstate and Foreign Commerce.

Mr. BIAGGI:

H.R. 1461. A bill to amend title 18 of the United States Code to provide that persons accused of committing Federal felonies who have attained the age of 15 years shall be tried as adults, and to require the several States, the District of Columbia, and the other territories and possessions of the United States to treat all felony offenders alike who have attained the age of 15 years; to the Committee on the Judiciary.

H.R. 1462. A bill to require the fingerprinting of juvenile delinquents upon conviction or adjudication and to forbid the withholding of information from criminal trials on the grounds such information relates to a juvenile proceeding; to the Committee on the Judiciary.

By Mr. BOWEN:

H.R. 1463. A bill to delay for 1 year the effective date of the changes made by the Tax Reform Act of 1976 in the minimum tax on individuals; to the Committee on Ways and Means.

By Mr. BROWN of California (for himself, Mr. MOAKLEY, Mr. OTTINGER, Mr. DRINAN, Mr. RODINO, Mr. SEIBERLING, Mr. WHITEHURST, Mr. CARNEY, and Mr. Moss):

H.R. 1464. A bill to amend the Federal Meat Inspection Act for purposes of requiring that meat inspected and approved under such act be produced only from livestock slaughtered in accordance with humane methods; to the Committee on Agriculture.

By Mr. BURGENER:

H.R. 1465. A bill to repeal the earnings limitation of the Social Security Act; to the Committee on Ways and Means.

By Mr. COHEN:

H.R. 1466. A bill to amend the Internal Revenue Code of 1954 to encourage greater conservation of energy in home heating and cooling by allowing individuals a credit of 25 percent of amounts paid or incurred for the installation of more effective insulation and heating equipment in existing residential structures; to the Committee on Ways and Means.

By Mr. CONTE:

H.R. 1467. A bill to amend the State Technical Services Act of 1965 to make municipal governments eligible for technical services under the act, to extend the act through fiscal year 1979, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 1468. A bill to require that new forms and reports, and revisions of existing forms, resulting from legislation be contained in reports of committees reporting the legislation; to the Committee on Rules.

H.R. 1469. A bill to amend the Internal Revenue Code of 1954 to remove certain age restrictions applicable to individual retirement accounts and retirement plans for the self-employed; to the Committee on Ways and Means.

By Mr. CORRADA (for himself, Mr. DE LUGO, Mr. WON PAT, Mr. BADILLO, Mr. PHILLIP BURTON, and Mr. STARK):

H.R. 1470. A bill to amend title XVI of the Social Security Act and related laws to extend the supplemental security income benefits program to Puerto Rico, the Virgin Islands, and Guam on the same basis as the States; to the Committee on Ways and Means.

By Mr. ROBERT W. DANIEL, JR. (for himself, Mr. BURGENER, Mr. COCHRAN, Mr. DAN DANIEL, Mr. DOWNEY, Mr. DUNCAN of Oregon, Mr. FISH, Mrs. HOLT, Mr. HOWARD, Mr. KINDNESS, Mr. LEGGETT, Mr. LEVITAS, Mrs. LLOYD of Tennessee, Mr. MCCLORY, Mr. MATHIS, Mr. MOORHEAD of California, Mr. QUIE, Mr. ROBINSON, Mr. STRATTON, Mr. THONE, Mr. TRIBLE, Mr. WHALEN, Mr. WHITEHURST, Mr. BOB WILSON, and Mr. WOLFF):

H.R. 1471. A bill to provide that the changes made by the Tax Reform Act of 1976 to the exclusion for sick pay shall only apply to taxable years beginning after December 31, 1976; to the Committee on Ways and Means.

By Mr. DANIELSON:

H.R. 1472. A bill to direct the Administrator of General Services to provide, after consulting with the Attorney General, for the construction of a correctional center in Los Angeles County, Calif.; to the Committee on Public Works and Transportation.

By Mr. DELANEY:

H.R. 1473. A bill to amend title 18, United States Code, to strengthen and clarify the law prohibiting the introduction, or manufacture for introduction, of switchblade knives into interstate commerce; to the Committee on the Judiciary.

H.R. 1474. A bill to make any alien who becomes a public charge within 24 months of his arrival in the United States subject to deportation, and for other purposes; to the Committee on the Judiciary.

H.R. 1475. A bill to amend the Water Resources Development Act of 1974, relating to the New York Harbor collection and removal of drift project; to the Committee on Public Works and Transportation.

H.R. 1476. A bill to extend tax relief benefits to single individuals; to the Committee on Ways and Means.

H.R. 1477. A bill to permit officers and employees of the Federal Government to elect coverage under the old-age, survivors, and disability insurance system; to the Committee on Ways and Means.

By Mr. DEVINE:

H.R. 1478. A bill to amend chapter 49 of title 10, United States Code, to prohibit union organization in the Armed Forces, and for other purposes; to the Committee on Armed Services.

H.R. 1479. A bill to amend the Natural Gas Act to permit curtailed pipelines to fulfill the needs of consumers of natural gas; to the Committee on Interstate and Foreign Commerce.

H.R. 1480. A bill to provide for additional sentences for commission of a felony with use of a firearm; to the Committee on the Judiciary.

H.R. 1481. A bill to amend the Immigration and Nationality Act to eliminate the procedures for voluntary departure with respect to certain aliens illegally in the United States and to increase the penalties for the illegal entry of aliens; to require the Attorney General to employ additional personnel to patrol the land borders of the United States; and for other purposes; to the Committee on the Judiciary.

H.R. 1482. A bill to amend title II of the Social Security Act to increase to $7,500 the amount of outside earnings which (subject to further increases under the automatic adjustment provisions) is permitted each year without any deductions from benefits thereunder; to the Committee on Ways and Means.

H.R. 1483. A bill to amend titles II and XVIII of the Social Security Act to remove the earnings limitation; to the Committee on Ways and Means.

By Mr. FISHER (for himself, Mr. KOCH, and Mr. SOLARZ):

H.R. 1484. A bill to eliminate the complete immunity from criminal, civil, and administrative jurisdiction currently given to all foreign diplomats and their staffs and to establish the Vienna Convention on Diplomatic Relations as the basis for diplomatic privileges and immunities in the United States; to the Committee on International Relations.

By Mr. GILMAN (for himself, Mr. BRECKINRIDGE, Mr. DE LUGO, Mr. DERWINSKI, Mr. DOWNEY, Mr. DUNCAN of Tennessee, Mr. EILBERG, Mr. FISH, Mr. LAGOMARSINO, Mr. LENT, Mr. MATHIS, Mr. MURTHA, Mr. OTTINGER, Mr. RODINO, Mr. SIMON, Mrs. SPELLMAN, Mr. STEERS, Mr. WALSH, Mr. WOLFF, and Mr. ZEFERETTI):

H.R. 1485. A bill to establish a task force to study and evaluate the taxation of real property by State and local governments, the effects of such taxation on certain taxpayers, and the feasibility of Federal taxation and other policies designed to reduce the dependence of State and local governments on such taxation; jointly, to the Committees on Ways and Means, and Government Operations.

By Mr. GINN:

H.R. 1486. A bill to provide for the regular review of certain Federal agencies and for the abolition of such agencies after such review unless Congress specifically provides for their continued existence; to the Committee on Government Operations.

H.R. 1487. A bill amending title 5 of the United States Code to improve agency rulemaking by expanding the opportunities for public participation, by creating procedures for congressional review of agency rules, and by expanding judicial review, and for other purposes; jointly, to the Committee on the Judiciary, and Rules.

By Mr. GRASSLEY:

H.R. 1488. A bill to abolish the Commission on Executive, Legislative, and Judicial Salaries established by section 225 of the Federal Salary Act of 1967, and for other purposes; to the Committee on Post Office and Civil Service.

H.R. 1489. A bill to encourage the establishment of wind erosion control and wildlife habitat areas which meet standards prescribed by the Secretary of Agriculture; to the Committee on Ways and Means.

By Mr. HAGEDORN:

H.R. 1490. A bill to extend the period during which applications for insurance may be made under the Federal Crop Insurance Act; to the Committee on Agriculture.

H.R. 1491. A bill to protect the public health and welfare by providing for the inspection of imported dairy products and by requiring that such products comply with certain minimum standards for sanitation and that the dairy farms on which milk is produced and the plants in which such products are produced meet certain minimum standards of sanitation, and for other purposes; to the Committee on Agriculture.

H.R. 1492. A bill to require the U.S. Government to improve budgeting procedures by preparing annual financial statements utilizing the accrual method of accounting, and by requiring that the average cost for each taxpaying family be included in all bills and resolutions; to the Committee on Rules.

H.R. 1493. A bill to amend the Internal

Revenue Code of 1954 to limit the authority for inspection of tax returns, to provide for cost-of-living adjustments for taxpayers, and to eliminate certain tax inequities based upon marital status; to the Committee on Ways and Means.

H.R. 1494. A bill to amend the Internal Revenue Code of 1954 to exempt farmers from the highway use tax on heavy trucks used for farm purposes; to the Committee on Ways and Means.

H.R. 1495. A bill to amend title II of the Social Security Act to increase to a minimum of $3,000 the amount of outside earnings which (subject to future cost-of-living adjustments) is permitted any individual each year without deductions from benefits thereunder, and to increase further the amount of the outside earnings so permitted (while decreasing the rate of the deductions made from earnings above such amount) in the case of individuals receiving less than the maximum provided for benefits of the type involved; to the Committee on Ways and Means.

By Mr. HALL:

H.R. 1496. A bill to amend the Occupational Safety and Health Act of 1970 to provide that any employer who successfully contests a citation or penalty shall be awarded a reasonable attorney's fees and other reasonable litigation costs; to the Committee on Education and Labor.

H.R. 1497. A bill to repeal titles XV and XVI of the Public Health Services Act; to the Committee on Interstate and Foreign Commerce.

H.R. 1498. A bill to authorize construction of the Little Cypress Lake and Reservoir, Texas; to the Committee on Public Works and Transportation.

H.R. 1499. A bill to amend title 38 of the United States Code in order to provide that the fees payable to agents or attorneys who represent veterans in allowed claims under the veterans laws shall be paid by the Administrator rather than deducted from amounts awarded under the claims; to the Committee on Veterans' Affairs.

H.R. 1500. A bill to amend section 2 of the act of August 22, 1964, to prevent circumvention of import restrictions through the production or manufacture of articles from foreign meat in foreign trade zones, territories, and possessions of the United States; to the Committee on Ways and Means.

H.R. 1501. A bill to amend title II of the Social Security Act to provide that attorneys' fees allowed in administrative or judicial proceedings under that title (or under title XVIII of such act), in cases where the claimants are successful, shall be paid by the Secretary of Health, Education, and Welfare rather than deducted from the amounts awarded claimants; to the Committee on Ways and Means.

By Mr. HARRINGTON (for himself, Mr. CARNEY, Ms. CHISHOLM, Mr. CORNELL, Mr. DOWNEY, Mr. DUNCAN of Tennessee, Mr. GIAIMO, Ms. HOLTZMAN, Mr. HOWARD, Ms. KEYS, Mr. MARKEY, Ms. MEYNER, Mr. MOTTL, Mr. MURPHY of Pennsylvania, Mr. MURPHY of New York, Mr. PEPPER, Mr. ROSENTHAL, Mr. WOLFF, and Mr. WON PAT):

H.R. 1502. A bill to establish a Solar Energy Loan Administration to assist homeowners, owners of multifamily housing projects, builders, and small business concerns in purchasing and installing solar heating or combined solar heating and cooling equipment, including solar hot water systems, by providing low-interest, long-term loans; to the Committee on Banking, Finance and Urban Affairs.

By Mr. HORTON (for himself and Mr. STEED):

H.R. 1503. A bill to distinguish Federal grant and cooperative agreement relationships from Federal procurement relationships, and for other purposes; to the Committee on Government Operations.

By Mr. HUGHES:

H.R. 1504. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for certain expenses paid or incurred by a taxpayer in providing an education for himself or his spouse at an institution of higher education; to the Committee on Ways and Means.

By Mr. KOCH (for himself and Mr. SCHEUER):

H.R. 1505. A bill to prohibit U.S. companies from participating in the boycott of another U.S. company or a country friendly to the United States, or providing certain information, in response to a foreign country's request; to the Committee on International Relations.

By Mr. LATTA:

H.R. 1506. A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits thereunder; to the Committee on Ways and Means.

H.R. 1507. A bill to amend title XVIII of the Social Security Act to authorize payment under the medicare program for certain Services performed by chiropractors; jointly to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. LENT:

H.R. 1508. A bill to reaffirm the intent of Congress with respect to the structure of the commmon carrier telecommunications industry rendering services in interstate and foreign commerce; to grant additional authority to the Federal Communications Commission to authorize mergers of carriers when deemed to be in the public interest; to reaffirm the authority of the States to regulate terminal and station equipment used for telephone exchange service; to require the Federal Communications Commission to make certain findings in connection with Commission actions authorizing specialized carriers; and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. LEVITAS (for himself, Mr. PEPPER, Mr. MAZZOLI, Mr. MOAKLEY, Mr. BLANCHARD, Mr. KETCHUM, Mr. ALEXANDER, Mr. NEDZI, Mr. ROE, Mr. MARTIN, Mr. MATHIS, Mr. BRECKINRIDGE, Mr. HUBBARD, Mr. ZEFERETTI, Mr. DERWINSKI, Mr. WHITEHURST, Mr. BROWN of Ohio, Mr. KINDNESS, Mrs. HOLT, Mr. BURGENER, Mr. HANNAFORD, Mr. WYDLER, Mr. CLEVELAND, Mr. KREBS, and Mrs. LLOYD of Tennessee):

H.R. 1509. A bill amending title 5 of the United States Code to improve agency rulemaking by expanding the opportunities for public participation, by creating procedures for congressional review of agency rules, and by expanding judicial review, and for other purposes; jointly, to the Committees on the Judiciary and Rules.

By Mr. LEVITAS (for himself, Mr. PEPPER, Mr. MAZZOLI, Mr. BLANCHARD, Mr. KETCHUM, Mr. ALEXANDER, Mr. NEDZI, Mr. ROE, Mr. MARTIN, Mr. MATHIS, Mr. BRECKINRIDGE, Mr. HUBBARD, Mr. ZEFERETTI, Mr. DERWINSKI, Mr. WHITEHURST, Mr. BROWN of Ohio, Mr. KINDNESS, Mrs. HOLT, Mr. BURGENER, Mr. HANNAFORD, Mr. WYDLER, Mr. CLEVELAND, Mr. SANTINI, Mrs. LLOYD of Tennessee, and Mr. WIRTH):

H.R. 1510. A bill amending title 5 of the United States Code to improve agency rulemaking by expanding the opportunities for public participation, by creating procedures for congressional review of future agency rules, and by expanding judicial review, and for other purposes; jointly, to the Committees on the Judiciary and Rules.

By Mr. LEVITAS (for himself, Mr. PEPPER, Mr. MAZZOLI, Mr. BLANCHARD, Mr. KETCHUM, Mr. ALEXANDER, Mr. NEDZI, Mr. ROE, Mr. MARTIN, Mr. MATHIS, Mr. BRECKINRIDGE, Mr. HUBBARD, Mr. ZEFERETTI, Mr. DERWINSKI, Mr. WHITEHURST, Mr. BROWN of Ohio, Mr. KINDNESS, Mrs. HOLT, Mr. BURGENER, Mr. HANNAFORD, Mr. WYDLER, Mr. CLEVELAND, Mr. KREBS, Mr. STUDDS, and Mrs. MEYNER):

H.R. 1511. A bill amending title 5 of the United States Code to improve agency rulemaking by expanding the opportunities for public participation, by creating procedures for congressional review of agency rules imposing certain sanctions, and by expanding judicial review, and for other purposes; jointly, to the Committees on the Judiciary and Rules.

By Mr. LOTT:

H.R. 1512. A bill to amend the Communications Act of 1934 to provide that licenses for the operation of broadcasting stations may be issued and renewed for terms of 5 years, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 1513. A bill to incorporate the U.S. Submarine Veterans of World War II; to the Committee on the Judiciary.

H.R. 1514. A bill to authorize a project for channel deepening for navigation at Gulfport Harbor, Harrison County, Miss.; to the Committee on Public Works and Transportation.

H.R. 1515. A bill to amend the Internal Revenue Code of 1954 to increase from $1 million to $10 million the exemption from industrial development bond treatment for certain small issues; to the Committee on Ways and Means.

H.R. 1516. A bill to amend the Internal Revenue Code of 1954 to avoid duplication of tax imposed under the Federal Insurance Contributions Act and the Federal Unemployment Tax Act in the case of employers of the same employee; to the Committee on Ways and Means.

H.R. 1517. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Commttee on Ways and Means.

H.R. 1518. A bill to amend title II of the Social Security Act to eliminate the 5-month waiting period for disability benefits, to liberalize the earnings test, to permit adopted children to qualify for benefits without regard to time of adoption, to eliminate the reconsideration stage in benefit determinations, to provide for the issuance of duplicate benefit checks where the initial checks are lost or delayed, and to provide for expedited benefit payments to disability beneficaries; to the Committee on Ways and Means.

H.R. 1519. A bill to amend the Public Health Services Act to provide special allowances to certain physicians employed by the United States in order to enhance the recruitment and retention of such physicians; jointly, to the Committees on Interstate and Foreign Commerce, and Post Office and Civil Service.

By Mr. McFALL:

By Mr. McKAY:

H.R. 1521. A bill to increase the amount which is authorized by Public Law 92-287 to be appropriated for the establishment of a metallurgy research center on the Fort Douglas Military Reservation, Utah, in replacement of the facility now located on the

campus of the University of Utah; to the Committee on Interior and Insular Affairs.

By Mr. REUSS:

H.R. 1522. A bill to amend title I of the Housing and Community Development Act of 1974 for the purpose of providing that units of general local government receiving grants under the hold-harmless provisions of such title shall be entitled, after fiscal year 1977, to continue to receive at least the amount to which they are presently entitled under such provisions; to the Committee on Banking, Finance, and Urban Affairs.

H.R. 1523. A bill to extend title II of the Public Works Employment Act of 1976 for five additional quarters; to the Committee on Public Works and Transportation.

H.R. 1524. A bill to amend the Internal Revenue Code of 1954 to provide that the tax-exempt treatment allowed to certain industrial development bonds be restricted to bonds the proceeds of which are to be used within economic development areas, and to allow national banks to underwrite these bonds; to the Committee on Ways and Means.

H.R. 1525. A bill to amend title II of the Social Security Act to provide special cost-of-living increases in benefits thereunder based on local differentials in the cost of food and other necessities (over and above the regular annual cost-of-living increases in such benefits which are provided under present law on a national basis) for individuals residing in high cost cities and other high cost areas; to the Committee on Ways and Means.

By Mr. REUSS (for himself, Mr. SEIBERLING, Mr. MOTTL, and Mr. NEAL):

H.R. 1526. A bill to authorize the Secretary of the Treasury to invest public moneys and for other purposes; jointly, to the Committees on Banking, Finance and Urban Affairs and Ways and Means.

By Mr. RUPPE:

H.R. 1527. A bill to amend the Internal Revenue Code of 1954 to provide a tax credit for investments in certain economically lagging regions; to the Committee on Ways and Means.

By Mr. ST GERMAIN (for himself, and Mr. REUSS):

H.R. 1528. A bill to amend the Federal Credit Union Act in order to improve the efficiency and flexibility of the financial system of the United States by permitting Federal credit unions to operate more efficiently and to better serve the family financial needs of their members; by reorganizing the National Credit Union Administration; by establishing a central liquidity fund for Federal and State credit unions; and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. SEBELIUS:

H.R. 1529. A bill to authorize the Secretary of the Interior to construct, operate, and maintain the Glen Elder unit of the Pick-Sloan Missouri Basin program, Kansas, and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 1530. A bill to amend the Uniform Time Act of 1966 to provide that daylight saving time shall begin on Memorial Day and end on Labor Day of each year; to the Committee on Interstate and Foreign Commerce.

H.R. 1531. A bill to amend chapter 44 of title 18 of the United States Code (respecting firearms) to penalize the use of firearms in the commission of any felony and to increase the penalties in certain related existing provisions; to the committee on the Judiciary.

By Mr. SIMON (for himself and Mr. PERKINS):

H.R. 1532. A bill to amend the Federal Coal Mine Health and Safety Act of 1969 to revise the black lung benefits program established under such act in order to transfer the residual liability for the payment of benefits under such program from the Federal Government to the coal industry, and for other purposes; jointly to the Committees on Education and Labor and Ways and Means.

By Mr. SOLARZ:

H.R. 1533. A bill to amend the Arms Export Control Act to require the President to provide certain information to the Congress with respect to any proposed major arms sales to a country which is not a member of the North Atlantic Treaty Organization and to provide the Congress with 30 days of continuous session in which to disapprove proposed arms sales; to the Committee on International Relations.

H.R. 1534. A bill to amend the Arms Export Control Act to provide the Congress with an opportunity to disapprove proposed transfers from the recipient country to another country of defense articles or related training or other defense services supplied by the United States; to the Committee on International Relations.

By Mr. SOLARZ (for himself, Mr. FISHER, and Mr. KOCH):

H.R. 1535. A bill providing that the United States shall be deemed liable in the case of any judgment levied by any court against any diplomat against whom a recovery of damages is statutorily not allowed; to the Committee on the Judiciary.

H.R. 1536. A bill to establish within the Department of State an Assistant Secretary for Claims Against Foreign Ministers and Diplomats; to award just compensation for such claims; and for other purposes; to the Committee on International Relations.

By Mr. TRAXLER:

H.R. 1537. A bill to amend the National Housing Act to authorize expenditures by the Secretary of Housing and Urban Development for repairs of certain dwellings; to the Committee on Banking, Finance and Urban Affairs.

H.R. 1538. A bill to amend the Regional Rail Reorganization Act of 1973 to provide for the equitable distribution of rail service continuation assistance in the region; to the Committee on Interstate and Foreign Commerce.

H.R. 1539. A bill to provide for the monthly publication of a Consumer Price Index for the Aged and Other Social Security Beneficiaries, which shall be used in the provision of the cost-of-living benefit increases authorized by title II of the Social Security Act; to the Committee on Ways and Means.

H.R. 1540. A bill to amend title II of the Social Security Act to increase to $3,600 the amount of outside earnings which (subject to further increases under the automatic adjustment provisions) is permitted an individual each year without any deductions from benefits thereunder; to the Committee on Ways and Means.

H.R. 1541. A bill to amend title II of the Social Security Act to provide that the automatic cost-of-living increases in benefits which are authorized thereunder may be made on a semiannual basis (rather than only on an annual basis as at present); to the Committee on Ways and Means.

H.R. 1542. A bill to amend title II of the Social Security Act to provide that an individual otherwise eligible may be paid full widow's or widower's insurance benefits at age 55, or reduced widow's or widower's insurance benefits at age 50 (age 45 in case of disability); to the Committee on Ways and Means.

H.R. 1543. A bill to amend title II of the Social Security Act to provide that the remarriage of a widow, widower, or parent shall not terminate his or her entitlement to widow's, widower's, or parent's insurance benefits or reduce the amount thereof; to the Committee on Ways and Means.

H.R. 1544. A bill to amend the Internal Revenue Code of 1954 to exempt farmers from the highway use tax on heavy trucks used for farm purposes; to the Committee on Ways and Means.

H.R. 1545. A bill to amend the Internal Revenue Code of 1954 to increase the amount of the credit for the elderly, and for other purposes; to the Committee on Ways and Means.

H.R. 1546. A bill to establish a program for repairing and replacing unsafe highway bridges; jointly, to the Committees on Public Works and Transportation and Ways and Means.

H.R. 1547. A bill to amend title XVIII of the Social Security Act to include drugs requiring a doctor's prescription among the medical expenses with respect to which payment may be made under the voluntary program of supplementary medical insurance benefits for the aged; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.
